

Environmental Protection

California Environmental Protection Agency programs restore and protect environmental quality, and protect public health. The Secretary coordinates the state's environmental regulatory programs and ensures fair and consistent enforcement of environmental law, which safeguards the state's residents and promotes the state's economic vitality.

3900 Air Resources Board

The Air Resources Board has primary responsibility for protecting air quality in California. This responsibility includes establishing ambient air quality standards for specific pollutants, maintaining a statewide ambient air-monitoring network in conjunction with local air districts, administering air pollution research studies, evaluating standards adopted by the U.S. Environmental Protection Agency, and developing and implementing plans to attain and maintain these standards. These plans include emission limitations for vehicular and other mobile sources and industrial sources established by the Board and local air pollution control districts. The Air Resources Board also has the responsibility, in coordination with the Secretary for Environmental Protection, to develop measures to reduce greenhouse gas emissions to 1990 levels by 2020, pursuant to Chapter 488, Statutes of 2006 (AB 32).

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the Air Resource Board's Capital Outlay Program see "Infrastructure Overview."

PROGRAM DESCRIPTIONS

3500 - MOBILE SOURCE

The Mobile Source Program works to improve air quality by reducing emissions from on- and off-road mobile sources as follows:

 Enforce laws and develop, implement, and enforce regulations limiting criteria pollutants, greenhouse gases, and toxic air contaminants from new and in-use vehicles and other mobile sources and assess the effectiveness of established procedures.

^{*} Dollars in thousands, except in Salary Range. Numbers may not add or match to other statements due to rounding of budget details.

Air Resources Board - Continued 3900

 Develop testing and evaluation procedures for vehicles, engines, emission control components, fuel additives, and test equipment to ensure emission standards are met.

3505 - STATIONARY SOURCE

The Stationary Source Program works with air pollution control districts and business and scientific communities to reduce emissions from stationary sources to comply with state and federal laws as follows:

- Develop, implement, and enforce measures for reducing emissions from stationary and other sources as required by the California Clean Air Act and work with local air pollution control districts to achieve and maintain state and federal ambient air quality standards.
- Identify substances that are toxic air contaminants and develop, implement, and enforce measures to control toxic air contaminant emissions from stationary sources.

3510 - CLIMATE CHANGE

The Climate Change Program works to reduce greenhouse gas emissions to 1990 levels by 2020, and further reduce

- emissions to 80 percent of 1990 levels by 2050, as follows:

 Develop, implement, and enforce measures for reducing greenhouse gas emissions, including emissions from mobile and stationary sources, as required by the California Global Warming Solutions Act of 2006 (AB 32, Chapter 488, Statutes of 2006).
- Enforce laws and develop, implement, and enforce regulations to achieve the required greenhouse gas emission reductions and other requirements of AB 32.
- Develop, implement, and oversee programs to achieve greenhouse gas emission reductions, including grant, loan, and other incentive programs.

3515 - SUBVENTION

The Air Resources Board provides subventions to local air pollution control districts to encourage and support effective district programs. The state's 35 local air pollution control districts have primary responsibility for controlling stationary sources of air pollution in California.

INFRASTRUCTURE OVERVIEW

Air Resources Board has 61 sites statewide. One site is state-owned and the remaining 60 sites are leased. Of these leased sites, 43 support air-monitoring stations and 17 sites support an array of vehicle testing, research, planning, enforcement, chemical laboratory, support services, and administrative needs; one of the support sites is also equipped with an air-monitoring station. These sites serve a multitude of programs the Air Resources Board oversees to support its statutory authority to attain and maintain healthy air quality, reduce the public's exposure to toxic air pollutants, conduct research into the causes of and solutions to air pollution, and support the Air Resources Board leadership role related to greenhouse gas reduction and climate change.

3930 Department of Pesticide Regulation

The Department of Pesticide Regulation protects public health and the environment by regulating pesticide sales and use and fostering reduced-risk pest management. The Department ensures compliance with pesticide laws and regulations through its oversight of County Agricultural Commissioners, who enforce pesticide laws and regulations at the local level.

^{*} Dollars in thousands, except in Salary Range. Numbers may not add or match to other statements due to rounding of budget details.

PROGRAM DESCRIPTIONS

3540 - PESTICIDE PROGRAMS

The Pesticide Program protects California residents and the environment from adverse pesticide impacts with particular emphasis on the protection of children, vulnerable populations, and communities. Specific activities include:

- Scientific evaluation of whether to register pesticide products for sale or use in California.
- Assessing human health and environmental (air, water quality, and wildlife) risks from pesticides.
- Examination, licensing, and certification of individuals and businesses that recommend, perform, or supervise pest control.
- Collecting pesticide use data and evaluating use trends.
- Monitoring pesticide residues in fresh produce, air, and water, as well as occupational settings.
- Protecting surface and groundwater from pesticide movement through evaluation, prevention, and mitigation. Protecting non-target wildlife from pesticide risks.

 Reevaluating and mitigating human health and environmental hazards from pesticides.

- Overseeing local enforcement of pesticide laws and regulations by County Agricultural Commissioners.

 Ensuring standard and supposition of pesticide laws and regulations by County Agricultural Commissioners.

 Ensuring standard position of pesticide laws and regulations by County Agricultural Commissioners. standards, and that sellers comply with mill assessment responsibilities.
- Promoting the development and adoption of reduced risk pest management practices through outreach, incentives, and grants.

3940 State Water Resources Control Board

The State Water Resources Control Board and the nine Regional Water Quality Control Boards preserve, enhance, and restore the quality of California's water resources and ensure proper allocation and effective use. These objectives are achieved through the Water Quality, Water Rights, and Drinking Water programs.

PROGRAM DESCRIPTIONS

3560 - WATER QUALITY

This program ensures the highest possible quality of water for the state. Specific activities include the following:

Formulating, adopting, and updating water quality control plans and policies that set standards and provide guidance in water management decisions.

 Monitoring water quality to determine compliance with control plans, permit terms, conditions, and water standards; implement the Total Maximum Daily Load program to address pollution in the state's most seriously impaired water bodies by developing plans that allocate responsibility for reducing pollution.

^{*} Dollars in thousands, except in Salary Range. Numbers may not add or match to other statements due to rounding of budget details.

State Water Resources Control Board - Continued 3940

- Ensuring the waters of the state are not degraded by hazardous waste spills or tank leaks, or by spills or tank leaks from solid and hazardous waste treatment, storage, and disposal facilities.
- Requiring waste dischargers, including storm water dischargers, to prevent and abate water pollution and inspect dischargers to determine compliance with requirements.
- Assisting owners and operators of underground tanks in financing the cleanup of unauthorized releases from their tanks. Administering financial assistance programs, that include loan and grant funding for construction of municipal sewage facilities, drinking water systems, water recycling facilities, watershed protection projects, and nonpoint source pollution control projects.

3565 - DRINKING WATER QUALITY

The Drinking Water Program works to protect and improve the health of all California residents by ensuring the safety of drinking water. This program is responsible for enforcing the state and federal Safe Drinking Water Acts, adopting drinking water standards, and enforcing compliance with drinking water standards. The program also establishes criteria for water recycling projects; supports and promotes water system security; provides support for improving technical, managerial, and financial capacity of public water systems; certifies laboratories that analyze environmental samples for regulatory purposes; and maintains a registry of certified water treatment devices.

3570 - WATER RIGHTS

The Water Rights Program ensures that California's water resources are put to beneficial use, while protecting prior rights, water quality, and the environment. Specific activities include:

- Allocating the unappropriated waters of the state to ensure water is used in accordance with state laws.
- Maintaining a record of title of appropriative water rights initiated and maintained since 1914, including those for stockponds, livestock, and small irrigation and domestic use ponds.
- Maintaining records of water diversion and use under riparian and pre-1914 rights and groundwater extractions in four southern counties.
- Enforcing permit and license terms and conditions, abate illegal diversions, protect public trust resources, and prevent waste or unreasonable use under all rights.
- Assisting the courts in determining existing rights to surface water throughout the state through court reference and statutory adjudication proceedings, and in determining rights to groundwater through the groundwater adjudication process.

3575 - DEPT OF JUSTICE LEGAL SERVICES

This Program includes Department of Justice legal services to support the Water Boards in judicial proceedings related to the Water Boards' authorities.

9900 - ADMINISTRATION

This program includes management, program and policy direction, budgeting, accounting, human resources, data processing, legislation, public information functions for agency programs, and coordinating with the nine Regional Water Quality Control Boards.

3960 Department of Toxic Substances Control

The Department of Toxic Substances Control protects the people of California and the environment from the harmful effects of toxic substances by restoring contaminated resources, enforcing hazardous waste laws, reducing hazardous waste generation, and encouraging the manufacture of chemically-safer products.

Department programs drive the need for infrastructure investment. Thus, each department has a related capital outlay program to support this need. For the specifics on the Department of Toxic Substances Control's Capital Outlay Program, see "Infrastructure Overview."

PROGRAM DESCRIPTIONS

3620 - SITE MITIGATION AND BROWNFIELDS REUSE

The Site Mitigation and Brownfields Reuse program implements the state's laws regarding site cleanup and the federal Superfund program. The program currently oversees approximately 1,170 hazardous substance release site investigations and cleanups, and monitors long-term operations and maintenance activities at more than 470 sites where the cleanup process is complete. Additionally, the program is responsible for ensuring compliance with the terms of approximately 820 land-use restrictions in place on properties throughout the state.

New sites are identified through surveillance and enforcement efforts, emergency response activities, examination of other previously-identified potential sites, and public and private entities that voluntarily request that the Department take action to return local properties to productive use. These sites and projects include cleaning up federal and state Superfund properties, abandoned mines, other abandoned and underutilized properties known as "brownfields," and both active and closed military installations.

The program oversees environmental assessments and the clean-up of proposed new or expanding school sites to prevent or reduce exposing students and staff to hazardous substances. The program is also responsible for the Stringfellow Hazardous Waste Site, a former hazardous waste disposal site and federal Superfund Site.

The program works closely with other state agencies, the United States Environmental Protection Agency, and local agencies throughout the state to establish and implement viable grant and loan programs to aid in the assessment and clean-up of brownfields sites.

The program works with the California Emergency Management Agency and other state agencies to assure response readiness for acts of terrorism involving the use of toxic chemicals. Additionally, the program mitigates off-highway hazardous waste spills and responds to hazardous waste contamination resulting from illegal drug laboratories.

3625 - HAZARDOUS WASTE MANAGEMENT

The Hazardous Waste Management program regulates the generation, storage, transportation, treatment, and disposal of hazardous waste to minimize risks to public health and the environment. The program oversees permitting and compliance at 119 authorized facilities that manage hazardous waste, approximately 900 registered businesses that transport hazardous waste, and approximately 300 facilities/generators that are subject to corrective actions. Additionally, the program manages approximately \$2.2 billion in financial assurance resources, and supports and oversees local agencies implementing the hazardous waste elements of the Unified Program.

The program monitors hazardous waste transfer, storage, treatment, and disposal facilities for illegal activity, including electronic manifest surveillance and monitoring of registered hazardous waste transporters; enforcement of hazardous waste requirement violations found through routine inspections; complaint intake, triage, and investigations; and other focused enforcement initiatives. The program also ensures compliance with hazardous waste requirements related to electronic waste and used oil.

3630 - SAFER CONSUMER PRODUCTS

The Safer Consumer Products (SCP) program strives to get manufacturers to reduce human and environmental exposure to toxic chemicals. SCP calls for industry to develop safer consumer products and use pollution prevention best practices. The program implements the SCP regulations. SCP also collects information on the presence of toxic chemicals in products in order to identify Priority Products for possible regulation; provides support and guidance to Priority Product manufacturers for the analysis of safer alternatives; and issues regulatory responses to proposed alternatives. The program encourages the adoption of "green chemistry" practices.

Pollution Prevention responsibilities are to promote compliance with legislative mandates regarding consumer product chemical safety. The program supports adoption of focused business sector pollution prevention strategies; supports local green business initiatives; and helps the regulated community comply with laws and regulations.

This program, in conjunction with the Department of Public Health and the Office of Environmental Health Hazard Assessment, also implements the California Environmental Contaminant Biomonitoring Program. DTSC's Environmental Chemistry Laboratory (ECL) is charged with measuring both targeted and new chemicals in blood and urine. Ongoing activities include measuring these chemicals in studies of vulnerable populations, including mothers and their newborns,

^{*} Dollars in thousands, except in Salary Range. Numbers may not add or match to other statements due to rounding of budget details.

EP 52 ENVIRONMENTAL PROTECTION

3960 Department of Toxic Substances Control - Continued

older women, firefighters, and families with childhood leukemia. Additionally, ECL is continuously developing new methods to identify and measure chemicals of emerging concern, including newer flame retardants and other substitutes and alternatives for restricted/banned toxic chemicals. The SCP program will rely on biomonitoring results for implementation of its three-year Priority Products Work Plan. Biomonitoring evidence has been called out in the Work Plan as a priority screening tool for identification of product-chemical combinations warranting consideration of safer alternatives.

3635 - STATE AS CERTIFIED UNIFIED PROGRAM AGENCY

The California Environmental Protection Agency designated the Department of Toxic Substances Control as the Certified Unified Program Agency (CUPA) in Trinity and Imperial Counties. As the CUPA, the Department is responsible for implementing the six elements of the Unified Program: hazardous waste generator and onsite treatment activities; spill-prevention control and countermeasure plans for owners of aboveground petroleum storage tanks; underground storage tank program; hazardous material release response plans and inventories; California Accidental Release Prevention program; and certain Uniform Fire Code requirements pertaining to hazardous material management plans and inventories.

9900 - ADMINISTRATION

The Administration program provides accounting, budgeting, revenue collection, human resource and workforce management, data processing, performance management, business services, and other administrative support to departmental programs. Administration also supports operations in Sacramento, Clovis, Berkeley, Chatsworth, Cypress, San Diego, and El Centro, including two environmental chemistry laboratories located in northern and southern California.

INFRASTRUCTURE OVERVIEW

The Department of Toxic Substances Control (DTSC) operates the state-owned Stringfellow Pretreatment Plant site in Riverside County. The Stringfellow Pretreatment Plant site includes groundwater monitoring and extraction wells and three treatment facilities used to filter and clean the contaminated groundwater. The DTSC also leases ten facilities (450,405 square feet) throughout California that include space for offices, specialized fieldwork, sample and field equipment storage, two environmental chemistry laboratories, and an information center for the Stringfellow Pretreatment Plant site.

3970 Department of Resources Recycling and Recovery

The Department of Resources Recycling and Recovery (CalRecycle) protects public health, safety, and the environment by regulating solid waste facilities, including landfills, and promoting recycling of a variety of materials, including organics, beverage containers, electronic waste, waste tires, used oil, and other materials. CalRecycle also promotes the following waste management and recycling practices: (1) source reduction, (2) recycling and composting, and (3) reuse. Additional departmental activities include research, permitting, inspection, enforcement, public awareness, education, market development to promote recycling industries, and technical assistance to local agencies. Lastly, CalRecycle administers the Education and the Environment Initiative (EEI), a statewide effort promoting environmental education in California.

PROGRAM DESCRIPTIONS

3700 - Waste Reduction and Management

The objectives of the Waste Reduction and Management Program include:

- Ensuring all nonhazardous solid waste is stored, collected, processed, and disposed in a safe and environmentally sound manner.
- Participating in development and maintenance of local solid waste management plans describing how each city and county will reduce solid waste disposed to achieve at minimum a 50 percent diversion of waste from landfills.
- Developing programs and policies to support the policy goal that not less than 75 percent of solid waste generated be source reduced, recycled, or composted by the year 2020.

^{*} Dollars in thousands, except in Salary Range. Numbers may not add or match to other statements due to rounding of budget details.

3970 Department of Resources Recycling and Recovery - Continued

- Cleaning up solid waste disposal sites when the responsible party either cannot be identified or is unable or unwilling to pay for timely remediation, and where cleanup is needed to protect public health and safety, or the environment.
 Reducing the amount of waste generated and promoting composting, recycling, and use of recycled materials in
- Reducing the amount of waste generated and promoting composting, recycling, and use of recycled materials in manufacturing processes.
- Reducing the number of tires placed in landfills, illegally dumped, or stockpiled while promoting technologies turning
 waste tires into useful products.

Reducing the amount of improperly disposed used oil and promoting used oil recycling.

Reducing electronic waste by providing safe and convenient collection and recycling of specified electronic equipment.

3710 - Education and the Environment Initiative

In cooperation with the State Department of Education and the State Board of Education, the Office of Education and the Environment develops and implements a unified education strategy for educating pupils, faculty, and administrators on the importance of integrating environmental concepts and programs for elementary and secondary schools. The EEI vision encourages responsible stewardship of the Earth, advances tomorrow's leaders in a changing economy, and positively impacts the lives of students, families, schools, communities, and California.

3715 - Beverage Container Recycling and Litter Reduction

CalRecycle administers the Beverage Container Recycling and Litter Reduction program with a goal of achieving an 80-percent recycling rate for glass, aluminum, and plastic beverage containers sold in California. To achieve this goal, the Division of Recycling ensures the following: (1) the California Redemption Value (CRV) is paid by beverage distributors for each beverage sold in California; (2) consumers are refunded CRV for recycled beverage containers; (3) recycling centers are conveniently located; (4) grants are made to encourage recycling and development of markets for recycled materials; (5) strong oversight and enforcement programs are in place to protect the integrity of the Beverage Container Recycling Fund; and (6) public outreach and private partnerships are promoted.

3980 Office of Environmental Health Hazard Assessment

The Office of Environmental Health Hazard Assessment protects and enhances public health and the environment through objective scientific evaluation of risks posed by hazardous substances. The Office performs risk assessments for various regulatory programs under the California Environmental Protection Agency, as well as other state and local agencies, and provides these programs with the scientific tools and information upon which to base risk management decisions. Distinct programs focus on assessing health risks, including risks to children and other sensitive subpopulations, from exposure to chemicals in air, drinking water, food, pesticides, consumer products, hazardous and municipal waste facilities, fish and shellfish, and sediments in bay and estuarine waters. The Office also evaluates community pollution burdens and vulnerabilities.

PROGRAM DESCRIPTIONS

3730 - HEALTH RISK ASSESSMENT

The Health Risk Assessment program provides tools forming the basis for a scientific approach to assessing both health and environmental risks across all environmental exposure sources. The program identifies chemicals with potential to cause adverse health effects; quantifies risks and recommends health-based goals and standards; develops scientific policies and guidelines for hazard identification and risk assessment; and provides medical, scientific, and public health support, consultation, and training to state regulators, local governmental agencies, and the public. The program also evaluates community pollution burdens and vulnerabilities. This program pays particular attention to protecting the health of infants and children.
