MANUAL OF STATE FUNDS

PREFACE

Introduction

The Manual of State Funds was originally prepared and distributed by the Department of Finance (Finance) in 1957. The manual was primarily for the use of Finance staff; however, other departments and agencies found that the information was useful and requested copies. Finance no longer provides a hard copy version of this manual because it has become so extensive. The manual is now available only at this location on the Internet.

This manual contains descriptions for all funds listed in the Uniform Codes Manual (UCM), which is another publication maintained by Finance. In the UCM, funds are presented alphabetically, numerically, by source classification, and by generally accepted accounting principles (GAAP) classification.

The description shown for each fund is brief, but provides the most significant information pertaining to the fund. Each fund description provides the administering agency and organization code, authority that created the fund, legal title, purpose, appropriation authority, fund classification, major revenue source, State Appropriations Limit code, historical information, date the fund may be abolished, if any, and disposition of any balance remaining in the fund upon abolishment. If more information is needed, refer to the specific legal citation or authority identified in the fund write-up.

Any fund that currently has any budgetary or accounting activity is shown in this manual. Once a fund is abolished, a letter "a" is added at the end of the fund number.

Fund Accounting

The administering agency of a fund usually maintains the general accounting records and related budgetary accounts for the fund and prepares the Fund Condition displayed in the Governor's Budget, where applicable, in accordance with the State Administrative Manual (SAM). The administering agency is also responsible for the Schedule 10R (Supplementary Schedule of Revenues and Transfers). In some smaller departments, the accounting function may be delegated to or contracted with another state department. All receipts for a fund are deposited to the credit of the fund in the State Treasury and can only be withdrawn by order of the State Controller.

The State Controller's Office maintains summary records that account for the revenues, expenditures, appropriations, and fund balance for each fund.

Fund Classification

Funds are classified both on a budgetary/legal basis and GAAP basis.

The **budgetary/legal** basis classifications are as follows:

Governmental Cost Funds

General Fund (G)
General Fund Special Accounts (S)
Transportation Funds (T)
Feeder Funds (E)
Other Governmental Cost Funds (O)
Unallocated Special Funds (X)

Non-Governmental Cost Funds

Bond Funds (B)
Trust and Agency Funds – Federal (F)
Trust and Agency Funds – Non-Federal (A)
Retirement Funds (I)
Public Service Enterprise Funds (P)
Working Capital and Revolving Funds (W)
Unallocated Non-Governmental Cost Funds (N)
Various Unclassified (V)

Governmental Cost Funds are used to record and report the normal cost of state government.

Non-Governmental Cost Funds are used to record and report activities from sources other than general and special taxes, licenses, and fees.

The GAAP basis classifications are divided into three fund categories as follows:

Governmental Funds

General Fund (GF) Special Revenue Funds (SR) Capital Projects Funds (CP) Debt Service Funds (DS)

Proprietary Funds

Enterprise Funds (EN)
Internal Service Funds (IS)

Fiduciary Funds

Pension Trust Funds (PT)
Private-Purpose Trust Funds (PPT)
Investment Trust Funds (IT)
Agency Funds (AG)

Governmental funds are used to account for most governmental functions. They account for the acquisition, use, and balances of the government's expendable financial resources and related current liabilities.

Proprietary funds are used to account for a government's ongoing organizations and activities that are paid for by user charges and are similar to those found in the private sector.

Fiduciary funds are those funds in which the governmental unit is acting in a trustee capacity or as an agent for individuals, private organizations, other governmental units, and/or other funds.

Two other fund classifications are included in this manual. The classification, Budgetary/DOF USE ONLY, is used to allow presentation of estimated revenues or expenditures pertaining to several "real" funds without assigning accountability to each fund.

The classification, CALSTARS USE ONLY, is used to fulfill requirements for certain transactions necessitated by the automated accounting system.

Appropriation Authority

Each fund description contains information related to appropriation authority. Most funds are appropriated through the budget process; however, some funds may be continuously appropriated. Refer to Government Code Section 13340 as amended by Control Section 30.00 of the annual Budget Act for further information regarding continuous appropriation authority.

If you have any questions, comments or changes to the information contained in the Manual of State Funds, please contact the Fiscal Systems and Consulting Unit at the Department of Finance either by e-mail at fscuhotline@dof.ca.gov or by telephone at (916) 324-0385.
