The Housing Related Entities can use their proceeds to preserve, upgrade and expand the supply of affordable housing in the 90032 zip code.

The proposed regulation does not impose direct restrictions or reporting requirements on individual businesses that would result in a financial burden. Individual business may indirectly bear a financial burden through changes in disposable incomes.

The regulations state that the Affordable Housing Trust Account will be used for the financing of multifamily developments or the purchase of loans to effectuate the purposes of the Roberti Act. The Housing Related Entities can use their proceeds to preserve, upgrade and expand the supply of affordable housing in the 90032 zip code.

3. Description of all costs and all benefits due to the proposed regulatory change (calculated on an annual basis from estimated date of filing with the Secretary of State through 12 months after the estimated date the proposed major regulation will be fully implemented as estimated by the agency).

Costs:
- The total costs for the Regulation for the thirty year analysis period is estimated to be $900 million dollars. This includes:
  - Maintenance services are estimated to cost $12.6 million. The property management staff is estimated to cost approximately $1.9 million in 15/16, reducing to $375,000 in 2021. The total cost is approximately $8 million.
  - To sell the properties, it is estimated at $1.6 million in 15/16 increasing to $3.8 million in 18/19. The total cost is estimated to be $17 million.
  - The relocation assistance paid to individuals is estimated to be $2.5 million. The 24% non-exempt state pays to LA County drops from $1.3 million in 15/16 to $375,000 in 20/21. The total cost is estimated to be $3.7 million.
  - Mortgage payments and property taxes for 30 years are estimated to be $800 million.
  - The total rent paid by individuals is estimated to be $15.6 million. The closing costs paid by buyers is estimated to be $3700 per property (Zillow), this is approximately $1.8 million for the analysis period.

Benefits:
- For the thirty year analysis period, the total statewide benefit is estimated to be $500 million. Included in this total is:
  - Property sales paid to the state are estimated to be $225 million. Total rent paid to the CA General Fund is estimated to be $15.6 million.
  - Disposable income for individuals is estimated to be $2 million. Relocation assistance to individuals is estimated to be $2.5 million.
  - Maintenance services paid to the locals and others is $12.6 million. Salaries paid to property management and sales employees is $24 million. CalHFA's Affordable Housing Trust Account is estimated to receive $78 million. The Housing Related Entities are estimated to receive $20 million and the affordable property owners are expected to receive $85 million in equity and appreciation.

4. Description of the 12-month period in which the agency estimates the economic impact of the proposed major regulation will exceed $50 million.

This analysis assumes 410 Roberti properties will be sold, (complete close of escrow), during the five years beginning in the 15/16 fiscal year. The benefits are calculated as shown below:

<table>
<thead>
<tr>
<th>Fiscal Year</th>

<tr>
<td>19/20</td>
<td>$74 million</td>
</tr>
</tbody>
</table>
5. Description of the agency's baseline:

Without the proposed ASP Regulation, the properties would not be sold, and the properties would continue to be rented as they are today. The baseline is based on the Bureau of State Audits 2011-12, August, 2012, (2012 Audit) in addition to information obtained from the Division of Right of Way.

The total annual stated value benefit for the baseline period is $13.5 million and the statewide cost is $15.5 million. See chart labeled BASELINE (w/o Regulations) in SRIA.

Per 2012 Audit and Division of Right of Way,

- 450 total properties, 412 will be sold according to the Affordable Sales Regulations. 398 single family residences and multifamily residence are owned by Caltrans, most are rented; 14 are either unimproved or have no tenant
- CA General Fund received $4.8 million/year in rent;
- LA County (24%) received $1.15 million/year;
- DGS and private contractors received $5.5 million/year to make repairs;
- CT support costs for property management = $2 million;
- Other assumptions described above were applied. Sales of 41 multifamily units

6. For each alternative that the agency considered (including those provided by the public or another governmental agency), please describe:

a. All costs and all benefits of the alternative
b. The reason for rejecting alternative

The first alternative assumes the same conditions for the first five years: that 100 properties are sold at an affordable price, 41 multifamily homes are sold at a reasonable price, 25% of the remaining properties that are sold at FMV, will be purchased by the Housing Related Entities at a reasonable price and sold to the current tenant at a FMV and 25% of the single family homes purchased by the HRE's will be sold. The subsequent 25 years assume that 50 of the 100 affordable properties sell, and 25% of the remaining properties sell.

Cost and Benefit: The total benefit for Alternative 1 in the 30 year analysis period is $45 million and the total cost is $82.5 million.

Reason for Rejecting This alternative only assumes half the affordable properties sell, reducing the benefit to the Affordable Housing Trust Account and the affordable property owners.

The second alternative assumes the same conditions for the first five years: that 100 properties are sold at an affordable price, 41 multifamily homes are sold at a reasonable price, 25% of the remaining properties that are sold at FMV, will be purchased by the Housing Related Entities at a reasonable price and sold to the current tenant at FMV and 25% of the single family homes purchased by the HRE's will be sold. For the subsequent 25 years, alternative 2 assumes the following:

- All costs and all benefits of the alternative will be sold to public or private housing authorities at FMV and 25% of the single family homes purchased by the HRE's will be sold. For the subsequent 25 years, alternative 2 assumes the following:

Costs and Benefits:

The total 30 year benefit for Alternative 2 is $45 million and the 30 year cost is estimated to be $1 billion.

Reason for Rejecting This alternative reduces the benefit to the affordable property owners because it assumes they sell as soon as they reach 100% of the appreciation but before they get the gains from the 5% increase in property values per year. The cost is higher because it is assumed all the properties sell and the mortgage and property tax are based on the higher values.

7. A description of the methods by which the agency sought public input. (Please include documentation of that public outreach).

Caltrans held two public workshops, on October 22, 2013 and October 24, 2013, to gather input to address the issues deemed most important to the public. Caltrans held the public workshops in El Sereno and Pasadena to receive comments from current tenants, former tenants, and the general public. These comments were reviewed, evaluated, and, as Caltrans deemed appropriate, incorporated into the proposed regulations. Caltrans held three public hearings on July 15, 2014, July 17, 2014, and August 21, 2104 to take under submission all written and oral statements submitted or made during these hearings. As required by the Administrative Procedures Act, the text of the proposed regulations, Initial Statement of Reasons, Notice of Proposed Rulemaking and Extension Notices are posted to the internet here:

http://www.dot.ca.gov/regulations.htm

News releases were distributed on May 30, 2014 announcing the public written comment period open as of that date through 5:00 p.m. on July 14, 2014. On July 14, 2014 a news release was posted notifying of the extension of the written public comment period to 5:00 p.m. September 2, 2104. Two more public hearings are scheduled April 20 and 21, 2105.

- Ads were posted in (3) newspapers to increase public awareness of the proposed regulations, written comment period and public hearings.
- May 29, 2014, Caltrans mailed a package to all tenants and other interested parties which included an Information Notice regarding the property sales for the SR 710 Corridor and the text of the proposed regulations.
- July 14, 2014, the notice of extension of the written public comment period to July 31, 2014 was mailed to all tenants and interested parties.
- July 30, 2014 the (second) notice of extension of the written public comment period notice to September 2, 2104 was mailed to all tenants and interested parties.
- Feb 27, 2015, Caltrans mailed a package to all tenants and other interested parties which included an Information Notice regarding the property sales for the SR 710 Corridor and the text of the proposed regulations.

8. A description of the economic impact method and approach (including the underlying assumptions used and the basis for those assumptions).

The economic impact assessment was derived using regional economic multipliers (REM) and Type II Output to estimate employment, output and value added from changes in disposable income due to the sale of surplus parcels of residential real property owned by Caltrans. Actual, static, time-related economic impacts from sales were evaluated using an urban-based model to the TREDIS Transportation Economic Impact Model, providing employment, output and value added effects. Changes in disposable incomes result from the purchase of properties at affordable price occupied by the current tenant, and the difference between the rent paid by the occupants and the estimated mortgage payments after purchase. It also includes differences in estimated housing costs necessary to rent FMV parcels and the estimated qualifying income required to purchase the same parcel at FMV. Historically, Caltrans has rented the parcels, including parcels that we estimate would sell for an affordable or reasonable price, well below comparable rates in the surrounding area. The assumptions used to compute the economic impact assessment and the rationale and basis are in the proposed regulations.

9. A list of the assumptions used to complete the economic impact usemenent and the rationale and basis. Change In disposable income from the purchase of properties at an Affordable Price:

- 100 Single family parcels would be sold at an affordable price to existing tenants.
- 41 multifamily parcels and 8 single family parcels would be sold to public and/or housing authorities at a reasonable price.
- Existing rent is based on the average rent paid as described in the California State Auditor, August 2012 Report.
- Rent was adjusted to reflect the Affordable, Reasonable and FMV prices and the average rent established from the California State Auditor, August 2012 Report. Values for properties purchased at Affordable and at FMV prices were determined by the 2012 Audit.
- The 2012 Audit states that the affordable price will be approximately 17% of FMV. The Reasonable Price of 50% of FMV was based on advice and expertise from Right of Way.
- The Bureau of Labor Statistics reports the average household in L.A. County spends 37% of its income on housing.
- Mortgage terms used to establish average mortgage payment: 50 conventional, 10% down payment at 4% interest.
- The number of Affordable, Reasonable and FMV parcel sold each year was estimated using the 5 year property sale analysis period.
- Rent to existing tenants was escalated 3% annually. Values of parcels were escalated 10% per year from 2012-204 based on "Tulsa" and "Claw" and then 9% each year.
- Mortgage payments were escalated 2% each year to reflect increased property tax payments.
- Change in disposable income from the purchase of FMV parcels: Assumptions: 25% of FMV parcels would be purchased by existing tenants and 75% would be purchased by non-tenants. Estimated household income from all non-tenants purchasing would fully displace estimated household incomes from previous tenants. All other assumptions described above were applied. Sales of 41 multifamily units were excluded from this analysis because it is assumed that affordable housing developments would purchase these units, renting them to qualifying households with low and moderate incomes. Caltrans does not expect a significant change in household income from the sale of these parcels.

The economic impact assessment was carried out six years in accordance with the SRIA analysis period.
