

Past Year Fund Reconciliation

When past year actuals are provided by departmental accounting offices to departmental budget staff, a reconciliation between accounting and budgeting must be completed. This training aid provides background and instructions for budget staff submitting past year fund reconciliation documents to their Finance Budget Analyst.

Fund Classifications

In budgeting we categorize funds into five different classifications generally based on the fund's revenue source; General Fund, Special Fund, Bond Fund, Federal Fund, and Nongovernmental Cost Fund.

General Fund (G): Used to account for revenues not specifically designated to be accounted for by any other fund. Primary sources of revenue are personal income tax, sales tax, and corporation tax.

Special Funds (S): Used to account for taxes, licenses, and fees that are restricted by law for particular activities of government.

Bond Funds (B): Used to account for proceeds of general obligation (non-self liquidating) bond authorizations.

Nongovernmental Cost Funds (N): Used to account for revenues from sources other than general or special taxes, licenses, fees, or other state revenues (excluding bond proceeds and federal receipts).

Federal Funds (F): Used to account for all monies received from an agency of the federal government.

All special funds along with a select few federal, bond, and other non-governmental cost funds are displayed in the fund administrators' budget galley, Fund Condition Statement section. The FCS section includes a detailed breakdown of all revenue and expenditure fund information and allows readers to see how all the financial information ties together.

Matching vs. Reconciling

The goal of the past year fund reconciliation process is to tie budgeting and accounting fund balances. This does not however mean matching between the two. It is our duty to the State to provide the most accurate information possible to allow for elected officials to make informed budgeting decisions.

Matching: Two numbers are the same. Do not force them to match if they don't, we need to understand which one is correct and why.

Reconciled: Explaining any differences between two numbers and providing the best number to Finance to make the best recommendations on budget issues.

On accounting documents you will notice every dollar and cent is included, for budgeting we round everything to the nearest thousand "000". As such variances between the two will occur, which is why we allow for a variance of up to \$5,000 without a written explanation. Any amount over the \$5,000 threshold will require a reconciliation explanation.

Past Year Fund Reconciliation Package

A complete fund reconciliation package consists of a DF-117, DF-303 or DF-304, a Fund Condition Statement if applicable, and all backup accounting documents.

DF-117: A Certification of Past and Prior Year Information, signed by the Department Director or equivalent and may be designate one level down such as to a Chief Deputy Director. A digital signature is acceptable.

DF-303 (Accounting Document): A fully annotated Detailed Fund Balance report for funds that will have a Fund Condition Statement in the Governor's Budget galley.

DF-304 (Accounting Document): A Past Year Expenditure Reconciliation report submitted for all other funds with expenditure activity that do not have a Fund Condition Statement in the Governor's Budget galley.

FCS (Budgeting Document): A Fund Condition Statement, if applicable, with an adjusted beginning and ending balance that ties to the DF-303 rounded to thousands.

Backup accounting documents include but are not limited the Report 4, 6, 9, and 15. It is expected these Year End Reports be fully annotated by department accounting staff to allow budgeting to tie between them and the DF-303.

All past year fund reconciliation forms (DF-117, DF-303, DF-304, and FCS) can be located on Finances website, directly link below:

<https://dof.ca.gov/accounting/accounting-policies-and-procedures/accounting-policies-and-procedures-fund-reconciliation/>

Roles and Responsibilities

Departments are responsible for preparing the past year fund reconciliation package. It is crucial that departmental accounting and departmental budgeting staff coordinate with each other.

Department accounting staff are responsible for preparing fully annotated DF-303 or DF-304 documents and for providing all relevant backup accounting reports also fully annotated.

Department budgeting staff are responsible for preparing fully annotated Fund Condition Statements and submitting the past year fund reconciliation package as a whole to Finance.

Finance is responsible for reviewing past year fund packages, and are instructed to return any fund package to the department if it is incomplete or if corrections are necessary. Finance's central units are responsible for providing central technical instructions.

Information provided to Finance is subject to audit. If an audit does occur, the cost will be funded by the department's existing spending authority.

Shared Fund vs. Non-Shared Fund

It is important that a few distinctions be made between the roles and responsibilities of shared funds and non-shared funds along with fund administrators and fund users. It is critical that fund users and administrators coordinate amongst themselves in order to produce a successfully reconciled fund.

Fund Administrator: The fund administrator is the designated department responsible for the collecting, reviewing, reconciling and submitting a DF-117, a consolidated DF-303, and Fund Condition Statement to Finance.

Fund User: The fund user is a department that spends, collects revenue, or transfers cash to a fund that their department does not administer. Fund users are responsible for reconciling their portion of the prior year adjustment, past year revenues, expenditures, and transfers between their Year End accounting documents and their DF-303. Users will review, prepare and submit a DF-303 report along with supporting reports and certification to the fund administrator by the date established by the fund administrator.

Non-Shared Fund: Funds that have are only used by the fund administrator for expenditures, revenues, or transfers. The fund administrator is solely responsible for submittal of the past year fund reconciliation package.

Shared Fund: Funds that have one or more fund users that either have expenditures, revenues, or transfers. A shared fund reconciliation package will include DF-303 reports from each department along with a consolidated DF-303 and Fund Condition Statement report prepared by the fund administrator.

General Fund Past Year Reconciliation

Finance is responsible for reconciling past year expenditures and revenues for the General Fund between Finance (budgeting) and SCO (accounting), similar to the role of a fund administrator.

Past year expenditure and past year revenue amounts reported to Finance from departments must be reconciled by departments to amounts reported to the SCO in the year-end financial statements, similar to the role of a fund user.

After submittal of past year updates by departments, no changes to the General Fund may be made without prior approval from Finance.

Departments may be contacted by their Finance analyst for further clarification and assistance if there are material differences between Finance and SCO.

Fund Condition Statement Components

The fund condition statement is broken into two sections, Fund Resources and Fund Expenditures.

Fund Resources include: Beginning Balance, Prior Year Adjustment, Adjusted Beginning Balance, Revenues, Transfers, and Loans.

The Beginning Balance is always equal to the ending balance for past year as displayed in the Enacted Budget Galley. If adjustments are needed to years prior to past year, they should be incorporated into the Prior Year Adjustment. The Adjusted Beginning Balance should match between the DF-303 and the FCS.

	PY	CY	BY
0181 Registered Nurse Education Fund^s			
BEGINNING BALANCE	\$1,016	\$1,259	\$1,245
Prior year adjustments	147	-	-
Adjusted Beginning Balance	\$1,163	\$1,259	\$1,245
REVENUES, TRANSFERS AND OTHER ADJUSTMENTS			
Revenues:			
4129200 Other Regulatory Fees	692	633	633
License Renewal Fees	(432)	(450)	(450)
New License Fees	(260)	(183)	(183)
4163000 Investment Income - Surplus Money Investments	109	95	95
4151000 Interest Income - Other Loans	32	20	20
4171400 Escheat - Unclaimed Checks, Warrants, Bonds, and Coupons	2	-	-
Transfers and Other Adjustments:			
6540000 General Fund Per Item 4140-002-0181, Budget Act of 20XX	-	-	-800
Total Revenues, Transfers and Other Adjustments	\$835	\$748	-\$52
Total Resources	\$1,998	\$2,007	\$1,193

Fund Expenditures include: Expenditures and Expenditure Transfers, Statewide Adjustments, the Ending Fund Balance.

The ultimate goal of past year fund reconciliation is to have the Ending Balance tie between the DF-303 and the FCS. It's more important the accounting and budgeting can reconcile ending fund balances than any other section.

Expenditure amounts reflect the amounts posted in Hyperion at the point in time the FCS is generated.	EXPENDITURES AND EXPENDITURE ADJUSTMENTS			
	Expenditures:			
	4140 Office of Statewide Health Planning-Development (State Operations)	739	762	737
		-----	-----	-----
Total Expenditures and Expenditure Adjustments equal the total of all Hyperion records at that point in time for the fund.	Total Expenditures and Expenditure Adjustments	\$739	\$762	\$737
		=====	=====	=====
	FUND BALANCE	\$1,259	\$1,245	\$456
	Reserve for economic uncertainties	1,259	1,245	456
Other designations (reserves) of Fund Balance can be added by providing that information on the FCS document BY submitting the information to Finance.				

Prior Year Adjustments

Prior year adjustments are made to record the difference between previous accruals (including encumbrances) and actual expenditures, transfers, or revenues for years prior to past year. This can also include adjustments to statewide assessments.

A prior year adjustment will include all activity that occurred in years prior to the current past year. Below is an example of how a prior year adjustment is calculated:

The first column, 2023-24 Last Estimates, represents past year estimated amounts reported at Budget Act in a department's enacted budget galley. The second column, 2023-24 Actuals, represents the actual expenditure amounts reported by accounting after closing out the fiscal year. The third column 2024-25 represents the current past year which will display in the department's Governor's Budget galley.

For the example below in the first column an estimated expenditure amount of 13 was published at enactment. The 13 included accruals and other estimations. In the second column accounting reported an actual expenditure amount of 5, causing a difference between the ending fund balance reported at enactment and the actual fund balance reported after year-end closing. In order to transparently update the beginning balance to reflect actuals the difference will be added as a Prior Year Adjustment.

Tying Accounting to Budgeting

The FCS produced by a department's budget office and the DF-303 populated by departmental accounting should tie for the Adjusted Beginning Balance, Total Resources, Total Expenditures, and most importantly Ending Fund Balance. The beginning balances may be different, but the adjusted beginning balances should match. Below are examples of an FCS, DF-303, and backup accounting reports that are fully annotated.

Below is an example of a FCS that has been annotated. Annotations should be numbered and tie to the DF-303 and the backup accounting documents. This will allow for a smoother fund reconciliation process and far less confusing dialogue between finance staff, departmental budget staff, and departmental accounting staff. Note the "#1" circled on the FCS ties to the "1" placed in the reference column of the DF-303 on the next page.

The Detailed Fund Balance Report (DF-303) is an accounting reconciliation document that displays past year actuals for a fund. The DF-303 should tie to the Year End backup reports and should be clearly annotated.

Below is an example of a DF-303 that has been annotated, annotations should be numbered and tie to the FCS and the backup accounting documents. Note that the "8" entered into the Ref # column next to "80,044,419.50" ties to the sum of the values annotated with a circled "#8" on the FCS above.
