

2015-16 Single Audit Report

Edmund G. Brown Jr. Governor State of California

**DEPARTMENT OF
FINANCE**
OFFICE OF THE DIRECTOR

EDMUND G. BROWN JR. • GOVERNOR

STATE CAPITOL ■ ROOM 1145 ■ SACRAMENTO CA ■ 95814-4998 ■ WWW.DOF.CA.GOV

March 29, 2017

Mr. Daniel R. Levinson, Inspector General
Department of Health and Human Services
Room 5541, Cohen Building
330 Independence Avenue, S.W.
Washington, D.C. 20201

Dear Mr. Levinson:

As the Governor's fiscal representative, I submit to you the State of California Single Audit Report for the fiscal year ended June 30, 2016. The report contains the Independent Auditor's Reports on the state's general-purpose financial statements, compliance and internal control over financial reporting, compliance and internal control related to federal grants, and schedule of expenditures of federal awards. The Independent Auditor identified significant deficiencies related to internal control over compliance with major federal program requirements and identified several instances of noncompliance that were considered material. We recognize internal controls and federal award administration need improvement.

California provides its citizens with numerous state and federal programs and activities and is more complex and vast than most economic entities in the world. Such complexity, along with ever-present budget constraints, challenges the State to meet the requirements of those programs and activities efficiently and effectively. Moreover, these operations must exist within a system of accounting, administrative, operational, and programmatic controls that safeguard assets and resources, and produce reliable financial and programmatic information. Overseeing the financial and business policies of the State continues to be an important part of the California Department of Finance's (Finance) leadership.

The California State Leadership Accountability Act (SLAA) specifies the head of each state entity is responsible for establishing and maintaining a system of internal accounting, administrative, operational, and programmatic controls within their organization. Moreover, all levels of state management must be involved in assessing and strengthening their systems of internal controls to minimize fraud, errors, abuse, and waste of government funds. SLAA requires each state entity to conduct an internal review of its controls and report the results. Finance will continue to provide education and guidance to assist state entities in meeting the SLAA requirements.

Further, Finance's leadership will also include providing state entities technical accounting guidance through training and maintaining hotlines; establishing written guidance through various state manuals; offering consulting services; and providing audit services. These resources and assistance support state entities in implementing effective accounting, reporting, and operational practices.

Mr. Daniel R. Levinson
March 29, 2017
Page 2

Individual state entities separately responded to the Single Audit Report findings and recommendations. Accordingly, their viewpoints and corrective action plans are included in the report. The combined results of the Single Audit Report will be disseminated to all state entities and Finance will remind entities of their responsibility for implementing corrective actions.

Finance is committed to ensuring proper financial, reporting, and operational practices of the State, as well as ensuring internal controls safeguard assets and support the effective use of its resources. We will take into consideration the findings reported in the Single Audit Report during the course of our work.

If you have any questions concerning this letter, please contact Jennifer Whitaker, Chief, Office of State Audits and Evaluations, at (916) 322-2985.

Sincerely,

MICHAEL COHEN
Director

Independent Auditor's Report

THE GOVERNOR AND THE LEGISLATURE OF THE
STATE OF CALIFORNIA

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of California, as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the following:

Government-wide Financial Statements

- Certain enterprise funds that, in the aggregate, represent 80 percent of the assets and deferred outflows, and 40 percent of the revenues of the business-type activities.
- The University of California and the California Housing Finance Agency that represent 93 percent of the assets and deferred outflows, and 94 percent of the revenues of the discretely presented component units.

Fund Financial Statements

- The Safe Drinking Water State Revolving fund, that represents 15 percent of the assets and deferred outflows, and 3 percent of the additions, revenues, and other financing sources of the Environmental and Natural Resources fund, a major governmental fund.
- The following major enterprise funds: Electric Power fund, Water Resources fund, State Lottery fund, and California State University fund.
- The Golden State Tobacco Securitization Corporation, the Public Building Construction, the Public Employees' Retirement, the State Teachers' Retirement, the State Water Pollution Control, and the 1943 Veterans Farm and Home Building funds, that represent 84 percent of the assets and deferred outflows, and 27 percent of the additions, revenues and other financing sources of the aggregate remaining fund information.
- The discretely presented component units noted above.

The related financial statements were audited by other auditors whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for those funds and entities, are based solely on the reports of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The financial statements of the Golden State Tobacco Securitization Corporation, the Public Building Construction, the Public Employees' Retirement, the State Lottery, and the 1943 Veterans Farm and Home Building funds were not audited in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of California, as of June 30, 2016, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that a discussion and analysis by management, schedule of changes in net pension liability and related ratios, schedule of state pension contributions, schedules related to the State's support of the California State Teachers' Retirement System, schedule of funding progress for other postemployment benefits, infrastructure information, budgetary comparison information, reconciliation of budgetary and GAAP-basis fund balances, and related notes be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We and the other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the

basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The introductory section, combining financial statements, and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining financial statements are the responsibility of management and were derived from, and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and other auditors. In our opinion, based on our audit, the procedures performed as described above, and the reports of other auditors, the combining financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 22, 2017 on our consideration of the State's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State's internal control over financial reporting and compliance.

CALIFORNIA STATE AUDITOR

JOHN F. COLLINS II, CPA
Deputy State Auditor

March 22, 2017

Management's Discussion and Analysis

The following Management's Discussion and Analysis is required supplementary information to the State of California's financial statements. It describes and analyzes the financial position of the State, providing an overview of the State's activities for the year ended June 30, 2016. We encourage readers to consider the information we present here in conjunction with the information presented in the Controller's transmittal letter at the front of this report and in the State's financial statements and notes, which follow this section.

Financial Highlights – Primary Government

Government-wide Highlights

After seven years of economic expansion, California is approaching an economic plateau as its rate of growth has started to slow. For the fiscal year ended June 30, 2016, the State's general revenues increased by only \$1.4 billion (1.0%) over the prior year—significantly less than the 10.0% growth experienced in the 2014-15 fiscal year. Expenses and transfers for the State's governmental activities increased by \$12.0 billion (5.1%) but were less than total revenues received, resulting in a \$7.5 billion increase in the governmental activities' net position. Total revenues and transfers for the State's business-type activities also surpassed expenses by \$3.1 billion in the 2015-16 fiscal year.

Net Position – The primary government ended the 2015-16 fiscal year with a net deficit position of \$30.3 billion, an improvement of \$10.6 billion (26.0%). The total net deficit position is reduced by \$107.1 billion for net investment in capital assets and by \$34.8 billion for restricted net position, yielding a negative unrestricted net position of \$172.2 billion. Restricted net position is dedicated for specified uses and is not available to fund current activities. More than 59.0%, or \$101.6 billion, of the negative \$172.2 billion consists of unfunded, employee-related, long-term liabilities that are recognized as soon as an obligation has been incurred, even though payment will occur over many future periods (net pension liability, net other postemployment benefit obligations, and compensated absences). Another 38.6%, or \$66.5 billion, consists of outstanding bonded debt issued to build capital assets of school districts and other local governmental entities. Bonded debt reduces the State's unrestricted net position; however, local governments, not the State, own the capital assets that would normally offset this reduction.

Fund Highlights

Governmental Funds – As of June 30, 2016, the primary government's governmental funds reported a combined ending fund balance of \$30.9 billion, an increase of \$4.8 billion over the prior fiscal year. This year is the first in more than 15 years without any governmental fund deficits. The unrestricted fund balance, comprised of committed, assigned, and unassigned balances, was \$1.9 billion, an increase of \$2.4 billion over the prior fiscal year's deficit balance of \$448 million. The nonspendable and restricted fund balances were \$87 million and \$28.9 billion, respectively.

Proprietary Funds – As of June 30, 2016, the primary government's proprietary funds reported a combined ending net position of \$4.1 billion, an increase of \$3.0 billion over the prior fiscal year. The total net position is reduced by \$2.9 billion for net investment in capital assets, expendable restrictions of \$5.9 billion, and nonexpendable restrictions of \$9 million, yielding a negative unrestricted net position of \$4.7 billion, an improvement of \$1.3 billion over the prior fiscal year.

Noncurrent Assets and Liabilities

As of June 30, 2016, the primary government's noncurrent assets totaled \$156.2 billion, of which \$136.7 billion is related to capital assets. State highway infrastructure assets of \$73.5 billion represent the largest portion of the State's capital assets.

The primary government's noncurrent liabilities totaled \$221.4 billion, which consists of \$101.6 billion in unfunded employee-related future obligations, \$76.6 billion in general obligation bonds, \$29.4 billion in revenue bonds, and \$13.9 billion in other noncurrent liabilities. During the 2015-16 fiscal year, the primary government's noncurrent liabilities increased by \$7.0 billion (3.2%) over the previous fiscal year. The most significant changes were increases of \$8.1 billion in net pension liability and \$3.5 billion in net other postemployment benefits obligation, and decreases of \$2.6 billion in loans payable and \$1.5 billion in general obligation bonds payable.

Overview of the Financial Statements

This discussion and analysis is an introduction to the section presenting the State's basic financial statements, which includes four components: (1) government-wide financial statements, (2) fund financial statements, (3) discretely presented component units financial statements, and (4) notes to the financial statements. This report also contains required supplementary information and combining financial statements and schedules intended to furnish additional detail to support the basic financial statements.

Government-wide Financial Statements

Government-wide financial statements are designed to provide readers with a broad overview of the State's finances. The government-wide financial statements do not include fiduciary programs and activities of the primary government and component units because fiduciary resources are not available to support state programs.

The statements provide both short-term and long-term information about the State's financial position to help readers assess the State's economic condition at the end of the fiscal year. These statements are prepared using the economic resources measurement focus and the accrual basis of accounting, similar to methods used by most businesses. These statements take into account all revenues and expenses connected with the fiscal year, regardless of when the State received or paid the cash. The government-wide financial statements include two statements: the Statement of Net Position and the Statement of Activities.

- The *Statement of Net Position* presents all of the State's financial and capital resources in a format in which assets and deferred outflows of resources equal liabilities and deferred inflows of resources, plus net position. Over time, increases or decreases in net position indicate whether the financial position of the State is improving or deteriorating.
- The *Statement of Activities* presents information showing how the State's net position changed during the most recent fiscal year. The State reports changes in net position as soon as the event giving rise to the change occurs, regardless of the timing of the related cash flows. Thus, this statement reports revenues and expenses for some items that will result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave). This statement also presents a comparison between direct expenses and program revenues for each function of the State.

The government-wide financial statements separate into different columns the three types of state programs and activities—governmental activities, business-type activities, and component units.

- *Governmental activities* are mostly supported by taxes, such as personal income and sales and use taxes, and intergovernmental revenues, primarily federal grants. Most services and expenses normally associated with state government fall into this activity category, including general government; education (public kindergarten through 12th grade [K–12] schools and institutions of higher education); health and human services; natural resources and environmental protection; business, consumer services, and housing; transportation; corrections and rehabilitation; and interest on long-term debt.
- *Business-type activities* typically recover all or a significant portion of their costs through user fees and charges to external users of goods and services. The business-type activities of the State of California include providing unemployment insurance programs, providing housing loans to California veterans, providing water to local water districts, providing services to California State University students, selling California State Lottery tickets, and selling electric power. These activities are conducted with minimal financial assistance from the governmental activities or general revenues of the State.
- *Component units* are organizations that are legally separate from the State, but are at the same time related to the State financially (i.e., the State is financially accountable for them) or the nature of their relationship with the State is so significant that their exclusion would cause the State's financial statements to be misleading or incomplete. Various types of component units are presented; all are legally separate. However, blended component units function as part of the State's operations. Fiduciary component units are primarily the resources and operations of the California Public Employees' Retirement System and the California State Teachers' Retirement System. Discretely presented component units contain some form of accountability either from or to the State.

Most component units prepare their own separately issued financial statements. For information regarding obtaining the financial statements of the individual component units, refer to Note 1A, Reporting Entity.

Fund Financial Statements

The State of California, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal and contractual requirements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. All of the funds of the State may be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

- *Governmental funds* are used to account for essentially the same functions that are reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on short-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's short-term financing requirements. This approach is known as the *flow of current financial resources measurement focus* and the *modified accrual basis of accounting*. These governmental fund statements provide a detailed short-term view of the State's finances, enabling readers to determine whether adequate financial resources exist to meet the State's current needs.

Because governmental fund financial statements provide a narrower focus than do government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing

so, readers may better understand the long-term impact of the government's short-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate comparison between governmental funds and governmental activities. Primary differences between the government-wide and fund-based statements relate to noncurrent assets, such as land and buildings, and noncurrent liabilities, such as bonded debt and amounts owed for net pension liability, compensated absences, and capital lease obligations. These amounts are reported in the government-wide statements but not in the fund-based statements.

- *Proprietary funds* show activities that operate more like those found in the private sector. The State of California has two proprietary fund types—enterprise funds and internal service funds.
 - *Enterprise funds* record activities for which a fee is charged to external users; they are presented as business-type activities in the government-wide financial statements.
 - *Internal service funds* accumulate and allocate costs internally among the State's various functions. For example, internal service funds provide public buildings construction, information technology, printing, fleet management, and architectural services primarily for state departments. As a result, their activity is considered governmental.
- *Fiduciary funds* account for resources held for the benefit of parties outside the State. Fiduciary funds and the activities of fiduciary component units are not reflected in the government-wide financial statements because the resources of these funds are not available to support state programs. The accounting used for fiduciary funds and similar component units is similar to that used for trusts.

Discretely Presented Component Units Financial Statements

The State has financial accountability for discretely presented component units, which have certain independent qualities and operate in a similar manner as private sector businesses. The activities of the discretely presented component units are classified as enterprise activities.

Notes to the Financial Statements

The notes to the financial statements in this publication provide additional information that is essential for a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements, which describe particular accounts in more detail, are located immediately following the discretely presented component units financial statements.

Required Supplementary Information

A section of required supplementary information follows the notes to the basic financial statements in this publication. This section includes several schedules of information for the State's pension plans and the State's contributions to those plans, a schedule of funding progress for other postemployment benefit trust funds, information on infrastructure assets based on the modified approach, a budgetary comparison schedule, and a reconciliation of the budgetary basis and the GAAP basis fund balances for the major governmental funds presented in the governmental fund financial statements.

Combining Financial Statements and Schedules

The Combining Financial Statements and Schedules – Nonmajor and Other Funds section presents combining statements that provide separate financial statements for nonmajor governmental funds, nonmajor proprietary funds, fiduciary funds, and nonmajor component units as supplementary information. The basic financial statements present only summary information for these activities.

Government-wide Financial Analysis

Net Position

The primary government's combined net position (governmental and business-type activities) increased by \$10.6 billion (26.0%) from a negative \$40.9 billion to a negative \$30.3 billion at June 30, 2016.

The primary government's \$107.1 billion net investment in capital assets, such as land, buildings, equipment, and infrastructure (roads, bridges, and other immovable assets) comprise a significant portion of its net position. This amount of capital assets is net of any outstanding debt used to acquire those assets. The State uses capital assets when providing services to citizens; consequently, these assets are not available for future spending. Although the State's investment in capital assets is reported net of related debt, the resources needed to repay this debt must come from other sources because the State cannot use the capital assets to pay off the liabilities.

Another \$34.8 billion of the primary government's net position represents resources that are externally restricted as to how they may be used, such as resources pledged to debt service. The internally imposed earmarking of resources is not presented in this publication as restricted net position. As of June 30, 2016, the primary government's combined unrestricted net deficit position was \$172.2 billion—\$168.5 billion for governmental activities and \$3.7 billion for business-type activities.

A significant factor contributing to the unrestricted net deficit is that governments recognize a liability on the government-wide Statement of Net Position as soon as an obligation has been incurred, while financing and budgeting functions focus on when a liability will be paid. As of June 30, 2016, the primary government recognized \$101.6 billion (59.0% of the \$172.2 billion unrestricted net deficit) in unfunded employee-related obligations—net pension liability, net other postemployment benefits obligation, and compensated absences. In addition, the primary government recognized \$66.5 billion (38.6% of the \$172.2 billion unrestricted net deficit) in outstanding bonded debt issued to build capital assets for school districts and other local governmental entities, a common state practice nationwide. As the State does not own these capital assets, neither the assets nor the related bonded debt is included in the portion of net position reported as “net investment in capital assets.” Instead, the bonded debt is reported as a noncurrent liability that increases the State's unrestricted net deficit position. The State can expect continued deficits in the unrestricted net position of governmental activities as long as it has significant unfunded employee-related obligations and outstanding obligations for school districts and other local governmental entities.

Table 1 presents condensed financial information derived from the Statement of Net Position for the primary government.

(amounts in billions)

Note: Prior-year adjustments recorded in the current year have not been reflected in the 2015 amounts.

Changes in Net Position

The expenses of the primary government totaled \$272.7 billion for the year ended June 30, 2016. Of this amount, \$142.8 billion (50.4%) was funded with program revenues (charges for services or program-specific grants and contributions), leaving \$129.9 billion to be funded with general revenues (mainly taxes). The primary government's general revenues of \$140.5 billion exceeded net unfunded expenses by \$10.6 billion, resulting in a 26.0% increase in net position.

Table 2 presents condensed financial information derived from the Statement of Activities for the primary government.

Note: Prior-year adjustments recorded in the current year have not been reflected in the prior-year column.

Governmental Activities

During the 2015-16 fiscal year, governmental activities' expenses and transfers totaled \$248.5 billion. Program revenues totaling \$115.5 billion, including \$88.1 billion received in federal grants and contributions, funded 46.5% of expenses and transfers, leaving \$133.0 billion to be funded with general revenues (mainly taxes). General revenues for governmental activities (\$140.5 billion) exceeded net unfunded expenses and transfers, resulting in the governmental activities' net deficit position of \$34.9 billion for the year ended June 30, 2016, an improvement of \$7.5 billion (17.7%) over the prior-year's net deficit position of \$42.4 billion.

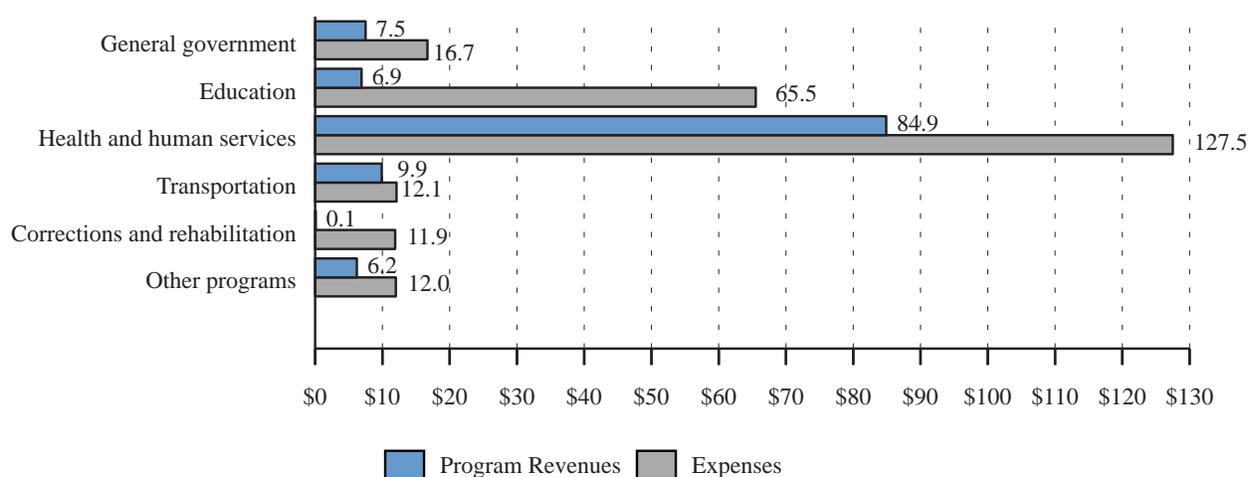

Chart 2 presents a comparison of governmental activities' expenses to related revenue by program.

Chart 2

Program Revenues and Expenses – Governmental Activities

Year ended June 30, 2016

(amounts in billions)

For the year ended June 30, 2016, total governmental activity revenue was \$256.0 billion, an increase of 2.5% over the prior year. General revenues increased by \$1.4 billion (1.0%) to \$140.5 billion, and program revenues increased by \$4.9 billion (4.5%) to \$115.5 billion. These increases are significantly smaller than the 2014-15 fiscal year growth of 10.0% for general revenues and 18.1% for program revenues, reflecting the slowing of the recent economic recovery and expansion. Personal income taxes and corporation taxes had the greatest impact on the slowing growth rate during the 2015-16 fiscal year. Corporation taxes decreased by \$1.5 billion (14.1%) from the prior year. Personal income taxes increased by \$2.2 billion over the prior year, representing only a 2.8% increase compared to the 2014-15 fiscal year increase of 13.5%.

Overall expenses for governmental activities increased by \$11.8 billion (5.0%) over the prior year. The largest increase in expenditures, \$5.9 billion (10.0%), was for education due to the Proposition 98 minimum funding guarantee; the increased spending was triggered by higher General Fund revenue. Another significant increase, \$5.5 billion (4.5%), occurred in health and human services programs; the majority of the increase is attributable to the Department of Health Care Services, which administers the State's Medi-Cal program. This growth in spending reflects the continuing expansion in Medi-Cal caseload under federal health care reform.

Charts 3 and 4 present the percentage of total expenses for each governmental activities program and the percentage of total revenues by source.

Chart 3

(as a percent)

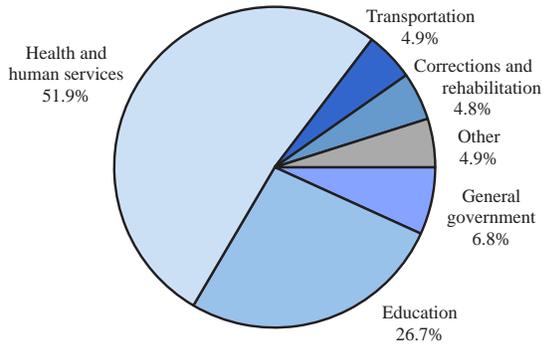

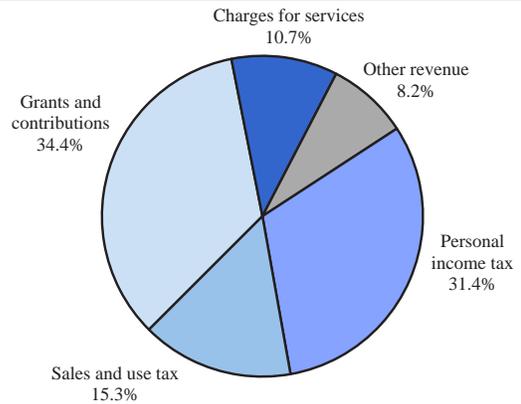

Chart 4

Revenues by Source

Year ended June 30, 2016
(as a percent)

Business-type Activities

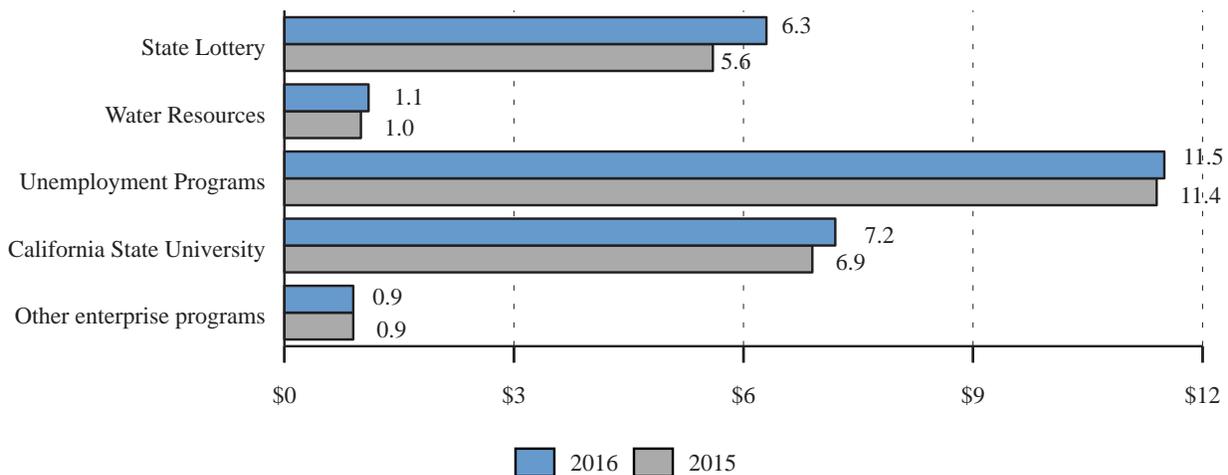

As of June 30, 2016, business-type activities' expenses totaled \$26.9 billion. Program revenues of \$27.2 billion, primarily generated from charges for services, and \$2.8 billion in transfers, were sufficient to cover these expenses. As a result, the business-type activities' total net position of \$4.6 billion increased by \$3.1 billion (214.4%) over the prior-year's net position of \$1.5 billion.

Chart 5 presents a two-year comparison of the expenses of the State's business-type activities.

Chart 5

Expenses – Business-type Activities – Two-year Comparison

Years ended June 30, 2016 and 2015
(amounts in billions)

Fund Financial Analysis

The State's governmental funds' balance increased by \$4.8 billion over the prior year's ending fund balance. The 2015-16 fiscal year marks the first time since before the 2001-02 fiscal year implementation of GASB Statement No. 34 that all of the State's governmental funds ended the year with positive fund balances. Proprietary funds' net position increased by \$3.0 billion during the 2015-16 fiscal year, of which \$2.4 billion was in the Unemployment Programs Fund, increasing its fund balance to \$1.5 billion—its first positive balance in eight years.

Governmental Funds

As of June 30, 2016, the governmental funds' Balance Sheet reported \$82.3 billion in assets, \$51.4 billion in liabilities and deferred inflows of resources, and \$30.9 billion in fund balance. Total assets of governmental funds increased by 5.4%, while total liabilities and deferred inflows of resources decreased by 1.2%, resulting in a total fund balance increase of \$4.8 billion (18.5%) over the prior year's balance.

Within the governmental funds' total fund balance, \$87 million is classified as nonspendable, as this amount consists of long-term interfund receivables, loans receivable, and legal or contractual requirements. Additionally, \$28.9 billion is classified as restricted for specific programs by external constraints such as debt covenants and contractual obligations, or by constitutional provisions or enabling legislation. Furthermore, of the total fund balance, \$5.7 billion is classified as committed for specific purposes and \$15 million is classified as assigned for specific purposes. The remaining unassigned balance of the governmental funds is a negative \$3.8 billion, an improvement of \$830 million over the prior fiscal year.

The Statement of Revenues, Expenditures, and Changes in Fund Balances of the governmental funds reported \$255.7 billion in revenues, \$255.3 billion in expenditures, and a net \$4.4 billion in receipts from other financing sources. The ending fund balance of the governmental funds for the year ended June 30, 2016, was \$30.9 billion, a \$4.8 billion increase over the prior year's ending fund balance of \$26.1 billion.

Governmental funds' revenue consists primarily of taxes (54.6%) and intergovernmental revenue (35.6%). Personal income taxes accounted for 57.2% of tax revenues and increased by \$1.7 billion over the prior fiscal year. Sales and use taxes accounted for 28.0% of tax revenues and increased by \$746 million over the prior fiscal year. Corporation taxes accounted for 6.6% of tax revenues and decreased by \$1.6 billion from the prior fiscal year. The decline in corporation tax revenue is largely due to significantly increased refunding activity as corporate taxpayers continue to adjust to changes in the calculation of their California taxable revenue under Proposition 39 that was enacted in 2012. Intergovernmental revenue, primarily from the federal government, increased by \$3.3 billion (3.8%) over the prior fiscal year.

Governmental funds' expenditures increased by \$6.9 billion (2.8%) over the prior fiscal year, primarily for health and human services and education. The increase in health and human services expenditures, of \$4.9 billion (4.0%), is due primarily to the continued expansion of the Medi-Cal caseload under the Patient Protection and Affordable Care Act (federal health care reform). The \$2.3 billion increase in education expenditures is to comply with constitutional requirements (Proposition 98) that provide a minimum funding guarantee to support California's K-12 schools and community colleges; the minimum funding guarantee increased as a result of increased General Fund revenue in the 2015-16 fiscal year. Offsetting these two governmental funds' expenditure increases is a decrease of \$2.0 billion (15.2%) in debt service principal and interest payments for bonds and commercial paper.

Chart 6 presents a two-year comparison of governmental funds' tax revenues.

Chart 6

Governmental Funds Tax Revenue – Two-year Comparison

Years ended June 30, 2016 and 2015
(amounts in billions)

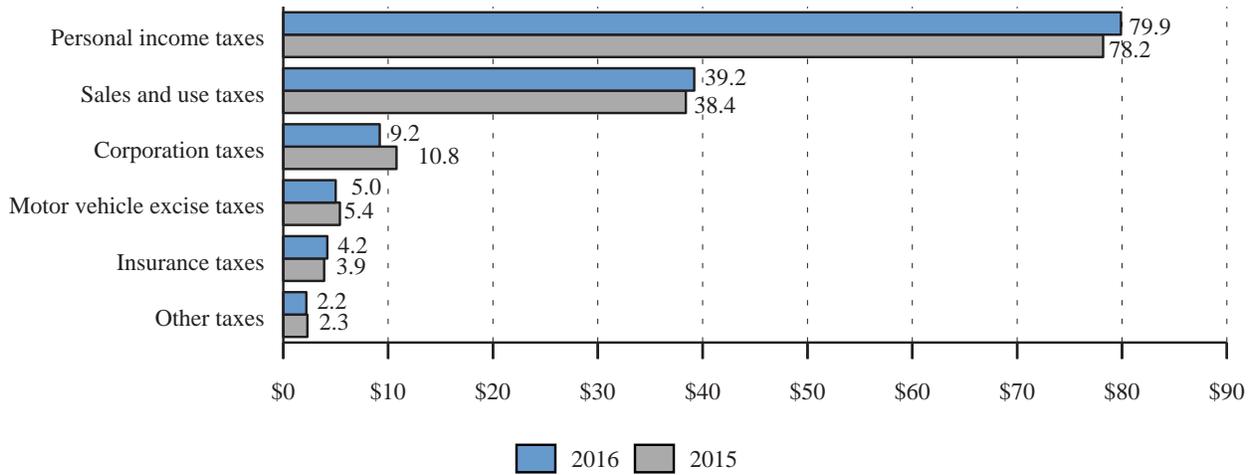

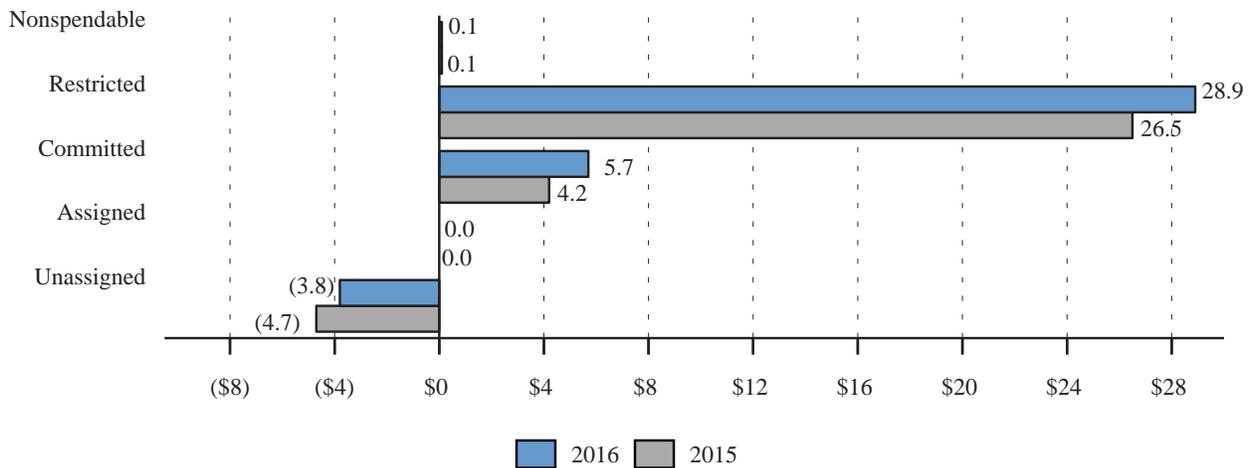

Chart 7 presents a two-year comparison of the components of the governmental funds' balance.

Chart 7

Governmental Funds – Components of Fund Balance – Two-year Comparison

Years ended June 30, 2016 and 2015
(amounts in billions)

The State's major governmental funds are the General Fund, the Federal Fund, the Transportation Fund, and the Environmental and Natural Resources Fund. The General Fund ended the fiscal year with a fund balance of \$362 million, an increase of \$2.6 billion over the prior year's fund deficit. The Federal Fund, the Transportation Fund, and the Environmental and Natural Resources Fund ended the fiscal year with fund balances of \$248 million, \$8.5 billion, and \$10.1 billion, respectively. The nonmajor governmental funds ended the fiscal year with a total fund balance of \$11.6 billion.

General Fund: As shown on the Balance Sheet, the General Fund (the State's main operating fund) ended the 2015-16 fiscal year with assets of \$20.9 billion; liabilities and deferred inflows of resources of \$20.6 billion; and nonspendable, restricted, and committed fund balances of \$76 million, \$4.0 billion, and \$68 million, respectively, leaving the General Fund with a negative unassigned fund balance of \$3.8 billion. Total assets of the General Fund decreased by \$1.3 billion (5.6%) from the prior fiscal year, while total liabilities and deferred inflows of resources decreased by \$3.8 billion (15.7%). The General Fund's unassigned fund balance deficit decreased by \$830 million (17.8%).

As shown on the Statement of Revenue, Expenditures, and Changes in Fund Balance, the General Fund had an excess of revenues over expenditures of \$5.8 billion (\$117.6 billion in revenues and \$111.8 billion in expenditures). Approximately \$112.5 billion (95.7%) of General Fund revenue is derived from the State's largest three taxes—personal income taxes (\$78.5 billion), sales and use taxes (\$24.8 billion), and corporation taxes (\$9.2 billion). As a result of fund classifications made to comply with generally accepted governmental accounting principles, a total of \$246 million in revenue, essentially all from unemployment programs, is included in the General Fund. These revenues are not considered General Fund revenues for any budgetary purposes or for the State's Budgetary/Legal Basis Annual Report.

During the 2015-16 fiscal year, total General Fund revenue increased by \$796 million (0.7%). The increase is a result of increases in personal income taxes of \$1.6 billion (2.1%) and sales and use taxes of \$1.2 billion (5.1%), offset by a decrease in corporation taxes of \$1.6 billion (14.5%).

General Fund expenditures increased by \$4.6 billion (4.3%). The largest increases were in education and health and human services expenditures, which were up \$2.3 billion and \$2.1 billion, respectively. The General Fund's net fund balance of \$362 million for the year ended June 30, 2016, was an improvement of \$2.6 billion over the prior year's ending fund deficit of \$2.2 billion.

Federal Fund: The Federal Fund reports federal grant revenues and the related expenditures to support the grant programs. The largest of these programs is for health and human services, which accounted for \$73.8 billion (84.5%) of the total \$87.4 billion in fund expenditures. The Medical Assistance program and the Temporary Assistance for Needy Families program are included in this program area. Education programs also constituted a large part of the fund's expenditures, amounting to \$6.9 billion (7.9%) of the total. The Federal Fund's revenues increased by \$1.9 billion, which was approximately the same amount of increase in the combined expenditures and transfers, resulting in only a \$30 million fund balance increase over the prior year's ending fund balance of \$218 million.

Transportation Fund: The Transportation Fund accounts for fuel taxes, bond proceeds, and other revenues used primarily for highway and passenger rail construction. The Transportation Fund's revenues decreased by \$535 million (5.1%), while its expenditures decreased by \$1.4 billion (11.6%). Other financing sources provided net receipts of \$1.3 billion. The Transportation Fund ended the fiscal year with an \$8.5 billion fund balance, an increase of \$322 million over the prior year.

Environmental and Natural Resources Fund: The Environmental and Natural Resources Fund accounts for fees, bond proceeds, and other revenues that are used for maintaining the State's natural resources and improving the environmental quality of its air, land, and water. The Environmental and Natural Resources Fund's revenues increased by \$534 million (10.7%), while its expenditures decreased by \$265 million (5.1%). Other financing sources provided net receipts of \$1.2 billion. The Environmental and Natural Resources Fund ended the fiscal year with a \$10.1 billion fund balance, an increase of \$1.8 billion (20.9%) over the prior year.

Proprietary Funds

Enterprise Funds: The economic recovery continued to have a positive impact on the State's enterprise funds. The total net position of the enterprise funds at June 30, 2016, was \$4.6 billion—\$3.1 billion greater than the prior year's net position of \$1.5 billion. The Unemployment Programs Fund had an increase in its net position of \$2.4 billion to end the fiscal year with a balance of \$1.5 billion. This balance represents the Unemployment Programs Fund's first positive net position since 2009—the end of the recession that dramatically increased the State's unemployment and resulted in the fund's insolvency. The State Lottery Fund, the California State University Fund, and the nonmajor enterprise funds increased their net positions by \$52 million, \$538 million, and \$121 million, respectively.

As shown on the proprietary funds' Statement of Net Position, total assets and deferred outflows of resources for the enterprise funds were \$37.0 billion as of June 30, 2016. Of this amount, current assets totaled \$12.9 billion, noncurrent assets totaled \$22.8 billion, and deferred outflows of resources totaled \$1.3 billion. The total liabilities and deferred inflows of resources for the enterprise funds was \$32.5 billion. The three largest liabilities of the enterprise funds are \$13.9 billion in revenue bonds payable, \$7.5 billion in net pension liability, and \$3.1 billion in noncurrent loans payable. During the 2015-16 fiscal year, the State reduced by \$2.6 billion the balance of the loans from the U.S. Department of Labor that covered prior-year deficits in the Unemployment Programs Fund, leaving a balance of \$3.1 billion as of June 30, 2016.

Total net position consisted of four segments: net investment in capital assets of \$2.5 billion, a nonexpendable restricted net position of \$9 million, a restricted expendable net position of \$5.7 billion, and an unrestricted net deficit of \$3.7 billion.

As shown on the Statement of Revenues, Expenses, and Changes in Fund Net Position of proprietary funds, the enterprise funds ended the year with operating revenues of \$24.2 billion, operating expenses of \$24.0 billion, and net expenses from other transactions of \$3 million. The largest sources of operating revenue were unemployment and disability insurance receipts of \$13.8 billion in the Unemployment Programs Fund, and lottery ticket sales of \$6.3 billion collected by the State Lottery Fund. The unemployment and disability insurance receipts in the Unemployment Programs Fund increased by \$453 million to \$13.8 billion over the prior fiscal year. These receipts came primarily from the federal government unemployment account to pay unemployment and disability benefits. The largest operating expenses were distributions of \$11.1 billion to beneficiaries by the Unemployment Programs Fund, personal services of \$4.6 billion by the California State University Fund, and lottery prizes of \$4.0 billion distributed by the State Lottery Fund.

Internal Service Funds: The total net deficit of the internal service funds was \$458 million as of June 30, 2016. The net position consists of three segments: net investment in capital assets of \$383 million, a restricted expendable net position of \$131 million, and an unrestricted net deficit of \$972 million.

Fiduciary Funds

The State of California has four types of fiduciary funds: private purpose trust funds, pension and other employee benefit trust funds, investment trust funds, and agency funds. The private purpose trust funds ended the fiscal year with a net position of \$6.8 billion. The pension and other employee benefit trust funds ended the fiscal year with a net position of \$507.6 billion. The State's only investment trust fund, the Local Agency Investment Fund, ended the fiscal year with a net position of \$22.7 billion. Agency funds act as clearing accounts and thus do not have a net position.

For the year ended June 30, 2016, the fiduciary funds' combined net position was \$537.1 billion, a \$4.3 billion decrease from the prior year net position. The net position decreased primarily because payments made to participants exceeded contributions received and investment income in pension and other employee benefit trust funds.

General Fund Budget Highlights

The original General Fund budget of \$115.2 billion was increased by \$1.7 billion during the 2015-16 fiscal year. This increase is mainly comprised of funding for education, natural resources and environmental protection, and health and human services programs. The funding for education programs increased due primarily to the Proposition 98 minimum funding guarantee per Education Code Section 41202; an increase in General Fund revenue causes an increase to the minimum funding guarantee. Additional funding for drought-related activities accounts for most of the increase in the natural resources and environmental protection budget. The increase in health and human services program funding is due primarily to the continuing implementation of the federal Patient Protection and Affordable Care Act. During the 2015-16 fiscal year, the General Fund's actual budgetary basis expenditures were \$114.4 billion, \$2.5 billion less than the final budgeted amount of \$116.9 billion.

Table 3 presents a summary of the General Fund original and final budgets.

Table 3

General Fund Original and Final Budgets

Capital Assets and Debt Administration

Capital Assets

As of June 30, 2016, the State’s investment in capital assets for its governmental and business-type activities amounted to \$136.7 billion (net of accumulated depreciation/amortization). The State’s capital assets include land, state highway infrastructure, collections, buildings and other depreciable property, intangible assets, and construction/development in progress. The buildings and other depreciable property account includes buildings, improvements other than buildings, equipment, certain infrastructure assets, certain books, and other capitalized and depreciable property. Intangible assets include computer software, land use rights, patents, copyrights, and trademarks. Infrastructure assets are items that normally are immovable, such as roads and bridges, and can be preserved for a greater number of years than can most capital assets.

As of June 30, 2016, the State’s capital assets increased \$4.3 billion, or 3.2% over the prior fiscal year. The majority of the increase occurred in state highway infrastructure and buildings and other depreciable property.

Additional information on the State’s capital assets can be found in Note 7.

Table 4 presents a summary of the primary government’s capital assets for governmental and business-type activities.

Table 4

Capital Assets – Primary Government – Two-year Comparison

June 30, 2016 and 2015

(amounts in millions)

	Governmental Activities		Business-type Activities		Total	
	2016	2015	2016	2015	2016	2015

Total	\$ 126,859	\$ 123,201	\$ 9,849	\$ 9,220	\$ 136,708	\$ 132,421

Note: Prior-year adjustments recorded in the current year have not been reflected in the prior-year column.

Modified Approach for Infrastructure Assets

The State has elected to use the modified approach for capitalizing infrastructure assets of the state highway system (state roadways and bridges). Under the modified approach, the State does not report depreciation expense for its roads and bridges but capitalizes all costs that add to their capacity and efficiency. All maintenance and preservation costs are expensed. Under the modified approach, the State maintains an asset management system to demonstrate that the infrastructure is preserved at or above established condition levels. During the 2015-16 fiscal year, the actual amount spent on preservation was 48.0% of the estimated budgeted amount needed to maintain the infrastructure assets at the established condition levels. Although the amount spent fell short of the budgeted amount, the assessed condition of the State's bridges and roadways is better than the established condition baselines with 84.1% of lane miles judged to be of excellent, good, or fair quality in the last completed pavement-condition survey. The State is responsible for maintaining 49,645 lane miles and 12,972 bridges.

The Required Supplementary Information includes additional information on how the State uses the modified approach for infrastructure assets; it also presents the established condition standards, condition assessments, and preservation costs.

Debt Administration

At June 30, 2016, the State had total bonded debt outstanding of \$110.9 billion. Of this amount, \$79.8 billion (71.9%) represents general obligation bonds, which are backed by the full faith and credit of the State. The current portion of general obligation bonds outstanding is \$3.2 billion and the long-term portion is \$76.6 billion. The remaining \$31.1 billion (28.1%) of bonded debt outstanding represents revenue bonds, which are secured solely by specified revenue sources. The current portion of revenue bonds outstanding is \$1.7 billion and the long-term portion is \$29.4 billion.

During the fiscal year, the State issued \$7.3 billion in new general obligation bonds for governmental activities, including: parks, clean water and clean air; reading and literacy improvement and public libraries; safe drinking water; children's hospitals; earthquake safety and public building rehabilitation; public primary, secondary, community college and university education facilities; highway safety, traffic reduction, air quality and port security; transportation; clean water, watershed protection and flood protection; water security, water quality, water supply and river, coastal and beach protection; water conservation; seismic retrofit; wildlife, coastal and parkland conservation; medical research; housing and emergency shelters; veterans' homes; high speed passenger train projects; and to refund previously outstanding general obligation bonds and commercial paper. The State also issued \$545 million in new general obligation bonds for veterans farm and home buildings, a business-type activity.

Table 5 presents a summary of all the primary government’s long-term obligations for governmental and business-type activities.

Table 5

Note: Prior-year adjustments recorded in the current year have not been reflected in the prior-year column.

¹ All certificates of participation were retired in fiscal year 2016.

During the year ended June 30, 2016, the primary government’s total long-term obligations increased by \$6.9 billion over the prior year’s balance. The largest increases were \$8.1 billion in net pension liability and \$3.5 billion in other postemployment benefit obligations because the State does not fully fund these benefits. The largest decrease was \$2.6 billion in loans payable to the U.S. Department of Labor for prior-year shortfalls in the unemployment program.

Note 9, Long-term Obligations, and Notes 10 through 16 include additional information on the State’s long-term obligations.

In July 2015, Standard and Poor’s Rating Services raised the State’s general obligation rating to “AA-” from “A+”, citing the enactment of the State’s 2015-16 budget which marked an improved fiscal sustainability. During the 2015-16 fiscal year, the ratings from Fitch Ratings and Moody’s Investors Service remained unchanged at “A+” and “Aa3”, respectively.

Economic Condition and Future Budgets

The Economy for the Year Ending June 30, 2016

California, along with the United States as a whole, completed its seventh year of economic recovery as the State ended its fiscal year on June 30, 2016. California's economy demonstrated continued economic growth throughout the 2015-16 fiscal year. California's personal income growth outperformed that of the nation as a whole during the 2015-16 fiscal year, increasing by 5.2% compared with a 3.8% increase nationally. Consequently, consumer spending increased, as demonstrated by a 2.8% increase in California's new vehicle registrations in the 2015-16 fiscal year and a \$1.2 billion (5.1%) increase in sales and use tax revenue.

The State's real estate market showed mixed signs of continued strength during the 2015-16 fiscal year. As of June 2016, median prices for existing single family homes were 6.1% higher than June 2015, though sales were essentially flat (down by 0.1%) and the pace of homebuilding had largely leveled off. As of June 2016, the rate of new residential building permits issued increased by 1.7% to nearly 97,000 units compared to the same period a year earlier. Nonresidential construction activity showed more strength relative to the residential sector, with new permit activity increasing 15.9% during the 2015-16 fiscal year to \$28.1 billion.

California's labor market continued to add jobs during the 2015-16 fiscal year. Total employment for June 2016 stood at 18.1 million jobs, a gain of more than 300,000 jobs from the same period a year earlier. Mirroring the increase in jobs, the State's unemployment rate fell from 6.2% in June 2015 to 5.4% in June 2016.

Economic Outlook for the 2016-17 Fiscal Year as of December 31, 2016

During the first several months of the 2016-17 fiscal year, California continued to experience job growth. By December 2016, total employment was nearly 18.4 million jobs, reflecting a year-to-year increase of 500,000 jobs compared to December 2015. The unemployment rate largely held steady since June 2016, with only a slight decrease to 5.2% by December 2016.

California's personal income growth continued to outpace the nation during the beginning of the 2016-17 fiscal year, with total personal income for the third quarter of 2016 4.8% above the level observed in the same period in 2015, compared with an increase of 3.6% nationally.

The State's real estate market continued to show mixed results during the beginning of the 2016-17 fiscal year. As of December 2016, median home prices were up by 4.0% over the same period one year earlier, but the number of sales decreased 0.6% from the level observed in December 2015. New residential construction activity also leveled off in the first half of the 2016-17 fiscal year with the number of permits for new residential units coming in just under 100,000 units as of December 2016, an increase of 1.9% from the same period one year earlier. The pace of nonresidential construction showed signs of slowing during the first half of the 2016-17 fiscal year. The annual value of nonresidential permits for the period ending December 2016 had a year-to-year increase of 1.6%.

The State's Department of Finance expects only moderate economic growth during the next two years, although this economic recovery has already lasted longer than many previous recoveries, including the expansion from 2001 to 2007. As the economic recovery matures and unemployment decreases, the pace of job growth is expected to slow and inflation is expected to gradually rise.

California's 2016-17 Budget

California's 2016-17 Budget Act was enacted on June 27, 2016. The Budget Act appropriated \$170.9 billion—\$122.5 billion from the General Fund, \$44.6 billion from special funds, and \$3.8 billion from bond funds. The General Fund's budgeted expenditures increased by \$6.9 billion, or 6.0% over last year's General Fund budget. When the budget was enacted, the General Fund's revenues were projected to be \$120.3 billion after a \$3.3 billion transfer to the Budget Stabilization Account (BSA), the State's rainy day fund. General Fund revenue comes predominantly from taxes, with personal income taxes expected to provide 67.5% of total revenue. California's major taxes (personal income, sales and use, and corporation taxes) are projected to supply approximately 98.1% of the General Fund's resources in the 2016-17 fiscal year. When the budget was enacted, the General Fund was projected to end the 2016-17 fiscal year with \$8.5 billion in total reserves—\$6.7 billion in the BSA and \$1.8 billion in the Special Fund for Economic Uncertainties (SFEU), resulting in the fifth consecutive year of projected budget surplus in the General Fund.

In January 2017, the proposed 2017-18 Governor's Budget provided revised General Fund revenue, expenditure, and reserve estimates for the 2016-17 fiscal year. The revised estimate projects General Fund revenue of \$118.8 billion, expenditures of \$122.8 billion, and total year-end reserves of \$6.8 billion—\$6.7 billion in the BSA and only \$47 million in the SFEU, which is \$1.7 billion less than projected in June 2016 for the enacted budget. Actual General Fund cash receipts for the first half of the 2016-17 fiscal year have fallen short of the estimates used in preparing the enacted budget, which supports the need for revised estimates. As of January 1, 2017, revenues were \$1.7 billion less than forecasted for the first six months of the fiscal year, while disbursements were \$2.2 billion more than estimated. As a result, the General Fund's temporary borrowing was \$4.0 billion more than projected, leaving a balance as of December 31, 2016, of \$17.8 billion in outstanding loans—comprised entirely of internal borrowing from special funds.

The majority of the spending plan for the 2016-17 fiscal year included funding that maintains existing state policies or is based on spending allocations driven by constitutional funding requirements, such as the Proposition 98 guaranteed minimum funding levels for K-12 schools and community colleges and the Proposition 2 required minimum transfers to the BSA and minimum annual debt reduction payments. The discretionary portion of the 2016-17 spending plan allocated \$2.6 billion toward additional General Fund reserves—an additional \$2.0 billion transfer to the BSA and \$600 million to the SFEU; funding for one-time activities, such as \$1.5 billion for repairing and replacing aged infrastructure, \$500 million for building affordable housing, and \$200 million for drought-related activities; and ongoing funding augmentations for specific programs, including \$300 million to the University of California and California State Universities. To offset the impact of reduced General Fund revenues in the 2016-17 fiscal year, the administration is proposing to reduce or eliminate some of these discretionary items in the 2016-17 spending plan.

California's 2017-18 Budget

The Governor released his proposed 2017-18 budget on January 10, 2017. The large revenue growth that the State experienced in the past few years is beginning to slow and, if no action is taken, the Governor's Budget projects a budget shortfall (a gap between estimated revenue and expenditures) of \$1.6 billion for the 2017-18 fiscal year. The proposed budget includes a variety of solutions to bring the State's budget back into balance for the 2017-18 fiscal year and future years, including a \$1.7 billion reduction in the Proposition 98 minimum funding guarantee for K-12 schools and community colleges based on the lower revenue estimates, a \$900 million elimination of uncommitted one-time spending included in the prior year budget (2016-17), and a \$600 million delay or elimination of proposed spending increases. After addressing the budget shortfall, the 2017-18 Governor's Budget prioritizes the achievements made in recent years—more money for education, an earned income tax credit for working families, raising the minimum wage, extending health care to millions of Californians, paying down long-term liabilities, and continuing to plan and save for the next recession.

The 2017-18 Governor's Budget projects (with all budget solutions enacted) that General Fund revenues and transfers will be \$124.0 billion and expenditures will be \$122.5 billion, leaving an estimated year-end reserve of \$1.5 billion in the General Fund's SFEU. Estimated 2017-18 General Fund revenues and transfers are 4.4% higher than the revised 2016-17 fiscal year projection of \$118.8 billion, but are 2.2% less than estimated for the 2017-18 fiscal year in June 2016. The proposed 2017-18 General Fund expenditures are slightly less than the revised 2016-17 fiscal year projected expenditures of \$122.8 billion, but are 3.0% less than projected for the 2017-18 fiscal year in June 2016.

In addition to the \$1.5 billion reserve in the General Fund's SFEU, the Governor's budget projects that the 2017-18 fiscal year will end with \$7.9 billion in the BSA for a total reserve of \$9.4 billion. This would be an increase of \$1.2 billion in the BSA, the minimum transfer required by Proposition 2, and \$1.5 billion in the SFEU over their estimated 2016-17 fiscal year ending balances. In accordance with the requirements of Proposition 2, the budget proposes an equivalent \$1.2 billion General Fund allocation for debt reduction that includes partial repayment of special fund loans and pre-Proposition 42 transportation loans; partial settle-up of prior-years' Proposition 98 underfunding; contributions toward unfunded state retiree postemployment health care benefits; and contributions toward unfunded University of California retirement benefits.

The Legislative Analyst's Office (LAO), California's nonpartisan fiscal and policy advisor, believes the Governor's 2017-18 fiscal year revenue estimates are too low, but supports the Governor's decision to build reserves and limit any new commitments to one-time purposes in order to prepare for the next economic downturn. Both the Governor and the LAO acknowledge that the State is facing uncertainties about the future economy and potential changes to federal fiscal policy that could have significant financial impact on the State's budget and financial condition.

Requests for Information

The State Controller's Office designed this financial report to provide interested parties with a general overview of the State of California's finances. Address questions concerning the information provided in this report or requests for additional information through email to the State Controller's Office, State Accounting and Reporting Division at StateGovReports@sco.ca.gov. This report is also available on the State Controller's Office's website at www.sco.ca.gov.

Reconciliation of the Governmental Funds Balance Sheet to the Statement of Net Position

(amounts in thousands)

Total fund balances – governmental funds **\$ 30,924,145**

Amounts reported for governmental activities in the Statement of Net Position are different from those in the Governmental Funds Balance Sheet because:

- The following capital assets used in governmental activities are not financial resources and, therefore, are not reported in the funds:

Land	19,381,154	
State highway infrastructure	73,462,607	
Collections – nondepreciable	22,627	
Buildings and other depreciable property	29,012,566	
Intangible assets – amortizable	1,966,630	
Less: accumulated depreciation/amortization	(12,915,431)	
Construction/development in progress	14,199,912	
Intangible assets – nonamortizable	426,186	
		125,556,251

- State revenues that are earned and measurable, but not available within 12 months of the end of the reporting period, are reported as deferred inflows of resources in the funds. 1,903,716
- Internal service funds are used by management to charge the costs of certain activities, such as building construction and architectural, procurement, and technology services, to individual funds. The assets and liabilities of the internal service funds are included in governmental activities in the Statement of Net Position, excluding amounts for activity between the internal service funds and governmental funds. (7,798,090)
- Bond premiums/discounts and prepaid insurance charges are amortized over the life of the bonds and are included in the governmental activities in the Statement of Net Position. (4,381,983)
- Deferred inflows and outflows of resources related to pension transactions are not reported in the funds. 1,810,250
- Deferred inflows and outflows of resources resulting from bond refunding gains and losses, respectively, are amortized over the life of the bonds and are not reported in the funds. 563,989
- General obligation bonds and related accrued interest totaling \$75,977,987, revenue bonds totaling \$6,936,807, and commercial paper totaling \$771,215 are not due and payable in the current period and are not reported in the funds. (83,686,009)
- The following liabilities are not due and payable in the current period and are not reported in the funds:

Compensated absences	(3,622,022)	
Capital leases	(370,182)	
Net pension liability	(63,131,928)	
Net other postemployment benefits obligation	(24,370,278)	
Mandated cost claims	(2,764,469)	
Workers' compensation	(3,485,636)	
Proposition 98 funding guarantee	(996,740)	
Pollution remediation obligations	(1,021,854)	
Other noncurrent liabilities	(14,133)	
		(99,777,242)

Net position of governmental activities **\$ (34,884,973)**

The notes to the financial statements are an integral part of this statement.

Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds to the Statement of Activities

(amounts in thousands)

Net change in fund balances – total governmental funds **\$ 4,798,574**

Amounts reported for governmental activities in the Statement of Activities are different from those in the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds because:

- Governmental funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. In the current year, these amounts are:

Purchase of assets	7,550,591	
Disposal of assets	(3,899,467)	
Depreciation expense, net of asset disposal	(760,016)	2,891,108
- Some revenues in the Statement of Activities do not provide current financial resources and, therefore, are unavailable in governmental funds. 234,735
- Internal service funds are used by management to charge the costs of certain activities, such as building construction and architectural services, procurement, and technology, to individual funds. The net revenue (expense) of the internal service funds is reported with governmental activities. (65,414)
- The issuance of long-term debt instruments provides current financial resources to governmental funds, while the repayment of the principal of long-term debt is an expenditure of governmental funds. Neither transaction, however, has any effect on the Statement of Activities. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the Statement of Activities. The following shows the effect of these differences in the treatment of long-term debt and related items:

	General Obligation Bonds	Revenue Bonds	Certificates of Participation and Commercial Paper	Total	
Debt issued	(7,316,280)	(162,500)	(1,816,520)	(9,295,300)	
Premium on debt issued	(1,017,928)	(19,992)	—	(1,037,920)	
Accreted interest	—	(45,346)	—	(45,346)	
Principal repayments	5,302,930	87,831	1,539,105	6,929,866	
Payments to refund long-term debt	4,172,348	205,980	—	4,378,328	
Related expenses not reported in governmental funds:					
Premium/discount amortization	362,554	20,507	(30)	383,031	
Deferred gain/loss on refunding	(33,143)	(16,028)	(46)	(49,217)	
Prepaid insurance	—	(619)	—	(619)	
Accrued interest	(6,251)	1,132	—	(5,119)	
	1,464,230	70,965	(277,491)		1,257,704

(continued)

- The following expenses reported in the Statement of Activities do not require the use of current financial resources and, therefore, are not recognized as expenditures in governmental funds. Once the use of current financial resources is required, expenditures are recognized in governmental funds but are eliminated from the Statement of Activities. In the current period, the net adjustment consists of:

Compensated absences	(94,077)	
Capital leases	(95,422)	
Net pension liability	1,598,122	
Net other postemployment benefits obligation	(3,294,378)	
Mandated cost claims	23,170	
Workers' compensation	(84,046)	
Proposition 98 funding guarantee	259,729	
Pollution remediation obligations	75,782	
Other noncurrent liabilities	<u>3,258</u>	
		(1,607,862)
Change in net position of governmental activities		<u>\$ 7,508,845</u>
		(concluded)

Notes to the Financial Statements

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements present information on the financial activities of the State of California over which the Governor, the Legislature, and other elected officials have direct or indirect governing and fiscal control. These financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP). The provisions of the following Governmental Accounting Standards Board (GASB) Statements have been implemented for the year ended June 30, 2016:

GASB Statement No. 72, *Fair Value Measurement and Application*, effective for the fiscal year ended June 30, 2016, defines fair value and provides guidance for determining fair value measurement for financial reporting purposes, applying fair value to certain investments, and disclosures related to fair value measurements. A new schedule categorizing the State's investments by levels of fair value measurement hierarchy was added to Note 3, Deposits and Investments.

GASB Statement No. 73, *Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement No. 68, and Amendments to Certain Provisions of GASB Statements 67 and 68*, includes some provisions that are applicable to the State that are effective for the fiscal year ended June 30, 2016. The State does not offer any defined benefit pensions that are not within the scope of Statement No. 68; thus, the provisions of Statement No. 73 related to those pensions are not applicable. The provisions that amended Statements Nos. 67 and 68 are applicable to the State; however, implementation of these provisions had no impact on the financial statements for the year ended June 30, 2016.

GASB Statement No. 76, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*, became effective for the fiscal year ended June 30, 2016, and should be applied retroactively. The objective of this Statement is to identify the hierarchy of generally accepted accounting principles for governmental financial reporting and establish the framework for selecting those principles. This statement supersedes Statement No. 55, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*. Implementation of Statement No. 76 had no impact on the financial statements for the year ended June 30, 2016.

GASB Statement No. 79, *Certain External Investment Pools and Pool Participants*, with some provisions effective for the fiscal year ended June 30, 2016, and others effective for next fiscal year, establishes criteria for an external investment pool to qualify for making the election to measure all of its investments at amortized cost for financial reporting purposes. The State administers one external investment pool for local governments and public agencies, the Local Agency Investment Fund (LAIF). The California State Treasurer has determined that LAIF does not meet the criteria established by Statement No. 79 and, therefore, the election was *not* made. Implementation of Statement No. 79 had no impact on the financial statements for the year ended June 30, 2016.

A. Reporting Entity

These financial statements present the primary government of the State and its component units. The **primary government** consists of all funds, organizations, institutions, agencies, departments, and offices that are not legally separate from the State. **Component units** are organizations that are legally separate from the State, but for which the State is financially accountable, or organizations whose relationship with the State is such that exclusion would cause the State's financial statements to be misleading. Following is information on the blended, fiduciary, and discretely presented component units of the State.

1. Blended Component Units

Blended component units, although legally separate entities, are in substance part of the primary government's operations. Therefore, data from these blended component units are integrated into the appropriate funds for reporting purposes.

Building authorities are blended component units because they have been created through the use of joint exercise of powers agreements with various cities to finance the construction of state buildings. The building authorities' financial activities are reported in capital projects funds. As a result, capital lease arrangements between the building authorities and the State have been eliminated from the financial statements. Instead, only the underlying capital assets and the debt used to acquire them are reported in the government-wide financial statements. For information regarding obtaining copies of the financial statements of the building authorities, email the State Controller's Office, State Accounting and Reporting Division at StateGovReports@sco.ca.gov.

The *Golden State Tobacco Securitization Corporation (GSTSC)* is a not-for-profit corporation established through legislation in September 2002 solely for the purpose of purchasing Tobacco Settlement Revenues from the State. The five voting members of the State Public Works Board serve ex officio as the directors of the corporation. The GSTSC is authorized to issue bonds as necessary to provide sufficient funds for carrying out its purpose. The GSTSC's financial activity is reported in the combining statements in the Nonmajor Governmental Funds section as a special revenue fund. For information regarding obtaining copies of the financial statements of GSTSC, contact the Department of Finance, Natural Resources, Energy, Environmental, and Capital Outlay Section, 915 L Street, 9th Floor, Sacramento, California 95814.

2. Fiduciary Component Units

The State has two legally separate fiduciary component units that administer pension and other employee benefit trust funds. The State appoints a voting majority of the board members of both plans which, due to their fiduciary nature, are presented in the Fiduciary Fund Statements as pension and other employee benefit trust funds, along with other primary government fiduciary funds.

The *California Public Employees' Retirement System (CalPERS)* administers pension plans for state employees, non-teaching school employees, and employees of California public agencies. Its Board of Administration has plenary authority and fiduciary responsibility for the investment of monies and the administration of the plan. CalPERS administers the following seven pension and other employee benefit trust funds: the Public Employees' Retirement Fund, the Judges' Retirement Fund, the Judges' Retirement Fund II, the Legislators' Retirement Fund, the State Peace Officers' and Firefighters' Defined Contribution Plan Fund, the Public Agency Deferred Compensation Plan, and the public employee Supplemental Contributions Program Fund. CalPERS' separately issued financial statements may be found on its website at www.CalPERS.ca.gov.

The *California State Teachers' Retirement System (CalSTRS)* administers pension benefit plans for California public school teachers and certain other employees of the public school system. The State is financially accountable for CalSTRS. CalSTRS administers the following four pension and other employee benefit trust funds: the Defined Benefit Program, the Defined Benefit Supplement Program, the Cash Balance Benefit Program, and the Replacement Benefit Program. CalSTRS' separately issued financial statements may be found on its website at www.CalSTRS.com.

3. Discretely Presented Component Units

Enterprise activity of discretely presented component units is reported in a separate column in the government-wide financial statements. Discretely presented component units are legally separate from the primary government and usually provide services to entities and individuals outside the primary government. Discretely presented component units that report enterprise activity include the University of California, the California Housing Finance Agency, and nonmajor component units. Most component units separately issue their own financial statements. In general, the notes to the financial statements in this publication do not include information found in the component units' separately issued financial statements. Instead, references to the individual component unit financial statements are provided where applicable.

The *University of California* was founded in 1868 as a public, state-supported, land-grant institution. It was written into the State Constitution of 1879 as a public trust to be administered by a governing board, the Regents of the University of California (Regents). The University is a component unit of the State because the State appoints a voting majority of the Regents and provides financial assistance to the University. The University offers defined benefit pension plans and defined contribution pension plans to its employees through the University of California Retirement System (UCRS), a fiduciary responsibility of the Regents. The financial information of the UCRS is not included in the financial statements of this report due to its fiduciary nature. The University's financial statements may be found on its website at www.ucop.edu.

The *California Housing Finance Agency (CalHFA)* was created by the Zenovich-Moscone-Chacon Housing and Home Finance Act, as amended. CalHFA's purpose is to finance the housing needs of persons and families of low and moderate income. It is a component unit of the State because the State appoints a voting majority of CalHFA's governing board and the executive director, who administers the day-to-day operations. CalHFA's financial statements may be found on its website at www.CalHFA.ca.gov.

State legislation created various nonmajor component units to provide certain services outside the primary government and to provide certain private and public entities with a low-cost source of financing for programs deemed to be in the public interest. California State University auxiliary organizations are considered component units because they exist entirely or almost entirely for the direct benefit of the universities. The remaining nonmajor component units are considered component units because the majority of members of their governing boards are appointed by or are members of the primary government, and the primary government can impose its will on the entity; or the entity provides a specific financial benefit to or imposes a financial burden on the primary government. For information regarding obtaining copies of the financial statements of these component units, email the State Controller's Office, State Accounting and Reporting Division at StateGovReports@sco.ca.gov.

The nonmajor consolidated component unit segments are:

California State University auxiliary organizations, which provide services primarily to university students through foundations, associated student organizations, student unions, food service entities, book stores, and similar organizations.

Financing authorities, which provide financing for specific purposes. These agencies include:

- The *California Alternative Energy and Advanced Transportation Financing Authority*, which provides financing for alternative energy and advanced transportation technologies;
- The *California Infrastructure and Economic Development Bank*, which provides financing for business development and public improvements; and
- The *California Urban Waterfront Area Restoration Financing Authority*, which provides financing for coastal and inland urban waterfront restoration projects.

District agricultural associations, which exhibit all of the industries, industrial enterprises, resources, and products of the State (the district agricultural association's financial report is as of and for the year ended December 31, 2015).

Other component units, which include the following entities:

- The *University of California Hastings College of the Law*, which was established as the law department of the University of California to provide legal education programs and operates independently under its own board of directors. The college has a discretely presented component unit, the Foundation, which provides private sources of funds for academic programs, scholarships, and faculty research;
- The *State Assistance Fund for Enterprise, Business and Industrial Development Corporation*, which provides financial assistance to small business; and
- The *Public Employees' Contingency Reserve*, which provides health benefit plans for state employees and annuitants.

4. Joint Venture

A joint venture is an entity resulting from a contractual arrangement; it is owned, operated, or governed by two or more participants as a separate and specific activity subject to joint control. In such an arrangement, the participants retain an ongoing financial interest or an ongoing financial responsibility in the entity. These entities are not part of the primary government or a component unit.

The State participates in a joint venture called the *Capitol Area Development Authority (CADA)*. CADA was created in 1978 by the joint exercise of powers agreement between the primary government and the City of Sacramento for the location of state buildings and other improvements. CADA is a public entity, separate from the primary government and the city, and is administered by a board of five members—two appointed by the primary government, two appointed by the city, and one appointed by the affirmative vote of at least three of the other four members of the board. The primary government designates the chairperson of the board. Although the primary government does not have an equity interest in CADA, it does have an ongoing financial interest. The primary government subsidizes CADA's operations by leasing land to CADA without consideration; however, the primary government is not obligated to do so. At June 30, 2016, CADA had total assets and deferred outflows of resources of \$33.6 million, total liabilities and deferred inflows of resources of \$21.3 million, and total net position of \$12.3 million. Total revenues for the fiscal year were \$11.4 million and expenses were \$8.8 million, resulting in an increase in net position of \$2.6 million. As the primary government does not have equity interest in CADA, CADA's financial information is not included in the financial statements of this report. Separately issued financial statements may be obtained from the Capitol Area Development Authority, 1522 14th Street, Sacramento, California 95814-5958 or on its website at www.cadanet.org.

5. Related Organizations

A related organization is an organization for which a primary government is accountable because that government appoints a voting majority of the organization's governing board, but for which it is not financially accountable.

Chapter 854 of the Statutes of 1996 created an *Independent System Operator (ISO)*, a state-chartered, nonprofit market institution. The ISO provides centralized control of the statewide electrical transmission grid to ensure the efficient use and reliable operation of the transmission system. The ISO is governed by a five-member board, the members of which are appointed by the Governor and confirmed by the Senate. The State's accountability for this institution does not extend beyond making the initial oversight board appointments. As the primary government is not financially accountable for the ISO, the financial information of this institution is not included in the financial statements of this report. For information regarding obtaining copies of the financial statements of the ISO, contact the Independent System Operator, P.O. Box 639014, Folsom, California 95763-9014 or go to its website at www.caiso.com.

The *California Earthquake Authority (CEA)*, a legally separate organization, offers earthquake insurance for California homeowners, renters, condominium owners, and mobilehome owners. A three-member board of state-elected officials governs the CEA. The State's accountability for this institution does not extend beyond making the appointments. As the primary government is not financially accountable for the CEA, the financial information of this institution is not included in the financial statements of this report. For information regarding obtaining copies of the financial statements of the CEA, contact the California Earthquake Authority, 801 K Street, Suite 1000, Sacramento, California 95814 or go to its website at www.earthquakeauthority.com.

The *State Compensation Insurance Fund (State Fund)* was established by the State through legislation enacted in 1913 to provide an available market for workers' compensation insurance to employees located in California. State Fund operates in competition with other insurance carriers to serve California businesses. The State appoints all 11 members of the State Fund's governing board. The State's accountability for this institution does not extend beyond making the initial oversight board appointments. As the primary government is not financially accountable for the State Fund, the financial information of this institution is not included in the financial statements of this report. For information regarding obtaining copies of the financial statements of the State Fund, contact the State Compensation Insurance Fund, 333 Bush Street, 8th Floor, San Francisco, California 94104 or go to its website at www.statefundca.com.

The *California Health Benefit Exchange (the Exchange)*, an independent public entity, offers new health insurance to individuals, families, and small businesses. A five-member board of state-elected officials governs the Exchange. The State's accountability for this institution does not extend beyond making the appointments. As the primary government is not financially accountable for the Exchange, the financial information of this institution is not included in the financial statements of this report. For information regarding obtaining copies of the financial statements of the Exchange, contact Covered California, P.O. Box 989725, West Sacramento, California 95798-9725.

The *California Pollution Control Financing Authority (CPCFA)* was created through the California Pollution Control Financing Authority Act of 1972. The CPCFA is a legally separate entity that provides financing for pollution control facilities. A three-member board of state-elected officials governs the CPCFA. The State's accountability for this institution does not extend beyond making the appointments. As the primary government is not financially accountable for the CPCFA, the financial information of this institution is not included in the financial statements of this report. For information regarding obtaining copies of the financial statements of the CPCFA, contact the State Treasurer's Office, 915 Capitol Mall, Room 457, Sacramento, California 95814 or go to its website at www.treasurer.ca.gov/cpcfa.

The *California Health Facilities Financing Authority (CHFFA)* was established by the State through legislation enacted in 1979. The CHFFA is a legally separate entity that provides financing for the construction, equipping, and acquisition of health facilities. A nine-member board of state-elected officials and appointees govern the CHFFA. The State's accountability for this institution does not extend beyond making the appointments. As the primary government is not financially accountable for the CHFFA, the financial information of this institution is not included in the financial statements of this report. For information regarding obtaining copies of the financial statements of the CHFFA, contact the State Treasurer's Office, 915 Capitol Mall, Suite 590, Sacramento, California 95814 or go to its website at www.treasurer.ca.gov/chffa.

The *California Educational Facilities Authority (CEFA)* was created by Board of Control approval in 1974. The CEFA is a legally separate entity established to issue revenue bonds to finance loans for students attending public and private colleges and universities, and to assist private educational institutions of higher learning in financing the expansion and construction of educational facilities. A five-member board of state-elected officials and appointees govern the CEFA. The State's accountability for this institution does not extend beyond making the appointments. As the primary government is not financially accountable for the CEFA, the financial information of this institution is not included in the financial statements of this report. For information regarding obtaining copies of the financial statements for the CEFA, contact the State Treasurer's Office, 915 Capitol Mall, Suite 590, Sacramento, California 95814 or go to its website at www.treasurer.ca.gov/cefa.

The *California School Finance Authority (CSFA)* was created in 1985. The CSFA is a legally separate entity that provides loans to school and community college districts to assist them in obtaining equipment and facilities. A three-member board of state officials governs the CSFA. The State's accountability for this institution does not extend beyond making the appointments. As the primary government is not financially accountable for the CSFA, the financial information for this institution is not included in the financial statements of this report. For information regarding obtaining copies of the financial statements of the CSFA, contact the State Treasurer's Office, 300 South Spring Street, Suite 8500, Los Angeles, California 90013 or go to its website at www.treasurer.ca.gov/csfa.

B. Government-wide and Fund Financial Statements

Government-wide financial statements (the Statement of Net Position and the Statement of Activities) provide information on all of the nonfiduciary activities of the primary government and its component units. The primary government is reported separately from legally separate component units for which the State is financially accountable. Within the primary government, the State's governmental activities, which are normally supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. The effect of interfund activity has been removed from the statements, with the exception of amounts between governmental and business-type activities, which are presented as internal balances and transfers. Centralized services provided by the General Fund for other funds are charged as direct costs to the funds that received those services. Also, the General Fund recovers the cost of centralized services provided to federal programs from the federal government.

The Statement of Net Position reports all of the financial and capital resources of the government as a whole in a format in which assets and deferred outflows of resources equal liabilities and deferred inflows of resources, plus net position. The Statement of Activities demonstrates the degree to which the expenses of a given function are offset by program revenues. Program revenues include charges to customers who purchase, use, or directly benefit from goods, services, or privileges provided by a given function. Program revenues also include grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items that are not program-related are reported as general revenues.

Fund financial statements are provided for governmental funds, proprietary funds, fiduciary funds and similar component units, and discretely presented component units. A fund is a fiscal and accounting entity with a self-balancing set of accounts. Fund accounting segregates funds according to their intended purpose and is used to aid management in demonstrating compliance with finance-related legal and contractual provisions. The State maintains the minimum number of funds consistent with legal and managerial requirements. Fiduciary funds, although excluded from the government-wide statements, are included in the fund financial statements. Major governmental and enterprise funds are reported in separate columns in the fund financial statements. Nonmajor governmental and proprietary funds are grouped into separate columns. Discretely presented component unit statements, which follow the fiduciary fund statements, also separately report the enterprise activity of the major discretely presented component units. In this report, the enterprise activity of nonmajor discretely presented component units is grouped in a separate column.

Governmental fund types are used to account for activities primarily supported by taxes, grants, and similar revenue sources.

The State reports the following major governmental funds:

The *General Fund* is the main operating fund of the State. It accounts for transactions related to resources obtained and used for those services that need not be accounted for in another fund.

The *Federal Fund* accounts for the receipt and use of grants, entitlements, and shared revenues received from the federal government that are all restricted by federal regulations.

The *Transportation Fund* accounts for fuel taxes, including the State's diesel, motor vehicle, and fuel use taxes; bond proceeds; automobile registration fees; and other revenues that are restricted for transportation purposes, including highway and passenger rail construction and transportation safety programs.

The *Environmental and Natural Resources Fund* accounts for fees, bond proceeds, and other revenues that are restricted for maintaining the State's natural resources and improving the environmental quality of its air, land, and water.

Proprietary fund types focus on the determination of operating income, changes in net position, financial position, and cash flows.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. Operating expenses include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses. For its proprietary funds, the State applies all applicable GASB pronouncements.

The State has two proprietary fund types: enterprise funds and internal service funds.

Enterprise funds record business-type activity for which a fee is charged to external users for goods and services. In addition, the State is required to report activities as enterprise funds in the context of the activity's principal revenue sources when any of the following criteria are met:

- The activity's debt is secured solely by fees and charges of the activity;
- There is a legal requirement to recover costs; or
- The pricing policies of fees and charges are designed to recover costs.

The State reports the following major enterprise funds:

The *Electric Power Fund* accounts for the acquisition and resale of electric power to retail end-use customers.

The *Water Resources Fund* accounts for charges to local water districts and the sale of excess power to public utilities.

The *State Lottery Fund* accounts for the sale of California State Lottery (Lottery) tickets and the Lottery's payments for education.

The *Unemployment Programs Fund* accounts for employer and worker contributions used for payments of unemployment insurance and disability benefits.

The *California State University Fund* accounts for student fees and other receipts from gifts, bequests, donations, federal and state grants, and loans that are used for educational purposes.

Nonmajor enterprise funds account for additional operations that are financed and operated in a manner similar to private business enterprises.

Additionally, the State reports *internal service funds* as a proprietary fund type with governmental activity. Internal service funds account for goods or services provided to other agencies, departments, or governments on a cost-reimbursement basis. The goods and services provided include architectural services, public building construction and improvements, printing and procurement services, goods produced by inmates of state prisons, data processing services, and administrative services related to water delivery. Internal service funds are included in the governmental activities at the government-wide level.

Fiduciary fund types are used to account for assets held by the State. The State acts as a trustee or as an agent for individuals, private organizations, other governments, or other funds. Fiduciary funds, including fiduciary component units, are not included in the government-wide financial statements.

The State has the following four fiduciary fund types:

Private purpose trust funds account for all trust arrangements, other than those properly reported in pension or investment trust funds, whereby principal and income benefit individuals, private organizations, or other governments. The following are the State's largest private purpose trust funds:

The *Scholarshare Program Trust Fund* accounts for money received from participants to fund their beneficiaries' higher education expenses at certain postsecondary educational institutions.

The *Unclaimed Property Fund* accounts for unclaimed money and properties held in trust by the State. Unclaimed money is remitted to the General Fund where it can be used by the State until it is claimed.

Pension and other employee benefit trust funds of the primary government and fiduciary component units account for transactions, assets, liabilities, and net position available for plan benefits of the retirement systems and for other employee benefit programs.

An *investment trust fund* accounts for the deposits, withdrawals, and earnings of the Local Agency Investment Fund, an external investment pool for local governments and public agencies.

Agency funds account for assets held by the State, which acts as an agent for individuals, private organizations, or other governments. The following are the State's largest agency funds:

The *Receipting and Disbursing Fund* accounts for the collection and disbursement of revenues and receipts on behalf of local governments. This fund also accounts for receipts from numerous state funds, typically for the purpose of writing a single warrant when the warrant is funded by multiple funding sources.

The *Deposit Fund* accounts for various deposits, such as those from condemnation and litigation proceedings.

Discretely presented component units consist of certain organizations that have enterprise activity. The enterprise activity component units are the University of California, the California Housing Finance Agency, and nonmajor component units. In this report, all of the enterprise activity of the discretely presented component units is reported in a separate column in the government-wide financial statements and on separate pages following the fund financial statements.

C. Measurement Focus and Basis of Accounting

1. Government-wide Financial Statements

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when they are earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar transactions are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

2. Fund Financial Statements

The measurement focus and basis of accounting for the fund financial statements vary with the type of fund. **Governmental fund types** are presented using the current financial resources measurement focus. With this measurement focus, operating statements present increases and decreases in net current assets; the unassigned fund balance is a measure of available, spendable resources.

The accounts of the governmental fund types are reported using the modified accrual basis of accounting. Under the modified accrual basis, revenues are recorded as they become measurable and available, and expenditures are recorded at the time the liabilities are incurred. The State records revenue sources when they are earned or when they are due, provided they are measurable and available within the ensuing 12 months. When an asset is recorded in a governmental fund statement, but the revenue is not available within the ensuing 12 months, the State reports a deferred inflow of resources until such time as the revenue becomes available. Principal tax revenues susceptible to accrual are recorded as taxpayers earn income (personal income and corporation taxes), as sales are made (consumption and use taxes), and as a taxable event occurs (miscellaneous taxes), net of estimated tax overpayments.

Proprietary fund types, the investment trust fund, private purpose trust funds, and pension and other employee benefit trust funds are accounted for using the economic resources measurement focus. **Agency funds** are custodial in nature and do not measure the results of operations.

The accounts of the proprietary fund types, the investment trust fund, private purpose trust funds, pension and other employee benefit trust funds, and agency funds are reported using the accrual basis of accounting.

Under the accrual basis, most transactions are recorded when they occur, regardless of when cash is received or disbursed.

Lottery revenue and the related prize expenses are recognized when sales are made. Certain prizes are payable in deferred installments. Such liabilities are recorded at the present value of amounts payable in the future.

Discretely presented component units are accounted for using the economic resources measurement focus and the accrual basis of accounting.

D. Cash and Investments

The State considers cash and pooled investments, for the purpose of the Statement of Cash Flows, as cash and cash equivalents. Cash and cash equivalents are considered to be cash on hand; deposits in the State's pooled investment program; restricted cash and pooled investments for debt service, construction, and operations; restricted cash on deposit with fiscal agents (for example, revenue bond trustees); and highly liquid investments with an original maturity date of three months or less.

The State reports investments at fair value, as prescribed by GAAP, which was recently updated by the provisions of GASB Statement No. 72, *Fair Value Measurement and Application*. Additional information on the State's investments and fair value measurement can be found in Note 3, Deposits and Investments.

E. Receivables

Amounts are aggregated into a single receivables account net of allowance for uncollectible amounts. The detail of the primary government's accounts receivable can be found in Note 4, Accounts Receivable.

F. Inventories

Inventories of supplies are reported at cost and inventories held for resale are stated at the lower of average cost or market. In the government-wide financial statements, inventories for both governmental and business-type activities are expensed when they are consumed and unused inventories are reported as an asset on the Statement of Net Position. In the fund financial statements, governmental funds report inventories as expenditures when purchased, and proprietary funds report inventories as expenditures when consumed. The discretely presented component units have inventory policies similar to those of the primary government.

G. Net Investment in Direct Financing Leases

The State Public Works Board accounts for its activities in the Public Buildings Construction Fund, an internal service fund, and has entered into lease-purchase agreements with various other primary government agencies and certain local agencies. The payments from these leases are used to satisfy the principal and interest requirements of revenue bonds issued by the State Public Works Board to finance the cost of projects such as acquisition and construction of facilities and equipment. Upon expiration of these leases, title to the facilities and projects transfers to the primary government agency or the local agency. The State Public Works Board records the net investment in direct financing leases at the net present value of the minimum lease payments in the internal service fund financial statements. As the majority of this lease receivable is from governmental funds, it is eliminated within the governmental activities column of the government-wide Statement of Net Position.

The California State University (CSU) system accounts for its lease activities in the California State University Fund, a major enterprise fund, and has entered into 30-year capital lease agreements with certain

auxiliary organizations. These agreements lease existing and newly constructed facilities to the CSU auxiliary organizations. A portion of the proceeds from certain revenue bonds issued by CSU were used to finance the construction of these facilities.

H. Long-term Prepaid Charges

The long-term prepaid charges account in the enterprise funds primarily represents operating and maintenance costs that will be recognized in the Water Resources Fund as expenses over the remaining life of long-term state water supply contracts. These costs are billable in future years. In addition, the account includes unbilled interest earnings on unrecovered capital costs that are recorded as long-term prepaid charges. These charges are recognized when billed in the future years under the terms of water supply contracts. Long-term prepaid charges are also included in the State Lottery Fund. These prepaid charges are incurred in connection with certain contracts that extend beyond a one-year period, which are amortized as expenses over the remaining life of the contracts. The long-term prepaid charges for the Public Buildings Construction Fund, an internal service fund, include prepaid insurance costs on revenue bonds issued. In the government-wide financial statements, the prepaid charges for governmental activities include prepaid insurance costs on revenue bonds issued.

I. Capital Assets

Capital assets are categorized into land, state highway infrastructure, collections, buildings and other depreciable property, intangible assets, and construction in progress. The buildings and other depreciable property account includes buildings, improvements other than buildings, equipment, certain infrastructure assets, certain books, and other capitalized and depreciable property. Intangible assets include computer software, land-use rights, patents, copyrights, and trademarks. The value of the capital assets, including the related accumulated depreciation and amortization, is reported in the applicable governmental, business-type, or component unit activities columns in the government-wide Statement of Net Position.

The primary government has a large collection of historical and contemporary treasures that have important documentary and artistic value. These assets are not capitalized or depreciated because they are cultural resources and cannot reasonably be valued and/or the assets have inexhaustible useful lives. These treasures and works of art include furnishings, portraits and other paintings, books, statues, photographs, and miscellaneous artifacts. These collections meet the conditions for exemption from capitalization because the collections are held for public exhibition, education, or research in furtherance of public service, rather than financial gain; protected, kept unencumbered, cared for, and preserved; and subject to an organizational policy that requires the proceeds from sales of collection items to be used to acquire other items for collections.

In general, capital assets of the primary government are defined as assets that have a normal useful life of at least one year and a unit cost of at least \$5,000. These assets are recorded at historical cost or estimated historical cost, including all costs related to the acquisition. Donated capital assets are recorded at the fair market value on the date the gift was received. Major capital asset outlays are capitalized as projects are constructed.

Buildings and other depreciable or amortizable capital assets are depreciated using the straight-line method with no salvage value for governmental activities. Generally, buildings and other improvements are depreciated over 40 years, equipment is depreciated over five years, and intangible assets are amortized over 10 to 20 years. Depreciable or amortizable assets of business-type activities are depreciated or amortized using the straight-line method over their estimated useful or service lives, ranging from three to 100 years.

California has elected to use the modified approach for capitalizing the infrastructure assets of the state highway system. The state highway system is maintained by the California Department of Transportation. By

using the modified approach, the infrastructure assets of the state highway system are not depreciated and all expenditures made for those assets, except for additions and improvements, are expensed in the period incurred. All additions and improvements made after June 30, 2001, are capitalized. All infrastructure assets that are related to projects completed prior to July 1, 2001, are recorded at the historical costs contained in annual reports of the American Association of State Highway and Transportation Officials and the Federal Highway Administration.

The capital assets of the discretely presented component units are reported at cost at the date of acquisition or at fair market value at the date of donation, in the case of gifts. They are depreciated or amortized over their estimated useful service lives.

J. Long-term Obligations

Long-term obligations consist of unmatured general obligation bonds, unmatured revenue bonds, capital lease obligations, certificates of participation, commercial paper, net pension liability, net other postemployment benefits obligation (OPEB), employees' compensated absences and workers' compensation claims, pollution remediation obligations, amounts owed for lawsuits, reimbursement for costs mandated by the State, outstanding Proposition 98 funding guarantee owed to schools, the liability for Lottery prizes and annuities, loans from other governments, and the primary government's share of the University of California's pension liability that is due in more than one year. In the government-wide financial statements, the obligations are reported as liabilities in the applicable governmental activities, business-type activities, and component units columns of the Statement of Net Position. The current portion—amount due within one year—of the long-term obligations is reported under current liabilities.

Pollution remediation obligations are recorded by the State when one or more of the GASB Statement No. 49 obligating events have occurred and when a reasonable estimate of the remediation cost is available. These liabilities are measured using actual contract costs, where no change in cost is expected, or the expected cash flow technique. The remediation obligation estimates that appear in this report are subject to change over time. Costs may vary due to price fluctuations, changes in technology, changes in potential responsible parties, results of environmental studies, changes to statutes or regulations, and other factors that could result in revisions to these estimates. Prospective recoveries from responsible parties may reduce the State's obligation.

Bond premiums and discounts for business-type activities and component units are deferred and amortized over the life of the bonds. In these instances, bonds payable is reported net of the applicable premium and discount. Bond premiums and discounts for governmental funds are reported as other financing sources (uses). However, in the government-wide financial statements, the bonds payable for governmental activities is reported net of the applicable unamortized premium and discount. Bond issuance costs, excluding prepaid insurance, are expensed when incurred.

With advance approval from the Legislature, certain authorities and state agencies may issue revenue bonds. Principal and interest on revenue bonds are payable from the pledged revenues of the respective funds, building authorities, and agencies. The General Fund has no legal liability for payment of principal and interest on revenue bonds. With the exception of certain special revenue funds (Transportation and the Golden State Tobacco Securitization Corporation) and the building authorities capital projects fund, the liability for revenue bonds is recorded in the respective fund.

K. Compensated Absences

The government-wide financial statements report both the current and the noncurrent liabilities for compensated absences, which are vested unpaid vacation, annual leave, and other paid leave programs.

However, unused sick-leave balances are not included in the compensated absences because they do not vest to employees. In the governmental fund financial statements, only the compensated absences liability for employees who have left state service and have unused reimbursable leave at fiscal year-end is included. The amounts of vested unpaid vacation and annual leave accumulated by state employees are accrued in proprietary funds when incurred. In the discretely presented component units, the compensated absences are accounted for in the same manner as in the proprietary funds of the primary government.

L. Deferred Outflows and Deferred Inflows of Resources

The government-wide and fund financial statements report deferred outflows of resources and deferred inflows of resources.

1. Deferred Outflows of Resources

Deferred outflows of resources are the consumption of assets that are applicable to future reporting periods. Deferred outflows of resources are presented separately after “Total Assets” in the Balance Sheet and Statement of Net Position.

Deferred outflows of resources consist of the following transactions:

- *Loss on Refunding of Debt:* The defeasance of previously outstanding general obligation and revenue bonds results in deferred refunding losses for governmental activities, business-type activities, and component units. These deferred losses are recognized as a component of interest expense over the remaining life of the old debt or the life of the new debt, whichever is shorter.
- *Decrease in Fair Value of Hedging Derivatives:* Negative changes in the fair value of hedging derivatives are reported for component units.
- *Net Pension Liability:* Increases in net pension liability that are not recognized in pension expense for the reporting period are reported as deferred outflows of resources related to pensions. Differences between expected and actual experience with regard to economic or demographic factors; changes of assumptions about future economic or demographic factors, or of other inputs used by the actuaries to determine total pension liability; and increases in the State’s proportionate share of net pension liability for plans that have a special funding situation, such as CalSTRS, are all recognized in pension expense over the average of the expected remaining service lives of participating employees. A deferred outflow of resources is also reported when projected earnings on pension plan investments exceed actual earnings, with the net difference amortized to pension expense over a five-year period beginning in the current reporting period. Employer contributions, and state contributions in the case of CalSTRS’ special funding situation, made subsequent to the measurement date are reported as deferred outflows of resources related to pensions and reduce net pension liability in the following year. Deferred outflows of resources related to net pension liability are reported for governmental activities, business-type activities, fiduciary funds, and component units.

2. Deferred Inflows of Resources

Deferred inflows of resources are the acquisition of assets that are applicable to future reporting periods. Deferred inflows of resources are presented separately after “Total Liabilities” in the Balance Sheet and Statement of Net Position.

The State's deferred inflows of resources consist of the following transactions:

- *Unavailable Revenues:* Governmental funds report deferred inflows of resources for earned and measurable revenue from long-term receivables that is not available within 12 months of the end of the reporting period. These deferred amounts are recognized as revenue in the periods that they become available.
- *Gain on Refunding of Debt:* The defeasance of previously outstanding general obligation and revenue bonds results in deferred refunding gains for governmental activities and discretely presented component units. These deferred gains are recognized as a component of interest expense over the remaining life of the old debt or the life of the new debt, whichever is shorter.
- *Service Concession Arrangements:* The State and its component units have entered into service concession arrangements with third parties for park facility services, student housing, and certain other services. The upfront payment received or present value of installment payments expected to be received from the third parties are reported as deferred inflows of resources.
- *Net Pension Liability:* Reductions in net pension liability that are not recognized in pension expense for the reporting period are reported as deferred inflows of resources related to pensions. Differences between expected and actual experience with regard to economic or demographic factors; changes of assumptions about future economic or demographic factors, or of other inputs used by the actuaries to determine total pension liability; and decreases in the State's proportionate share of net pension liability for plans that have a special funding situation, such as CalSTRS, are all recognized against pension expense over the average of the expected remaining service lives of participating employees. A deferred inflow of resources is also reported when actual earnings on pension plan investments exceed projected earnings, with the net difference amortized against pension expense over a five-year period beginning in the current reporting period. Deferred inflows of resources related to net pension liability are reported for governmental activities, business-type activities, fiduciary funds, and component units.
- *Other Deferred Inflows of Resources:* Revenues generated from current rates charged by regulated business-type activities that are intended to recover costs expected to be incurred in the future are reported in the government-wide Statement of Net Position. A component unit's sale of future royalty payments plus residual interest made to a third party are reported as deferred inflows of resources and will be recognized on a straight-line basis through the expiration of the patents.

M. Abnormal Account Balances

In the 2015-16 fiscal year, the Water Resources Electric Power Fund had a net refund of \$182 million in power charges revenue. The refund resulted from lower power sales, return of prior year over-collection, and return of reserves as lower levels of reserve were required. During the 2015-16 fiscal year, the fund returned \$178 million through adjustments to power charges and through separate monthly payments to its ratepayers.

N. Nonmajor Enterprise Segment Information

Two nonmajor enterprise fund segments are displayed discretely in the Combining Statement of Net Position; the Combining Statement of Revenues, Expenses, and Changes in Fund Net Position; and the Combining Statement of Cash Flows of the nonmajor enterprise funds. A *segment* is an identifiable activity reported as or within an enterprise fund or another stand-alone entity for which debt is outstanding and a revenue stream has been pledged in support of that debt. In addition, to qualify as a segment, an activity must be subject to an external requirement to separately account for revenues, expenses, gains and losses, assets and deferred outflows of resources, and liabilities and deferred inflows of resources. All of the activities reported for the fund segments listed below meet these requirements.

State Water Pollution Control Revolving Fund: Interest charged on loans to communities for construction of water pollution control facilities and projects.

Housing Loan Fund: Interest payments from low-interest, long-term farm and home mortgage loan contracts to eligible veterans living in California.

O. Net Position and Fund Balance

The difference between fund assets, deferred outflows of resources, liabilities, and deferred inflows of resources is called “net position” on the government-wide financial statements, the proprietary and fiduciary fund statements, and the component unit statements; it is called “fund balance” on the governmental fund statements.

1. Net Position

The government-wide financial statements include the following categories of net position:

Net investment in capital assets represents capital assets, net of accumulated depreciation, reduced by the outstanding debt attributable to the acquisition, construction, or improvement of those assets.

Restricted net position results from transactions with purpose restrictions and is designated as either *nonexpendable* or *expendable*. *Nonexpendable restricted* net position is subject to externally imposed restrictions that must be retained in perpetuity. *Expendable restricted* net position is subject to externally imposed restrictions that can be fulfilled by actions of the State. As of June 30, 2016, the government-wide financial statements show restricted net position for the primary government of \$34.8 billion, of which \$7.9 billion is due to enabling legislation.

Unrestricted net position is neither restricted nor invested in capital assets.

2. Fund Balance

In the fund financial statements, proprietary funds include categories of net position similar to those in the government-wide financial statements. Fund balance amounts for governmental funds are reported as nonspendable, restricted, committed, assigned, or unassigned.

Nonspendable fund balance includes amounts that cannot be spent because they are not in spendable form (inventories; prepaid amounts; long-term portion of loans or notes receivable; or property held for resale unless the proceeds are restricted, committed, or assigned) or they are legally or contractually required to remain intact.

Restricted fund balance has constraints placed upon the use of the resources either by an external party (creditors, grantors, contributors, or laws and regulations of other governments) or through a constitutional provision or enabling legislation.

Committed fund balance can be used only for specific purposes pursuant to constraints imposed by state law as adopted by the California State Legislature. The state law that commits fund balance to a specific purpose must have been adopted prior to the end of the reporting period, but the amount subject to the constraint may be determined in a subsequent period. Committed fund balance incorporates contractual obligations to the extent that existing resources in the fund have been specifically committed for use in satisfying those contractual requirements.

Assigned fund balance: California does not have a formal policy to delegate authority to assign resources. However, fund balance can be classified as assigned when a purchase order creates an outstanding encumbrance amount, unless the purchase order relates to restricted or committed resources. Furthermore, in governmental funds created by state law for a specific purpose, other than the General Fund, all resources that are not reported as nonspendable, restricted, or committed are classified as assigned for the purpose of the respective funds.

Unassigned fund balance is the residual amount of the General Fund not included in the four classifications described above. In other governmental funds in which expenditures incurred for specific purposes exceeded amounts restricted, committed, or assigned to those purposes, a negative unassigned fund balance is reported.

Fund balance spending order: For the purpose of reporting fund balance in this financial report under GASB Statement No. 54, the State considers resources to be spent in the following order when an expenditure is incurred for which these classifications are available: restricted, committed, assigned, and unassigned.

Fiduciary fund net position represents amounts held in trust for pension and other postemployment benefits, deferred compensation participants, pool participants, individuals, organizations, or other governments.

3. Budget Stabilization Account

In accordance with Article 16, Section 20 of the California State Constitution, the State maintains the Budget Stabilization Account. The Budget Stabilization Account is reported in the General Fund. By October 1 of each fiscal year, a transfer must be made from the General Fund to the Budget Stabilization Account in an amount equal to one-half of (a) 1.5% of the estimated General Fund revenues for that fiscal year and (b) personal capital gains tax revenues in excess of 8% of estimated General Fund taxes for that fiscal year less amounts that must be spent on Proposition 98. The remaining half of the calculated amount is used as appropriated by the State Legislature to pay down (1) interfund loans, (2) specified debts to local governments, and (3) debts for pension and retiree health benefits.

The State Legislature may suspend or reduce the transfer of funds to, or withdrawal of funds from, the Budget Stabilization Account if the Governor declares a budget emergency. For this purpose, budget emergency means either (1) a natural disaster or other event that creates a condition of extreme peril to the safety of persons or property, or (2) there is not enough money to keep General Fund spending at the highest level of the past three fiscal years (adjusted for changes in state population and cost of living). The amount of the withdrawal from the Budget Stabilization Account is limited to the actual amount needed for the natural disaster or to keep General Fund spending at the highest level of the past three years. In addition, if there was no budget emergency in the prior fiscal year, no more than one-half of the Budget Stabilization Account balance may be withdrawn; the entire remaining balance could be withdrawn in the second straight year of a budget emergency.

When the balance of the Budget Stabilization Account reaches 10% of the estimated General Fund revenues for that fiscal year, the amount that would have been transferred to the Budget Stabilization Account would instead be used to build and maintain infrastructure. At June 30, 2016, the Budget Stabilization Account had restricted fund balance of \$3.4 billion.

P. Restatement of Beginning Fund Balances and Net Position

1. Fund Financial Statements

The beginning fund balance of *governmental funds* increased by \$24 million. The net increase is comprised of a \$27 million increase in the Health Care Related Programs Fund, a nonmajor special revenue fund for the reclassification of a program previously reported in an agency fund and a decrease of \$3 million due to the overstatement of prior-year revenue reported in the Building Authorities Fund, a nonmajor capital projects fund.

The beginning net position of the *internal service funds* decreased by \$183 million due to the allocation of net pension liability and related amounts to a department included in the Other Internal Service Programs Fund. In the prior year, this amount was part of the unallocated total reported only within governmental activities in the government-wide financial statements.

The beginning net position of the *discretely presented component units* decreased by \$90 million (\$264 thousand in the California Housing Finance Agency Fund, a major component unit, and \$90 million in the District Agriculture Associations Fund, a nonmajor component unit) for the recognition of net pension liability and deferred outflows of resources from the first-year implementation of GASB Statements No. 68 and No. 71 for entities whose financial information is presented as of and for the year ended December 31, 2015.

2. Government-wide Financial Statements

The beginning net position of *governmental activities* increased by \$24 million. In addition to the \$24 million increase described in the previous section for governmental funds, the restatement also includes a \$35 million decrease for overstated capital assets and a \$35 million increase for overstated pollution remediation liability. As internal service funds are also included in *governmental activities* in the government-wide financial statements, there is no impact to *governmental activities* for the allocation of pension liability and related amounts described in the previous section for internal service funds.

The beginning net position of *component units* was restated as described in the previous section for discretely presented component units.

Q. Guaranty Deposits

The State is the custodian of guaranty deposits held to protect consumers, to secure the State's deposits in financial institutions, and to ensure payment of taxes and fulfillment of obligations to the State. Guaranty deposits of securities and other properties are not shown on the financial statements.

NOTE 2: BUDGETARY AND LEGAL COMPLIANCE

A. Budgeting and Budgetary Control

The State's annual budget is primarily prepared on a modified accrual basis for governmental funds. The Governor recommends a budget for approval by the Legislature each year. This recommended budget includes estimated revenues, but revenues are not included in the annual budget bill adopted by the Legislature. Under state law, the State cannot adopt a spending plan that exceeds estimated revenues.

Under the State Constitution, money may be drawn from the treasury only through a legal appropriation. The appropriations contained in the Budget Act, as approved by the Legislature and signed by the Governor, are the primary sources of annual expenditure authorizations and establish the legal level of control for the annual operating budget. The budget can be amended throughout the year by special legislative action, budget revisions by the Department of Finance, or executive orders of the Governor. Amendments to the original budget for the year ended June 30, 2016, increased spending authority for the budgetary/legal basis-reported General Fund and Transportation Funds, and decreased spending authority for the Environmental and Natural Resources Funds.

Appropriations are generally available for expenditure or encumbrance either in the year appropriated or for a period of three years if the legislation does not specify a period of availability. At the end of the availability period, the encumbering authority for the unencumbered balance lapses. Some appropriations continue indefinitely, while others are available until fully spent. Generally, encumbrances must be liquidated within two years from the end of the period in which the appropriation is available. If the encumbrances are not liquidated within this additional two-year period, the spending authority for these encumbrances lapses.

B. Legal Compliance

State agencies are responsible for exercising basic budgetary control and ensuring that appropriations are not overspent. The State Controller's Office is responsible for overall appropriation control and does not allow expenditures in excess of authorized appropriations.

Financial activities are mainly controlled at the appropriation level but can vary, depending on the presentation and wording contained in the Budget Act. The Budget Act appropriations are identified by department, reference item, and fund. The annual appropriated budget may establish detailed allocations to specific programs, projects, or sources of reimbursement within an appropriation. The Department of Finance can authorize adjustments between the detail allocations but cannot increase the amount of the overall appropriation. While the financial activities are controlled at various levels, the legal level of budgetary control—the extent to which management may amend the budget without seeking approval of the governing body—has been established in the Budget Act for the annual operating budget.

The Budgetary Comparison Schedule is not presented in this document at the legal level of budgetary control because such a presentation would be extremely lengthy and cumbersome. The State prepares a separate report, the Comprehensive Annual Financial Report Supplement, which includes statements that demonstrate compliance with the legal level of budgetary control in accordance with Government Accounting Standards Board's Codification of Governmental Accounting and Financial Reporting Standards, section 2400.121. The supplement includes the comparison of the annual appropriated budget with expenditures at the legal level of control. A copy of the Comprehensive Annual Financial Report Supplement is available upon request by emailing the State Controller's Office, State Accounting and Reporting Division at StateGovReports@sco.ca.gov.

NOTE 3: DEPOSITS AND INVESTMENTS

Cash balances not required for immediate use are invested by the State Treasurer. The State Treasurer administers a single pooled investment program comprising both an internal investment pool and an external investment pool (the Local Agency Investment Fund). A single portfolio of investments exists, with all participants having an undivided interest in the portfolio. Both pools are administered in the same manner.

A. Primary Government

1. Control of State Funds

The State's pooled investment program and certain funds of the primary government are allowed by state statutes, bond resolutions, and investment policy resolutions to invest in United States government securities, federal agency securities, negotiable certificates of deposit, bankers' acceptances, commercial paper, corporate bonds, bank notes, other debt securities, repurchase agreements, reverse repurchase agreements, and other investments.

Certain discretely presented component units and related organizations participate in the State Treasurer's Office pooled investment program. As of June 30, 2016, the discretely presented component units and related organizations account for approximately 3.4% of the State Treasurer's pooled investment portfolio. This program enables the State Treasurer's Office to combine available cash from all funds and to invest cash that exceeds current needs.

Both deposits and investments are included in the State's investment program. For certain banks, the State Treasurer's Office maintains cash deposits that cover uncleared checks deposited in the State's accounts and that earn income that compensates the banks for their services.

Demand and time deposits held by financial institutions as of June 30, 2016, totaling approximately \$7.8 billion, were insured by federal depository insurance or by collateral held by the State Treasurer's Office or an agent of the State Treasurer's Office in the State's name. The California Government Code requires that collateral pledged for demand and time deposits be deposited with the State Treasurer.

As of June 30, 2016, the State Treasurer's Office had on deposit with a fiscal agent amounts totaling \$22 million related to principal and interest payments to bondholders. These deposits were insured by federal depository insurance or by collateral held by an agent of the State Treasurer's Office in the State's name.

Certain funds have elected to participate in the pooled investment program even though they have the authority to invest on their own. Others may be required by legislation to participate in the program; as a result, the deposits of these funds may be considered involuntary. However, these funds are part of the State's reporting entity. The remaining participant in the pool, the Local Agency Investment Fund, is voluntary.

Certain funds that have deposits in the State Treasurer's pooled investment program do not receive the interest earnings on their deposits. Instead, by law, the earnings are assigned to the State's General Fund. Most of the \$41 million in interest revenue received by the General Fund from the pooled investment program in fiscal year 2015-16 was earned on balances in these funds.

Enterprise funds and special revenue funds also make separate investments, which are presented at fair value.

2. Valuation of State Investments

The State Treasurer's Office reports its investments at fair value. The State Treasurer's Office performs a quarterly fair market valuation of the pooled investment program portfolio. The fair value of securities in the State Treasurer's pooled investment program generally is based on quoted market prices. In addition, the State Treasurer's Office performs a monthly fair market valuation of all securities held against carrying cost. These valuations can be obtained from the State Treasurer's Office website at www.treasurer.ca.gov.

Table 1 categorizes fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the assets and liabilities. Level 1 inputs are quoted prices for identical assets or liabilities in active markets at the date of measurement; Level 2 inputs are significant other directly or indirectly observable inputs other than quoted prices; and Level 3 inputs are significant unobservable inputs. The State does not use Level 3 inputs to measure the fair value of its investments.

Table 1

Schedule of Investments – Primary Government – Investments by Fair Value Level

Less: discretely presented component units and related organizations	2,373,319		
Total primary government investments	\$ 45,191,044		

¹ Reported at carrying value.

As of June 30, 2016, the weighted average maturity of the securities in the pooled investment program administered by the State Treasurer's Office was approximately 174 days. Weighted average maturity is the average number of days, given a dollar-weighted value of individual investments, that the securities in the portfolio have remaining from evaluation date to stated maturity.

3. Oversight of Investing Activities

The Pooled Money Investment Board (PMIB) provides oversight of the State Treasurer's pooled investment program. The purpose of the board is to design and administer an effective cash management and investment program, using all monies flowing through the State Treasurer's Office bank accounts and keeping all available funds invested in a manner consistent with the goals of safety, liquidity, and yield. The PMIB is comprised of the State Treasurer as chair, the State Controller, and the Director of Finance. This board designates the amounts of money available for investment. The State Treasurer is charged with making the actual investment transactions for this program. This investment program is not registered with the Securities and Exchange Commission as an investment company.

The value of the deposits in the State Treasurer's pooled investment program, including the Local Agency Investment Fund, is equal to the dollars deposited in the program. The fair value of the position in the program may be greater or less than the value of the deposits, with the difference representing the unrealized gain or loss. As of June 30, 2016, this difference was immaterial to the valuation of the program. The pool is run with "dollar-in, dollar-out" participation. There are no share-value adjustments to reflect changes in fair value.

The State Treasurer's pooled investment program values participants' shares on an amortized cost basis. Specifically, the program distributes income to participants quarterly, based on their relative participation during the quarter. This participation is calculated based on (1) realized investment gains and losses calculated on an amortized cost basis, (2) interest income based on stated rates (both paid and accrued), (3) amortization of discounts and premiums on a straight-line basis, and (4) investment and administrative expenses. This amortized cost method differs from the fair value method used to value investments in these financial statements; the amortized cost method is not designed to distribute to participants all unrealized gains and losses in the fair value of the pool's investments. Because the total difference between the fair value of the investments in the pool and the value distributed to pool participants using the amortized cost method described above is not material, no adjustment was made to the financial statements. The State Treasurer's Office also reports participant fair value as a ratio of amortized cost on a quarterly basis. The State Treasurer's Office has not provided or obtained a legally binding guarantee to support the principal invested in the investment program.

As of June 30, 2016, medium-term asset-backed securities comprised approximately 1.1% of the pooled investments. The asset-backed securities consist of mortgage-backed securities, Small Business Administration (SBA) pools, and asset-backed commercial paper. The mortgage-backed securities are called real estate mortgage investment conduits (REMICs), and are securities backed by pools of mortgages. The REMICs in the State's portfolio have a fixed principal payment schedule. A portion of the asset-backed securities consisted of floating-rate SBA notes. For floating-rate SBA notes held in the portfolio during the fiscal year, the interest received by the State Treasurer's pooled investment program rose or fell as the underlying index rate rose or fell. The structure of the floating-rate SBA notes in the State Treasurer's pooled investment program portfolio provided a hedge against the risk of increasing interest rates. A portion of the asset-backed portfolio holdings were short-term, asset-backed commercial paper (ABCP), which represented 1.37% of the pooled investments.

Table 2 identifies the investment types that are authorized by the California Government Code and the State Treasurer’s Office Investment Policy for the Pooled Investment Program. Maturities are limited by the State Treasurer’s Office Investment Policy for the Pooled Money Investment Program. For commercial paper, the Investment Policy matches the Government Code. For corporate bonds and notes, the Government Code requires that a security falls within the top three ratings of a nationally recognized statistical ratings organization (NRSRO). Items reported as N/A have no limitation in either the Government Code or the State Treasurer’s Office Investment Policy.

Table 2

Authorized Investments

Authorized Investment Type	Maximum Maturity	Maximum Percentage of Portfolio	Maximum Investment in One Issuer	Credit Rating
U.S. Treasury securities	5 years	N/A	N/A	N/A
Federal agency and supranational securities	5 years	N/A	N/A	N/A
Certificates of deposit	5 years	N/A	N/A	N/A
Bankers acceptances	180 days	N/A	N/A	N/A
Commercial paper	270 days	30%	10 % of issuer’s outstanding Commercial Paper	A-3/P-3/F-3
Corporate bonds/notes	5 years	N/A	N/A	A-/A3/A-
Repurchase agreements	1 year	N/A	N/A	N/A
Reverse repurchase agreements	1 year	10%	N/A	N/A

4. Risk of Investments

The following types of risks are common in deposits and investments, including those of the State:

Interest Rate Risk is the risk that the value of fixed-income securities will decline because of changing interest rates. The prices of fixed-income securities with longer time to maturity tend to be more sensitive to changes in interest rates than those with shorter durations.

Credit Risk is the risk that a debt issuer will fail to pay interest or principal in a timely manner, or that negative perceptions of the issuer’s ability to make these payments will cause security prices to decline.

Custodial Credit Risk is the risk that, in the event a financial institution or counterparty fails, the investor will not be able to recover the value of deposits, investments, or collateral.

Concentration of Credit Risk is the risk of loss attributed to the magnitude of an investor’s holdings in a single issuer.

Foreign Currency Risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit.

a. Interest Rate Risk

Table 3 presents the interest rate risk of the primary government's investments. In calculating SBA holdings' weighted average maturity, the State Treasurer's Office assumes that stated maturity is the quarterly reset date. Total pooled investments do not include \$5.5 billion of time deposits and \$502 million of internal loans to state funds. Repurchase agreements of the California State University system mature in one day. Most mortgage-backed securities are issued by U.S. government agencies, or government-sponsored enterprises such as the Federal National Mortgage Association, and entitle the purchaser to receive a share of the cash flows, such as principal and interest payments, from a pool of mortgages. Mortgage-backed securities are highly sensitive to interest rate changes because principal prepayments either increase (in a low interest rate environment) or decrease (in a high interest rate environment) the security yield. As of June 30, 2016, only \$64 million, or 0.09% of the total pooled investments, was invested in mortgage-backed securities.

Table 3**Schedule of Investments – Primary Government – Interest Rate Risk**

June 30, 2016

(amounts in thousands)

	Fair Value at Year End	Weighted Average Maturity (in years)
Pooled investments		
U.S. Treasury bills and notes	\$ 33,912,924	0.68
U.S. Agency bonds and discount notes (IBRD)	9,241,229	0.42
Supranational debentures	601,736	1.24
Small Business Administration loans	705,336	0.25
Mortgage-backed securities	63,530	2.12
Certificates of deposit	16,574,127	0.21

U.S. Treasuries and agencies	2,585,251	3.36
Commercial paper	40,056	3.40
Guaranteed investment contracts	200,000	5.83
Corporate debt securities	1,030,765	1.12
Repurchase agreements	19,774	—
Other	1,322,630	2.02
Total other primary government investments	5,198,476	
Funds outside primary government included in pooled investments		
Less: investment trust funds	22,701,071	
Less: other trust and agency funds	4,323,877	
Less: discretely presented component units and related organizations	2,373,319	
Total primary government investments	\$ 45,191,044	

b. Credit Risk

Table 4 presents the credit risk of the primary government’s debt securities. If a particular security has multiple ratings, the lowest rating of the three major NRSROs is used. Similar to interest rate risk shown in Table 3, time deposits and internal loans to state funds are not included.

Table 4

Schedule of Investments in Debt Securities – Primary Government – Credit Risk

June 30, 2016

(amounts in thousands)

Credit Rating as of Year End		Fair Value
Short-term	Long-term	
Pooled investments		
A-1+/P-1/F-1+	AAA/Aaa/AAA	\$ 7,549,713
A-1/P-1/F-1	AA/Aa/AA	25,809,354
A-2/P-2/F-2	A/A/A	1,349,978
Not rated		63,530
Not applicable		34,618,260
Total pooled investments		\$ 69,390,835
Other primary government investments		
A-1+/P-1/F-1+	AAA/Aaa/AAA	\$ 935,887
A-1/P-1/F-1	AA/Aa/AA	1,780,339
A-2/P-2/F-2	A/A/A	1,080,922
A-3/P-3/F-3	BBB/Baa/BBB	22,384
B/NP/B	BB/Ba/BB	5,101
Not rated		1,373,837
Not applicable		6
Total other primary government investments		\$ 5,198,476

c. Custodial Credit Risk

The State has a deposit policy for custodial credit risk that requires deposits held by financial institutions to be insured by federal depository insurance or secured by collateral. As of June 30, 2016, one guaranteed investment contract of the Electric Power Fund in the amount of \$100 million was uninsured and uncollateralized.

d. Concentration of Credit Risk

The investment policy of the State Treasurer’s Office contains no limitations on the amount that can be invested in any one issuer beyond those limitations stipulated in the California Government Code. As of June 30, 2016, the State had investments in the Federal National Mortgage Association totaling 6.6% of the total pooled investments.

B. Fiduciary Funds

The fiduciary funds include pension and other employee benefit trust funds of the following fiduciary funds and component units: California Public Employees' Retirement System (CalPERS), California State Teachers' Retirement System (CalSTRS), the fund for the California Scholarshare program, and various other funds. CalPERS and CalSTRS account for 97% of these separately invested funds. CalPERS and CalSTRS exercise their authority under the State Constitution and invest in stocks, bonds, mortgages, real estate, and other investments, including derivative instruments.

Additional disclosure for CalPERS' investments and derivative instruments is included in CalPERS' separately issued financial statements, which may be found on its website at www.CalPERS.ca.gov. Additional disclosure for CalSTRS' investments and derivative instruments is included in CalSTRS' separately issued financial statements, which may be found on its website at www.CalSTRS.com.

C. Discretely Presented Component Units

The discretely presented component units consist of the University of California and its foundation, the California Housing Finance Agency (CalHFA), and various nonmajor component units. The University and CalHFA constitute 93.1% of the total investments of discretely presented component units. State law, bond resolutions, and investment policy resolutions allow component units to invest in U.S. government securities, state and municipal securities, commercial paper, corporate bonds, investment agreements, real estate, and other investments. Additionally, a portion of the cash and pooled investments of CalHFA, and other nonmajor component units are invested in the State Treasurer's pooled investment program.

Additional disclosures for the University of California's investments and derivative instruments are included in the University's separately issued financial statements, which can be obtained from the University on its website at www.ucop.edu. Additional disclosure for CalHFA's investments and derivative instruments is included in CalHFA's separately issued financial statements, which may be found on its website at www.CalHFA.ca.gov.

NOTE 4: ACCOUNTS RECEIVABLE

Table 5 presents the disaggregation of accounts receivable attributable to taxes; licenses, permits, and fees; Lottery retailer collections; unemployment program receipts; and the California State University. Other receivables are for interest, gifts, grants, penalties, and other charges.

Table 5

Schedule of Accounts Receivable

June 30, 2016

(amounts in thousands)

	Taxes	Licenses, Permits and Fees	Lottery Retailers
Current governmental activities			
General Fund	\$ 12,993,809	\$ —	\$ —

NOTE 6: NET INVESTMENT IN DIRECT FINANCING LEASES

The State Public Works Board (SPWB) accounts for its activities in the Public Buildings Construction Fund, an internal service fund, and has entered into lease-purchase agreements with various other primary government agencies and certain local agencies. Payments from these leases will be used to satisfy the principal and interest requirements of revenue bonds issued by the SPWB. The lease-purchase activity between the SPWB and the primary government agencies shown in the schedule below represents only that activity with agencies reported as enterprise funds. The lease receivable of \$7.3 billion from governmental funds and the corresponding lease obligation were eliminated within the governmental activities column of the government-wide Statement of Net Position.

The CSU system accounts for its lease activities in the California State University Fund, a major enterprise fund, and has entered into capital lease agreements with certain auxiliary organizations. These agreements lease existing and newly constructed facilities to the auxiliary organizations. A portion of the proceeds from certain revenue bonds issued by CSU were used to finance the construction of these facilities.

Table 7 summarizes the minimum lease payments to be received by the primary government.

Table 7**Schedule of Minimum Lease Payments to be Received by the Primary Government**

(amounts in thousands)

NOTE 8: ACCOUNTS PAYABLE

Accounts payable are amounts, related to different programs, that are due taxpayers, vendors, customers, beneficiaries, and employees. Table 11 presents details related to accounts payable.

The adjustment for the fiduciary funds represents amounts due fiduciary funds that were reclassified as external payables on the government-wide Statement of Net Position.

NOTE 9: LONG-TERM OBLIGATIONS

As of June 30, 2016, the primary government had long-term obligations totaling \$228.5 billion. Of that amount, \$7.1 billion is due within one year. Governmental activities had a net increase in long-term obligations of \$7.7 billion. Significant increases included \$6.8 billion in net pension liability and \$3.4 billion in net OPEB obligation. Significant decreases included \$1.5 billion in general obligation bonds payable, \$1.2 billion in revenue bonds payable, and \$298 million in Proposition 98 funding guarantees.

Not included in the mandated cost claims payable shown in Table 12 are certain state-mandated programs that are in the adjudication process. Until the Commission on State Mandates rules on a test claim and the claim's parameters and guidelines are established, expected costs cannot be reasonably determined; however, a positive finding for any of the claimants could individually or in aggregate pose a significant cost to the State.

As of June 30, 2016, the pollution remediation obligations decreased by \$75 million to \$1.0 billion. Under federal Superfund law, responsibility for pollution remediation is placed on current and previous owners or operators of polluted sites. Currently, the State's most significant superfund site is the Stringfellow Class 1 Hazardous Waste Disposal Facility (Stringfellow) located in Riverside County. As of June 30, 2016, the State estimates that remediation costs at Stringfellow will total \$426 million. At two other sites, Leviathan Mine and BKK Landfill, obligating events have occurred. At the Leviathan Mine site, litigation was concluded by settlement in March 2015. The settlement requires the State to pay 20% to 25% of ongoing cleanup costs at the Leviathan Mine site, with the remainder paid by ARCO. At the BKK Landfill site, reasonable estimates of the remediation costs cannot be made at this time. In addition to superfund sites, the State's other pollution remediation efforts include underground storage tank removal and cleanup, cleanup of polluted groundwater, and contaminated soil removal and cleanup, as required by state law.

The other long-term obligations for governmental activities consist of \$18 million owed to the University of California, the Technology Services Revolving Fund notes payable of \$23 million, and the Water Resources Revolving Fund notes payable of \$5 million. The compensated absences will be liquidated by the General Fund, special revenue funds, capital projects funds, and internal service funds. Workers' compensation and capital leases will be liquidated by the General Fund, special revenue funds, and internal service funds. The General Fund will liquidate net pension liabilities, the Proposition 98 funding guarantee, lawsuits, and reimbursement of costs incurred by local agencies and school districts for costs mandated by the State.

Business-type activities had a net decrease in long-term obligations of \$550 million, as restated. Significant decreases included \$2.6 billion in loans payable to the US Department of Labor for prior-year's shortfalls in the Unemployment Fund and \$821 million in capital lease obligations. Significant increases included \$1.3 billion in revenue bonds payable, \$1.2 billion in net pension liability, and \$343 million in lottery prizes and annuities.

Table 12 summarizes the changes in long-term obligations during the year ended June 30, 2016.

Table 12

NOTE 10: PENSION TRUSTS

The California Public Employees' Retirement System (CalPERS) provides retirement and health benefits to eligible employees of the State, public agencies, and public schools through single-employer, agent multiple-employer, and cost-sharing plans. The California State Teachers' Retirement System (CalSTRS) provides pension benefits to full-time and part-time employees of the State's public school system. Both are fiduciary component units of the State, and their financial activity is included in the pension and other employee benefit trust funds column of the fiduciary funds and similar component units' financial statements of this report.

CalPERS administers four defined benefit retirement plans: the Public Employees' Retirement Fund (PERF), the Judges' Retirement Fund (Judges'), the Judges' Retirement Fund II (Judges' II), and the Legislators' Retirement Fund (Legislators'). CalPERS previously administered three defined contribution plans: the State Peace Officers' and Firefighters' Defined Contribution Plan Fund (SPOFF), the Public Employees' Deferred Compensation Fund, and the Supplemental Contributions Program Fund. The SPOFF plan was terminated in 2014 and, as directed by state statute, the remaining funds were transferred to the Supplemental Contributions Program Fund.

The PERF accounts for the majority of assets and liabilities reported for CalPERS' plans. CalPERS issues a publicly available financial report that includes financial statements and required supplementary information for these plans. The report may be found on CalPERS' website at www.CalPERS.ca.gov.

Contributions to the CalPERS' pension trust funds are recognized in the period in which the contributions are due, pursuant to legal requirements. Benefits and refunds in the defined benefit plans are recognized when due and payable in accordance with the terms of each plan.

CalSTRS administers four defined benefit retirement plans within the State Teachers' Retirement Plan: the Defined Benefit Program, the Defined Benefit Supplement Program, the Cash Balance Benefit Program, and the Replacement Benefit Program. CalSTRS issues a publicly available financial report that includes financial statements and required supplementary information for these plans. This report may be found on its website at www.CalSTRS.com.

Member contributions to CalSTRS' pension plans are recognized in the period in which the contributions are earned. Employer and state contributions are recognized when earned and when the employer or the State has made a formal commitment to provide the contributions. Benefits and refunds are recognized when due and payable, in accordance with the retirement and benefits programs.

For the purpose of measuring net pension liability, deferred outflows and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net positions of CalPERS' and CalSTRS' plans and changes to the plans' fiduciary net positions has been determined on the same basis as reported by the plans.

The University of California, a discretely presented component unit, administers the University of California Retirement System (UCRS), which consists of two defined benefit plans funded with University and employee contributions, and four defined contribution plans with options to participate in internally or externally managed investment portfolios generally funded with employee non-elective and elective contributions. The State does not directly contribute to the UCRS. Additional information on the UCRS can be found in the University's separately issued financial statements on its website at www.ucop.edu.

A. California Public Employees' Retirement System

1. Public Employees' Retirement Fund (PERF)

Plan Description: The PERF is comprised of and reported as three separate entities for financial reporting purposes, of which the State reports only PERF A. PERF A is comprised of agent multiple-employer plans, which include the State of California and most public agencies' rate plans that have more than 100 active members. PERF B is a cost-sharing multiple-employer plan comprised of school employers and consisting of non-teaching and non-certified employee members. PERF C is a cost-sharing multiple-employer plan comprised of public agencies' plans that generally have fewer than 100 active members. Employers participating in the PERF as of June 30, 2015, included the primary government and certain discretely presented component units; 1,423 school employers, including charter schools; and 1,630 public agencies. As the State is not an employer in PERF B or PERF C, the term "PERF" is used hereafter to refer exclusively to the agent multiple-employer plans that include employees of the primary government and certain discretely presented component units.

CalPERS acts as the common investment and administrative agent for participating employers. State employees served by the PERF include first- and second-tier miscellaneous and industrial employees, California Highway Patrol (CHP) employees, peace officers and firefighters, and other safety members.

Benefits Provided: All employees in a covered class of employment who work half-time or more are eligible to participate in the PERF. The PERF provides retirement, death, disability, and survivor benefits. Vesting occurs after five years, or after ten years for second-tier employees. The benefit provisions are established by the Public Employees' Retirement Law (PERL) and the Public Employees' Pension Reform Act of 2013 (PEPRA), and are summarized in Appendix B of the State's June 30, 2014 Actuarial Valuation Report, which may be found at www.CalPERS.ca.gov/docs/forms-publications/2014-state-valuation.pdf. In general, for the PERF plans, retirement benefits are based on a formula using a member's years of service credit, age at retirement, and final compensation (average salary for a defined period of employment). Retirement formulas vary based on:

- Classification (e.g., miscellaneous, safety, industrial, CHP, or peace officers and firefighters);
- Membership category (pre-PEPRA and post-PEPRA); and
- Specific provisions in employees' contracts.

The four basic types of retirement are:

- Service Retirement – The "normal" retirement is a lifetime benefit. In most cases, employees become eligible for service retirement as early as age 50 with five years of service credit. If the employee became a member on or after January 1, 2013, he or she must be at least 52 year old with at least five years of service to retire. Second-tier employees (miscellaneous and industrial) become eligible at age 55 with at least ten years of service credit.
- Vested Deferred Retirement – Vested members who leave employment but keep their contribution balances on deposit with CalPERS are eligible for this benefit.
- Disability Retirement – Vested members who can no longer perform the usual duties of their current position due to illness or injury may receive this benefit.
- Industrial Disability Retirement – This benefit is available for eligible safety members, industrial employees, CHP employees, and peace officers and firefighters, who are unable to perform the usual duties of their current position due to job-related illness or injury.

Employees Covered by Benefit Terms: The State’s June 30, 2015 Actuarial Valuation Report provides information about the number of employees by type covered within the various PERF plans. Table 13 shows the number of employees covered by the benefit terms of each of the PERF plans as of the most recent valuation.

Table 13

Number of Employees by Type Covered by Benefit Terms – PERF Plans

June 30, 2015

	State <u>Miscellaneous</u>	State <u>Industrial</u>	State <u>Safety</u>	State Peace Officers and <u>Firefighters</u>	California Highway <u>Patrol</u>	Total <u>PERF Plans</u>

Inactive employees entitled to but not yet receiving benefits	51,939	3,202	5,857	6,378	366	67,742
Active employees	<u>204,731</u>	<u>19,888</u>	<u>31,536</u>	<u>46,237</u>	<u>7,493</u>	309,885
Total	<u>438,967</u>	<u>35,842</u>	<u>60,080</u>	<u>87,396</u>	<u>16,509</u>	<u>638,794</u>

Contributions: Section 20814(c) of PERL requires that the employer contribution rates for all public employers be determined on an annual basis by the actuary and shall be effective on the July 1 following notice of a change in the rate. The total plan contributions are determined through CalPERS’ annual actuarial valuation process. The actuarially determined rate is the estimated amount necessary to finance the costs of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The employer is required to contribute the difference between the actuarially determined rate and the contribution rate of employees. Employer contribution rates may change if plan contracts are amended.

Table 14 shows the average active employee and the employer contribution rates for each of the PERF plans as a percentage of annual pay for the measurement period ended June 30, 2015.

Table 14

Contribution Rates – PERF Plans

June 30, 2015

	State <u>Miscellaneous</u>	State <u>Industrial</u>	State <u>Safety</u>	State Peace Officers and <u>Firefighters</u>	California Highway <u>Patrol</u>
Average active employee rate	6.587 %	7.735 %	10.450 %	11.498 %	10.388 %
Employer rate of annual payroll	<u>24.265 %</u>	<u>18.134 %</u>	<u>19.278 %</u>	<u>36.780 %</u>	<u>43.455 %</u>
Total	<u>30.852 %</u>	<u>25.869 %</u>	<u>29.728 %</u>	<u>48.278 %</u>	<u>53.843 %</u>

Actuarial Methods and Assumptions: The total pension liability for PERF plans was measured as of June 30, 2015 (measurement date), by rolling forward the total pension liability determined by the June 30, 2014 actuarial valuation (valuation date), based on the actuarial methods and assumptions shown in Table 15.

Table 15**Actuarial Methods and Assumptions – PERF Plans**

Valuation date:	June 30, 2014
Actuarial cost method:	Entry age normal in accordance with the requirement of GASB 68
Actuarial assumptions:	
Discount rate	7.65%
Inflation	2.75%
Salary increases	Varies by entry age and service
Investment rate of return	7.65% net of pension plan investment expense but without reduction for administrative expenses; includes inflation
Mortality	Mortality rates are based on the 2014 CalPERS Experience Study adopted by the CalPERS Board and include 20 years of mortality improvements using Scale BB published by the Society of Actuaries.
Post-retirement benefit adjustments (COLAs)	Contract COLA up to 2.75% until the Purchasing Power Protection Allowance floor on purchasing power applies, 2.75% thereafter

Discount Rate: The discount rate used to measure the total pension liability was 7.65% for the PERF. To determine whether the municipal bond rate should be used in the calculation of a discount rate for each plan, CalPERS stress-tested plans that would most likely result in a discount rate that would differ from the actuarially assumed discount rate. Results of the testing showed that none of the tested plans would exhaust assets. Therefore, the current 7.65% discount rate is adequate and the use of the municipal bond rate calculation is not necessary. The long-term expected discount rate of 7.65% was applied to all plans in the PERF. The stress test results are presented in the “GASB Crossover Testing Report,” which may be found on CalPERS’ website at www.CalPERS.ca.gov/docs/gasb-crossover-testing-2015.pdf.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class.

In determining the long-term expected rate of return, CalPERS took into account both short- and long-term market return expectations as well as the expected pension fund cash flows. Such cash flows were developed assuming that both members and employers will make their required contributions on time and as scheduled in all future years. Using historical returns of all the funds’ asset classes, CalPERS calculated expected compound (geometric) returns over the short-term (first 10 years) and the long-term (11–60 years) using a building-block approach. Using the expected nominal returns for both short- and long-term, the present value of benefits was calculated for each fund. The expected rate of return was set by calculating the single equivalent expected return that arrived at the same present value of benefits for cash flows as the one calculated using both short- and long-term returns. The expected rate of return was then set equivalent to the single equivalent rate calculated above and rounded down to the nearest one quarter of one percent.

Table 16 shows long-term expected geometric real rate of return by asset class for all plans in the PERF.

Table 16

Long-term Expected Real Rate of Return by Asset Class – PERF Plans

Asset Class	Current Target Allocation	Real Return Years 1 – 10 ¹	Real Return Years 11+ ²
Global equity	51.0 %	5.25 %	5.71 %
Global fixed income	19.0	0.99	2.43

Pension Plans Fiduciary Net Position: Detailed information about the PERF plans' fiduciary net position is available in the separately issued CalPERS financial report.

Pension Expense and Deferred Outflows and Deferred Inflows of Resources Related to Pensions: For the PERF plans, for the year ended June 30, 2016, the State recognized pension expense of \$4.3 billion. At June 30, 2016, the State reported deferred outflows of resources from contributions made by the State to the PERF plans subsequent to the measurement date of June 30, 2015, but prior to the year ended June 30, 2016. Differences between expected and actual expenses are recognized as deferred outflows and inflows of resources. The aggregate difference (positive and negative) between projected and actual earnings on pension plan investments arising in different measurement periods are reported as net deferred inflows of resources. Deferred outflows of resources related to contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the subsequent year.

Table 19 shows pension expense and sources of deferred outflows and deferred inflows of resources related to each PERF plan.

Table 19

**Pension Expense and Sources of Deferred Outflows and Deferred Inflows of Resources
Related to Pensions – PERF Plans**

June 30, 2016

(amounts in thousands)

	State Miscellaneous	State Industrial	State Safety	State Peace Officers and Firefighters	California Highway Patrol	Total PERF Plans

Payable to the Pension Plans: At June 30, 2016, the State reported a payable of \$628 million for the outstanding amount of contributions to the PERF pension plans required for the year ended June 30, 2016.

2. Single-employer Plans

Plan Description: CalPERS administers three single-employer defined benefit retirement plans.

Judges' – Judges' membership includes judges working in the California Supreme Court, the courts of appeal, and the superior courts who were appointed or elected prior to November 9, 1994. Judges' is funded on a "pay-as-you-go" basis, where short-term investments, contributions received during the year, and a General Fund augmentation are used to provide funding for benefit payments.

Judges' II – Judges' II membership includes judges working in the California Supreme Court, the courts of appeal, and the superior courts, who were appointed or elected on or after November 9, 1994. There are two types of service retirement available for plan members: the Defined Benefit Plan and the Monetary Credit Plan, in which members can choose a single lump sum payment or annuity at retirement.

Legislators' – Legislators' was established in 1947 and its members consist of state legislators, constitutional officers, and legislative statutory officers. The PEPRA closed Legislators' to new participants effective January 1, 2013.

Benefits Provided: All employees in a covered class of employment who work on a half-time basis or more are eligible to participate. The benefits for the defined benefit plans are based on a member's years of service, age, final compensation, and a benefit formula. Benefits are provided for disability, death, and survivors of eligible members or beneficiaries. Members become fully vested in their retirement benefits earned to date after five years of credited service. Benefits are established in accordance with the provisions of the Judges' Retirement Law, Judges' Retirement System II Law, and Legislators' Retirement Law. Additional information is available in the Actuarial Valuation Report for each plan, which may be found on CalPERS' website at www.CalPERS.ca.gov.

Judges' – The four basic types of retirement are:

- Service Retirement – Members must be at least age 60 with 20 years of service or age 70 with at least 10 years of service.
- Deferred Retirement – Vested members are eligible for deferred retirement at any age with at least 5 years of service.
- Disability Retirement – The service requirement is four years. The retirement allowance is 65% of a judge's final salary, or 75% of his or her final salary if the judge has 20 or more years of service.
- Death Benefits – Beneficiaries may receive 25% of a current active judge's salary for life if the judge was not eligible for retirement. Beneficiaries receive one-half of what the retirement allowance would have been if the judge had retired on the date of death.

Judges' II – The four basic types of retirement are:

- Service Retirement – Judges must be at least age 65 with 20 years of service or age 70 with a minimum of five years of service to receive the defined benefit plan. Judges must have at least five years of service to receive the monetary credit plan.
- Disability Retirement (non-work related) – Judges who have five years of service and become permanently disabled because of a mental or physical disability may apply to the Commission on Judicial Performance for disability retirement.
- Disability Retirement (work related) – Judges receive 65% of their average monthly salary earned during the 12 months preceding their retirement date, regardless of age or length of service.

- Death Benefits – Beneficiaries receive the judge’s monetary credits or three times the annual salary at the time of death, whichever is greater, if the judge was not eligible for retirement. Beneficiaries receive one-half of the retirement pension for life if the judge was retired on the date of death.

Legislators’ – The three basic types of retirement are:

- Service Retirement – Members must be age 60, with four or more years of service credit, or any age with 20 or more years. The retirement age for legislative statutory officers is 55, or any age with 20 years or more of service credit.
- Disability Retirement – Disability retirement uses the same formula as service retirement. There is no reduction for members of the Legislature if retirement is before age 60.
- Death Benefits – Beneficiaries have multiple options depending on whether the member was eligible for retirement or was retired at the time of death.

Employees Covered by Benefit Terms: The June 30, 2015 actuarial valuation reports for each single-employer plan provide information about the number of employees by type covered within the plans. Table 21 shows the number of employees covered by the benefit terms of each of the single-employer plans as of the most recent valuation.

Table 21

Number of Employees by Type Covered by Benefit Terms – Single-employer Plans

June 30, 2015

	Judges’	Judges’ II	Legislators’	Total
Inactive employees or beneficiaries currently receiving benefits	1,924	96	244	2,264
Inactive employees entitled to but not yet receiving benefits	15	1	14	30
Active employees	231	1,470	9	1,710
Total	2,170	1,567	267	4,004

Contributions: As Judges’ is funded on a “pay-as-you-go” basis, the contributions made will be less than the actuarially determined contribution requirement of normal cost plus a 10-year amortization of the unfunded accrued liability. The actual contribution is the estimated amount of benefit payouts during the year. Currently, Judges’ member contributions are 8% of pay. In certain situations, employers make member contributions.

Judges’ II contribution rates are determined through the CalPERS’ annual actuarial valuation process as required by section 75600.5 of the PERL. Classic members contribute 8% of their annual compensation to the plan. New members contribute half of the total normal cost calculated on January 1, 2013. The percentage only changes in any given year once the change to the total normal cost is greater than one percent from the original percentage determined.

For Legislators’, contribution rates are determined through the CalPERS’ annual actuarial valuation process as required by section 9358 on the PERL. The minimum employer contribution rate under PEPR is the greater of the actuarially determined employer rate or the employer normal cost.

Table 22 shows the average active employee and the employer contribution rates for each of the single-employer plans as a percentage of annual pay for the measurement period ended June 30, 2015.

Table 22**Contribution Rates – Single-employer Plans**

June 30, 2015

	Judges'	Judges' II	Legislators'
Average active employee rate	“Pay-	8.062 %	7.533 %
Employer rate of annual payroll	as-you-	24.615 %	42.257 %
Total	go”	32.677 %	49.790 %

Actuarial Methods and Assumptions: The total pension liability for single-employer plans was measured as of June 30, 2015 (measurement date), by rolling forward the total pension liability determined by the June 30, 2014 actuarial valuations (valuation date), based on the actuarial methods and assumptions shown in Table 23.

Table 23**Actuarial Methods and Assumptions – Single-employer Plans**

Valuation date:	June 30, 2014
Actuarial cost method:	Entry age normal in accordance with the requirement of GASB 68
Actuarial assumptions:	
Discount rate	Judges' 3.82%, Judges' II 7.15%, Legislators' 6.00%
Inflation	All single-employer plans – 2.75%
Salary increases	All single-employer plans – 3.00%
Investment rate of return	Judges' 3.82%, Judges' II 7.15%, Legislators' 6.00%, net of pension plan investment without reduction of administrative expenses; includes inflation.
Mortality	Mortality rates are based on the 2014 CalPERS Experience Study adopted by the CalPERS Board and include 20 years of mortality improvements using Scale BB published by the Society of Actuaries.
Post-retirement benefit adjustments (COLAs)	Judges' – 3.00% Judges' II – 2.75% Legislators' – 2.75%

Discount Rate: To determine whether the municipal bond rate should be used in the calculation of a discount rate for each plan, CalPERS stress tested plans that would most likely result in a discount rate that would differ from the actuarially assumed discount rate. For the single-employer plans, the following rates were used:

Judges' – 3.82%, reflecting the short-term nature of the assets. As the plan is insufficiently funded, CalPERS uses a discount rate of 3.82%, which falls within a reasonable range of yields on 20-year tax-exempt general obligation municipal bonds with an average rating of AA.

Judges' II – 7.15%

Legislators' – 6.00%

With the exception of *Judges'*, which uses a lower rate of return, the information regarding the discount rate and the long-term expected real rate of return described previously for the PERF plans is also applicable to the single-employer plans. GAAP requires that the long-term discount rate should be determined without reduction for pension plan administrative expense.

Table 24 shows long-term expected real rates of return by asset class for *Judges' II* and *Legislators'*.

Table 24

Long-term Expected Real Rate of Return by Asset Class – *Judges' II* and *Legislators' Plans*

Asset Class	Judges' II	Legislators'	Real Return Years 1 – 10 ¹	Real Return Years 11+ ²
	Current Target Allocation	Current Target Allocation		
Global equity	50.0 %	24.0 %	5.25 %	5.71 %

Pension Plans Fiduciary Net Position: Detailed information about the single-employer plans’ fiduciary net position is available in the separately issued CalPERS financial report.

Pension Expense and Deferred Outflows and Deferred Inflows of Resources Related to Pensions: For the single-employer plans, for the year ended June 30, 2015, the State recognized pension expense of \$227 million. At June 30, 2016, the State reported deferred outflows of resources from contributions made by the State to the single-employer plans subsequent to the measurement date of June 30, 2015, but prior to the year ended June 30, 2016, which will be recognized as a reduction of the net pension liability in the subsequent year.

Table 27 shows pension expense and sources of deferred outflows and deferred inflows of resources related to each single-employer plan.

Table 27

B. California State Teachers' Retirement System

The State reports a net pension liability, deferred outflows and deferred inflows of resources, and expenses as a result of its statutory requirement to contribute to the State Teachers' Retirement Fund as a non-employer contributing entity.

Plan Description: CalSTRS administers the State Teachers' Retirement Fund, which is an employee benefit trust fund created to finance the State Teachers' Retirement Plan (STRP). The STRP is a cost-sharing multiple-employer defined benefit pension plan that provides retirement, disability, and survivor benefits to teachers and certain other employees of the California public school system. Four programs comprise the STRP: the Defined Benefit (DB) Program, the Defined Benefit Supplement (DBS) Program, the Cash Balance Benefit (CBB) Program, and the Replacement Benefit (RB) Program. CalSTRS issues a publicly available financial report, which may be found on CalSTRS' website at www.CalSTRS.com.

Benefits Provided: Membership in the DB Program is mandatory for all employees meeting certain statutory requirements. The DB Program provides retirement benefits based on a member's age, final compensation, and years of service. In addition, the retirement program provides benefits to members upon disability and to their survivors or beneficiaries upon the death of eligible members. The Teachers' Retirement Law establishes the benefits for the DB Program. The DB Program had 1740 contributing employers, 438,388 active and 187,804 inactive program members, and 288,079 benefit recipients as of June 30, 2016. The payroll for employees covered by the DB Program for the year ended June 30, 2015, was approximately \$32.0 billion.

Membership in the DBS Program is automatic for all members of the DB Program. The DBS Program provides benefits based on the amount of funds contributed. Vesting in the DBS Program occurs automatically with vesting in the DB Program. The Teachers' Retirement Law establishes the benefits for the DBS Program. The primary government does not contribute to the DBS Program.

Contributions: The DB Program contribution rates are based on the provisions of AB 1469 and Education Code Section 22955.1(b). The Legislature may amend these provisions at any time and submit the amendment to the Governor for approval. The contribution rates for members and employers for the reporting period were

8.15% and 8.88% of creditable compensation, respectively. The General Fund contributed an additional 2.017% of total creditable compensation of the fiscal year ending in the prior calendar year. Contributions will increase to 4.311% in the next year and continue to increase until fiscal year 2046-47. The State contributed a total of \$1.9 billion for the fiscal year 2015-16. CalSTRS' June 30, 2014 Defined Benefit Actuarial Valuation Report, may be found on CalSTRS' website at www.CalSTRS.com/sites/main/files/file-attachments/2014_db_valuation_report.pdf.

The CB Benefit Program is designed for employees of California public schools who are hired to perform creditable service for less than 50% of the full-time equivalent for the position. Employer participation in the CB Benefit Program is optional. However, if the employer elects to offer the CB Benefit Program, then each eligible employee will automatically be covered by the CB Benefit Program, unless the member elects to participate in the DB Program or an alternative plan provided by the employer within 60 days of hire or the election period determined by the employer. At June 30, 2015, the CB Benefit Program had 33 contributing school districts and 36,530 contributing participants.

The RB Program is a qualified excess benefits arrangement for DB Program members that is administered through a separate pension trust apart from the other three STRP programs; it was established in accordance with Internal Revenue Code section 415(m). Internal Revenue Code section 415(b) imposes a dollar limit on the annual retirement benefits an individual may receive from a qualified defined benefit pension plan. The program is funded as needed. Monthly contributions that would otherwise be credited to the DB program are instead credited to the RB Program to fund monthly program costs. Monthly employer contributions are received and paid to members in amounts equal to the benefits not paid as a result of Internal Revenue Code section 415(b), subject to withholding for any applicable income or employment taxes. At June 30, 2015, 287 individuals were receiving benefits from the RB program.

Actuarial Methods and Assumptions: The total pension liability in the June 30, 2014 actuarial valuation (valuation date) was determined using the actuarial methods and assumptions shown in Table 29, applied to the measurement period ended June 30, 2015.

Table 29

Actuarial Methods and Assumptions – CalSTRS

Valuation date	June 30, 2014
Experience study	July 1, 2006 through June 30, 2010
Actuarial cost method	Entry age normal
Investment rate of return	7.60 %
Consumer price inflation	3.00 %
Wage growth	3.75 %
Post-retirement benefit increases (COLAs)	2.00 % simple

CalSTRS uses custom mortality tables to best fit the patterns of mortality among its members. These custom tables are based on RP2000 series tables adjusted to fit CalSTRS experience. RP2000 series tables are an industry standard set of mortality rates published by the Society of Actuaries.

Discount Rate: The discount rate used to measure the total pension liability was 7.60%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members and employers will be made at statutory contribution rates in accordance with the rate increases created by AB 1469. Projected inflows from investment earnings were calculated using the long-term assumed investment rate of return (7.60%) and assuming that contributions, benefit payments, and administrative expense occur midyear.

Based on those assumptions, the STRP's fiduciary net position was projected to be available to make all projected future benefit payments to current plan members. Therefore, the long-term assumed investment rate of return was applied to all periods of projected benefit payments to determine the total pension liability.

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. The best estimate ranges were developed using capital market assumptions from CalSTRS' general investment consultant as an input to the process. Based on the model from CalSTRS' consulting actuary's investment practice, a best estimate range was determined by assuming that the portfolio is re-balanced annually and that annual returns are lognormally distributed and independent from year to year to develop expected percentiles for the long-term distribution of annualized returns. The assumed asset allocation is based on board policy for target asset allocation in effect since 2012.

Table 30 shows the assumed allocation and best estimates of 10-year geometric real rate of return for each major asset class.

Table 30**Long-term Expected Real Rate of Return by Asset Class – CalSTRS**

Asset Class	Assumed Asset Allocation	Long-term Expected Real Rate of Return
Global equity	47 %	4.50 %
Private equity	12	6.20
Real estate	15	4.35
Inflation sensitive	5	3.20
Fixed income	20	0.20
Cash/liquidity	1	0.00
Total	100 %	

Pension Liabilities, Pension Expense, and Deferred Outflows and Deferred Inflows of Resources Related to Pensions: CalSTRS' net pension liability was measured as of June 30, 2015 (measurement date) by applying update procedures and rolling forward the total pension liability determined by the actuarial valuation as of June 30, 2014 (valuation date). The State's proportion of the net pension liability was based on CalSTRS' calculated non-employer contributions to the pension plan relative to the total contributions of the State and all participating school districts. Per CalSTRS' revenue recognition policy, CalSTRS recognizes state contributions for the entire fiscal year at the beginning of each fiscal year. Contributions excluded from the proportionate share per CalSTRS' policy include employer contributions for retirement incentives, additional service credit, and unused sick leave. As of June 30, 2015, the State's proportionate share of the CalSTRS' net pension liability was 34.593%, or \$23.3 billion; this amount is reported in the governmental activities column of the government-wide Statement of Net Position as of June 30, 2016.

As a result of its requirement to contribute to CalSTRS, the State recognized expense of \$1.55 billion for the year ended June 30, 2016 and reported deferred outflows and deferred inflows of resources as shown in Table 31.

Table 31

State contributions subsequent to the measurement date	1,935,287	—
Total	\$ 1,935,287	\$ 4,195,910

The \$1.9 billion reported as deferred outflows of resources resulting from State contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2017.

Table 32 shows amounts reported as deferred outflows and deferred inflows of resources related to pensions that will be recognized in pension expense in futures years as a result of the State’s requirement to contribute to CalSTRS. Increases to pension expense are shown as positive amounts and decreases to pension expense are shown as negative amounts.

Pension Plan Fiduciary Net Position: Detailed information about CalSTRS' pension plans' fiduciary net position is available in the separately issued CalSTRS financial report.

NOTE 11: POSTEMPLOYMENT HEALTH CARE BENEFITS

Other Postemployment Benefits (OPEB) Plan Description: The primary government provides health benefits (medical and prescription drug benefits) and dental benefits to annuitants of retirement systems through a substantive single-employer defined benefit plan to which the primary government contributes as an employer (State substantive plan). The primary government also offers life insurance, long-term care, and vision benefits to retirees; however, because these benefits are completely paid for by the retirees, the primary government has no liability. The design of health and dental benefit plans can be amended by the California Public Employees' Retirement System (CalPERS) Board of Administration and the California Department of Human Resources (CalHR), respectively. Employer and retiree contributions are governed by the primary government and can be amended by the primary government through the Legislature. The State contributes to the California Employers' Retiree Benefit Trust Fund (CERBTF). The CERBTF is a self-funded trust fund for the prefunding of health, dental, and other non-pension benefits. CalPERS reports on the CERBTF as part of its separately issued annual financial statements, which can be obtained from CalPERS on its website at www.CalPERS.ca.gov.

Fifty-eight county superior courts (trial courts) are included in the primary government. However, each trial court is a separate employer for GASB Statement No. 45 reporting purposes. Fifty-one trial courts have a single-employer defined benefit plan; these plans have separate biennial actuarial valuations. One trial court (San Diego) has a cost-sharing multiple-employer defined benefit plan. Six trial courts (Alameda, Fresno, Mendocino, Modoc, San Benito, and Stanislaus) have no plan. Twenty-one plans are not accounted for in a trust fund and do not issue separate reports.

To be eligible for these benefits, primary government first-tier plan annuitants must retire on or after age 50 with at least five years of service, and second-tier plan annuitants must retire on or after age 55 with at least 10 years of service. In addition, annuitants must retire within 120 days of separation from employment to be eligible to receive these benefits. During the 2015-16 fiscal year, approximately 178,750 annuitants were enrolled to receive health benefits and approximately 149,560 annuitants were enrolled to receive dental benefits. As of July 1, 2015, the most recent actuarial valuation date, the trial courts had approximately 4,750 enrolled retirees and spouses.

Funding Policy: The contribution requirements of plan members and the State are established and may be amended by the Legislature. In accordance with the California Government Code, the State generally pays 100% of the health insurance premium cost for annuitants, plus 90% of the additional premium required for the enrollment of family members of annuitants. The State generally pays all or a portion of the dental insurance premium cost for annuitants, depending upon the completed years of credited state service at retirement and the dental coverage selected by the annuitant, as specified in the California Government Code. The State funds the cost of providing health and dental insurance to annuitants primarily on a pay-as-you-go basis, with a modest amount of prefunding for members of Bargaining Units 5, 12, and 16. The maximum 2016 monthly State contribution was \$705 for one-party coverage, \$1,343 for two-party coverage, and \$1,727 for family coverage.

Each of the trial courts determines its respective retirees' benefits and benefit levels as well as the funding policy for its respective plan. Nineteen trial courts fund retirees' benefits on a strictly pay-as-you-go basis. The fiscal year 2015-16 monthly contribution rate for the trial courts with single-employer defined benefit plans, the latest year for which contribution information is available, ranged from \$0 to \$2,977,294, with the average being \$145,805. One trial court (Yolo) continuously contributes at least the annual required contribution (ARC) of the employer, an amount actuarially determined in accordance with the parameters of GASB Statement No. 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal costs each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed 30 years. San Diego's plan, a cost-sharing multiple-employer defined benefit plan, had a contribution rate of 1.78% of annual covered payroll for active members of the San Diego County Employees Retirement Association. Twenty-one trial courts will make future trust contributions as funds are made available. For 2016, Orange contributed either 3.5% of payroll or no less than the ARC, with no commitment to future contributions. Kern and Lassen are fully funded and no future trust contributions are expected. Sonoma and Solano anticipate future contributions to be equal to the annual direct subsidy amount, with Sonoma ceasing contributions once the plan is fully funded. Both Marin and Santa Clara expect to contribute to their trusts until sufficient funds are available to pay all future benefits, with Santa Clara expecting to initially contribute \$31 million in the 2015-16 fiscal year and an amount annually thereafter, and Marin expecting to annually contribute \$100,000. Los Angeles and Nevada expect to contribute to their trusts as funds are available, with Los Angeles initially contributing \$21 million in the 2016-17 fiscal year, and Nevada contributing \$25,000 in the 2015-16 fiscal year. Shasta will make future trust contributions as funds are available, with an annual target of \$100,000. For the year ended June 30, 2016, the State contributed \$2.1 billion toward annuitants' health and dental benefits. Of this amount, the trial courts represent \$91 million and certain discretely presented component units represent \$4 million.

Annual OPEB Cost and Net OPEB Obligation: The State's annual OPEB cost (expense) is calculated based on the ARC. Table 34 presents the State's OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for the year ended June 30, 2016, and the two preceding years, including trial courts.

Table 34

Schedule of Annual OPEB Cost, Percentage of Annual OPEB Cost Contributed and Net OPEB Obligation
(amounts in thousands)

<u>Fiscal Year Ended</u>	<u>Annual OPEB Cost</u>	<u>Percentage of Annual OPEB Cost Contributed</u>	<u>Net OPEB Obligation</u>
June 30, 2014	\$ 5,129,284	37.20 %	\$ 19,489,030
June 30, 2015	5,156,787	39.33	22,617,653
June 30, 2016	5,693,106	37.74	26,162,194

Table 35 presents the components of the State's net OPEB obligation to the OPEB plan, including trial courts.

Table 35

Schedule of Net OPEB Obligation

June 30, 2016

(amounts in thousands)

	<u>Amount</u>
Annual required contribution	\$ 5,626,380
Interest on net OPEB obligation	967,619
Adjustment to annual required contribution	(900,893)
Annual OPEB cost	5,693,106
Contributions made	(2,148,565)
Increase in net OPEB obligation	3,544,541
Net OPEB obligation – beginning of year	22,617,653
Net OPEB obligation – end of year ¹	\$ 26,162,194

¹ This total is not fully reported within this State's financial statements as a portion is allocated to related organizations that are not included in the CAFR and fiduciary component units that deem the amount immaterial for inclusion in their separately issued financial statements.

Funded Status and Funding Progress: As of June 30, 2016—the most recent actuarial valuation date for the State substantive plan—the actuarial accrued liability (AAL) for benefits was \$76.7 billion, and the actuarial value of assets was \$148 million, resulting in an unfunded actuarial accrued liability (UAAL) of \$76.5 billion. The covered payroll (annual payroll of active employees covered by the plan) was \$20.2 billion, and the ratio of the UAAL to the covered payroll was 380%.

For the trial courts, as of July 1, 2015—the most recent actuarial valuation date—the AAL for benefits was \$1.5 billion and the actuarial value of assets was \$88 million, resulting in an UAAL of \$1.4 billion. The covered payroll was \$1.0 billion and the ratio of the UAAL to covered payroll was 139%.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about mortality and the healthcare cost trend. Amounts determined regarding the plan's funded status and the employer's annual required contributions are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Actuarial Methods and Assumptions: Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used are consistent with a long-term perspective.

In the June 30, 2016 State substantive plan actuarial valuation, the individual entry age normal cost method was used. The actuarial assumptions included a 4.25% investment rate of return and an annual health care cost trend rate of actual increases for 2017 and 8.00% in 2018 initially, reduced to an ultimate rate of 4.50% in 2023. Both rates included a 2.75% annual inflation assumption. Annual wage inflation is assumed to be 3.00%. The UAAL is being amortized as a level percentage of active member payroll on an open basis over 30 years.

In the July 1, 2015 biennial actuarial valuations, the entry age normal cost method was used for 51 of the trial courts. The actuarial assumptions included a 3.75% investment rate of return for 19 trial courts. There are 32 other trial courts with investment rates of return ranging from 4.95% to 7.28%. The actuarial assumptions included a health care cost trend assumption based on the Society of Actuaries' "Getzen" trend model that incorporates (1) initial short-term rates (up to five years); (2) a multi-decade transition period of medium-term rates until projected healthcare costs reach gross domestic product capacity; and (3) a transition to the ultimate trend rate. The initial trend rates start at 8.25% for most trial courts and then reduce gradually to an ultimate trend rate of 4.4% after 60 years. Annual inflation and payroll growth are assumed to be 2.75% and 3.00%, respectively, for most trial courts. The UAAL is amortized on an open basis over 30 years as a level percentage of payroll for 47 trial courts. Three other trial courts (Lassen, Orange, and Yolo) amortize on a closed basis as a level percentage of payroll over 27, 22, and 23 years, respectively. Alpine is amortizing using the level dollar amount over 22 years on a closed basis.

NOTE 12: COMMERCIAL PAPER AND OTHER LONG-TERM BORROWINGS

The primary government has two commercial paper borrowing programs: a general obligation commercial paper program and an enterprise fund commercial paper program for the Department of Water Resources. Commercial paper (new issuance or rollover notes that replace maturing new issuances) may be issued at the prevailing market rate, not to exceed 11% for the general obligation program and 12% for the Department of Water Resources enterprise fund program, for periods not to exceed 270 days from the date of issuance. The proceeds from the initial issuance of commercial paper are restricted primarily for construction costs of general obligation bond program projects and certain state water projects. For both commercial paper borrowing programs, the commercial paper is retired by the issuance of long-term debt, so commercial paper is considered a noncurrent liability.

To provide liquidity for the programs, the State has entered into revolving credit agreements with credit providers such as commercial banks. The current "Letter of Credit" or "Note Purchase" agreements for the general obligation commercial paper program authorize the issuance of notes in an aggregate principal amount not to exceed \$2.2 billion. As of June 30, 2016, the general obligation commercial paper program had

\$771 million in outstanding commercial paper notes for governmental activities. The current agreement for the enterprise fund commercial paper program authorizes the issuance of notes in an aggregate principal amount not to exceed \$140 million. As of June 30, 2016, the enterprise fund commercial paper program had \$43 million in outstanding notes.

The primary government has a bond anticipation note program that consists of borrowing for capital improvements on certain California State University campuses. As of June 30, 2016, \$5 million in outstanding bond anticipation notes existed in anticipation of the primary government issuing revenue bonds to the public.

The University of California, a discretely presented component unit, has a commercial paper program and other uncollateralized borrowings. Additional disclosures for the University's commercial paper and other long-term borrowings are included in the University's separately issued financial statements, which can be obtained from the University on its website at www.ucop.edu.

NOTE 13: LEASES

The aggregate amount of lease commitments for facilities and equipment of the primary government in effect as of June 30, 2016, was approximately \$1.8 billion. Primary government leases that are classified as operating leases, in accordance with the applicable standards, contain clauses providing for termination. Operating lease expenditures are recognized as being incurred over the lease term. Operating lease expenditures for the year ended June 30, 2016, amounted to approximately \$256 million for governmental activities and \$27 million for business-type activities. It is expected that, in the normal course of business, most of these operating leases will be replaced by similar leases.

The total present value of net minimum capital lease payments for the primary government is \$760 million. Note 9, Long-term Obligations, reports current additions and deductions for these capital lease obligations. Included in the capital lease commitments are lease-purchase agreements, amounting to a present value of net minimum lease payments of \$208 million that the California State University, reported as an enterprise fund, has entered into with the State Public Works Board (SPWB), reported as an internal service fund. This amount represents 27.3% of the total present value of minimum capital lease payments of the primary government. Also included in the capital lease commitments are lease-purchase agreements to acquire equipment. Total assets related to capital leases have a net carrying value of \$254 million for governmental activities and \$467 million for business-type activities.

The capital lease commitments do not include \$7.3 billion in lease-purchase agreements with the SPWB and \$186 million in lease purchase agreements with building authorities that are blended component units. The SPWB and the building authorities acquire or develop office buildings and then lease the facilities to state agencies. Upon expiration of the lease, title passes to the primary government. The costs of the buildings and the related outstanding revenue bonds are reported as governmental activities in the government-wide financial statements. Accordingly, the lease receivables and capital lease obligations associated with these buildings are not included in the government-wide financial statements.

The University of California, a discretely presented component unit, leases land, buildings, and equipment under agreements recorded as operating leases. Additional disclosure for the University's lease obligations is included in its separately issued financial statements that may be found on its website at www.ucop.edu.

Table 36 summarizes future minimum lease commitments of the primary government.

Table 36

Schedule of Future Minimum Lease Commitments – Primary Government

(amounts in thousands)

Year Ending June 30	Governmental Activities		Business-type Activities		Total
	Operating Leases	Capital Leases	Operating Leases	Capital Leases	
2017	\$ 215,480	\$ 65,031	\$ 25,274	\$ 63,683	\$ 369,468
2018	166,683	54,120	19,227	61,232	301,262

2057-2061	45	—	33	—	78
2062-2066	—	—	211	—	211
Total minimum lease payments	\$ 680,383	391,597	\$ 145,050	602,317	\$ 1,819,347
Less: amount representing interest		21,415		212,932	
Present value of net minimum lease payments		370,182		389,385	
Less: current portion		25,689		43,818	
Capital lease obligation, net of current portion		\$ 344,493		\$ 345,567	

NOTE 14: COMMITMENTS

As of June 30, 2016, the primary government had commitments of \$7.3 billion for certain highway construction and high-speed rail projects. These commitments are not included as a liability in the Federal Fund or the Transportation Fund because future expenditures related to these commitments will be reimbursed with \$1.1 billion from local governments and \$6.2 billion from proceeds of approved federal grants. The primary government also had other commitments for which the future expenditures will be reimbursed by the proceeds of approved federal grants of \$623 million for various education programs, \$371 million for terrorism prevention and disaster-preparedness response projects, \$296 million for services under the workforce development program, \$189 million for services provided under various public health programs, \$111 million for community service programs, \$44 million for services provided under the welfare program, and \$18 million for services provided under the child support program.

The primary government had other commitments, totaling \$9.1 billion, that are not included as a liability on the Balance Sheet or the Statement of Net Position. The \$9.1 billion in commitments includes grant agreements totaling approximately \$4.9 billion to reimburse other entities for construction projects for school building aid, parks, transportation-related infrastructure, housing, and other improvements; and to reimburse counties and cities for costs associated with various programs. Any assets that have been constructed will not belong to the primary government, whose payments are contingent upon the other entities entering into

construction contracts. The \$9.1 billion in commitments includes \$379 million in undisbursed loan commitments for various programs aimed at providing housing and emergency shelter to persons in need and \$2.0 billion for undisbursed loan commitments to qualified agencies for clean water projects.

The \$9.1 billion in commitments also includes contracts of \$1.0 billion for the construction of water projects and the purchase and transmission of power that are not included as a liability on the Statement of Net Position of the Water Resources Fund. Included in this amount are certain power purchase, sale, and exchange contracts. The primary government had commitments of \$473 million for CSU construction projects. In addition, CSU participates in forward-purchase contracts of natural gas and electricity. As of June 30, 2016, CSU's obligation under these special purchase arrangements requires it to purchase at fixed prices an estimated total of \$30 million in electricity through December 2019 and \$10 million in natural gas through June 2018. The primary government also had commitments of \$43 million to veterans for the purchase of properties under contracts of sale. The California State Lottery Commission had commitments of \$243 million for gaming and telecommunication systems and services. These are long-term projects, and all of the contracts' needs may not have been defined. The projects will be funded with existing and future program resources or with the proceeds of revenue and general obligation bonds.

As of June 30, 2016, the primary government encumbered expenditures of \$989 million for the General Fund, \$2.5 billion for the Transportation Fund, \$977 million for the Environmental and Natural Resources Fund, and \$910 million for the nonmajor governmental funds. See Note 2A, Budgeting and Budgetary Control, for an explanation of the primary government's policy concerning encumbrances.

As of June 30, 2016, the discretely presented and fiduciary component units had other commitments that were not included as liabilities on the corresponding Statement of Net Position. Additional disclosure for the University of California's commitments is included in its separately issued financial statements, which may be found on its website at www.ucop.edu. Additional disclosure for the California Housing Finance Agency's (CalHFA) commitments is included in its separately issued financial statements, which may be found on its website at www.CalHFA.ca.gov. Additional disclosure for the California Public Employees' Retirement System's (CalPERS) commitments is included in its separately issued financial statements, which may be found on its website at www.CalPERS.ca.gov. Additional disclosure for the California State Teachers' Retirement System's (CalSTRS) commitments is included in its separately issued financial statements, which may be found on its website at www.CalSTRS.com.

NOTE 15: GENERAL OBLIGATION BONDS

The State Constitution permits the primary government to issue general obligation bonds for specific purposes and in such amounts as approved by a two-thirds vote of both houses of the Legislature and by a majority of voters in a general or direct primary election. The debt service for general obligation bonds is appropriated from the General Fund. Under the State Constitution, the General Fund is used first to support the public school system and public institutions of higher education; the General Fund can then be used to service the debt on outstanding general obligation bonds. Enterprise funds and certain other funds reimburse the General Fund for any debt service it provides on their behalf. General obligation bonds that are directly related to, and are expected to be paid from, the resources of enterprise funds are included as a liability of such funds in the financial statements. However, the General Fund may be liable for the payment of any principal and interest on these bonds that is not met from the resources of such funds.

As of June 30, 2016, the State had \$74.9 billion in outstanding general obligation bonds related to governmental activities and \$792 million related to business-type activities. In addition, \$27.9 billion in long-term general obligation bonds had been authorized but not issued, of which \$27.6 billion is related to governmental activities and \$368 million is related to business-type activities. The total amount authorized but not issued includes \$15.5 billion authorized by the applicable finance committees for issuance in the form

of commercial paper notes. Of this amount, \$771 million in general obligation indebtedness in the form of commercial paper notes was not yet retired by long-term bonds.

A. Variable-rate General Obligation Bonds

The State issues both fixed and variable-rate general obligation bonds. As of June 30, 2016, the State had \$3.0 billion in variable-rate general obligation bonds outstanding, consisting of \$803 million in daily-rate bonds with credit enhancement and \$1.7 billion in weekly-rate bonds with credit enhancement, and \$498 million in weekly- or monthly-rate bonds without credit enhancement. The interest rates associated with the credit-enhanced bonds are determined by the remarketing agents to be the lowest rate that would allow the bonds to sell on the effective date of such rate at a price (without regard to accrued interest) equal to 100% of the principal amount. The interest rates associated with the unenhanced Index Floating Rate Bonds are determined by the Securities Industry and Financial Markets Association (SIFMA) Index rate or percentage of the London Interbank Offered Rate (LIBOR) then in effect plus a pre-determined spread. The interest on variable-rate bonds is generally paid on the first business day of each calendar month.

The credit-enhanced bonds are secured by letters of credit that secure payment of principal and interest on the bonds. The State has entered into different credit agreements with various banks for each series of credit-enhanced bonds. Under these credit agreements, the credit providers agree to pay all principal and interest payments or the commitment amounts to the bondholders; the State is then required to reimburse the credit providers for the amounts paid. In return, the credit providers are compensated with commitment fees that are calculated as a percentage of the bank commitment amounts. The bondholders have the right to tender the bonds daily if the bonds are in a daily-rate mode and weekly if the bonds are in a weekly-rate mode. Upon a tender, the remarketing agent will attempt to remarket the bonds to a new investor. If the remarketing of the bonds is unsuccessful, the bonds will enter into a bank bond period and accrue interest at higher rates, which cannot exceed 11% as permitted by law until remarketed or redeemed. If the bonds cannot be remarketed and remain in a bank bond period ranging from 45 days to 90 days, the bonds will be subject to term loan payment in 12 equal quarterly installments under the terms stated in the credit agreements. The term loan period may exceed the expiration dates of the credit agreements. The bonds may be remarketed at any time during the bank bond or term loan period. There were no bank bonds during fiscal year 2015-16.

The letters of credit for the Series 2003 variable-rate bonds have expiration dates of December 16, 2016; September 7, 2018; November 2, 2018; November 16, 2018; and April 26, 2019. The letters of credit for the Series 2004 variable-rate bonds have expiration dates of April 5, 2018; September 7, 2018; and August 11, 2020. The letters of credit for the Series 2005 variable-rate bonds have expiration dates of December 16, 2016; April 11, 2017; November 16, 2018; November 4, 2019; and November 15, 2019. The Series 2012A and 2013 C, D, and E Index Floating Rate Bonds have mandatory purchase dates on December 1, 2016 (Series 2013C); December 1, 2017 (Series 2013D); May 1, 2018 (Series 2012A); and December 3, 2018 (Series 2013E). The Series 2012B SIFMA Index Floating Rate Bonds have final maturities from 2017 to 2020.

Based on the schedules provided in the Official Statements, any required sinking fund deposits for the variable-rate general obligation bonds were set aside in a mandatory sinking fund at the beginning of each of fiscal year 2015-16 and will continue through 2033-34, and 2039-40. The deposits set aside in any fiscal year may be applied, with approval of the State Treasurer and the appropriate bond finance committees, to the redemption of any other general obligation bonds then outstanding. To the extent that the deposit is not applied by January 31 of each fiscal year, the variable-rate general obligation bonds will be redeemed in whole or in part on an interest payment date in that fiscal year.

B. Mandatory Tender Bonds

As of June 30, 2016, the State had \$1.1 billion in outstanding general obligation mandatory tender bonds, including \$675 million with a fixed interest rate and \$400 million with an index floating rate (discussed in Section A). On their respective mandatory tender dates, these bonds are subject to mandatory tender for purchase at a price equal to 100% of the principal amount, plus accrued interest, without premium, unless the bonds have been called for redemption on or prior to that day. These bonds have mandatory tender dates on December 1, 2016; December 1, 2017; May 1, 2018; December 3, 2018; December 2, 2019; and December 1, 2021. In the event of an unsuccessful remarketing of all the outstanding bonds on the scheduled mandatory tender dates, the bonds will enter into a delayed remarketing period and accrue interest at a higher effective interest rate, gradually increasing on a stepped basis until they are remarketed, redeemed, or paid at maturity. Current state laws limit interest rates to 11% per annum. With respect to \$100 million of the Index Floating Rate Bonds, beginning six months after the scheduled mandatory tender date, the bonds will be subject to special mandatory redemption in 20 equal quarterly installments until they are remarketed or refunded.

C. Build America Bonds

As of June 30, 2016, the State had \$13.5 billion in taxable various-purpose general obligation bonds outstanding that were issued as “Build America Bonds” under the American Recovery and Reinvestment Act of 2009 (ARRA) signed into law on February 17, 2009. The bonds will mature between 2020 and 2040. Pursuant to ARRA, the State receives a cash subsidy payment from the United States Treasury equal to 35% of the interest payable by the State on the Build America Bonds on or near each interest payment date. Subsequent federal legislation reduced the Build America Bonds subsidy by 7.3% for the federal fiscal year ending September 30, 2015, and by 6.8% for the federal fiscal year ending September 30, 2016. The cash payment does not constitute a full faith and credit guarantee of the federal government, but is required to be paid by the United States Treasury under ARRA. The subsidy payments are deposited into the State’s General Fund.

D. Debt Service Requirements

Table 37 shows the debt service requirements for all general obligation bonds as of June 30, 2016. The estimated debt service requirements for the \$3.0 billion variable-rate general obligation bonds are calculated using the actual interest rates in effect on June 30, 2016. For mandatory tender bonds, the debt service requirements shown in Table 37 are based on the assumption that the interest rate will remain in effect until the applicable reset dates and that the bonds will be fully redeemed on their scheduled maturity dates. The amounts do not reflect any interest subsidy under the Build America Bonds program or any other offsets to general fund costs of debt service.

Table 37

Schedule of Debt Service Requirements for General Obligation Bonds

(amounts in thousands)

Year Ending June 30	Governmental Activities			Business-type Activities

E. General Obligation Bond Defeasances

1. Current Year Activity

On September 9, 2015, the primary government issued \$1.4 billion in general obligation bonds to current and advance refund \$1.5 billion in outstanding general obligation bonds maturing in 2016 to 2036. As a result, the refunded bonds are defeased and the liability for those bonds has been removed from the financial statements. The refunding decreased overall debt service by \$273 million and resulted in an economic gain of \$205 million. The economic gain is the difference between the present value of the old debt service requirements and the present value of the new debt service requirements, discounted at 2.80% per year over the life of the new bonds.

On November 3, 2015, the primary government issued \$866 million in general obligation bonds to advance refund \$930 million in outstanding general obligation bonds maturing in 2017 to 2035. As a result, the refunded bonds are defeased and the liability for those bonds has been removed from the financial statements. The refunding decreased overall debt service by \$160 million and resulted in an economic gain of \$123 million. The economic gain is the difference between the present value of the old debt service requirements and the present value of the new debt service requirements, discounted at 2.71% per year over the life of the new bonds.

On March 17, 2016, the primary government issued \$1.8 billion in general obligation bonds to current and advance refund \$2.0 billion in outstanding general obligation bonds maturing in 2016 to 2037. As a result, the refunded bonds are defeased and the liability for those bonds has been removed from the financial statements. The refunding decreased overall debt service by \$399 million and resulted in an economic gain of \$294 million. The economic gain is the difference between the present value of the old debt service requirements and the present value of the new debt service requirements, discounted at 2.62% per year over the life of the new bonds.

On April 28, 2016, the primary government issued \$998 million in general obligation bonds to current and advance refund \$1.1 billion in outstanding general obligation bonds maturing 2017 to 2037. As a result, the refunded bonds are defeased and the liability for those bonds has been removed from the financial statements. The refunding decreased overall debt service by \$251 million and resulted in an economic gain of \$196 million. The economic gain is the difference between the present value of the old debt service requirements and the present value of the new debt service requirements, discounted at 2.05% per year over the life of the new bonds.

2. Outstanding Balance

In the current and prior years, the primary government placed the proceeds of the refunding bonds in a special irrevocable escrow trust account with the State Treasury to provide for all future debt service payments on defeased bonds. The assets of the trust accounts and the liability for defeased bonds are not included in the State's financial statements. As of June 30, 2016, the outstanding balance of defeased general obligation bonds was approximately \$3.6 billion.

NOTE 16: REVENUE BONDS

A. Governmental Activities

The State Treasurer is authorized by state law to issue Federal Highway Grant Anticipation Revenue Vehicles (GARVEE bonds). The purpose of these bonds is to accelerate the funding and construction of critical transportation infrastructure projects in order to provide congestion relief benefits to the public significantly sooner than with traditional funding mechanisms. These bonds are secured and payable from the annual federal appropriation for the State's federal-aid transportation projects. The primary government has no legal liability for the payment of principal and interest on these revenue bonds. Total principal and interest remaining on the bonds is \$46 million, payable through 2020. In addition, the California Alternative Energy and Advanced Transportation Financing Authority is authorized to issue Clean Renewable Energy Bonds to fund the acquisition and installation of certain transportation-related solar energy facilities located throughout the State. Both of these bonds finance activity in the Transportation Fund and are included in the governmental activities column of the government-wide Statement of Net Position.

The Golden State Tobacco Securitization Corporation (GSTSC), a blended component unit, as authorized by state law, has issued asset-backed bonds to purchase 100% of the State's rights to future revenues from the Master Settlement Agreement with participating tobacco companies. These bonds are secured by and payable solely from future Tobacco Settlement Revenue and interest earned on that revenue. The primary government has no legal liability for the payment of principal and interest on the bonds. The Legislature has annually granted a General Fund appropriation for payment of debt service in the event tobacco settlement revenues and other available amounts prove insufficient to make these payments during the next fiscal year. However, the use of the appropriated monies has never been required. In 2013 and 2015, bonds were issued to partially refund the 2005 bonds. Total principal and interest remaining on all asset-backed bonds is \$16.6 billion, payable through 2047. All of the Tobacco Settlement Revenue and interest has been pledged in support of these asset-backed bonds. Principal and interest paid in the current year totaled \$371 million, while Tobacco

Settlement Revenue and interest earned totaled \$365 million. These bonds are included in the governmental activities column of the government-wide Statement of Net Position.

Under state law, the State Public Works Board (SPWB), an agency that accounts for its activity in the Public Buildings Construction Fund, an internal service fund, and certain building authorities may issue revenue bonds. These bonds are issued for the purpose of constructing state office buildings. Leases with state agencies pay the principal and interest on the revenue bonds issued by the Public Buildings Construction Fund and building authorities. The General Fund has no legal liability for the payment of principal and interest on these revenue bonds. Total principal and interest remaining on the bonds is \$14.8 billion, payable through 2040. These revenue bonds are included in the governmental activities column of the government-wide Statement of Net Position.

For the specific debt service coverage ratios, refer to the Schedule of Pledged Revenue Coverage in the Statistical Section.

B. Business-type Activities

Revenue bonds that are directly related to, and are expected to be paid from, the resources of enterprise funds are included in the accounts of such funds. Principal and interest on revenue bonds are payable from the pledged revenues of the respective funds of agencies that issued the bonds. The General Fund has no legal liability for payment of principal and interest on revenue bonds. For specific debt service coverage ratios, refer to the Schedule of Pledged Revenue Coverage in the Statistical Section.

Revenue bonds to acquire, construct, or renovate state facilities or to refund outstanding revenue bonds in advance of maturity are issued for water resources, financing of electric power purchases for resale to utility customers, state university campuses, and certain nonmajor enterprise funds.

C. Discretely Presented Component Units

The University of California issues revenue bonds to finance various auxiliary, administrative, academic, medical center, and research facilities. The revenue bonds are not collateralized by any encumbrance, mortgage, or other pledge of property except pledged revenues, and do not constitute general obligations of the University. For more information regarding revenue bonds, current year defeasances, and outstanding defeasances of the University, refer to its separately issued financial report for fiscal year 2015-16, which may be found on its website at www.ucop.edu.

Under state law, the California Housing Finance Agency (CalHFA) issues fixed-rate and variable-rate revenue bonds to fund loans to qualified borrowers for single-family houses and multifamily developments. Variable-rate debt is typically related to remarketed rates or common indices, such as the Securities Industry and Financial Markets Association (SIFMA) or the London Interbank Offered Rate (LIBOR) and is reset periodically. CalHFA issues both federally taxable and tax-exempt bonds. The bonds issued by CalHFA are payable solely from and collateralized by revenues and other pledged assets. For more information regarding revenue bonds, current year defeasances, and outstanding defeasances of the CalHFA, refer to its separately issued financial report for fiscal year 2015-16, which may be found on its website at www.CalHFA.ca.gov.

Table 38 shows outstanding revenue bonds of the primary government and the discretely presented component units.

* Includes interest on variable-rate bonds based on rates in effect on June 30, 2016.

D. Revenue Bond Defeasances

1. Current Year – Governmental Activities

In April 2016, the SPWB and the California State University (CSU) entered into a restructuring agreement in which the bonds held by SPWB for CSU projects were refunded by revenue bonds issued by CSU. A portion of the bond proceeds of the CSU refunding bonds were deposited into escrow accounts and will be used to make principal and interest payments for the refunded debt, resulting in the legal defeasance of \$773 million in bonds payable. The restructuring was authorized in the 2015-16 budget.

The SPWB and CSU also executed termination agreements for the leases related to the defeased bonds. As a result, the net investment in direct financing leases, construction work in progress, and bonds payable related to these leases were removed from the Public Buildings Construction Fund’s Statement of Net Position. The net effect of these transactions was a gain of \$41 million, and is shown in the Public Buildings Construction Fund’s Statement of Revenues, Expenses, and Changes in Fund Net Position.

During the 2015-16 fiscal year, the SPWB issued \$618 million in lease revenue refunding bonds. The bond proceeds were used to refund \$731 million in outstanding lease revenue bonds. The net proceeds of the refunding bonds, along with additional resources, were deposited into an escrow account to provide for all future debt service payments on the refunded bonds. As a result, the bonds are considered defeased and the liability for those bonds has been removed from the financial statements. The refunding decreased debt service payments by \$137 million and resulted in an economic gain of \$117 million. These lease revenue bonds are reported in the Public Buildings Construction Fund, an internal service fund.

During the 2015-16 fiscal year, the San Francisco State Building Authority issued \$103 million in lease revenue refunding bonds to advance refund \$132 million in outstanding lease revenue bonds. The net proceeds of the refunding bonds were deposited in an escrow account to provide for all future debt service payments on the refunded bonds. As a result, the bonds are considered defeased and the liability for those bonds has been removed from the financial statements. The refunding decreased debt service payments by \$15 million and resulted in an economic gain of \$15 million.

During the 2015-16 fiscal year, the Oakland State Building Authority issued \$59 million in lease revenue refunding bonds to advance refund \$74 million in outstanding lease revenue bonds. The net proceeds of the refunding bonds were deposited in an escrow account to provide for all future debt service payments on the refunded bonds. As a result, the bonds are considered defeased and the liability for those bonds has been removed from the financial statements. The refunding decreased debt service payments by \$11 million and resulted in an economic gain of \$10 million.

2. Current Year – Business-type Activities

In August 2015 and April 2016, the CSU issued a total of \$2.4 billion in systemwide revenue refunding bonds to refund certain outstanding systemwide revenue bonds. A portion of the proceeds was deposited into an escrow account to provide for all future debt service payments on the refunded bonds. As a result, the bonds are considered defeased and the liability for these bonds has been removed from the financial statements. This refunding decreased debt service payments by \$210 million over the life of the bonds and resulted in an economic gain of \$154 million for the refunded bonds.

3. Outstanding Balances

In current and prior years, the primary government defeased certain bonds by placing the proceeds of new bonds in irrevocable trust accounts to provide for all future debt service requirements. Accordingly, the assets and liabilities for these defeased bonds are not included in the financial statements. As of June 30, 2016, the outstanding balances of defeased revenue bonds were \$233 million for governmental activities and \$2.3 billion for business-type activities.

NOTE 17: SERVICE CONCESSION ARRANGEMENTS

The State entered into various service concessions arrangements with independent third parties to develop, equip, operate, and maintain nonexclusive concessions at park grounds in exchange for fixed installment payments, for a fixed period of time. These third parties are compensated by user fees. These existing facilities are reported as capital assets by the State, the present value of installment payments are reported as receivables, and a corresponding deferred inflow of resources is reported in the government-wide Statement of Net Position. The State reserves the right to provide or modify the types of goods and services provided by the operator to ensure that the public receives fair pricing, proper service, and appropriate quality. The State is not obligated by the debts of the operator in the event of a default, nor does the State guarantee minimum revenue to the operator. The amount of the primary government's service concession arrangements can be found in Note 21, Deferred Outflows and Deferred Inflows of Resources.

The University of California, a discretely presented component unit, has entered into service concession arrangements with third parties for student housing and certain other faculty and student services. Payments received or to be received by the University from service concession arrangements are reported as deferred inflows of resources. Additional information on the University's service concession arrangements can be found in the University's separately issued financial statements on its website at www.ucop.edu.

NOTE 18: INTERFUND BALANCES AND TRANSFERS

A. Interfund Balances

Short-term interfund receivables and payables result from the time lag between the dates on which goods and services are delivered and the dates on which payments between entities are made. In addition, interfund borrowing, mainly from nonmajor governmental funds and fiduciary funds, is used to meet temporary imbalances of receipts and disbursements in the General Fund.

Table 40 shows the amounts due from and due to other funds.

Table 40

Schedule of Due From Other Funds and Due To Other Funds

Interfund receivables and payables are the result of interfund loans that are not expected to be repaid within one year. In addition to the temporary interfund cash-flow borrowing shown in Table 40, annual enacted budgets provide for long-term loans from many of the State’s special funds—mainly the Transportation Fund, Environmental and Natural Resources Fund, and nonmajor governmental funds—to the General Fund. The \$2.4 billion in Transportation Fund loans payable from the General Fund also includes \$849 million in deferred Proposition 42 transfers for traffic congestion relief and other direct loans from the Traffic Congestion Relief Program.

Table 41 shows the primary government’s interfund receivables and payables.

Table 41

Nonmajor governmental funds	32,321
Total governmental funds	170,203
Total primary government	\$ 170,203

B. Interfund Transfers

Transfers move money collected by one fund to another fund, which then disburses it as required by law. The General Fund and certain other funds transfer money to support various programs accounted for in other funds. The largest transfer from the General Fund was \$2.3 billion to nonmajor governmental funds, mainly for support of trial courts, local governments, and health care related programs. The General Fund also transferred \$2.8 billion to the California State University, an enterprise fund. The Transportation Fund transferred \$1.1 billion in weight fee revenues to the Transportation Debt Service Fund, a nonmajor governmental fund, for transportation-related debt service costs. The Federal Fund transferred \$500 million to the General Fund for administration of the Unemployment Insurance Program.

Table 43 shows interfund transfers of the primary government.

Total net position deficits	\$ 928,501	\$ 2,576,689

C. Discretely Presented Component Unit Endowments and Gifts

The University of California, a discretely presented component unit, administers certain restricted nonexpendable, restricted expendable, and unrestricted endowments that are included in the related net position categories of the government-wide and fund financial statements. As of June 30, 2016, the value of restricted endowments and gifts totaled \$14.6 billion, and unrestricted endowments and gifts totaled \$3.0 billion. The University's policy is to retain realized and unrealized appreciation on investments with the endowment after an annual income distribution. The net appreciation available to meet future spending needs upon approval by the Board of Regents amounted to \$2.1 billion at June 30, 2016. The portion of investment returns earned on endowments and distributed each year to support current operations is based on a rate approved by the Board of Regents. In addition, the California State University Auxiliary Organizations and the University of California Hastings College of the Law, nonmajor component units, have restricted nonexpendable and restricted expendable endowments of \$1.1 billion and \$9 million, respectively.

NOTE 20: RISK MANAGEMENT

The primary government has elected, with a few exceptions, to be self-insured against loss or liability. The primary government generally does not maintain reserves. Losses are covered by appropriations from each fund responsible for payment in the year in which the payment occurs. The State is permissively self-insured and, barring any extraordinary catastrophic event, the potential amount of loss faced by the State is not considered material in relation to the primary government's financial position. Generally, the exceptions are when a bond resolution or a contract requires the primary government to purchase commercial insurance for coverage against property loss or liability. There have been no significant reductions in insurance coverage from the prior year. In addition, no insurance settlement in the last three years has exceeded insurance coverage. All claim payments are on a "pay-as-you-go" basis, with workers' compensation benefits for self-insured agencies initially being paid by the State Compensation Insurance Fund.

The discounted liability for unpaid self-insurance claims of the primary government is estimated to be \$3.9 billion as of June 30, 2016. This estimate is primarily based on actuarial reviews of the State’s workers’ compensation program and includes indemnity payments to claimants, as well as all other costs of providing workers’ compensation benefits, such as medical care and rehabilitation. The estimate also includes the liability for unpaid services fees, industrial disability leave benefits, and incurred-but-not-reported amounts. The estimated total liability of approximately \$5.6 billion is discounted to \$3.9 billion using a 3.5% interest rate. Of the total discounted liability, \$409 million is a current liability, of which \$276 million is included in the General Fund, \$130 million in the special revenue funds, and \$3 million in the internal service funds. The remaining \$3.5 billion is reported as other noncurrent liabilities in the government-wide Statement of Net Position.

The University of California, a discretely presented component unit, is self-insured or insured through a wholly-owned captive insurance company. Additional disclosures for the University’s risk management and self-insurance claims liability is included in its separately issued financial statements, which can be obtained from the University on its website at www.ucop.edu.

Table 46 shows the changes in the self-insurance claims liability for the primary government.

Table 46

Schedule of Changes in Self-Insurance Claims

Year Ended June 30
(amounts in thousands)

	2016	2015
Unpaid claims, beginning	\$ 3,843,167	\$ 3,703,970
Incurred claims	540,310	566,194
Claim payments	(443,757)	(426,997)
Unpaid claims, ending	\$ 3,939,720 *	\$ 3,843,167

* Includes \$3,282 for business-type activities.

NOTE 21: DEFERRED OUTFLOWS AND DEFERRED INFLOWS OF RESOURCES

In the fund financial statements, governmental funds reported deferred inflows of resources of \$1.9 billion as this amount represents revenues that are earned and measurable, but not available within 12 months of the end of the reporting period.

Table 47 shows the detail of the deferred outflows of resources and deferred inflows of resources reported in the government-wide Statement of Net Position. For descriptions of the deferred outflows and deferred inflows of resources transactions, see Note 1.L.

Table 47**Schedule of Deferred Outflows and Deferred Inflows of Resources**

June 30, 2016

(amounts in thousands)

	Primary Government			Component Units
	Governmental Activities	Business-Type Activities	Total	
Deferred outflows of resources:				
Loss on refunding of debt	\$ 808,177	\$ 390,176	\$ 1,198,353	\$ 397,863
Decrease in fair value of hedging derivatives	—	—	—	179,564
Net pension liability	6,917,408	938,106	7,855,514	5,080,144
Total deferred outflows of resources	7,725,585	1,328,282	9,053,867	5,657,571
Deferred inflows of resources:				
Gain on refunding of debt	194,700	—	194,700	773

Net pension liability	4,990,302	162,346	5,152,648	1,210,490
Other deferred inflows	—	922,505	922,505	499,155
Total deferred inflows of resources	\$ 5,249,323	\$ 1,084,851	\$ 6,334,174	\$ 1,781,557

NOTE 22: NO COMMITMENT DEBT

The California Housing Finance Agency (CalHFA), a major component unit, issued conduit debt to provide financial assistance for the acquisition, construction, and development of multifamily rental housing. As of June 30, 2016, the CalHFA had \$592 million of conduit debt obligations outstanding, which is not debt of the State.

Certain debt of the nonmajor component units is issued to finance activities such as the promotion of renewable energy sources and financing for economic development projects. This debt is secured by the credit of private and public entities and is administered by trustees independent of the State. As of June 30, 2016, these component units had approximately \$4.3 billion of debt outstanding, which is not debt of the State.

NOTE 23: CONTINGENT LIABILITIES

A. Litigation

The primary government is a party to numerous legal proceedings, many of which are not unusual for governmental operations. To the extent they existed, the following legal proceedings were accrued as a liability in the government-wide financial statements: those decided against the primary government before June 30, 2016; those in progress as of June 30, 2016, and settled or decided against the primary government as of March 22, 2017; and those having a high probability of resulting in a decision against the primary government as of March 22, 2017, and for which amounts could be estimated. In the governmental fund financial statements, the portion of the liability that is expected to be paid within the next 12 months is recorded as a liability in the fund from which payment will be made. In the proprietary fund financial statements, the entire liability is recorded in the fund from which payment will be made.

In addition, the primary government is involved in certain other legal proceedings that, if decided against the primary government, may impair its revenue sources or require it to make significant expenditures. Because of the prospective nature of these proceedings, no provision for the potential liability has been made in the financial statements.

Following are the more significant lawsuits pending against the primary government:

The primary government is a defendant in two cases, *Bakersfield Mall, LLC v. Franchise Tax Board*, and *CA-Centerside II, LLC v. Franchise Tax Board*, both regarding the constitutionality of a fee imposed on limited-liability companies (LLC). Plaintiffs allege class action and declaratory relief, and seek attorney fees based on alleged violations to the state and federal constitutions. They seek certification of two classes of allegedly similarly situated LLCs and unspecified amount of refunds on behalf of the LLC classes, alleged to be in excess of 50,000 members. The trial court has denied class certification and the plaintiffs have appealed. Briefing of the appeal was completed on December 17, 2014, and the parties are waiting for notice of oral argument.

In a previously settled case, *Northwest Energetic Services, LLC v. Franchise Tax Board*, the Court of Appeal found the fee unconstitutional only as applied to the plaintiff. The primary government has already begun to pay refunds to LLCs, with the same facts as Northwest, that have no income earned inside California. In another previously settled case, *Ventas Finance I, LLC v. Franchise Tax Board*, the Court of Appeal also ruled that the fee is unconstitutional as applied to the plaintiff, but it awarded only a partial refund because Ventas received income from both inside and outside of California. *Bakersfield Mall, LLC v. Franchise Tax Board* raised the same constitutional issues as Northwest and Ventas, but initially pertained to LLCs that conduct business solely within California. Bakersfield Mall, LLC later amended its complaint to reflect the fact that not all of its income is derived within the state, making it similar to the Ventas case. This plaintiff also intended to bring a class action suit for refund on behalf of all similarly situated LLCs and to declare the LLC fee unconstitutional. However, the Court of Appeal ruled that Bakersfield Mall, LLC did not follow mandatory class action claim procedures. *CA-Centerside II, LLC v. Franchise Tax Board* raised the same constitutional issues as the Bakersfield case, and alleges that the LLC fee is unconstitutional regarding any activities, whether in-state or out-of-state. Actual and expected future claims for refunds from LLCs are estimated to be as high as \$1.2 billion.

The primary government is a defendant in another case, *Abercrombie & Fitch Co. & Subsidiaries v. Franchise Tax Board*, regarding constitutionality of Revenue and Taxation Code section 25101.15. If the plaintiff were to prevail and obtain the remedy it seeks, the estimated loss to the plaintiff and all similarly situated taxpayers is approximately \$5.0 billion in refunds and \$1.5 billion in lost annual revenues going forward. The case went to

trial and on September 13, 2016, the court granted the State's motion for judgement, which was entered for the State on October 31, 2016. A Notice of Appeal was filed December 7, 2016.

A writ petition, *Bekkerman et al v. California Board of Equalization*, has been filed against the primary government challenging the validity of a Board of Equalization (the Board) sales tax regulation (Cal. Code of Regulations, Title 18, section 1585) that requires the sales tax charged on a mobile telephone be based on the full "unbundled" price of the phone, rather than any discounted price that is contingent on a service plan commitment. A companion class action has been filed. One plaintiff has removed the class action to federal court. The primary government has filed a motion to remand that is fully briefed and pending before the District Court. If the sales tax regulation is invalidated, the companion class action could lead to an order requiring the Board to refund up to \$1.0 billion in sales tax collections. The superior court will hold a hearing on the merits of the writ on June 2, 2017.

The primary government is a defendant in several matters collectively known as the Suction Dredge Mining Cases. Mining interests have challenged the State's regulation of suction dredge gold mining, alleging federal preemption and takings claims. One of these matters, *The New 49'ERS, Inc. et al. v. California Department of Fish and Game (The New 49'ERS)*, is also pled as a class action. If the plaintiffs in *The New 49'ERS* succeed in certifying a class of miners, and that class ultimately prevails in their claim that the state moratorium on suction dredge mining resulted in a constitutional taking of their federal mining rights, the State could face a judgment in excess of \$5 billion.

The primary government was a defendant in the following cases: *Anthem Blue Cross v. David Maxwell-Jolly, et al.*; *Molina Family Health Plan v. DHCS*; and *Health Net of California v. DHCS* regarding application of budget reduction factors to managed-care capitated rates. These cases have been settled on a contingent basis based on the plans' profitability. The estimated combined total potential loss is more than \$400 million based on three separate settlement agreements that were entered into in 2013 and 2014. The primary government is involved in similar disputes with LA Care and other local initiatives regarding application of budget reduction factors to managed-care capitation rates; these disputes are still pending in administrative hearings. The combined total potential loss is more than \$200 million.

B. Federal Audit Exceptions

The primary government receives substantial funding from the federal government in the form of grants and other federal assistance. The primary government, the University of California, California Housing Finance Agency (CalHFA), and certain nonmajor discretely presented component units are entitled to these resources only if they comply with the terms and conditions of the grants and contracts and with the applicable federal laws and regulations; they may spend these resources only for eligible purposes. If audits disclose exceptions, the primary government, the University, CalHFA, and certain nonmajor discretely presented component units may incur a liability to the federal government.

NOTE 24: SUBSEQUENT EVENTS

The following information describes significant events that occurred subsequent to June 30, 2016, but prior to the date of the auditor's report.

A. Debt Issuances

In August 2016, October 2016 and March 2017, the primary government issued \$2.7 billion, \$1.6 billion, and \$2.8 billion, respectively, in general obligation bonds to finance or refinance capital facilities or other voter-approved costs for public purposes, including: stem cell research; housing and emergency shelter; high-speed rail; K-12 public school facilities; K-12 public education facilities; public higher education facilities; library construction and renovation; safe drinking water; clean air and transportation improvement; earthquake safety and public building rehabilitation; new prison construction; passenger rail and clean air; safe, clean, and reliable water supply; safe drinking water, clean water, watershed and flood protection; safe neighborhood parks, clean water, clean air, and coastal protection; seismic retrofit; water conservation; children's hospitals; highway safety, traffic reduction, air quality and port security; safe drinking water, water quality and supply, flood control, river and coastal protection; veterans' housing; water quality, supply, and infrastructure improvement; clean water, clean air, safe neighborhood and coastal protection; disaster preparedness and flood protection; public safety; correctional facilities; water security, clean drinking water, coastal and beach protection.

In August 2016, the University of California, a major component unit, issued a total of \$1.0 billion in revenue bonds to finance and refinance certain facilities and projects of their medical centers.

In September 2016, the primary government issued \$100 million in general obligation bonds for public purposes, including highway safety, traffic reduction, air quality and port security. The primary government also remarketed \$100 million in mandatory tender bonds originally issued to finance capital facilities or other voter-approved costs for public purposes..

In September 2016 and October 2016, the Department of Water Resources issued a combined \$995 million in revenue bonds. The \$567 million in power supply revenue bonds were issued to refund outstanding power supply bonds and to pay related issuance costs. The \$428 million in water system revenue bonds were issued to fund construction of certain water system projects, to refund or redeem certain outstanding water system revenue bonds and commercial paper notes, to fund deposits to a debt service reserve account, to fund capitalized interest, and to pay related issuance costs.

In October 2016, the State Public Works Board issued \$705 million in lease revenue bonds to refund outstanding lease revenue bonds, to finance and refinance certain design and construction cost on various projects for the benefit of the Department of Correction and Rehabilitation, to reimburse interim loans, and to pay related issuance costs.

In October 2016, the primary government issued \$167 million in veterans home purchase revenue bonds to refund certain outstanding home purchase revenue bonds, to make deposits into funds, accounts or subaccounts as provided in the resolution, to finance new and refinance existing contracts of purchase, and to pay related issuance costs.

In November 2016, two of the State's building authorities issued \$22 million in lease revenue bonds to refund outstanding bonds for two state office buildings, to fund a debt service reserve account, and to pay related issuance costs.

Subsequent to June 30, 2016, the California State University issued \$199 million in bond anticipation notes to fund capital projects at various campuses. In September 2016, the university deposited cash and certain investment securities in an irrevocable escrow with the State Treasurer as security for the partial refunding of certain outstanding Systemwide Revenue Bonds maturities. In February 2017, the university issued \$1.2 billion in revenue bonds to finance and refinance the acquisition, construction, improvement, and renovation of certain university facilities, to refund certain outstanding Systemwide Revenue Bond maturities, to fund capitalized interest, and to pay related issuance costs.

B. Other

In the November 8, 2016 general election:

- Voters passed Proposition 51 authorizing the State to sell \$9.0 billion in general obligation bonds for education facilities—\$7.0 billion for K-12 public school facilities and \$2.0 billion for community college facilities. The bonds will be issued over a five-year period and will increase the General Fund’s debt service expenditures by approximately \$500 million per year for 35 years.
- Voters passed Proposition 55 authorizing the State to extend through 2030 the income tax rates established by Proposition 30 that were scheduled to end in 2018. Proposition 55 guarantees revenues for K-12 public schools and community colleges, health care services for low-income Californians, budget reserves, and outstanding debt paydowns. After satisfying these constitutional requirements, remaining revenues, if any, would be available for any budget purpose.
- Voters passed Proposition 56 authorizing the State to increase its excise tax on cigarettes by \$2 per pack and by a similar amount for other tobacco products such as cigars, chewing tobacco, and electronic cigarettes effective April 1, 2017. Revenue from these higher taxes will be used for many purposes, but primarily to increase spending on health care services for low-income Californians.
- Voters passed Proposition 64 legalizing the use, growth, and possession of marijuana for adults 21 years and older for nonmedical purposes, with certain restrictions. The State will regulate nonmedical marijuana businesses and tax the growing and selling of medical and nonmedical marijuana. Most of the revenue from these taxes will support youth programs, environmental protection, and law enforcement.

In August 2016, Fitch Ratings raised the State’s general obligation rating to “AA-” from “A+”, stating that the upgrade reflected a combination of positive credit developments for the State, including Fitch’s revised criteria for U.S. state and local governments. In addition, Fitch stated, “California is fundamentally better positioned to withstand a future economic downturn than has been the case in prior recessions due to numerous institutional improvements.”

California’s demand for unemployment insurance benefits requires the State to continue borrowing from the U.S. Department of Labor during the 2016-17 fiscal year. As of June 30, 2016, the State had \$3.1 billion in outstanding loans with the U.S. Department of Labor that were used to cover deficits in the Unemployment Programs Fund. As of March 22, 2017, the State had an outstanding loan balance of \$3.0 billion and estimates that these loans will be fully repaid in 2018.

In December 2016, the California Public Employees’ Retirement System (CalPERS) Board of Administration voted to lower the discount rate used in its actuarial assumptions from 7.5% to 7.0% over the next three years. The Board approved separate timelines for implementing the new rate for the State, school districts, and public agencies. The new discount rate for the State would take effect July 1, 2017, and the new discount rate for school districts and public agencies would take effect July 1, 2018. CalPERS’ decrease in the discount rate will

potentially increase the State's unfunded pension liability and will likely result in higher employer contributions in the future.

In February 2017, the California State Teacher's Retirement System (CalSTRS) Board of Administration voted to adopt a new set of actuarial assumptions that reflect members' increasing life expectancies and current economic trends. The board voted to decrease the discount rate over a two-year period from 7.50% to 7.25% for the June 30, 2016 actuarial valuation to be presented at the April 2017 board meeting, and a decrease from 7.25% to 7.00% for the June 30, 2017 actuarial valuation to be presented at the April/May 2018 board meeting. CalSTRS' decrease in the discount rate will potentially increase the State's share of CalSTRS' unfunded liability and will likely result in a higher non-employer contribution required from the State.

Schedule of State Pension Contributions (continued)

For the Past Two Fiscal Years ¹

(amounts in thousands)

Notes to Required Supplementary Information for the most recent fiscal year presented:

Public Employees' Retirement Fund (PERF) and Single-Employer Plans

Actual contribution amounts: Based on statutorily required contributions as outlined in California Government Code section 20683.2, which dictates that any excess employer contributions due to increased employee contributions must be allocated to the unfunded liability.

Covered-employee payroll: Pensionable earnings provided by the employer

Valuation date: Actuarially determined contribution rates were calculated as of June 30, 2013.

Methods and assumptions used to determine contribution rates:

Actuarial cost method	Entry age normal
Amortization method	See each plan's June 30, 2013 Actuarial Valuation Report.
Asset valuation method	Actuarial value of assets; for details see each plan's June 30, 2013 Actuarial Valuation Report.
Inflation	2.75%
Salary increases	PERF – varies by entry age and service Judges' – 3.00% Judges' II – varies by entry age and service Legislators' – varies by entry age and service
Payroll growth	3.00%
Investment rate of return	Net of pension plan investment expenses and administrative expenses; includes inflation: PERF – 7.50%, which is used for contribution purposes Judges' – 4.25% Judges' II – 7.00% Legislators' – 5.75%
Retirement age	The probabilities of retirement are based on the 2014 CalPERS Experience Study for the period from 1997 to 2011.
Mortality	Mortality rates are based on the 2014 CalPERS Experience Study adopted by the CalPERS Board and post-retirement mortality rates include 20 years of projected on-going mortality improvements using Scale BB published by the Society of Actuaries.

Schedule of the State's Proportionate Share of Net Pension Liability – CalSTRS

For the Past Two Fiscal Years ¹

(amounts in thousands)

	<u>2014</u> ²	<u>2015</u> ²
State's proportion of CalSTRS' net pension liability	37.65%	34.59%
State's proportionate share of CalSTRS' net pension liability	\$ 22,001,531	\$ 23,289,391
Plan fiduciary net position as a percentage of the total pension liability ..	76.52%	74.02%

¹ This schedule will be built prospectively until it contains ten years of data.

² The date in the column heading represents the end of the measurement period of the net pension liability, which is one year prior to the reporting period.

Schedule of the State's Contributions – CalSTRS

For the Past Two Fiscal Years ¹

(amounts in thousands)

	<u>2015</u>	<u>2016</u>
Statutorily required contribution	\$ 1,486,004	\$ 1,935,288
Contributions in relation to the statutorily required contribution	1,486,004	1,935,288
Annual contribution deficiency/(excess)	\$ —	\$ —

¹ This schedule will be built prospectively until it contains ten years of data.

Notes to Required Supplementary Information for the most recent fiscal year presented:

State's Participation in CalSTRS

Actual contribution amounts:	Based on statutorily required contributions as outlined in California Education Code sections 22954 and 22955, as well as California Public Resources Code section 6217.
Valuation date:	Actuarially determined contribution rates were calculated as of June 30, 2014.
Methods and assumptions used to determine contribution rates:	
Actuarial cost method	Entry age normal
Amortization method/period	Level percent of payroll, closed/open period, 32 years remaining amortization period
Asset valuation method	Adjustment to market value
Consumer price inflation	3.00%
Payroll growth	3.75%
Investment rate of return	For calculating the actuarially determined contribution: 7.50%, net of pension plan investment and administrative expenses For calculating total pension liability: 7.60%, net of pension plan investment expenses, but gross of administrative expenses
Interest on accounts	4.50%
Post-retirement benefit increases (COLAs)	2.00% simple

July 1, 2015	88	1,494	1,406	5.9	1,014	138.7

¹ The trial courts reporting is based on 52 individual biennial actuarial valuations as of July 1, 2015.

Note: The University of California provides OPEB benefits through its Retirement Health Plan to its eligible retirees and their families. As the University is the employer providing these benefits, the State will not be reporting these benefits in Note 11 or the Required Supplementary Information. Information regarding the University and references to its financial statements can be found in Note 1, Section A.3., Discretely Presented Component Units.

Infrastructure Assets Using the Modified Approach

Pursuant to Governmental Accounting Standards Board (GASB) Statement No. 34, the State uses the modified approach to report the cost of its infrastructure assets (state roadways and bridges). Under the modified approach, the State does not report depreciation expense for roads and bridges but capitalizes all costs that add to the capacity and efficiency of State-owned roads and bridges. All maintenance and preservation costs are expensed and not capitalized.

A. Infrastructure Asset Reporting Categories

The infrastructure assets reported in the State's financial statements for the fiscal year ending June 30, 2016, are in the following categories and amounts: state highway infrastructure (completed highway projects) totaling \$73.5 billion, land purchased for highway projects totaling \$14.3 billion, and infrastructure construction-in-progress (uncompleted highway projects) totaling \$11.0 billion.

Donation and Relinquishment: Donation and relinquishment activity affects the inventory of statewide lane miles, land, and/or bridges as adjustments to the infrastructure assets and/or land balance in the State's financial statements. For the fiscal year ending June 30, 2016, there were no donations of infrastructure land, and relinquishments are \$40 million of state highway infrastructure (completed highway projects) and \$8 million of infrastructure land.

B. Condition Baselines and Assessments

1. Bridges

The State uses the Bridge Health Index (BHI)—a numerical rating scale from 0 to 100 that uses element-level inspection data—to determine the aggregate condition of its bridges. The inspection data is based on the American Association of State Highway and Transportation Officials’ “Guide Manual for Bridge Element Inspection.”

The BHI represents the remaining asset value of the bridge. A new bridge that has 100% of its asset value has a BHI of 100. As a bridge deteriorates, it loses asset value, as represented by a decline in its BHI. When a bridge is repaired, it will regain some (or all) of its asset value and its BHI will increase.

The following table shows the State’s established condition baseline and actual BHI for fiscal years 2013-14 through 2015-16:

<u>Fiscal Year Ended June 30</u>	<u>Established BHI Baseline ¹</u>	<u>Actual BHI</u>
2014	80.0	95.6
2015	80.0	95.7
2016	80.0	94.5

¹ The actual statewide BHI should not be lower than the minimum BHI established by the State.

The following table provides details on the State’s actual BHI as of June 30, 2016:

<u>BHI Range¹</u>	<u>Bridge Count</u>	<u>Percent</u>	<u>Network BHI</u>
Greater than 99.50	4,739	36.53 %	99.9
90.0 <= HI <= 99.50	5,784	44.59	97.0
80.0 <= HI < 90.0	862	6.65	85.8
70.0 <= HI < 80.0	980	7.55	73.9
0.0 < HI < 70.0	367	2.83	58.9
Does not carry traffic	240	1.85	97.3
Total	12,972	100.00 %	

¹ Effective FY 2015-16, the BHI Range is being displayed instead of the BHI Description for the analysis of State Bridges - Statewide as requested by the Office of Structure Maintenance and Investigations.

2. Roadways

The State conducts a periodic pavement-condition survey, which evaluates ride quality and structural integrity and identifies the number of distressed lane miles. The State classifies a roadway’s pavement condition by the following descriptions:

1. Excellent/good condition – few potholes or cracks
2. Fair condition – moderate number of potholes or cracks
3. Poor condition – significant or extensive number of potholes or cracks

Statewide lane miles are considered “distressed lane miles” if they are in poor condition. The actual distressed lane miles are compared to the established condition baseline to ensure that the baseline is not exceeded.

The following table shows the State’s established condition baseline and actual distressed lane miles from the last three completed pavement-condition surveys:

Condition Assessment Date ¹	Established Condition Baseline Distressed Lane Miles (maximum) ²	Actual Distressed Lane Miles	Actual Distressed Lane Miles as Percent of Total Lane Miles
December 2011	18,000	12,333	24.9 %
December 2013	18,000	7,820	15.7
December 2015	18,000	7,889	15.9

¹ Condition assessment for the State’s established condition baseline and actual distressed lane miles is being reported as of the *State of the Pavement* report publication date.

² The actual statewide distressed lane miles should not exceed the maximum distressed lane miles established by the State.

The following table provides details on the State’s actual distressed lane miles as of the last completed pavement-condition survey:

Pavement Condition	Lane Miles	Distressed Lane Miles
Excellent/Good	26,484	—
Fair	15,272	—
Poor	7,889	7,889
Total	49,645	7,889

C. Budgeted and Actual Preservation Costs

The estimated budgeted preservation costs represent the preservation projects approved by the California Transportation Commission and the State’s scheduled preservation work for each fiscal year. The actual preservation costs represent the cumulative cost to date for the projects approved and work scheduled in each fiscal year.

The State’s budgeted and actual preservation cost information for the most recent and four previous fiscal years is shown in the following table:

Fiscal Year Ended June 30	Estimated Budgeted Preservation Costs (in millions) ¹	Actual Preservation Costs (in millions) ¹
2012	\$ 3,362	\$ 3,184
2013	2,621	2,533
2014	2,510	2,353
2015	3,340	2,686
2016	3,975	1,909

¹ In fiscal year 2014-15, the methodology for identifying the preservation budgeted and actual costs was adjusted to include additional costs not previously reported.

Notes to the Required Supplementary Information

Budgetary Comparison Schedule

The State annually reports its financial condition based on a Generally Accepted Accounting Principles (GAAP) basis and on the State’s budgetary provisions (budgetary basis). The Budgetary Comparison Schedule for the General Fund and Major Special Revenue Funds reports the original budget, the final budget, the actual expenditures, and the variance between the final budget and the actual expenditures, using the budgetary basis of accounting.

On the budgetary basis, individual appropriations are charged as expenditures when commitments for goods and services are incurred. However, for financial reporting purposes, the State reports expenditures based on the year in which goods and services are received. The Budgetary Comparison Schedule includes all of the current year expenditures for the General Fund and major special revenue funds as well as related appropriations that typically are legislatively authorized annually, continually, or by project. While the encumbrances relate to all programs’ expenditures on a budgetary basis, adjustments for encumbrances are made under “other general government,” except for Environmental and Natural Resources where adjustments for encumbrances are made under each program’s expenditures.

The Budgetary Comparison Schedule is not presented in this document at the legal level of budgetary control because such a presentation would be extremely lengthy and cumbersome. The State of California prepares a separate report, the Comprehensive Annual Financial Report Supplement, which includes statements that demonstrate compliance with the legal level of budgetary control in accordance with Government Accounting

Standards Board's (GASB) Codification of Governmental Accounting and Financial Reporting Standards, Section 2400.121. The supplement includes a comparison of the annual appropriated budget with expenditures at the legal level of control. A copy of the Comprehensive Annual Financial Report Supplement is available by emailing the State Controller's Office, State Accounting and Reporting Division at StateGovReports@sco.ca.gov.

Reconciliation of Budgetary With GAAP Basis

The reconciliation of budgetary basis fund balances of the General Fund and the major special revenue funds to GAAP basis fund balances is presented on the previous page and the reconciling items are explained in the following paragraphs.

The beginning fund balance for the General Fund on the budgetary basis is restated for prior-year revenue adjustments and prior-year expenditure adjustments. A prior-year revenue adjustment occurs when the actual amount received in the current year differs from the amount of revenue accrued in the prior year. A prior-year expenditure adjustment results when the actual amount paid in the current year differs from the prior-year accrual for appropriations for which the ability to encumber funds has lapsed in previous periods. The beginning fund balance on a GAAP basis is not affected by these adjustments.

Basis Difference

Interfund Receivables and Loans Receivable: Loans made to other funds or to other governments are normally recorded as either expenditures or transfers on a budgetary basis. However, in accordance with GAAP, these loans are recorded as assets. The adjustments related to interfund receivables caused increases of \$66 million in the General Fund, \$2.4 billion in the Transportation Fund, and \$455 million in the Environmental and Natural Resources Fund. The adjustments related to loans receivable caused increases of \$43 million in the General Fund, \$241 million in the Federal Fund, and \$1.4 billion in the Environmental and Natural Resources Fund.

Interfund Payables: Loans received from other funds are normally recorded as transfers on a budgetary basis. However, in accordance with GAAP, these loans are recorded as liabilities. The adjustments related to interfund payables caused decreases of \$4.0 billion in the General Fund, \$11 million in the Transportation Fund, and \$15 million in the Environmental and Natural Resources Fund.

Escheat Property: A liability for the estimated amount of escheat property expected to ultimately be reclaimed and paid is not reported on a budgetary basis. The liability is required to be reported on a GAAP basis. This adjustment caused an \$950 million decrease in the General Fund.

Bonds Authorized but Unissued: In the year that general obligation bonds are authorized by the voters, the full amount authorized is recognized as revenue on a budgetary basis. In accordance with GAAP, only the amount of bonds issued each year is reported as an other financing source. The adjustments related to bonds authorized but unissued caused decreases of \$11.1 billion in the Transportation Fund and \$12.1 billion in the Environmental and Natural Resources Fund.

Tax Revenues: Estimated tax payments are accrued on a budgetary basis pursuant to Chapter 751, Statutes of 2008. However, in accordance with GAAP, tax payments are accrued based on the portion of estimated net final payments related to the fiscal year. This adjustment caused a decrease of \$997 million in the General Fund.

Fund Classification Changes: The fund balance amounts for governmental funds have been reclassified in accordance with governmental accounting standards. These reclassifications caused increases of \$4.0 billion

in the General Fund and \$2 million in the Federal Fund. These increases represent the fund balances of funds that are not considered part of the General Fund or the Federal Fund, respectively, for any budgetary purpose or for the Budgetary/Legal Basis Annual Report.

Other: Certain other adjustments and reclassifications are necessary in order to present the financial statements in accordance with GAAP. The other adjustments caused an increase of \$2.5 billion in the Transportation Fund and a decrease of \$53 million in the Environmental and Natural Resources Fund.

Timing Difference

Liabilities Budgeted in Subsequent Years: On a budgetary basis, the primary government does not accrue liabilities for which there is no existing appropriation or no currently available appropriation. The adjustments made to account for these liabilities in accordance with GAAP caused decreases of \$4.1 billion in the General Fund, \$1 million in the Federal Fund, \$465 million in the Transportation Fund, and \$87 million in the Environmental and Natural Resources Fund. The large decrease in the General Fund primarily consists of \$1.9 billion for medical assistance, \$1.1 billion for June 2016 payroll that was deferred to July 2016, \$627 million for pension contributions, and \$285 million for workers' compensation claims.

Combining Financial Statements and Schedules – Nonmajor and Other Funds

Nonmajor Governmental Funds

Nonmajor governmental funds account for the State's activities that do not meet the criteria of a major governmental fund. Following are brief descriptions of nonmajor governmental funds.

Special revenue funds account for the proceeds of specific revenue sources, other than debt service or capital projects, that are restricted, committed, or assigned to expenditures for specific purposes.

The **Business and Professions Regulatory and Licensing Fund** accounts for fees and other revenues charged for regulating and licensing specific industries, professions, and vocations.

The **Financing for Local Governments and the Public Fund** accounts for taxes, fees, bond proceeds, and other revenues used to finance the construction and maintenance of parks, jails, and other public and local government programs.

The **Cigarette and Tobacco Tax Fund** accounts for a surtax on cigarette and tobacco products that is used for various health programs.

The **Local Revenue and Public Safety Fund** accounts for vehicle license fees and a 1.5625% state sales tax dedicated to local governments for realigning costs from the State to local governments, and a 0.5% state sales tax dedicated to local governments to fund public safety programs.

The **Health Care Related Programs Fund** accounts for fees, taxes, bond proceeds, transfers from other state funds, and other revenues used for the Medi-Cal program, medical research, and other health and human services programs.

The **Trial Courts Fund** accounts for the various fees collected by the courts, maintenance-of-effort payments from the counties, transfers in from the General Fund, and trial court operating costs.

The **Golden State Tobacco Securitization Corporation Fund** is a blended component unit that accounts for the receipt of Tobacco Revenue Settlements pledged for the payment of debt service.

Other special revenue programs funds account for all other proceeds of revenue sources, other than debt service or capital projects, that are restricted or committed to expenditures for specific purposes.

Debt service funds account for and report financial resources that are restricted, committed, or assigned for the payment of principal and interest on general long-term obligations.

The **Economic Recovery Bond Sinking Fund** accounts for General Fund transfers, proceeds from the sale of surplus property, and the 0.25% sales and use tax revenue collected for the payment of principal, interest, and other related costs of the Economic Recovery Bonds. In August 2015, the outstanding Economic Recovery Bonds were defeased and all excess revenue remaining in this fund was transferred to the Financing for Local Governments and the Public Fund.

(continued)

(continued)

The **Transportation Debt Service Fund** accounts for Transportation Fund transfers used for the payment of principal and interest related to various transportation-related general obligation bonds.

Capital projects funds account for and report financial resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets.

The **Higher Education Construction Fund** accounts for bond proceeds used to construct state colleges and universities.

The **Hospital Construction Fund** accounts for bond proceeds used to construct hospitals.

The **Local Government Construction Fund** accounts for bond proceeds used to construct schools, libraries, and other major capital facilities for local governments.

Building authorities are blended component units created by joint-powers agreements between local governments and the State or other local governments for the purpose of financing the construction of state buildings. The funds account for bond proceeds used to finance and construct state buildings and parking facilities.

Other capital projects funds account for transactions related to resources that are restricted, committed, or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets.

¹ On a budgetary basis, the State's funds are classified as either governmental cost funds or nongovernmental cost funds. The governmental cost funds include the General Fund, most of the funds that comprise the Transportation Fund and the Environmental and Natural Resources Fund, and many other funds that make up the nonmajor governmental funds reported in these financial statements. Governmental cost funds derive their revenue from taxes, licenses, and fees that support the general operations of the State. The appropriations of the budgetary basis governmental cost funds form the annual appropriated budget of the State. Nongovernmental cost funds consist of funds that derive their receipts from sources other than general and special taxes, licenses, fees, or state revenues and mainly represent the proprietary and fiduciary funds reported in these financial statements. Expenditures of these funds do not represent a cost of government and most of the nongovernmental cost funds are not included in the annual appropriated budget. Therefore, the expenditures of these funds are not included in this schedule. The Federal Fund is one nongovernmental cost fund that is included in the annual appropriated budget. The Budgetary Comparison Schedule for the General Fund, Federal Fund, Transportation Fund, and Environmental and Natural Resources Fund is included in the Required Supplementary Information section; the remaining governmental cost funds are reflected in this schedule. Additional information on the budgetary basis of accounting can be found in the Management's Discussion and Analysis, Note 2 – Budgetary and Legal Compliance, notes to the Required Supplementary Information, and in the separately issued Comprehensive Annual Financial Report Supplement.

Internal Service Funds

Internal service funds account for state activities that provide goods and services to other state departments or agencies on a cost reimbursement basis. Following are brief descriptions of the internal service funds.

The **Public Buildings Construction Fund** accounts for rental charges from the lease of public assets and the related lease-purchase revenue bonds.

The **Architecture Revolving Fund** accounts for charges for the costs of architectural services, construction, and improvements.

The **Service Revolving Fund** accounts for charges for printing and procurement services rendered by the Department of General Services for state departments and other public entities.

The **Prison Industries Fund** accounts for charges for goods produced by inmates in state prisons that are sold to state departments and other governmental entities.

The **Financial Information Systems Fund** accounts for charges for the development and subsequent use of the State's new financial information system.

The **Technology Services Revolving Fund** accounts for charges for technology services performed for various state, federal, and local government entities by the California Technology Agency.

The **Water Resources Revolving Fund** accounts for charges for administrative services related to water delivery provided by the Department of Water Resources to federal, state, and local government agencies.

Other internal service program funds account for all other goods and services provided to other agencies, departments, or governments on a cost-reimbursement basis.

Nonmajor Enterprise Funds

Enterprise funds account for operations that are financed and operated in a manner similar to private business enterprises, in which the costs of providing goods or services to the general public on a continuing basis are intended to be financed or recovered primarily through user charges. Following are brief descriptions of nonmajor enterprise funds.

The **State Water Pollution Control Revolving Fund** accounts for loans to finance the construction of publicly owned water pollution control facilities.

The **Housing Loan Fund** accounts for financing and contracts for the sale of properties to eligible California veterans.

Other enterprise program funds account for all other goods or services provided to the general public on a continuing basis when all or most of the cost involved is to be financed by user charges, or when periodic measurement of the results of operations is appropriate for management control, accountability, capital maintenance, public policy, or other purposes.

Private Purpose Trust Funds

Private purpose trust funds account for all trust arrangements, other than those properly reported in pension and other employee benefit trust funds or investment trust funds, under which both principal and income benefit individuals, private organizations, or other governments. Following are brief descriptions of private purpose trust funds.

The **Scholarshare Program Trust Fund** accounts for money received from participants to fund their beneficiaries' higher-education expenses at certain postsecondary educational institutions.

The **Unclaimed Property Fund** accounts for unclaimed money and properties held in trust by the State.

Other private purpose trust funds account for other assets held in a trustee capacity when both principal and income benefit individuals, private organizations, or other governments.

Fiduciary Funds and Similar Component Units – Pension and Other Employee Benefit Trust Funds

Pension and other employee benefit trust funds account for transactions, assets, liabilities, and net position available for pension and other employee benefits of the two public employees' retirement systems that are fiduciary component units, and for other primary government employee benefit programs. Following are brief descriptions of pension and other employee benefit trust funds.

Defined Benefit Pension Plans are pension plans that provide defined benefit pensions to employees after separation from service:

The **Public Employees' Retirement Fund** is administered by the California Public Employees' Retirement System (CalPERS) and accounts for the employee and employer contributions of the agent and cost-sharing multiple-employer retirement plans that provide pension benefits to employees of the State of California, non-teaching school employees, and employees of California public agencies.

The **State Teachers' Retirement Fund** is administered by the California State Teachers' Retirement System (CalSTRS) and accounts for the employee, employer, and primary government contributions of the cost-sharing multiple-employer retirement plan that provides pension benefits to teachers and certain other employees of the California public school system.

The **Judges' Retirement Fund** is administered by CalPERS and accounts for the employee and employer contributions of the single-employer retirement plan that provides pension benefits to judges of the California Supreme Court, courts of appeal, and superior courts who were appointed or elected prior to November 9, 1994.

The **Judges' Retirement Fund II** is administered by CalPERS and accounts for the employee and employer contributions of the single-employer retirement plan that provides pension benefits to judges of the California Supreme Court, courts of appeal, and superior courts who were appointed or elected on or subsequent to November 9, 1994.

The **Legislators' Retirement Fund** is administered by CalPERS and accounts for the employee and employer contributions of the single-employer retirement plan that provides pension benefits to members of the Legislature serving prior to November 7, 1990, constitutional officers, and legislative statutory officers who elect to participate in the plan.

(continued)

(continued)

The **Deferred Compensation Fund** accounts for monies withheld from the salaries of participants per Internal Revenue Code sections 401(k), 457, and 403(b). The monies are invested until the employee retires or resigns, at which time all money withdrawn, including investment income, is subject to income taxes.

Other pension and other employee benefit trust funds account for funds contributed to smaller retirement plans and programs that are not defined benefit pension plans including the Annuitants' Health Care Coverage Fund, Teachers' Health Benefits Fund, State Peace Officers' and Firefighters' Defined Contribution Plan Fund, Supplemental Contributions Program Fund, Boxers' Pension Fund, and Flexelect Benefit Fund.

Agency Funds

Agency funds account for the receipt and disbursement of various taxes, deposits, deductions, and property collected by the State, acting in the capacity of an agent, for distribution to other governmental units or other organizations. Following are brief descriptions of agency funds.

The **Receipting and Disbursing Fund** accounts for the collection and disbursement of revenues and receipts on behalf of local governments. This fund also accounts for receipts from many state funds, typically for the purpose of writing a single warrant when the warrant is funded by multiple funding sources.

The **Deposit Fund** accounts for various deposits, such as those from condemnation and litigation proceedings.

Other agency activity funds account for other assets held by the State, which acts as an agent for individuals, private organizations, and other governments.

Nonmajor Component Units

Nonmajor component units are legally separate entities that are discretely presented in the State's financial statements in accordance with Generally Accepted Accounting Principles (GAAP). The inclusion of component units in the State's financial statements reflects the State's financial accountability for or relationships with these organizations such that exclusion would cause the State's financial statements to be misleading. Following are brief descriptions of the nonmajor consolidated component unit segments.

Financing authorities provide financing for transportation, business development and public improvements, and coastal and inland urban waterfront restoration projects. These agencies include: the California Alternative Energy and Advanced Transportation Financing Authority, the California Infrastructure and Economic Development Bank, and the California Urban Waterfront Area Restoration Financing Authority.

California State University Auxiliary organizations provide services primarily to university students through foundations, associated student organizations, student unions, food service entities, book stores, and similar organizations.

District agricultural associations were created to exhibit all of the industries, industrial enterprises, resources, and products of the State. The financial information presented is as of and for the year ended December 31, 2015.

Other component units provide legal education programs, financial assistance to businesses, and health benefits for state employees and annuitants. These entities include: the University of California Hastings College of the Law; the State Assistance Fund for Enterprise, Business and Industrial Development Corporation; and the Public Employees' Contingency Reserve.

¹ Governmental activities' unrestricted net position reflects a negative balance because of outstanding bonded debt issued to build capital assets for school districts and other local governmental entities.

² In fiscal year 2011, the net position of governmental activities and business-type activities changed primarily as a result of the reclassification of the \$1.2 billion beginning net position of the California State University Fund from a governmental fund to an enterprise fund.

³ In fiscal year 2014, the net position of governmental activities and business-type activities changed primarily as a result of the reclassification of the \$380 million beginning net position of the Public Buildings Construction Fund from an enterprise fund to an internal service fund.

⁴ In fiscal year 2015, the net position of governmental activities and business-type activities significantly decreased as a result of implementing GASB Statements No. 68 and No. 71 requiring the recognition of net pension liability and related pension expense and deferred outflows and inflows of resources.

¹ Tax relief program expenses and revenues reported separately prior to fiscal year 2009 are now included with “general government.”

² Motor vehicle excise taxes, reported separately in fiscal year 2012 due to material increases, were included with “other taxes” in prior years.

³ In fiscal year 2014, a component unit assumed debt on behalf of the primary government. In fiscal year 2016, the California State University, an enterprise fund, assumed debt on behalf of the Public Buildings Construction Fund, an internal service fund.

⁴ In fiscal year 2011, the California State University Fund was reclassified from a governmental fund to an enterprise fund.

⁵ In fiscal year 2014, the Public Buildings Construction Fund was reclassified from an enterprise fund to an internal service fund.

Total change in fund balance	\$ 634,776	\$ (5,307,978)	\$ (4,174,441)	\$ 3,778,599
Debt service as a percentage of noncapital expenditures	4.7%	6.3%	4.5%	3.9%

¹ Motor vehicle excise taxes, reported separately in fiscal year 2012 due to material increases, were included with “other taxes” in prior years.

² Tax relief program expenditures reported separately prior to fiscal year 2009 are now included with general government.

³ Prior to fiscal year 2008, premiums on bonds issued were netted against debt service interest and fiscal charges.

⁴ In fiscal year 2011, the California State University Fund was reclassified from a governmental fund to an enterprise fund.

2011 ⁴	2012	2013	2014	2015	2016

Revenue Capacity

Revenue capacity schedules contain information to help the reader assess the State's capacity to raise revenue and the sources of that revenue. This section includes the following revenue capacity schedules.

Schedule of Revenue Base

Schedule of Revenue Payers by Industry/Income Level

Schedule of Personal Income Tax Rates

Schedule of Revenue Base

For the Past Ten Calendar Years

(amounts in thousands)

Total taxable sales				\$ 456,492,945
Direct sales tax rate ²				6.25% ³

Source: California State Board of Equalization (BOE)

¹ Due to the BOE's conversion from business coding to North American Industry Classification System (NAICS) coding for the reporting of Taxable Sales by Industry, industry level data for 2009 and forward is not comparable to that reported for prior years. The NAICS conversion process for over one million permit holders was not completed until the end of 2008, so 2009 was the first year the BOE used the new format with NAICS codes.

² The direct sales tax rate used is the state tax rate that provides revenue to the State's General Fund and debt service fund. It does not include the 1% local tax rate that is allocated to cities and counties.

³ Rate change was effective on April 1, 2009.

⁴ Rate change was effective on January 1, 2013.

Source: California State Board of Equalization (BOE)

¹ Due to the BOE's conversion from business coding to North American Industry Classification System (NAICS) coding for the reporting of Taxable Sales by Industry, industry level data for 2009 and forward is not comparable to that reported for prior years. The NAICS conversion process for over one million permit holders was not completed until the end of 2008, so 2009 was the first year the BOE used the new format with NAICS codes.

² As of July 1.

³ Calculated by multiplying the taxable sales by industry shown on pages 258 and 259 by the direct sales tax rate. Amounts are in thousands.

Debt Capacity

Debt capacity schedules contain information to help the reader understand the State's outstanding debt, the capacity to repay that debt, and the ability to issue additional debt in the future. This section includes the following debt capacity schedules.

Schedule of Ratios of Outstanding Debt by Type

Schedule of Ratios of General Bonded Debt Outstanding

Schedule of General Obligation Bonds Outstanding

Schedule of Pledged Revenue Coverage

Sources: Unless otherwise noted, the information in the following schedules is derived from the State's Comprehensive Annual Financial Reports.

Schedule of Ratios of Outstanding Debt by Type

For the Past Ten Fiscal Years

(amounts in thousands, except per capita)

	2007	2008	2009	2010
Governmental activities				
General obligation bonds ¹	\$ 50,269,442	\$ 56,424,532	\$ 68,653,507	\$ 77,745,789
Revenue bonds ²	8,009,784	7,811,832	7,767,855	7,611,939
Certificates of participation and commercial paper ³	1,358,051	1,736,089	1,407,908	1,342,119
Capital lease obligations ⁴	4,346,179	4,376,410	4,456,039	4,967,290
Total governmental activities	63,983,456	70,348,863	82,285,309	91,667,137
Business-type activities				
General obligation bonds ¹	1,954,220	1,907,243	1,702,377	1,477,663
Revenue bonds ²	22,934,094	23,003,097	23,053,114	24,538,094
Commercial paper	179,782	67,204	51,307	64,518
Capital lease obligations	—	—	—	—
Total business-type activities	25,068,096	24,977,544	24,806,798	26,080,275
Total primary government	\$ 89,051,552	\$ 95,326,407	\$ 107,092,107	\$ 117,747,412
Debt as a percentage of personal income ^{5, 7}	5.8%	6.0%	6.6%	7.5%
Amount of debt per capita ^{6, 7}	\$ 2,472	\$ 2,630	\$ 2,926	\$ 3,186

Note: Details regarding the State's outstanding debt can be found in Notes 9, 12, 13, 15, and 16 of the financial statements.

¹ Prior to fiscal year 2008, net unamortized bond premiums and refunding gains/losses were not included. Beginning in fiscal year 2013, refunding gains/losses are no longer included in bonds payable, but are shown as deferred inflows and deferred outflows of resources.

² Prior to fiscal year 2014, the Public Buildings Construction Fund was included in business-type activities.

³ All certificates of participation were retired in fiscal year 2016.

⁴ Prior to fiscal year 2014, governmental activities reported a capital lease obligation to the Public Buildings Construction Fund. In fiscal year 2014, the fund was reclassified from an enterprise fund to an internal service fund and the governmental activities' obligation and the fund's net investment in direct financing leases were netted against each other within governmental activities.

⁵ Ratio calculated using personal income data shown on pages 276 and 277 for the prior calendar year.

⁶ Amount calculated using population data shown on pages 276 and 277 for the prior calendar year.

⁷ Some prior years were updated based on more current information.

Source: California State Controller's Office

¹ Total gross revenue includes non-operating interest revenue. Building authorities' revenue includes operating transfers in. The nature of the revenue pledged for each type of debt is as follows: investment and interest earnings for Housing Loans bonds and Water Pollution Control bonds; charges for services and sales for Water Resources bonds; power sales revenue for Electric Power bonds; rental revenue for Public Buildings Construction bonds, High Technology Education bonds, CSU Channel Island Financing Authority bonds, and building authorities bonds; residence fees for California State University bonds; tobacco settlements and investment earnings for the Golden State Tobacco Securitization Corporation bonds; and federal transportation funds for Grant Anticipation Revenue Vehicles.

² Total operating expenses are exclusive of depreciation, interest expense, and amortization (recovery) of long-term prepaid charges. Prior to fiscal year 2012, bond issuance costs were amortized over the term of the bond. Beginning fiscal year 2012, bond issuance costs are operating expenses in the fiscal year incurred.

³ Debt service requirements include principal and interest of revenue bonds.

⁴ All revenue bonds have been redeemed.

⁵ In fiscal year 2011, the California State University Fund was reclassified from a governmental fund to an enterprise fund.

⁶ Federal transportation funds are the only source of state revenue to pay these bonds, and the state obligation to pay debt service on these bonds is limited to and dependent on receipt of the federal funds.

Source: Annual Governor’s Budget Summary, California Department of Finance

Note: The number of full-time equivalent employees is calculated by counting each person who works full time as one full-time equivalent and those who work part time as fractional equivalents based on time worked.

¹ Effective July 1, 2013, under the Governor’s 2012 Reorganization Plan No. 2, a significant reorganization took place that impacted previously reported functions. The Government Operations Agency, including but not limited to Franchise Tax Board, Department of General Services, and the Public Employees’ Retirement System, was created and added to the General Government function. Also, the business and housing components under the previously reported Business, Transportation, and Housing function merged with the State and Consumer Services function and the remaining transportation components now comprise the Transportation Agency. Information reported under the new functions are not comparable to that of prior years.

² Some prior years were updated based on more current information.

Schedule of Findings	3

Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance With *Government Auditing Standards*

Independent Auditor's Report

The Governor and the Legislature of the State of California

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of California as of and for the year ended June 30, 2016, and the related notes to the financial statements, which collectively comprise the State's basic financial statements, and have issued our report thereon dated March 22, 2017. Our report includes a reference to other auditors who audited the financial statements of the following, as described in our report on the State's financial statements:

Government-wide Financial Statements

- Certain enterprise funds that, in the aggregate, represent 80 percent of the assets and deferred outflows, and 40 percent of the revenues of the business-type activities.
- The University of California and the California Housing Finance Agency that represent 93 percent of the assets and deferred outflows, and 94 percent of the revenues of the discretely presented component units.

Fund Financial Statements

- The Safe Drinking Water State Revolving fund, that represents 15 percent of the assets and deferred outflows, and 3 percent of the additions, revenues, and other financing sources of the Environmental and Natural Resources fund, a major governmental fund.
- The following major enterprise funds: Electric Power fund, Water Resources fund, State Lottery fund, and California State University fund.
- The Golden State Tobacco Securitization Corporation, the Public Building Construction, the Public Employees' Retirement, the State Teachers' Retirement, the State Water Pollution Control, and the 1943 Veterans Farm and Home Building funds, that represent 84 percent of the assets and deferred outflows, and 27 percent of the additions, revenues, and other financing sources of the aggregate remaining fund information.
- The discretely presented component units noted above.

This report does not include the results of the other auditors' testing of internal control over financial reporting or compliance and other matters that are reported on separately by those auditors. The financial statements of the Golden State Tobacco Securitization Corporation, the Public Building Construction, the Public Employees' Retirement, the State Lottery, and the 1943 Veterans Farm and Home Building funds were not audited in accordance with *Government Auditing Standards*.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statements, we considered the State of California's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the State's internal control. Accordingly, we do not express an opinion on the effectiveness of the State's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the State of California's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the result of that testing, and not to provide an opinion on the effectiveness of the State's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Auditor's Section

Independent Auditor's Report on the Schedule of Expenditures of Federal Awards as Required by the Uniform Guidance

The Governor and the Legislature of the State of California:

Report on the Schedule of Expenditures of Federal Awards

We have audited the accompanying Schedule of Expenditures of Federal Awards (the Schedule) of the State of California for the fiscal year ended June 30, 2016, and the related notes to the Schedule (the financial statement).

Management's Responsibility for the Schedule of Expenditures of Federal Awards

Management is responsible for the preparation and fair presentation of this financial statement in accordance with the cash basis of accounting described in Note 2; this includes determining that the cash basis of accounting is an acceptable basis for presentation of the financial statement in the circumstances. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of the financial statement that is free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on this financial statement based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and the requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administration Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statement. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statement, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statement in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statement.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statement referred to above presents fairly, in all material respects, the expenditures of federal awards of the State of California for the fiscal year ended June 30, 2016, in accordance with the cash basis of accounting as described in Note 2.

Basis of Accounting

We draw attention to Note 2 to the financial statement, which describes the basis of accounting. The financial statement is prepared on the cash basis of accounting, which is a basis of accounting other than accounting principles generally accepted in the United States of America. Our opinion is not modified with respect to this matter.

Emphasis of Matter

As described in Note 1 to the Schedule, the State of California's basic financial statements include the operations of the University of California system, a component unit of the State of California, the California State University system, the California State Water Resources Control Board Water Pollution Control Revolving Fund, the California State Water Resources Control Board Safe Drinking Water State Revolving Fund, and the California Housing Finance Fund, which is administered by the California Housing Finance Agency, a component unit of the State of California, which reported \$5.5 billion, \$2.6 billion, \$74.6 million, \$168.6 million, and \$60.2 million, respectively, in federal awards, which are not included in the Schedule for the fiscal year ended June 30, 2016. Our audit, described above, did not include the operations of the University of California system, the California State University system, the California State Water Resources Control Board Water Pollution Control Revolving Fund, the California State Water Resources Control Board Safe Drinking Water Pollution Control Revolving Fund, and the California Housing Finance Agency because these entities engaged other auditors to perform an audit in accordance with the Uniform Guidance. Our opinion is not modified with respect to this matter.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 22, 2017 on our consideration of the State of California's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance of the financial statement, and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State of California's internal control over financial reporting and compliance of the financial statement.

Sacramento, California

March 22, 2017

**Independent Auditor’s Report on Internal Control Over Financial Reporting
and on Compliance and Other Matters Based on an Audit of the Schedule of
Expenditures of Federal Awards Performed in Accordance With
Government Auditing Standards and the Uniform Guidance**

The Governor and the Legislature of the State of California:

We have audited, in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administration Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance), the Schedule of Expenditures of Federal Awards (the Schedule) of the State of California for the fiscal year ended June 30, 2016, and the related notes to the Schedule (the financial statement), and have issued our report thereon dated March 22, 2017. Our report includes an emphasis of matter paragraph to describe those entities which are audited by other auditors and whose federal award expenditures are not included in the Schedule. This report does not include the results of the other auditors’ testing of internal control over financial reporting or compliance and other matters that are reported on separately by those auditors.

Internal Control Over Financial Reporting

In planning and performing our audit of the financial statement, we considered the State of California’s internal control over financial reporting of the financial statement (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statement, but not for the purpose of expressing an opinion on the effectiveness of the State of California’s internal control. Accordingly, we do not express an opinion on the effectiveness of the State of California’s internal control over financial reporting of the financial statement.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity’s financial statement will not be prevented, or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. We did identify a certain deficiency in internal control, described in the accompanying schedule of findings and questioned costs as 2016-001 that we consider to be a significant deficiency.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the State of California's financial statement is free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our test disclosed an instance of noncompliance or other matters that is required to be reported under *Government Auditing Standards* and which is described in the accompanying schedule of findings and questioned costs as 2016-001.

State of California's Response to Finding

The State of California's response to the finding identified in our audit is described in the accompanying schedule of findings and questioned costs. The State of California's response was not subjected to the auditing procedures applied in the audit of the financial statement and, accordingly, we express no opinion on it.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the State of California's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State of California's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Sacramento, California

March 22, 2017

Independent Auditor’s Report on Compliance for Each Major Federal Program and Report on Internal Control Over Compliance Required by the Uniform Guidance

The Governor and the Legislature of the State of California:

Report on Compliance for Each Major Federal Program

We have audited the State of California’s compliance with the types of compliance requirements described in the *OMB Compliance Supplement* that could have a direct and material effect on each of the State of California’s major federal programs for the fiscal year ended June 30, 2016. The State of California’s major federal programs are identified in the summary of auditor’s results section of the accompanying schedule of findings and questioned costs.

As described in Note 1 to the Schedule, the State of California’s basic financial statements include the operations of the University of California system, a component unit of the State of California, the California State University system, the California State Water Resources Control Board Water Pollution Control Revolving Fund, the California State Water Resources Control Board Safe Drinking Water State Revolving Fund, and the California Housing Finance Fund, which is administered by the California Housing Finance Agency, a component unit of the State of California, which reported \$5.5 billion, \$2.6 billion, \$74.6 million, \$168.6 million, and \$60.2 million, respectively, in federal awards, which are not included in the State of California’s Schedule for the fiscal year ended June 30, 2016. Our audit, described below, did not include the operations of the University of California system, the California State University system, the California State Water Resources Control Board Water Pollution Control Revolving Fund, the California State Water Resources Control Board Safe Drinking Water Pollution Control Revolving Fund, and the California Housing Finance Agency because these entities engaged other auditors to perform an audit in accordance with Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administration Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance).

Management’s Responsibility

Management is responsible for compliance with federal statutes, regulations, and terms and conditions of its federal awards applicable to its federal programs.

Auditor’s Responsibility

Our responsibility is to express an opinion on compliance for each of the State of California’s major federal programs based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and Title 2 U.S. *Code*

of Federal Regulations Part 200, Uniform Administration Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance). Those standards and the Uniform Guidance require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the State of California’s compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major federal program. However, our audit does not provide a legal determination of the State of California’s compliance.

Basis for Qualified Opinion on Major Federal Programs

As described in the table below and in the accompanying schedule of findings and questioned costs, the State of California did not comply with requirements regarding the following:

Finding Number	CFDA Number	Federal Program Name or Cluster	Compliance Requirement(s)	State Administering Department
2016-003	10.557	Special Supplemental Nutrition Program for Women, Infants, and Children	Subrecipient Monitoring	Department of Public Health
2016-008	93.069	Public Health Emergency Preparedness	Allowable Costs	Department of Public Health
2016-008	93.889	National Bioterrorism Hospital Preparedness Program	Allowable Costs	Department of Public Health
2016-009	93.767	Children's Health Insurance Program	Activities Allowed or Unallowed; Allowable Costs/Cost Principles	Department of Health Care Services
2016-010	93.575	Child Care and Development Block Grant	Cash Management	Department of Education
2016-010	93.596	Child Care Mandatory and Matching Funds of the Child Care and Development Fund	Cash Management	Department of Education
2016-011 2016-012	93.959	Block Grants for Prevention and Treatment of Substance Abuse	Cash Management	Department of Health Care Services
2016-013	93.778	Medical Assistance Program (Medicaid Cluster)	Eligibility	Department of Health Care Services
2016-014	93.069	Public Health Emergency Preparedness	Matching	Department of Public Health
2016-014	93.889	National Bioterrorism Hospital Preparedness Program	Matching	Department of Public Health
2016-015	93.069	Public Health Emergency Preparedness	Level of Effort	Department of Public Health
2016-015	93.889	National Bioterrorism Hospital Preparedness Program	Level of Effort	Department of Public Health
2016-016	93.758	Preventive Health and Health Services Block Grant funded solely with Prevention and Public Health Funds (PPHF)	Earmarking	Department of Public Health
2016-018 2016-019	93.069	Public Health Emergency Preparedness	Subrecipient Monitoring	Department of Public Health
2016-018 2016-019	93.889	National Bioterrorism Hospital Preparedness Program	Subrecipient Monitoring	Department of Public Health

Finding Number	CFDA Number	Federal Program Name or Cluster	Compliance Requirement(s)	State Administering Department
2016-019 2016-020	93.268	Immunization Cooperative Agreements	Subrecipient Monitoring	Department of Public Health
2016-019	93.758	Preventive Health and Health Services Block Grant funded solely with Prevention and Public Health Funds (PPHF)	Subrecipient Monitoring	California Emergency Medical Services Authority
2016-019 2016-020	93.758	Preventive Health and Health Services Block Grant funded solely with Prevention and Public Health Funds (PPHF)	Subrecipient Monitoring	Department of Public Health
2016-020	93.758	Preventive Health and Health Services Block Grant funded solely with Prevention and Public Health Funds (PPHF)	Subrecipient Monitoring	California Emergency Medical Services Authority
2016-022	93.575	Child Care Development and Block Grant	Subrecipient Monitoring	Department of Education
2016-022	93.596	Child Care Mandatory and Matching Funds of the Child Care and Development Fund	Subrecipient Monitoring	Department of Education
2016-024 2016-025 2016-026 2016-027	93.767	Children's Health Insurance Program	Subrecipient Monitoring	Department of Health Care Services
2016-024 2016-025 2016-026 2016-027	93.778	Medical Assistance Program (Medicaid Cluster)	Subrecipient Monitoring	Department of Health Care Services
2016-024 2016-025 2016-026 2016-027 2016-030	93.778	Medical Assistance Program (Medicaid Cluster)	Special Tests and Provisions	Department of Health Care Services

Compliance with such requirements is necessary, in our opinion, for the State of California to comply with the requirements applicable to that program.

Qualified Opinion on Major Federal Programs

In our opinion, except for the noncompliance described in the Basis for Qualified Opinion paragraph, the State of California complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on the major federal programs listed in the Basis for Qualified Opinion paragraph for the fiscal year ended June 30, 2016.

Unmodified Opinion on Each of the Other Major Federal Programs

In our opinion, the State of California complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its other major federal programs identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs for the fiscal year ended June 30, 2016.

Other Matters

The results of our auditing procedures disclosed other instances of noncompliance, which are required to be reported in accordance with the Uniform Guidance and which are described in the table below and in the accompanying schedule of findings and questioned costs. Our opinion on each major federal program is not modified with respect to these matters.

Finding Number	CFDA Number	Federal Program Name or Cluster	Compliance Requirement(s)	State Administering Department
2016-002	10.557	Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)	Eligibility and Reporting	Department of Public Health
2016-004	20.205	Highway Planning and Construction	Subrecipient Monitoring	Department of Transportation
2016-005	84.010	Title I Grants to Local Educational Agencies	Level of Effort	Department of Education
2016-005	84.365	English Language Acquisition State Grants	Level of Effort	Department of Education
2016-006	84.002	Adult Education - Basic Grants to States	Subrecipient Monitoring	Department of Education
2016-006	84.010	Title I Grants to Local Educational Agencies	Subrecipient Monitoring	Department of Education
2016-006	84.365	English Language Acquisition State Grants	Subrecipient Monitoring	Department of Education
2016-007	84.010	Title I Grants to Local Educational Agencies	Subrecipient Monitoring	Department of Education
2016-007	84.365	English Language Acquisition State Grants	Subrecipient Monitoring	Department of Education
2016-017	93.568	Low-Income Home Energy Assistance	Period of Performance	Department of Community Services and Development
2016-021	93.575	Child Care and Development Block Grant	Subrecipient Monitoring	Department of Education
2016-021	93.596	Child Care Mandatory and Matching Funds of the Child Care and Development Fund	Subrecipient Monitoring	Department of Education
2016-023	93.658	Foster Care Title IV-E	Subrecipient Monitoring	Department of Social Services
2016-023	93.659	Adoption Assistance	Subrecipient Monitoring	Department of Social Services
2016-023	93.667	Social Services Block Grant	Subrecipient Monitoring	Department of Social Services
2016-028	93.069	Public Health Emergency Preparedness	Reporting	Department of Public Health
2016-028	93.889	National Bioterrorism Hospital Preparedness Program	Reporting	Department of Public Health
2016-029	93.777	State Survey and Certification of Health Care Providers and Suppliers (Title XVIII) Medicare	Special Tests and Provisions	Department of Public Health

The State of California’s responses to the noncompliance findings identified in our audit are described in the management’s response and corrective action plan. The State of California’s responses were not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the responses.

Report on Internal Control Over Compliance

Management of the State of California is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the State of California’s internal control over compliance with the types of requirements that could have a direct and material effect on each major federal program to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major federal program and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the State of California’s internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be material weaknesses and significant deficiencies.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a federal program on a timely basis. *A material weakness in internal control over compliance* is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a federal program will not be prevented, or detected and corrected, on a timely basis. We consider the deficiencies in internal control over compliance described in the accompanying schedule of findings and questioned costs as items 2016-003, 2016-008, 2016-009, 2016-010, 2016-0011, 2016-012, 2016-013, 2016-014, 2016-015, 2016-016, 2016-018, 2016-019, 2016-020, 2016-022, 2016-024, 2016-025, 2016-026, 2016-027, and 2016-030 to be material weaknesses.

A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a federal program that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the deficiencies in internal control over compliance described in the accompanying schedule of findings and questioned costs as items 2016-002, 2016-004, 2016-005, 2016-006, 2016-007, 2016-017, 2016-021, 2016-023, 2016-028, and 2016-029 to be significant deficiencies.

The State of California's responses to the internal control over compliance findings identified in our audit are described in the accompanying schedule of findings and questioned costs. The State of California's responses were not subjected to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on the responses.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of the Uniform Guidance. Accordingly, this report is not suitable for any other purpose.

Schedule of Expenditures of Federal Awards Finding

DEPARTMENT OF FINANCE AND OTHER DEPARTMENTS

Reference Number: 2016-001

Criteria

Title 2 - Grants and Agreements Subtitle A - Office Of Management and Budget Guidance for Grants and Agreements Chapter II - Office of Management and Budget Guidance Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards - Subpart D - Post Federal Award Requirements §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements Subtitle A - Office of Management and Budget Guidance for Grants and Agreements Chapter II - Office of Management and Budget Guidance Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards - Subpart F - Audit Requirements §205.510 Financial statements:

- (b) *Schedule of expenditures of Federal awards.* The auditee must also prepare a schedule of expenditures of Federal awards for the period covered by the auditee's financial statements which must include the total Federal awards expended as determined in accordance with §200.502 Basis for determining Federal awards expended. While not required, the auditee may choose to provide information requested by Federal awarding agencies and pass-through entities to make the schedule easier to use. For example, when a Federal program has multiple Federal award years, the auditee may list the amount of Federal awards expended for each Federal award year separately. At a minimum, the schedule must:
 - (3) Provide total Federal awards expended for each individual Federal program and the CFDA number or other identifying number when the CFDA information is not available. For a cluster of programs also provide the total for the cluster.
 - (4) Include the total amount provided to subrecipients from each Federal program.

Condition

The State of California (State) has a decentralized financial reporting process, which requires State agencies and departments to provide specific financial information to the Department of Finance (Finance) in order to annually compile the Schedule of Expenditures of Federal Awards (Schedule). In its effort to more efficiently and accurately prepare the Schedule in accordance with the requirements of Title 2 *U.S. Code of Federal Regulations* (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance), Finance developed the Single Audit Expenditures Reporting Database (Database). Finance developed the Database to include all of the relevant data fields necessary to

compile and produce the Schedule. Finance also created a Single Audit Database User Manual which provides specific guidance to users for accessing and navigating through the database. Departments are given access to the centralized Database by Finance in order to upload and report federal award information for all of their federal award programs which they administer. During our testing of the Schedule we identified the following errors, which were subsequently corrected by Finance, that are indicative of a lack of adequate controls for ensuring its completeness and accuracy:

- Education erroneously reported \$6.2 million and \$21.9 million of contractor payments as pass-through expenditures for Adult Education – Basic Grants to States (CFDA #84.002) and Child Care and Development Block Grant (CFDA #93.575).
- Education included a \$10.0 million transfer of funds from the Temporary Assistance for Needy Families (TANF) program (CFDA #93.558) in total federal expenditures for the Child Care and Development Block Grant (CFDA #93.575).
- Public Health combined the federal expenditures for Public Health Emergency Preparedness (CFDA #93.069) and the National Bioterrorism Hospital Preparedness Program (CFDA #93.889) and reported the amount under Hospital Preparedness Program and Public Health Emergency Preparedness Aligned Cooperative Agreements (CFDA #93.074).
- Health Care Services incorrectly reported \$123.0 million of pass-through expenditures for the Children’s Health Insurance Program (CFDA #93.767) under the Medical Assistance Program (CFDA #93.778).
- The California Emergency Medical Services Authority (EMSA) administers a portion of the Preventive Health and Health Services Block Grant funded solely with Prevention and Public Health Funds (CFDA #93.758) program, and did not timely report its federal award expenditures to Finance via the Database.

Cause

Education’s misclassification of contractor payments as pass-through expenditures for Adult Education – Basic Grants to States (CFDA #84.002) and the Child Care and Development Block Grant (CFDA #93.575) was because the Fiscal and Administrative Services Division misinterpreted the related contractor agreements as subawards.

The \$10.0 million funds transfer from TANF to Child Care and Development Block Grant (CFDA #93.575) was erroneously included as federal expenditures because Education reported cash basis receipts instead of cash basis expenditures.

Public Health misinterpreted the Centers for Disease Control and Prevention (CDC), the granting agency, reporting requirements for CFDA #93.069 and CFDA #93.889 since communications from the CDC are often times combined. However, in Section IV – Special Terms and Conditions of the Notice of Award, the CDC stipulates that although aligned, the two programs remain distinct and separate programs, are funded through two different appropriations, and should be listed as two CFDA numbers for audit purposes.

Due to the similarities in the Children's Health Insurance Program and Medical Assistance Program, Health Care Services mistakenly reported all Short-Doyle pass-through expenditures under the Medical Assistance Program.

Our understanding is that due to some difficulties encountered by EMSA with the State's phased implementation of its new FISCAL accounting application system, its reporting of federal expenditures for the Preventive Health and Health Services Block Grant funded solely with Prevention and Public Health Funds program was overlooked.

Effect

Although the errors identified were not quantitatively material to the Schedule as a whole, outside of the audit process, the State currently lacks a system of adequate controls for ensuring that the Schedule is complete and accurate. Accordingly, there is an increased risk for material errors to exist in the Schedule which will not be prevented or detected by the State.

Recommendation

Finance should work collaboratively with the State agencies and departments administering federal awards to ensure that the reporting requirements for preparing the Schedule under the Uniform Guidance are clearly understood, including performing more outreach and training. Furthermore, Finance should strengthen its analytical procedures that are being performed relative to the Schedule which considers the comparison of pass-through expenditures year-to-year, possible misclassification of federal awards, and missing federal award programs.

For those departments previously mentioned, a more thorough departmental internal review process should be developed and implemented to ensure the information submitted to Finance for compilation of the Schedule is complete and accurate. Also, departments need to ensure the information submitted to Finance is timely and expenditures reported in the Database are on the proper basis of accounting. Expenditures reported in the Database by departments should be cash basis expenditures, which has been articulated by Finance in its Single Audit Database User Manual.

Views of Responsible Officials

Finance Response – Finance agrees with this finding. Finance's responsibility is to compile each state entities' federal expenditure information into the Schedule. Currently, Finance provides guidance on the reporting requirements through the State Administrative Manual, Audit Memos, Single Audit Database User Manual, and E-mail instructions. Additionally, Finance performs various analytical procedures on the submitted information. When these procedures identify potential errors, Finance contacts the state entity and requests additional documentation to confirm the accuracy of the reported information.

Finance will continue to work collaboratively with state entities administering federal awards to obtain accurate information to compile the Schedule. Specifically, Finance will provide additional training and outreach, including site visits, to ensure that the reporting requirements for preparing the Schedule under the Uniform Guidance are clearly understood. To enhance the current analytical procedures, Finance will consider other information that could be requested from state entities.

Education Response – Concur. Education will strengthen internal processes to ensure that information submitted to the Department of Finance for compilation of the Schedule, including contractor payments and the transfer of Temporary Assistance for Needy Families funding, is complete, accurate, timely, and reported under the proper basis of accounting.

Public Health Response – Public Health agrees with the finding. Public Health already submitted corrected information to Finance to display the expenditures separately for these two programs for the fiscal year 2015-16 Schedule. Internally, Public Health has been tracking each program's expenditures separately on a detailed level.

EMSA Response – EMSA agrees with this finding. During fiscal year 2015-16 the Department of General Services (DGS)/Contracted Fiscal Services (CFS), who has responsibility for the accounting functions of EMSA, was transitioning all its client agencies from CalSTARS to the Financial Information System for California (Fi\$Cal). During this transition process both the Fi\$Cal project and DGS\CFS experienced multiple challenges resulting in significant delays completing both the month and the year-end reconciliation processes. Without these processes being completed, the fiscal year 2015-16 financial statements could not be accurately generated resulting in EMSA's inability to timely report its federal award expenditures via Finance's Single Audit Expenditures Reporting Database.

Health Care Services Response – Health Care Services agrees with the finding. The Health Care Services subrecipient procedures will be updated by April 2017 to ensure future reporting of subrecipient payments within the Short-Doyle system are correctly identified as either Children's Health Insurance Program (CFDA #93.767) or for the Medical Assistance Program (CFDA #93.778).

Schedule of Federal Award Findings and Questioned Costs

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

State Administrative Manual, Section 5300 – Information security refers to the protection of information, information systems, equipment, software, and people from a wide spectrum of threats and risks. Implementing appropriate security measures and controls to provide for the confidentiality, integrity, and availability of information, regardless of its form (electronic, optical, print, or other media), is critical to ensure business continuity and protect information assets against unauthorized access, use, disclosure, disruption, modification, or destruction. Information security is also the means by which privacy of personal information held by state entities is protected.

State Administrative Manual, Section 5365 – Each state entity shall establish and implement physical security and environmental protection controls to safeguard information assets against unauthorized access, use, disclosure, disruption, modification, or destruction.

Condition

During our testing of user access termination to the WIC Management Information Systems (MIS), we noted that one user access termination was not completed for 130 days. A routing form is used to request and authorize termination of user access. Approved forms are then routed to the appropriate information technology personnel.

Cause

The routing form used to request and authorize termination of user access was not routed to the appropriate information technology personnel. Current policies and procedures do not include monitoring controls to assess the effectiveness of existing controls over time.

Effect

Public Health utilizes WIC MIS to determine eligibility for WIC participants as well as to monitor and report issuance and redemption of food vouchers. Unauthorized access to the information system poses significant risk to the security and integrity of the data, and could result in the creation of inappropriate recipient profiles, or the disbursement of food instruments to ineligible participants.

Questioned Costs

Questioned costs could not be determined.

Context

We tested four of the thirty-nine user terminations processed during the year. The sample was not a statistical sample.

Recommendation

Public Health should strengthen the policies and procedures for termination of user access rights to ensure that requests are processed in a timely manner and that requests are sufficiently tracked from initiation through completion. Additionally, Public Health should perform periodic system access reviews to ensure that users access is appropriate for their current roles.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

Reference Number:	2016-003
Category of Finding:	Subrecipient Monitoring
Type of Finding:	Material Weakness and Material Instance of Noncompliance
State Administering Department:	California Department of Public Health (Public Health)
Federal Catalog Number:	10.557
Federal Program Title:	Special Supplemental Nutrition Program for Women, Infants, and Children (WIC)
Federal Award Numbers and Years:	201616W100347; 2016 201616W100647; 2016 201615W200147; 2015 2015IW100347; 2015

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Subrecipient Monitoring and Management, §200.331 Requirements or pass-through entities:

All pass-through entities must:

- (b) Evaluate each subrecipient’s risk of noncompliance with Federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient monitoring described in paragraphs (d) and (e) of this section, which may include consideration of such factors as:
 - (1) The subrecipient’s prior experience with the same or similar subawards;
 - (2) The results of previous audits including whether or not the subrecipient receives a Single Audit in accordance with Subpart F – Audit Requirements of this part, and the extent to which the same or similar subaward has been audited as a major program;
 - (3) Whether the subrecipient has new personnel or new or substantially changed systems; and

- (4) The extent and results of Federal awarding agency monitoring (e.g., if the subrecipient also receives Federal awards directly from a Federal awarding agency).

Condition

The Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) are subject to the *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Public Health did not evaluate each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward.

Cause

Public Health did not develop policies and procedures for evaluating each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward in a timely manner such that it could be implemented during the fiscal year ended June 30, 2016.

Effect

The monitoring performed during the fiscal year ended June 30, 2016, did not ensure that sufficient and effective monitoring occurred for those subrecipients most at risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward.

Questioned Costs

No questioned costs were identified.

Context

Disbursements for the fiscal year ended June 30, 2016 to the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) subrecipients totaled \$263,404,893.

Recommendation

Public Health should review all federal statutes, regulations, and the terms and conditions of the federal award and determine whether or not policies and procedures exist and are operating effectively to ensure compliance with all requirements.

Additionally, Public Health should develop policies and procedures to evaluate each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward and perform monitoring according to the assessed risk. Further, Public Health should retain evidence that the policies and procedures are operating as designed.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

U.S. DEPARTMENT OF TRANSPORTATION

Reference Number:	2016-004
Category of Finding:	Subrecipient Monitoring
Type of Finding:	Significant Deficiency and Instance of Noncompliance
State Administering Department:	California Department of Transportation (Caltrans)
Federal Catalog Number:	20.205
Federal Program Title:	Highway Planning and Construction
Federal Award Numbers and Years:	Various

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Subrecipient Monitoring and Management, §200.331 Requirements for pass-through entities:

All pass-through entities must:

- (b) Evaluate each subrecipient’s risk of noncompliance with Federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient monitoring described in paragraphs (d) and (e) of this section, which may include consideration of such factors as:
 - (1) The subrecipient’s prior experience with the same or similar subawards;
 - (2) The results of previous audits including whether or not the subrecipient receives a Single Audit in accordance with Subpart F – Audit Requirements of this part, and the extent to which the same or similar subaward has been audited as a major program;

- (3) Whether the subrecipient has new personnel or new or substantially changed systems; and
- (4) The extent and results of Federal awarding agency monitoring (e.g., if the subrecipient also receives Federal awards directly from a Federal awarding agency).

Condition

The Highway Planning and Construction program administered by Caltrans involves a large number of federal awards pertaining to individual project grants and was subject to the *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance) for the projects under those grants approved by the U.S. Department of Transportation on or after December 26, 2014. We noted that although Caltrans monitors its subrecipients on the basis of risk, primarily based on reviews of independent single audits of the subrecipients, it has not yet developed and documented a formal risk assessment process over its subrecipients of federal awards by which to determine the frequency and extent of subrecipient monitoring activities to be performed.

Cause

Caltrans did not develop formal policies and procedures for evaluating each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward in a timely manner such that it could be implemented during the fiscal year ended June 30, 2016.

Effect

In the absence of a formally documented risk assessment process for determining appropriate monitoring procedures, sufficient and effective monitoring may not occur for those subrecipients most at risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward.

Questioned Costs

No questioned costs were identified.

Context

Disbursements to subrecipients for the fiscal year ended June 30, 2016 for the Highway Planning and Construction program totaled \$1,217,538,067.

Recommendation

Caltrans should ensure that policies and procedures are in place for timely response to new federal award requirements and implementation of changes resulting from new requirements.

Caltrans should document a formal process for performing risk assessments over its subrecipients of federal awards in order to determine the frequency and extent of monitoring activities to be performed in accordance with the requirements of the Uniform Guidance.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

U.S. DEPARTMENT OF EDUCATION

Reference Number:	2016-005
Category of Finding:	Level of Effort – Maintenance of Effort
Type of Finding:	Significant Deficiency and Instance of Noncompliance
State Administering Department:	Department of Education (Education)
Federal Catalog Number:	84.010
Federal Program Title:	Title I Grants to Local Educational Agencies (Title I, Part A of the ESEA)
Federal Award Number and Year:	S010A150005; 2015
Federal Catalog Number:	84.365
Federal Program Title:	English Language Acquisition State Grants
Federal Award Number and Year:	S365A150005; 2015

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 34: Education, Subtitle B – Regulations of the Offices of the Department of Education, Chapter II – Office of Elementary and Secondary Education, Department of Education, Part 299—General Provisions, Subpart D—Fiscal Requirements, §299.5 What maintenance of effort requirements apply to ESEA programs? (34 CFR 299.5)

- (a) *General.* An LEA receiving funds under an applicable program listed in paragraph (b) of this section may receive its full allocation of funds only if the SEA finds that either the combined fiscal effort per student or the aggregate expenditures of State and local funds with respect to the provision of free public education in the LEA for the preceding fiscal year was not less than 90 percent of the combined fiscal effort per student or the aggregate expenditures for the second preceding fiscal year.

(c) *Meaning of “preceding fiscal year”*. For purposes of determining if the requirement of paragraph (a) of this section is met, the “preceding fiscal year” means the Federal fiscal year, or the 12-month fiscal period most commonly used in a State for official reporting purposes, prior to the beginning of the Federal fiscal year in which funds are available for obligation by the Department.

(d) *Expenditures*.

(1) In determining an LEA's compliance with paragraph (a) of this section, the SEA shall consider only the LEA's expenditures from State and local funds for free public education. These include expenditures for administration, instruction, attendance and health services, pupil transportation services, operation and maintenance of plant, fixed charges, and net expenditures to cover deficits for food services and student body activities.

(2) The SEA may not consider the following expenditures in determining an LEA's compliance with the requirements in paragraph (a) of this section:

(i) Any expenditures for community services, capital outlay, debt service or supplemental expenses made as a result of a Presidentially declared disaster.

(ii) Any expenditures made from funds provided by the Federal Government.

Title 20 – Education, Chapter 70 – Strengthening and Improvement of Elementary and Secondary Schools, Subchapter VIII: General Provisions, Part F – Uniform Provisions, Subpart 2 – Other Provisions, §7901. Maintenance of effort (20 USC 70.7901)

(a) In general - A local educational agency may receive funds under a covered program for any fiscal year only if the State educational agency finds that either the combined fiscal effort per student or the aggregate expenditures of the agency and the State with respect to the provision of free public education by the agency for the preceding fiscal year was not less than 90 percent of the combined fiscal effort or aggregate expenditures for the second preceding fiscal year, subject to the requirements of subsection (b).

(b) Reduction in case of failure to meet:

(1) In general - The State educational agency shall reduce the amount of the allocation of funds under a covered program in any fiscal year in the exact proportion by which a local educational agency fails to meet the requirement of subsection (a) of this section by falling below 90 percent of both the combined fiscal effort per student and aggregate expenditures (using the measure most favorable to the local agency), if such local educational agency has also failed to meet such requirement (as determined using the measure most favorable to the local agency) for 1 or more of the 5 immediately preceding fiscal years.

(2) Special rule - No such lesser amount shall be used for computing the effort required under subsection (a) of this section for subsequent years.

(c) Waiver - The Secretary may waive the requirements of this section if the Secretary determines that a waiver would be equitable due to—

(1) exceptional or uncontrollable circumstances, such as a natural disaster or a change in the organizational structure of the local educational agency; or

(2) a precipitous decline in the financial resources of the local educational agency.

Condition

For nine of the thirty-three local educational agencies (LEAs) tested, Education could not provide evidence that they substantiated whether the LEAs met the maintenance of effort (MOE) as required under the Elementary and Secondary Education Act, as amended by the No Child Left Behind Act of 2001. All nine of the LEAs were charter schools.

Cause

Education performs its MOE verification using financial data submitted by the LEAs pursuant to state law (*California Education Code* Section 42100). All school districts and county offices of education report their data through Education's software application called the Standardized Account Code Structure (SACS). Charter schools report their financial data to Education in one of the following three ways: (1) as part of the financial data of its authorizing LEA in the SACS software, (2) separate from its authorizing LEA in the SACS software, or (3) separate from its authorizing LEA in the Alternative Format approved by the State Board of Education, as authorized by state regulations (*Title 5, Section 15071 of the California Code of Regulations*).

According to Education, they do not substantiate whether the charter schools that report separately from their authorizing LEA meet their MOE due to many administrative complications which are not easily solved without changes to state laws and regulations. Specifically, each year a charter school can change from reporting in the SACS software to the Alternative Format, which does not provide Education the detail it needs to verify the MOE in accordance with 34 CFR 299.5(d). Additionally, state law allows charter schools to choose whether to be funded through their authorizing LEA or directly through Education from year-to-year, which effectively changes whether the charter schools are deemed to be an LEA for federal funding and MOE purposes. A charter school's funding selection does not have to coincide with whether or not they report with or separate from their authorizing LEA. Further, if a charter school does not meet its MOE, there would likely be no practical effect as the charter school could choose to be locally funded in the year in which the resulting award reduction should occur, and thus not be held accountable for not meeting the MOE requirement.

Effect

Education cannot perform the analysis necessary for compliance with the requirement to either reduce awards in cases of MOE failure in accordance with 20 USC 70.7901(b) or grant waivers in accordance with 20 USC 70.7901(c).

Questioned Costs

No questioned costs were identified.

Context

For the fiscal year ended June 30, 2016, award reductions due to MOE failures would affect Education's subawards using federal funds from its 2015 grant award. Total amounts allocated to subrecipients of Title I, Part A funds was \$1,668,279,381. Awards to charter schools subject to this noncompliance total \$38,094,383, or 2.3% of total subawards. Total amounts allocated for subrecipients of English Language Acquisition State Grants funds was \$139,550,930. Awards to charter schools subject to this noncompliance total \$2,505,248, or 1.795% of total subawards. The sample was a statistical sample.

Recommendation

Education should develop and follow policies and procedures which ensure the required MOE calculations are performed for all LEAs. Further, Education should obtain and maintain adequate documentation to provide evidence of compliance with the requirements.

Views of Responsible Officials and Corrective Action Plan

Management’s response is reported in “Management’s Response and Corrective Action Plan” included in a separate section at the end of this report.

Federal Program Title:	English Language Acquisition State Grants
Federal Award Number and Year:	S365A150005; 2015 S365A140005; 2014 S365A130005; 2013

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter I - Office of Management and Budget Government wide Guidance for Grants and Agreements, Part 25 - Universal Identifier and System for Award Management, Subpart B - Policy, §25.200 Requirements for program announcements, regulations, and application instructions (2 CFR 25.200):

- (a) Each agency that awards types of Federal financial assistance included in the definition of “award” in §25.305 must include the requirements described in paragraph (b) of this section in each program announcement, regulation, or other issuance containing instructions for applicants that either:
 - (1) Is issued on or after the effective date of this part; or
 - (2) Has application or plan due dates after October 1, 2010.
- (b) The program announcement, regulation, or other issuance must require each entity that applies and does not have an exemption under §25.110 to:
 - (1) Be registered in the System for Award Management (SAM) prior to submitting an application or plan;
 - (2) Maintain an active SAM registration with current information at all times during which it has an active Federal award or an application or plan under consideration by an agency; and
 - (3) Provide its unique entity identifier in each application or plan it submits to the agency.
- (c) For purposes of this policy:
 - (1) The applicant is the entity that meets the agency's or program's eligibility criteria and has the legal authority to apply and to receive the award. For example, if a consortium applies for an award to be made to the consortium as the recipient, the consortium must have a unique entity identifier. If a consortium is eligible to receive funding under an agency program but the agency's policy is to make the award to a lead entity for the consortium, the unique entity identifier of the lead entity will be used.
 - (2) A “program announcement” is any paper or electronic issuance that an agency uses to announce a funding opportunity, whether it is called a “program announcement,” “notice of funding availability,” “broad agency announcement,” “research announcement,” “solicitation,” or some other term.
 - (3) To remain registered in the SAM database after the initial registration, the applicant is required to review and update on an annual basis from the date of initial registration or subsequent updates its information in the SAM database to ensure it is current, accurate and complete.

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter I - Office of Management and Budget Government wide Guidance for Grants and Agreements, Part 25 - Universal Identifier and System for Award Management, Subpart B - Policy, §25.205 Effect of noncompliance with a requirement to obtain a unique entity identifier or register in the SAM (2 CFR 25.205):

- (a) An agency may not make an award to an entity until the entity has complied with the requirements described in §25.200 to provide a valid unique entity identifier and maintain an active SAM registration with current information (other than any requirement that is not applicable because the entity is exempted under §25.110).
- (b) At the time an agency is ready to make an award, if the intended recipient has not complied with an applicable requirement to provide a unique entity identifier or maintain an active SAM registration with current information, the agency:
 - (1) May determine that the applicant is not qualified to receive an award; and
 - (2) May use that determination as a basis for making an award to another applicant.

Condition

Education did not communicate the universal identifier and system for award management requirements to subaward applicants in accordance with 2 CFR 25.200. Additionally, Education did not collect the unique entity identifier prior to awarding funds in accordance with 2 CFR 25.205.

Cause

Education does not have a process in place to ensure the required information is communicated and collected, nor was Education aware of this pre-award requirement for pass-through entities.

Effect

Education is at risk for awarding federal funds to entities that have not properly registered with the SAM.

Questioned Costs

No questioned costs were identified.

Context

For the fiscal year ended June 30, 2016, disbursements to subrecipients of the Adult Education – Basic Grants to States, Title I Grants to Local Educational Agencies, and English Language Acquisition State Grants totaled \$87,178,734, \$1,639,844,358, and \$149,359,143, respectively.

Recommendation

Education should review all federal statutes, regulations, and the terms and conditions of the federal award and determine whether or not policies and procedures exist and are operating effectively to ensure compliance with all requirements.

Education should develop and implement policies and procedures over subawards that ensure the required information is communicated to applicants in accordance with 2 CFR 25.200 and that the unique entity identifier is collected prior to making subawards in accordance with 2 CFR 25.205.

Further, Education should maintain adequate documentation that the unique entity identifier has been obtained.

Views of Responsible Officials and Corrective Action Plan

Management’s response is reported in “Management’s Response and Corrective Action Plan” included in a separate section at the end of this report.

Reference Number:	2016-007
Category of Finding:	Subrecipient Monitoring
Type of Finding:	Significant Deficiency
State Administering Department:	Department of Education (Education)
Federal Catalog Number:	84.010
Federal Program Title:	Title I Grants to Local Educational Agencies (Title I, Part A of the ESEA)
Federal Award Number and Year:	S010A150005; 2015
Federal Catalog Number:	84.365
Federal Program Title:	English Language Acquisition State Grants
Federal Award Number and Year:	S365A150005; 2015

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Condition

During our testing of Education’s cash management process of disbursing funds to subrecipients, we noted that the methodology does not sufficiently analyze subrecipient information to reasonably determine, a subrecipient’s potential noncompliance with federal statutes, regulations, and the terms and conditions of the subaward. For example, one of the English Language

Acquisition subrecipient payments indicated that the subrecipient had spent 58% of its total fiscal year 2015-16 entitlement award during the month of July. Given that subrecipients are local education agencies and the nature of the funds is to provide services to students, the use of 58% of an entitlement award during the month of July should warrant further inquiry and analysis.

Cause

Education assesses payments to subrecipients of English Language Acquisition funding and Title I, Part A funding on a quarterly basis using the Federal Cash Management Data Collection (CMDC) system. This method requires quarterly reporting of cash-on-hand balances which the School Fiscal Services Division then uses to ensure that subrecipients have no more than 25% of total open entitlements on hand each quarter. The cash needs assessment methodology calculates the first disbursement amount of a new grant to reimburse for negative cash balances plus an amount equal to 25% of the total entitlement award. Education's subrecipient monitoring efforts do not take into account whether or not it is reasonable that the negative cash balance could be indicative of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward. For example, a negative cash balance at the beginning of an entitlement award could indicate that expenditures charged to the grant were incurred prior to the grant period, which is not allowable.

Effect

Negative cash at the beginning of a subaward period could indicate a risk of the subrecipients potential noncompliance with federal statutes, regulations, and the terms and conditions of the subaward concerning the expenditure of federal funds prior to the commencement of the grant period.

Questioned Costs

No questioned costs were identified.

Context

For English Language Acquisition, Education awarded \$139,517,109 of the fiscal year 2015-16 entitlement award funding to subrecipients. The first apportionment disbursement of the 2015-16 award totaled \$6,546,650, of which approximately \$1,864,611 was related to negative cash balances.

For Title I, Part A, Education awarded \$1,604,994,330 of the fiscal year 2015-16 entitlement award funding to subrecipients. The first apportionment disbursement of the 2015-16 award totaled \$53,452,867, of which approximately \$2,404,705 was related to negative cash balances.

Recommendation

Education should utilize subrecipient information gathered from all sources, including the CMDC system, to assist in subrecipient monitoring efforts such as risk assessment and periodic outreach.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

U.S. DEPARTMENT OF HEALTH AND HUMAN SERVICES

Federal Award Numbers and Years:	5U90TP000506-04; 2015 5U90TP000506-03; 2014

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart E-Cost Principles, General Provisions for Selected Items of Cost, §200.430-Compensation-personal services (2 CFR 200.430):

- (i) *Standards for Documentation of Personnel Expenses*
 - (1) Charges to Federal awards for salaries and wages must be based on records that accurately reflect the work performed. These records must:

(viii) Budget estimates (i.e., estimates determined before the services are performed) alone do not qualify as support for charges to Federal awards, but may be used for interim accounting purposes, provided that:

- (A) The system for establishing the estimates produces reasonable approximations of the activity actually performed;
- (B) Significant changes in the corresponding work activity (as defined by the non-Federal entity's written policies) are identified and entered into the records in a timely manner. Short term (such as one or two months) fluctuation between workload categories need not be considered as long as the distribution of salaries and wages is reasonable over the longer term; and
- (C) The non-Federal entity's system of internal controls includes processes to review after-the-fact interim charges made to a Federal awards based on budget estimates. All necessary adjustment must be made such that the final amount charged to the Federal award is accurate, allowable, and properly allocated.

Condition

The Department of Public Health charges personnel costs to the award based on budgeted amounts but does not perform an after-the-fact-review of the actual effort applied toward the administration of the award. As such, Public Health did not determine if an adjustment was necessary to final charges in accordance with 2 CFR 200.430(i)(1)(viii)(C).

Cause

The Department of Public Health does not have a system of recordkeeping that accurately reflects the work performed in order to perform the required adjustment analysis and support charges to federal awards for salaries and wages.

Effect

Actual payroll and related costs charged to federal awards administered by the Department could be materially misstated.

Questioned Costs

Questioned costs could not be determined due to the lack of records.

Context

For the fiscal year ended June 30, 2016, payroll and related costs totaled \$11,117,357 for the Public Health Emergency Preparedness program (CFDA #93.069) and \$7,563,667 for the National Bioterrorism Hospital Preparedness Program (CFDA #93.889).

Recommendation

Public Health should develop policies and procedures to comply with the standards for documentation of personnel expenses and retain evidence of compliance with this requirement. Additionally, Public Health should perform and document the required adjustment analysis to final charges when using a budget charge approach.

Views of Responsible Officials and Corrective Action Plan

Management’s response is reported in “Management’s Response and Corrective Action Plan” included in a separate section at the end of this report.

Reference Number:	2016-009
Category of Finding:	Activities Allowed or Unallowed; Allowable Costs/Cost Principles
Type of Finding:	Material Weakness and Material Instance of Noncompliance
State Administering Department:	California Department of Health Care Services (Health Care Services)
Federal Catalog Number:	93.767
Federal Program Title:	Children’s Health Insurance Program
Federal Award Numbers and Years:	05-1605CA5021; 2016 05-1505CA1081; 2015

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart E - Cost Principles, Basic Considerations, §200.403 Factors affecting allowability of costs (2 CFR 200.403):

Except where otherwise authorized by statute, costs must meet the following general criteria in order to be allowable under Federal awards:

- (a) Be necessary and reasonable for the performance of the Federal award and be allocable thereto under these principles.

Condition

Four cash drawdowns tested amounting to \$1,527,285 were for Local Education Agency (LEA) expenditures that are not allowable under the Children's Health Insurance Program.

Identification as a Repeat Finding

Finding 2015-008 was reported in the immediate prior year.

Cause

A coding error associated with aid code 7X, One Month Bridge to Healthy Families, resulted in payments claimed under the Children's Health Insurance Program from the title XIX Funding.

Effect

As a result, unallowable activity was funded under the Children's Health Insurance Program and is included in the schedule of expenditures of federal awards.

Questioned Costs

\$1,527,285

Context

Forty (40) cash drawdowns were tested that amounted to \$1,296,241,295 from a population of 349 cash drawdowns that amounted to \$1,972,883,719. The sample was not a statistical sample.

Recommendation

The Safety Net Financing Division should strengthen internal controls to ensure that program expenditures are properly funded from allowable federal funding sources. Further, management should correct the coding error to ensure future LEA expenditures are not charged to the Children's Health Insurance Program and that management review prior cash drawdowns to evaluate the extent to which LEA expenditures have been funded by the Children's Health Insurance Program.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

Reference Number:	2016-010
Category of Finding:	Cash Management
Type of Finding:	Material Weakness and Material Instance of Noncompliance
State Administering Department:	Department of Education (Education)

Federal Program Title:	Child Care and Development Block Grant
Federal Catalog Number:	93.596
Federal Program Title:	Child Care Mandatory and Matching Funds of the Child Care and Development Fund
Federal Award Numbers and Years:	G1601CACCDF; 2016 G1501CACCDF; 2015 G1401CACCDF; 2014 G1301CACCDF; 2013

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 31 - Money and Finance: Treasury, Chapter II - Fiscal Service, Department of the Treasury, Part 205 Rules and Procedures for Efficient Federal-State Funds Transfers, Subpart A - Rules Applicable to Federal Assistance Programs Included in a Treasury-State Agreement, §205.12 What Funding Techniques May Be Used? (2 CFR 205.12):

- (a) We and a State may negotiate the use of mutually agreed upon funding techniques. We may deny interest liability if a State does not use a mutually agreed upon funding technique. Funding techniques should be efficient and minimize the exchange of interest between States and Federal agencies.

CASH MANAGEMENT IMPROVEMENT ACT (CMIA) Agreement between the State of California and the Secretary of the Treasury, United States Department of the Treasury:

Section 6.2.1 The following are terms under which standard funding techniques shall be implemented for all transfers of funds to which the funding technique is applied in Section 6.3.2 of this Agreement.

Section 6.2.4 The following are terms under which State unique funding techniques shall be implemented for all transfers of funds to which the funding technique is applied in Section 6.3.2 of this Agreement.

Monthly Estimate/Monthly Draw – The State departments will estimate the monthly expenditures during the first week of each month. This amount will be requested within the first ten working days of each month. The request shall be made in accordance with the appropriate federal agency cut-off time specified in Exhibit I. The State will reconcile the actual expenditures to the estimate for each month and adjust the subsequent request for funds. This funding technique is interest neutral.

Section 6.3.1 The State shall apply the following funding techniques when requesting federal funds for the component cash flows of the programs listed in sections 4.2 and 4.3 of this Agreement.

Section 6.3.2 Programs - Below are programs listed in Section 4.2 and Section 4.3:

93.575 Recipient: % of Funds Agency Receives: Component: Technique:	Child Care and Development Block Grant Department of Education 88.94 Payments to child care providers Monthly Estimate/Monthly Draw
93.596 Recipient: % of Funds Agency Receives: Component: Technique:	Child Care Mandatory and Matching Funds of the Child Care and Development Fund Department of Education 95.46 Payments to child care providers Monthly Estimate/Monthly Draw

Condition

Education failed to ensure that federal fund drawdowns for payments to child care providers were in compliance with the funding technique required by the CMIA Agreement. For seven of the ten drawdowns tested, the draw down occurred after the first ten working days of the month.

Cause

Internal reports used for calculating the estimated monthly expenditures were not prepared in a timely manner for the draw down to occur within the first ten working days of the month. Education’s current process does not allow for the estimated monthly expenditure calculation to occur without the internal reports. As a result, requests for the seven drawdowns ranged from 2-10 days after the required period.

Effect

Pursuant to Section 11.1 of the CMIA Agreement, noncompliance with the funding technique can result in sanctions and penalties, including additional restrictions such as drawing funds on a reimbursement basis rather than the current advance basis.

Questioned Costs

Questioned costs were not identified.

Context

Education performed twelve Monthly Estimate/Monthly Draw drawdowns during the fiscal year ended June 30, 2016, totaling \$471,475,758. Drawdowns tested for payments to child care providers totaled \$422,653,406, of which drawdowns totaling \$317,481,102 occurred after the first ten working days of the month. The sample was not a statistical sample.

Recommendation

Education should evaluate the current policies and procedures for necessary revisions that would ensure that draw down of federal funds are in compliance with the stated funding technique pursuant to the CMIA Agreement.

Views of Responsible Officials and Corrective Action Plan

Management’s response is reported in “Management’s Response and Corrective Action Plan” included in a separate section at the end of this report.

Reference Number:	2016-011
Category of Finding:	Cash Management
Type of Finding:	Material Weakness and Material Instance of Noncompliance
State Administering Department:	California Department of Health Care Services (Health Care Services)
Federal Catalog Number:	93.959
Federal Program Title:	Block Grants for Prevention and Treatment of Substance Abuse
Federal Award Number and Year:	2B08TI010062-15; 2015

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A – Office of Management and Budget Guidance for Grants and Agreements, Chapter II – Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.305 Payment (2 CFR 200.305):

- (b) For non-Federal entities other than states, payments methods must minimize the time elapsing between the transfer of funds from the United States Treasury or the pass-through entity and the disbursement by the non-Federal entity whether the payment is made by electronic funds transfer, or issuance or redemption of checks, warrants, or payment by other means. See also §200.302 Financial management paragraph (b)(6). Except as noted elsewhere in this part, Federal agencies must require recipients to use only OMB-approved standard government-wide information collection requests to request payment.
 - (1) The non-Federal entity must be paid in advance, provided it maintains or demonstrates the willingness to maintain both written procedures that minimize the time elapsing between the transfer of funds and disbursement by the non-Federal entity, and financial management systems that meet the standards for fund control and accountability as established in this part. Advance payments to a non-Federal entity must be limited to the minimum amounts needed and be timed to be in accordance with the actual, immediate cash requirements of the non-Federal entity in carrying out the purpose of the approved program or project. The timing and amount of advance payments must be as close as is administratively feasible to the actual disbursements by the non-Federal entity for direct program or project costs and the proportionate share of any allowable indirect costs. The non-Federal entity must make timely payment to contractors in accordance with the contract provisions.

Condition

The Substance Use Disorder Program, Policy and Fiscal Division of Health Care Services distributes funds awarded to subrecipients on a quarterly basis in accordance with an allocation schedule. The cash management process does not provide for appropriate monitoring to ensure that subrecipients are minimizing the time elapsing between the receipt and disbursement of federal funds.

Cause

The Substance Use Disorder Program, Policy and Fiscal Division was not aware of the requirement to monitor the cash needs of their subrecipients.

Effect

Subrecipients might not be expending federal funds in a timely manner resulting in an interest liability, which is required to be returned to the federal granting agency.

Questioned Costs

Questioned costs could not be determined.

Context

Payments by the Substance Use Disorder Program, Policy and Fiscal Division to subrecipients related to the Block Grants for Prevention and Treatment of Substance Abuse (SABG) program totaled \$120,496,806 for the fiscal year ended June 30, 2016.

Recommendation

The Substance Use Disorder Program, Policy and Fiscal Division should develop and implement policies and procedures over federal funding that ensures the time between the receipt and disbursement of federal funds by subrecipients is minimized. Further, the Substance Use Disorder Program, Policy and Fiscal Division should develop procedures for the maintenance of records, which support that the compliance objectives are being satisfied.

Views of Responsible Officials and Corrective Action Plan

Management’s response is reported in “Management’s Response and Corrective Action Plan” included in a separate section at the end of this report.

Reference Number:	2016-012
Category of Finding:	Cash Management
Type of Finding:	Material Weakness and Material Instance of Noncompliance
State Administering Department:	California Department of Health Care Services (Health Care Services)
Federal Catalog Number:	93.959
Federal Program Title:	Block Grants for Prevention and Treatment of Substance Abuse
Federal Award Number and Year:	2B08TI010062-15; 2015

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These

internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 31 - Money and Finance: Treasury, Chapter II - Fiscal Service, Department of the Treasury, Part 205 Rules and Procedures for Efficient Federal-State Funds Transfers, Subpart A - Rules Applicable to Federal Assistance Programs Included in a Treasury-State Agreement, §205.12 What Funding Techniques May Be Used? (31 CFR 205.12):

- (a) We and a State may negotiate the use of mutually agreed upon funding techniques. We may deny interest liability if a State does not use a mutually agreed upon funding technique. Funding techniques should be efficient and minimize the exchange of interest between States and Federal agencies.

CASH MANAGEMENT IMPROVEMENT ACT (CMIA) Agreement between the State of California and the Secretary of the Treasury, United States Department of the Treasury:

Section 6.2.1 The following are terms under which standard funding techniques shall be implemented for all transfers of funds to which the funding technique is applied in Section 6.3.2 of this Agreement.

Pre-Issuance

The State shall request funds such that they are deposited in a State account not more than three business days prior to the day the State makes a disbursement. The request shall be made in accordance with the appropriate Federal agency cut-off time specified in Exhibit I to the Treasury-State Agreement. The amount of the request shall be the same amount the State expects to disburse. This funding technique is not interest neutral.

Section 6.3.1 The State shall apply the following funding techniques when requesting Federal funds for the component cash flows of the programs listed in sections 4.2 and 4.3 of this Agreements.

Section 6.3.2 Programs - Below are programs listed in Section 4.2 and Section 4.3:

93.959	Block Grants for Prevention and Treatment of Substance Abuse
Recipient:	Department of Health Care Services
Component:	Payments to health care providers and to States and local agencies
Technique:	Pre-Issuance

Condition

The Cash Management Unit of Health Care Services failed to ensure that the drawdown of federal funds for payments to local agencies were in compliance with the funding technique requirements for the Block Grants for Prevention and Treatment of Substance Abuse (SABG) program. For three of the eight pre-issuance drawdowns tested, the related disbursements occurred more than three business days after deposit of the related federal funds.

Cause

Funds were drawn in error by the Cash Management Unit, which caused the warrant issue dates to exceed the required number of business days, ranging from 12-23 business days.

Effect

Because this funding technique is not interest neutral, the State must calculate an interest liability for SABG draws in accordance with the CMIA Agreement, section 8.0, which calls for a dollar-weighted calculation methodology. Per CMIA Agreement, section 11.1, noncompliance with the funding technique can result in sanctions and penalties, including additional restrictions such as drawing funds on a reimbursement basis rather than the current advance basis.

Questioned Costs

No questioned costs were identified.

Context

The Cash Management Unit performed 26 pre-issuance funding technique drawdowns during the fiscal year ended June 30, 2016, totaling \$120,184,181. The amount of drawdowns tested for payments to local agencies totaled \$116,339,032, of which the noncompliant drawdowns totaled \$13,935,256. The sample was not a statistical sample. For the fiscal year ended June 30, 2016, SABG incurred a total of 172 interest days, resulting in a total interest liability of \$5,091. The State remits the interest earned back to the federal government from its General Fund, which is where the earned interest was deposited. Interest is not charged back to the federal award.

Recommendation

The Cash Management Unit should strengthen and follow existing policies and procedures, and monitor those procedures, to ensure that drawdown of federal funds are in compliance with the stated funding technique pursuant to the CMIA Agreement.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

Reference Number:	2016-013
Category of Finding:	Eligibility
Type of Finding:	Material Weakness and Material Instance of Noncompliance
State Administering Department:	California Department of Health Care Services (Health Care Services)
Federal Catalog Number:	93.778
Federal Program Title:	Medical Assistance Program
Federal Award Numbers and Years:	05-1605CA5ADM; 2016 05-1605CA5MAP; 2016

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II – Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 42 - Public Health, Chapter IV - Centers for Medicare & Medicaid Services, Department of Health and Human Services (Continued), Subchapter C - Medical Assistance Programs, Part 435 - Eligibility in the States, District of Columbia, the Northern Mariana Islands, and American Samoa, Subpart J - Eligibility in the States and District of Columbia, Redeterminations of Medicaid Eligibility, §435.916 Periodic renewal of Medicaid eligibility (42 CFR 435.916):

- (a) Renewal of individuals whose Medicaid eligibility is based on modified adjusted gross income methods (MAGI).
 - (1) Except as provided in paragraph (d) of this section, the eligibility of Medicaid beneficiaries whose financial eligibility is determined using MAGI-based income must be renewed once every 12 months, and no more frequently than once every 12 months.
 - (2) Renewal on basis of information available to agency. The agency must make a redetermination of eligibility without requiring information from the individual if able to do so based on reliable information contained in the individual’s account or other more current information available to the agency, including but not limited to information accessed through any data bases accessed by the agency under §435.948, §435.949 and §435.956 of this part.

(b) Redetermination of individuals whose Medicaid eligibility is determined on a basis other than modified adjusted gross income. The agency must redetermine the eligibility of Medicaid beneficiaries excepted from modified adjusted gross income under §435.603(j) of this part, for circumstances that may change, at least every 12 months. The agency must make a redetermination of eligibility in accordance with the provisions of paragraph (a)(2) of this section, if sufficient information is available to do so. The agency may adopt the procedures described at §435.916(a)(3) for individuals whose eligibility cannot be renewed in accordance with paragraph (a)(2) of this section.

Condition

Eligibility redeterminations for seven beneficiaries out of 69 reviewed were not performed within the required interval of once every 12 months. The overdue periods ranged from 29 months to 205 months.

Health Care Services has delegated the performance of eligibility redeterminations to County welfare agencies in subawards.

Identification as a Repeat Finding

Finding 2015-009 was reported in the immediate prior year.

Cause

Since the implementation of the Affordable Care Act, which resulted in expanded Medicaid coverage, there has been a continual large influx of new applications. This influx has increased the already existing condition of excessive case management workload at the County welfare agency level resulting in insufficient resources to ensure compliance with the redetermination requirements.

Effect

As a result of our inquiry into these seven beneficiaries, three were determined to be ineligible and benefits were terminated, while the remaining four were determined to be eligible. Thus, the existing internal controls did not prevent, or detect and correct, the occurrence of benefits being provided to ineligible beneficiaries.

Questioned Costs

Expenditures related to the ineligible beneficiaries totaled \$23,936 for fiscal year 2015-16.

Context

For the fiscal year ended June 30, 2016, a total of \$47,546 was disbursed on behalf of the seven beneficiaries with overdue redeterminations, and \$23,936 was disbursed on behalf of the three beneficiaries later determined to be ineligible. Total benefits paid on behalf of the 69 beneficiaries tested were \$1,139,044. The total benefits paid on behalf of beneficiaries for the fiscal year ended June 30, 2016 is \$45,995,934,041. The total number of beneficiaries for the fiscal year ended June 30, 2016 is approximately 13.4 million. The sample was not a statistical sample.

Recommendation

The Eligibility Division of Health Care Services should strengthen and follow policies and procedures to ensure that redeterminations occur within the required timeline. For the County welfare agencies that are responsible for completing the redetermination process, the Eligibility Division should consider additional training and oversight, including tracking of the due dates of redeterminations, to reduce the potential for future noncompliance.

Views of Responsible Officials and Corrective Action Plan

Management’s response is reported in “Management’s Response and Corrective Action Plan” included in a separate section at the end of this report.

Reference Number:	2016-014
Category of Finding:	Matching
Type of Finding:	Material Weakness and Material Instance of Noncompliance

Federal Catalog Number:	93.069
Federal Program Title:	Public Health Emergency Preparedness
Federal Award Number and Year:	5U90TP000506-04; 2015
Federal Catalog Number:	93.889
Federal Program Title:	National Bioterrorism Hospital Preparedness Program
Federal Award Number and Year:	5U90TP000506-04; 2015

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management §200.306 Cost sharing or matching (2 CFR 200.306):

(b) For all Federal awards, any shared costs or matching funds and all contributions, including cash and third party in-kind contributions, must be accepted as part of the nonfederal entity's cost sharing or matching when such contributions meet all of the following criteria:

- (1) Are verifiable from the non-Federal entity's records;
- (2) Are not included as contributions for any other Federal award;
- (3) Are necessary and reasonable for accomplishment of project or program objectives;
- (4) Are allowable under Subpart E-Cost Principles of this part;
- (5) Are not paid by the Federal Government under another Federal award, except where the Federal statute authorizing a program specifically provides that Federal funds made available for such program can be applied to matching or cost sharing requirements of other Federal programs;
- (6) Are provided for in the approved budget when required by the Federal awarding agency; and
- (7) Conform to other provisions of this part, as applicable.

U.S. Code Title 42 - The Public Health And Welfare Chapter, 6a - Public Health Service, Subchapter II General Powers and Duties, Part B, Federal-State Cooperation, 247d-3a. Improving State and Local Public Health Security (42 USC 247d-3a):

(h) Funding, (1) Authorization of appropriations, (B) Requirement for State matching funds. – Beginning in fiscal year 2009, in the case of any State or consortium of two or more States, the Secretary may not award a cooperative agreement under this section unless the State or consortium of States agree that, with respect to the amount of the cooperative agreement awarded by the Secretary, the State or consortium of States will make available (directly or through donations from public or private entities) non-Federal contributions in an amount equal to –

- (ii) for any second fiscal year of the cooperative agreement, and for any subsequent fiscal year of such cooperative agreement, not less than 10 percent of such costs (\$1 for each \$10 of Federal funds provided in the cooperative agreement).

Condition

The Emergency Preparedness Office of Public Health has an informal arrangement with Los Angeles County to set aside a portion of the County's Measure B Tax Revenue to contribute to the State's match requirement. The support for the County portion does not include evidence that meets the criteria of 2 CFR 200.306(b).

Cause

The Emergency Preparedness Office does not require evidence or assurance that the County portion meets the stated criteria.

Effect

If the match requirement is not met with amounts that meet the stated criteria, Public Health is subject to sanctions and penalties.

Questioned Costs

The amount claimed to have been met through Los Angeles County funding for the National Bioterrorism Hospital Preparedness Program totaled \$2,099,265 and for Public Health Emergency Preparedness totaled \$2,163,740.

Context

The required match for the fiscal year ended June 30, 2016, for National Bioterrorism Hospital Preparedness Program totaled \$2,320,445 and for Public Health Emergency Preparedness totaled \$4,257,727.

Recommendation

The Emergency Preparedness Office should develop policies and procedures to ensure that the Los Angeles County portion meets the stated criteria and retain evidence that the stated criteria have been met.

Views of Responsible Officials and Corrective Action Plan

Management’s response is reported in “Management’s Response and Corrective Action Plan” included in a separate section at the end of this report.

Reference Number:	2016-015
Category of Finding:	Level of Effort
Type of Finding:	Material Weakness and Material Instance of Noncompliance
State Administering Department:	California Department of Public Health (Public Health)
Federal Catalog Number:	93.069
Federal Program Title:	Public Health Emergency Preparedness
Federal Award Number and Year:	5U90TP000506-03; 2014
Federal Catalog Number:	93.889
Federal Program Title:	National Bioterrorism Hospital Preparedness Program
Federal Award Number and Year:	5U90TP000506-03; 2014

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 42 - The Public Health and Welfare Chapter, 6a - Public Health Service, Subchapter II General Powers and Duties, Part B, Federal-State Cooperation, 247d-3b. Partnerships for State and regional hospital preparedness to improve surge capacity (42 USC 247d-3b):

- (h) Maintenance of funding

- (1) In general - An entity that receives an award under this section shall maintain expenditures for health care preparedness at a level that is not less than the average level of such expenditures maintained by the entity for the preceding 2 year period.

Condition

Public Health did not maintain expenditures for health care preparedness at a level that is not less than the average level of such expenditures maintained by the entity for the preceding 2-year period for the grant award that closed during the fiscal year ended June 30, 2016. Additionally, Public Health cannot calculate compliance with the requirement for each program individually as the expenditures are not tracked separately.

Cause

Public Health has historically calculated the maintenance of effort using a budgeted allocation amount rather than actual expenditures. As such, Public Health has not been properly calculating the base against which compliance is measured. Additionally, as noted in finding 2016-001, Public Health has been erroneously tracking and reporting activity for these two programs as one single program.

Effect

Public Health cannot properly determine and budget for the required threshold of expenditures by using budgeted allocation in its calculation. When actual expenditures do not meet the maintenance of effort threshold, Public Health is subject to repayment of the amount not met in accordance with 42 USC 6a §247d-3a(2)(B) or withholding of payments in accordance with 42 USC 6a §247d-3a(2)(C). If actual expenditures exceed the maintenance of effort threshold, future thresholds would increase the average level during the measurement period.

Questioned Costs

Actual combined expenditures for the closed grant period resulted in a shortfall of \$1,056,964. Questioned costs represent the combined total of both programs because expenditures were not tracked separately by individual CFDA numbers.

Context

Actual combined expenditures for the closed grant period totaled \$4,838,638 and the threshold calculated as the previous two fiscal year’s average actual expenditures was \$5,895,602.

Recommendation

Public Health should develop policies and procedures to ensure proper calculation of the maintenance of effort requirement based on actual expenditures for each grant. Additionally, Public Health should evaluate the maintenance of effort result for closed grants and if required, submit revised reports to the granting agency.

Views of Responsible Officials and Corrective Action Plan

Management’s response is reported in “Management’s Response and Corrective Action Plan” included in a separate section at the end of this report.

Reference Number:	2016-016
Category of Finding:	Earmarking
Type of Finding:	Material Weakness and Material Instance of Noncompliance
State Administering Department:	California Department of Public Health (Public Health) and California Emergency Medical Services Authority (EMSA)
Federal Catalog Number:	93.758
Federal Program Title:	Preventive Health and Health Services Block Grant funded solely with Prevention and Public Health Funds (PPHF)
Federal Award Numbers and Years:	2B01OT009006-14; 2014 3B01OT009006-14S1; 2014 3B01OT009006-14S2; 2014

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 42-The Public Health and Welfare, Chapter 6A-Public Health Service, Subchapter XVII-Block Grants, Part A-Preventive Health and Health Services Block Grants §300w-3. Use of Allotments (42 USC 300w-3):

(d) Limitation on Administrative Costs

Of the amount paid to any State under section 300w-2 of this title, not more than 10 percent paid from each of its allotments under subsections (a) and (b) of section 300w-1 of this title may be used for administering the funds made available under section 300w-2 of this title. The State will pay from non-Federal sources the remaining costs of administering such funds.

Condition

Total administrative expenditures for the 2014 grant award exceeded the 10% administrative cost limit.

Cause

Public Health and EMSA do not have processes and procedures in place to monitor spending against the 10% limit during the grant period, nor do they have a process and procedure to perform an after-the-fact-review of compliance with the limit to adjust charges prior to final close-out of the grant.

Effect

Charges to the grant beyond the limit are not allowable to the grant.

Questioned Costs

Questioned costs of \$66,720 represent the amount by which actual administrative costs charged to the grant exceed the administrative cost limit.

Context

The 2014 grant award period was October 1, 2013 through September 30, 2015. The administrative cost limit of \$1,050,810 is determined by applying 10% to the total 2014 grant awards of \$10,508,099. Actual administrative costs charged to the 2014 grant awards by Public Health were \$907,054 and by EMSA were \$210,476, which total \$1,117,530.

Recommendation

Public Health and EMSA should develop processes and procedures to monitor spending against the 10% limit during the grant period and to perform an after-the-fact-review for potential adjustments to charges prior to final close-out of the grant. Additionally, Public Health and EMSA should perform an after-the-fact review of the already closed grants and report any noncompliant results to their granting agency for possible return of funds.

Views of Responsible Officials and Corrective Action Plan

Management’s response is reported in “Management’s Response and Corrective Action Plan” included in a separate section at the end of this report.

Reference Number:	2016-017
Category of Finding:	Period of Performance
Type of Finding:	Significant Deficiency and Instance of Noncompliance
State Administering Department:	California Department of Community Services and Development (CSD)
Federal Program Title:	Low-Income Home Energy Assistance Program (LIHEAP)
Federal Catalog Number:	93.568
Federal Award Numbers and Award Years:	G-14B1CALIEA; 2014 G-13B1CALIEA; 2013 G-12B1CALIEA; 2012 G-11B1CALIEA; 2011

Criteria

USC Title 42 – the Public Health and Welfare. Chapter 94 – Low-Income Energy Assistance. Subchapter II – Low-Income Home Energy Assistance. §8626 Payments to States; fiscal year requirements respecting availability, etc. (42 USC 8626):

(b)(2)(B) No amount may be held available under this paragraph for a State from a prior fiscal year to the extent such amount exceeds 10 percent of the amount payable to such State for such prior fiscal year. For purposes of the preceding sentence, the amount payable to a State for a fiscal year shall be determined without regard to any amount held available under this paragraph for such State for such fiscal year from the prior fiscal year. The Secretary shall reallocate amounts made available under this paragraph for the fiscal year following the fiscal year of the original allotment in accordance with paragraph (1) of this subsection.

Condition

Pursuant to the “Terms and Conditions Addendum: Additional Financial Requirements” issued by the DHHS’s Office of Community Services, the two-year funding period (or the obligation period) is from the first day of the federal fiscal year for which LIHEAP funds were awarded through the last day of the following federal fiscal year (i.e., from October 1 of the first federal fiscal year through September 30 of the second federal fiscal year). Any federal funds not obligated by the end of the obligation period are to be recouped by DHSS.

CSD’s practice has been to carryover and re-obligate LIHEAP funds on an annual basis, which were not expended by its subrecipients, as long as the re-obligation occurred within five years from the grant award date. CSD’s practice was based upon its understanding that it had five years to expend and liquidate LIHEAP funds. For the fiscal year ended June 30, 2016, the 2011-2015 grant award years were still active; however, only the 2011-2014 grant awards had carryover funds that were expended in 2016.

Since the finding was first reported in fiscal year 2014-15, CSD has taken corrective action and is no longer carrying-over and re-obligating federal funds outside the period of performance. CSD is now obligating federal funds for specific grant award years only within the first federal fiscal year. We noted per review of CSD’s 2016 Budget Allocation Worksheet and testing of subaward contracts entered into during fiscal year 2015-16, only 2016 grant award funds were being obligated in its 2016 subaward contracts.

In September 2016, CSD sent a letter to the Office of Community Services (OCS), expressing their remediation efforts and corrective action taken in response to the finding, which will be effective for grant award year 2016. Unexpended funds will no longer be recaptured from prior year grant awards and re-obligated within subsequent subaward contracts. In January 2017, OCS replied to CSD’s letter stipulating that CSD’s current interpretation of the period of performance aligns with OCS’ interpretation, which is that 90 percent of the annual grant award must be obligated within the same/first federal fiscal year in which the award is granted, and up to 10 percent of the grant may be carried over for obligation in the subsequent/second fiscal year.

Cause

CSD misinterpreted the period of performance compliance requirement and understood the obligation period to be five federal fiscal years. However, CSD must obligate the funds within the first two federal fiscal years but then has five federal fiscal years in which to expend and liquidate the federal funds awarded under the grants awards.

Effect

CSD is not in compliance with the required period of performance pursuant to the “Terms and Conditions Addendum: Additional Financial Requirements” and Section 8626 of Title 42 of the U.S. Code.

Questioned Costs

Questioned costs totaled \$13.6 million, which represents the costs incurred during fiscal year 2015-16 using federal funds from the 2011 to 2014 grant award years, which were re-obligated outside of the period of performance.

Context

For fiscal year 2015-16, CSD re-obligated \$236,163, \$13,683,504 and \$790,020 in federal funds related to the 2011, 2013, and 2014 grant award years, respectively, which fell outside the period of performance. CSD did not re-obligate any federal funds for the 2012 grant award year.

Identification as a Repeat Finding

Finding 2015-006 was reported in the immediate prior year.

Recommendation

Since CSD has remediated the period of performance compliance finding, which is effective for fiscal year 2016-17, CSD should continue to communicate with OCS to ensure that appropriate remediation and corrective action has occurred and ultimate resolution of the compliance finding.

Views of Responsible Officials and Corrective Action Plan

Management’s response is reported in “Management’s Response and Corrective Action Plan” included in a separate section at the end of this report.

Reference Number:	2016-018
Category of Finding:	Subrecipient Monitoring
Type of Finding:	Material Weakness and Material Instance of Noncompliance
State Administering Department:	California Department of Public Health (Public Health)
Federal Catalog Number:	93.069
Federal Program Title:	Public Health Emergency Preparedness
Federal Award Numbers and Years:	5U90TP000506-04; 2015 5U90TP000506-03; 2014
Federal Catalog Number:	93.889
Federal Program Title:	National Bioterrorism Hospital Preparedness Program
Federal Award Numbers and Years:	5U90TP000506-04; 2015 5U90TP000506-03; 2014

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Subrecipient Monitoring and Management, §200.331 Requirements for pass-through entities (2 CFR 200.331):

All pass-through entities must:

- (d) Monitor the activities of the subrecipient as necessary to ensure that the subaward is used for authorized purposes, in compliance with Federal statutes, regulations, and the terms and conditions of the subaward; and that subaward performance goals are achieved.

Condition

The Public Health Emergency Preparedness and the National Bioterrorism Hospital Preparedness Programs had sixty-one subrecipients during the fiscal year. We tested six subrecipients and noted that Emergency Preparedness Office (EPO) program management could not provide evidence that sufficient monitoring was performed for the purpose of determining that subrecipient use of funds is in accordance with federal statutes, regulations, and the terms and conditions of the subaward. Current monitoring procedures primarily focus on cost allowability and do not consistently cover other compliance areas, such as reporting and subrecipient monitoring, and whether programmatic objectives are achieved.

Cause

EPO did not properly design their monitoring policies and procedures to provide evidence that EPO monitors subrecipients’ use of funds in accordance with federal statutes, regulations, and the terms and conditions of the subaward.

Effect

The monitoring performed during the fiscal year ended June 30, 2016, did not ensure that sufficient and effective monitoring occurred over subrecipients’ use of funds in accordance with federal statutes, regulations, and the terms and conditions of the subaward.

Questioned Costs

Questioned costs were not identified.

Context

For the fiscal year ended June 30, 2016, disbursements to subrecipients totaled \$32,224,734 for the Public Health Emergency Preparedness (CFDA #93.069) and \$14,746,156 for the National Bioterrorism Hospital Preparedness Program (CFDA #93.889). The sample was not a statistical sample.

Recommendation

EPO should develop a comprehensive monitoring tool, which explicitly includes provisions for the review of subrecipient compliance with federal statutes, regulations, and the terms and conditions of the subaward; and that subaward performance goals are achieved.

Views of Responsible Officials and Corrective Action Plan

3B01OT009006-14S2; 2014

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Subrecipient Monitoring and Management, §200.331 Requirements for pass-through entities (2 CFR 200.331):

All pass-through entities must:

- (b) Evaluate each subrecipient’s risk of noncompliance with Federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient monitoring described in paragraphs (d) and (e) of this section, which may include consideration of such factors as:
 - (1) The subrecipient’s prior experience with the same or similar subawards;
 - (2) The results of previous audits including whether or not the subrecipient receives a Single Audit in accordance with Subpart F – Audit Requirements of this part, and the extent to which the same or similar subaward has been audited as a major program;
 - (3) Whether the subrecipient has new personnel or new or substantially changed systems; and
 - (4) The extent and results of Federal awarding agency monitoring (e.g., if the subrecipient also receives Federal awards directly from a Federal awarding agency).

Condition

The Public Health Emergency Preparedness, Immunization Cooperative Agreements, Preventive Health and Health Services Block Grant, and National Bioterrorism Hospital Preparedness Programs are subject to the *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Public Health and EMSA did not evaluate each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward.

Cause

Public Health and EMSA did not develop policies and procedures for evaluating each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward in a timely manner such that it could be implemented during the fiscal year ended June 30, 2016.

Effect

The monitoring performed during the fiscal year ended June 30, 2016, did not ensure that sufficient and effective monitoring occurred for those subrecipients most at risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward.

Questioned Costs

No questioned costs were identified.

Context

Disbursements for the fiscal year ended June 30, 2016 to the Public Health Emergency Preparedness, Immunization Cooperative Agreements, Preventive Health and Health Services Block Grant, and National Bioterrorism Hospital Preparedness Programs subrecipients totaled \$32,224,734, \$25,577,085, \$1,314,294, and \$14,746,156, respectively.

Recommendation

Public Health and EMSA should review all federal statutes, regulations, and the terms and conditions of the federal award and determine whether or not policies and procedures exist and are operating effectively to ensure compliance with all requirements.

Additionally, Public Health and EMSA should develop policies and procedures to evaluate each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward and perform monitoring according to the assessed risk. Further, Public Health and EMSA should retain evidence that the policies and procedures are operating as designed.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

Reference Number:	2016-020

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter I - Office of Management and Budget Government wide Guidance for Grants and Agreements, Part 25 - Universal Identifier and System for Award Management, Subpart B - Policy, §25.200 Requirements for program announcements, regulations, and application instructions (2 CFR 25.200):

- (a) Each agency that awards types of Federal financial assistance included in the definition of “award” in §25.305 must include the requirements described in paragraph (b) of this section in

each program announcement, regulation, or other issuance containing instructions for applicants that either:

- (1) Is issued on or after the effective date of this part; or
 - (2) Has application or plan due dates after October 1, 2010.
- (b) The program announcement, regulation, or other issuance must require each entity that applies and does not have an exemption under §25.110 to:
- (1) Be registered in the System for Award Management (SAM) prior to submitting an application or plan;
 - (2) Maintain an active SAM registration with current information at all times during which it has an active Federal award or an application or plan under consideration by an agency; and
 - (3) Provide its unique entity identifier in each application or plan it submits to the agency.
- (c) For purposes of this policy:
- (1) The applicant is the entity that meets the agency's or program's eligibility criteria and has the legal authority to apply and to receive the award. For example, if a consortium applies for an award to be made to the consortium as the recipient, the consortium must have a unique entity identifier. If a consortium is eligible to receive funding under an agency program but the agency's policy is to make the award to a lead entity for the consortium, the unique entity identifier of the lead entity will be used.
 - (2) A “program announcement” is any paper or electronic issuance that an agency uses to announce a funding opportunity, whether it is called a “program announcement,” “notice of funding availability,” “broad agency announcement,” “research announcement,” “solicitation,” or some other term.
 - (3) To remain registered in the SAM database after the initial registration, the applicant is required to review and update on an annual basis from the date of initial registration or subsequent updates its information in the SAM database to ensure it is current, accurate and complete.

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter I - Office of Management and Budget Government wide Guidance for Grants and Agreements, Part 25 - Universal Identifier and System for Award Management, Subpart B - Policy, §25.205 Effect of noncompliance with a requirement to obtain a unique entity identifier or register in the SAM (2 CFR 25.205):

- (a) An agency may not make an award to an entity until the entity has complied with the requirements described in §25.200 to provide a valid unique entity identifier and maintain an active SAM registration with current information (other than any requirement that is not applicable because the entity is exempted under §25.110).
- (b) At the time an agency is ready to make an award, if the intended recipient has not complied with an applicable requirement to provide a unique entity identifier or maintain an active SAM registration with current information, the agency:
 - (1) May determine that the applicant is not qualified to receive an award; and
 - (2) May use that determination as a basis for making an award to another applicant.

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Subrecipient Monitoring and Management, §200.331 Requirements for pass-through entities (2 CFR 200.331):

All pass-through entities must:

- (a) Ensure that every subaward is clearly identified to the subrecipient as a subaward and includes the following information at the time of the subaward and if any of these data elements change, include the changes in subsequent subaward modification. When some of this information is not available, the pass-through entity must provide the best information available to describe the Federal award and subaward. Required information includes:
 - (1) Federal Award Identification.
 - (i) Subrecipient name (which must match the name associated with its unique entity identifier);
 - (ii) Subrecipient's unique entity identifier;
 - (iii) Federal Award Identification Number (FAIN);
 - (iv) Federal Award Date (see §200.39 Federal award date) of award to the recipient by the Federal agency;
 - (v) Subaward Period of Performance Start and End Date;
 - (vi) Amount of Federal Funds Obligated by this action by the pass-through entity to the subrecipient;
 - (vii) Total Amount of Federal Funds Obligated to the subrecipient by the pass-through entity including the current obligation;
 - (viii) Total Amount of the Federal Award committed to the subrecipient by the pass-through entity;
 - (ix) Federal award project description, as required to be responsive to the Federal Funding Accountability and Transparency Act (FFATA);
 - (x) Name of Federal awarding agency, pass-through entity, and contact information for awarding official of the Pass-through entity;
 - (xi) CFDA Number and Name; the pass-through entity must identify the dollar amount made available under each Federal award and the CFDA number at time of disbursement;
 - (xii) Identification of whether the award is R&D; and
 - (xiii) Indirect cost rate for the Federal award (including if the de minimis rate is charged per §200.414 Indirect (F&A) costs).
 - (2) All requirements imposed by the pass-through entity on the subrecipient so that the Federal award is used in accordance with Federal statutes, regulations and the terms and conditions of the Federal award;
 - (3) Any additional requirements that the pass-through entity imposes on the subrecipient in order for the pass-through entity to meet its own responsibility to the Federal awarding agency including identification of any required financial and performance reports;
 - (4) An approved federally recognized indirect cost rate negotiated between the subrecipient and the Federal Government or, if no such rate exists, either a rate negotiated between the pass-through entity and the subrecipient (in compliance with this part), or a de minimis indirect cost rate as defined in §200.414 Indirect (F&A) costs, paragraph (f);
 - (5) A requirement that the subrecipient permit the pass-through entity and auditors to have access to the subrecipient's records and financial statements as necessary for the pass-through entity to meet the requirements of this part; and
 - (6) Appropriate terms and conditions concerning closeout of the subaward.

Condition

The Immunization Branch of Public Health, the Chronic Disease Control Branch of Public Health, and EMSA did not communicate the universal identifier and system for award management

requirements to applicants in accordance with 2 CFR 25.200. Additionally, the unique entity identifier was not collected prior to awarding funds in accordance with 2 CFR 25.205. Further, the Immunization Branch of Public Health, the Chronic Disease Control Branch of Public Health, and EMSA did not communicate to its subrecipients the required federal award data elements upon making a subaward, including identifying the award as a subaward in accordance with 2 CFR 200.331.

Cause

The Immunization Branch of Public Health, the Chronic Disease Control Branch of Public Health, and EMSA were not aware of these pre-award and post-award requirements for pass-through entities, and had not established a process place to ensure the required information is communicated to subrecipients.

Effect

This may result in awarding funds to entities that have not registered with the SAM and in subrecipients not using and reporting subawards in accordance with federal statutes, regulations, and the terms and conditions of the federal award.

Questioned Costs

No questioned costs were identified.

Context

The identified deficiencies apply to all subrecipient expenditures for fiscal year 2015-16.

For the fiscal year ended June 30, 2016, the Immunization Branch of Public Health passed a total of \$25,577,085 through to subrecipients of Immunization Cooperative Agreements funding.

For the fiscal year ended June 30, 2016, the Chronic Disease Control Branch of Public Health passed a total of \$864,021 through to subrecipients of PHHS Block Grant funding.

For the fiscal year ended June 30, 2016, EMSA passed a total of \$450,273 through to subrecipients of PHHS Block Grant funding.

Recommendation

The Immunization Branch of Public Health, the Chronic Disease Control Branch of Public Health, and EMSA should review all federal statutes, regulations, and the terms and conditions of the federal award and determine whether or not policies and procedures exist and are operating effectively to ensure compliance with all requirements.

The Immunization Branch of Public Health, the Chronic Disease Control Branch of Public Health, and EMSA should develop and implement policies and procedures to ensure the required information is communicated to applicants in accordance with 2 CFR 25.200 and that the unique entity identifier is collected prior to making subawards in accordance with 2 CFR 25.205. Further, the Immunization Branch of Public Health, the Chronic Disease Control Branch of Public Health, and EMSA should obtain and maintain adequate documentation that the unique entity identifier has been obtained.

Additionally, the Immunization Branch of Public Health, the Chronic Disease Control Branch of Public Health, and EMSA should develop and implement policies and procedures, which provide for the timely and proper communication of all applicable subaward information in accordance with 2 CFR 200.331 and maintain records demonstrating that such communications occurred.

Views of Responsible Officials and Corrective Action Plan

Federal Award Numbers and Years:	G1601CACCDF; 2016 G1501CACCDF; 2015 G1401CACCDF; 2014 G1301CACCDF; 2013

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management §200.303 Internal Controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring

Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter I - Office of Management and Budget Government wide Guidance for Grants and Agreements, Part 25 - Universal Identifier and System for Award Management, Subpart B - Policy, §25.200 Requirements for program announcements, regulations, and application instructions (2 CFR 25.200):

- (a) Each agency that awards types of Federal financial assistance included in the definition of “award” in §25.305 must include the requirements described in paragraph (b) of this section in each program announcement, regulation, or other issuance containing instructions for applicants that either:
 - (1) Is issued on or after the effective date of this part; or
 - (2) Has application or plan due dates after October 1, 2010.
- (b) The program announcement, regulation, or other issuance must require each entity that applies and does not have an exemption under §25.110 to:
 - (1) Be registered in the System for Award Management (SAM) prior to submitting an application or plan;
 - (2) Maintain an active SAM registration with current information at all times during which it has an active Federal award or an application or plan under consideration by an agency; and
 - (3) Provide its unique entity identifier in each application or plan it submits to the agency.
- (c) For purposes of this policy:
 - (1) The applicant is the entity that meets the agency's or program's eligibility criteria and has the legal authority to apply and to receive the award. For example, if a consortium applies for an award to be made to the consortium as the recipient, the consortium must have a unique entity identifier. If a consortium is eligible to receive funding under an agency program but the agency's policy is to make the award to a lead entity for the consortium, the unique entity identifier of the lead entity will be used.
 - (2) A “program announcement” is any paper or electronic issuance that an agency uses to announce a funding opportunity, whether it is called a “program announcement,” “notice of funding availability,” “broad agency announcement,” “research announcement,” “solicitation,” or some other term.
 - (3) To remain registered in the SAM database after the initial registration, the applicant is required to review and update on an annual basis from the date of initial registration or subsequent updates its information in the SAM database to ensure it is current, accurate and complete.

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter I - Office of Management and Budget Governmentwide Guidance for Grants and Agreements, Part 25 - Universal Identifier and System for Award Management, Subpart B - Policy, §25.205 Effect of noncompliance with a requirement to obtain a unique entity identifier or register in the SAM (2 CFR 25.205):

- (a) An agency may not make an award to an entity until the entity has complied with the requirements described in §25.200 to provide a valid unique entity identifier and maintain an active SAM registration with current information (other than any requirement that is not applicable because the entity is exempted under §25.110).

- (b) At the time an agency is ready to make an award, if the intended recipient has not complied with an applicable requirement to provide a unique entity identifier or maintain an active SAM registration with current information, the agency:
- (1) May determine that the applicant is not qualified to receive an award; and
 - (2) May use that determination as a basis for making an award to another applicant.

Condition

Education did not communicate the universal identifier and system for award management requirements to subaward applicants in accordance with 2 CFR 25.200. Additionally, Education did not collect the unique entity identifier prior to awarding funds in accordance with 2 CFR 25.205.

Cause

Education does not have a process in place to ensure the required information is communicated and collected, nor was Education aware of this pre-award requirement for pass-through entities.

Effect

Education is at risk for awarding federal funds to entities that have not properly registered with the SAM.

Questioned Costs

No questioned costs were identified.

Context

For the fiscal year ended June 30, 2016, disbursements to subrecipients of the Child Care and Development Block Grant (CFDA #93.575) funding totaled \$220,347,530 and to subrecipients of the Child Care Mandatory and Matching Funds of the Child Care and Development Fund (CFDA #93.596) funding totaled \$267,701,991.

Recommendation

Education should review all federal statutes, regulations, and the terms and conditions of the federal award and determine whether or not policies and procedures exist and are operating effectively to ensure compliance with all requirements.

Education should develop and implement policies and procedures over subawards that ensure the required information is communicated to applicants in accordance with 2 CFR 25.200 and that the unique entity identifier is collected prior to making subawards in accordance with 2 CFR 25.205. Further, Education should obtain and maintain adequate documentation that the unique entity identifier has been obtained.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

Reference Number:	2016-022

Federal Catalog Number:	93.575
Federal Program Title:	Child Care and Development Block Grant
Federal Catalog Number:	93.596
Federal Program Title:	Child Care Mandatory and Matching Funds of the Child Care and Development Fund
Federal Award Numbers and Years:	G1601CACCDF; 2016 G1501CACCDF; 2015 G1401CACCDF; 2014 G1301CACCDF; 2013

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Subrecipient Monitoring and Management, §200.331 Requirements for pass-through entities (2 CFR 200.331):

All pass-through entities must:

- (b) Evaluate each subrecipient’s risk of noncompliance with Federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient monitoring described in paragraphs (d) and (e) of this section, which may include consideration of such factors as:
 - (1) The subrecipient’s prior experience with the same or similar subawards;
 - (2) The results of previous audits including whether or not the subrecipient receives a Single Audit in accordance with Subpart F – Audit Requirements of this part, and the extent to which the same or similar subaward has been audited as a major program;

- (3) Whether the subrecipient has new personnel or new or substantially changed systems; and
- (4) The extent and results of Federal awarding agency monitoring (e.g., if the subrecipient also receives Federal awards directly from a Federal awarding agency).

Condition

The Child Care and Development Block Grant and Child Care Mandatory and Matching Funds of the Child Care and Development Fund are subject to the *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Education did not evaluate each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward.

Cause

Education did not develop policies and procedures for evaluating each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward in a timely manner such that it could be implemented during the fiscal year ended June 30, 2016.

Effect

The monitoring performed during the fiscal year ended June 30, 2016, did not ensure that sufficient and effective monitoring occurred for those subrecipients most at risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward.

Questioned Costs

No questioned costs were identified.

Context

Disbursements for the fiscal year ended June 30, 2016 to subrecipients of the Child Care and Development Block Grant and Child Care Mandatory and Matching Funds of the Child Care and Development Fund totaled \$220,347,530 and \$267,701,991, respectively.

Recommendation

Education should review all federal statutes, regulations, and the terms and conditions of the federal award and determine whether or not policies and procedures exist and are operating effectively to ensure compliance with all requirements.

Additionally, Education should develop and document a formal risk assessment process for evaluating each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward and perform monitoring commensurate with the assessed risk.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

Reference Number:	2016-023
Category of Finding:	Subrecipient Monitoring
Type of Finding:	Significant Deficiency and Instance of Noncompliance

Federal Program Title:	Social Services Block Grant
Federal Catalog Number:	93.667
Federal Award Number and Year:	1501CASOSR; 2015

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements §200.331 Requirements for pass-through entities (2 CFR 200.331):

All pass-through entities must:

- (b) Evaluate each subrecipient’s risk of noncompliance with Federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient

monitoring described in paragraphs (d) and (e) of this section, which may include consideration of such factors as:

- (1) The subrecipient's prior experience with the same or similar subawards;
- (2) The results of previous audits including whether or not the subrecipient receives a Single Audit in accordance with Subpart F – Audit Requirements of this part, and the extent to which the same or similar subaward has been audited as a major program;
- (3) Whether the subrecipient has new personnel or new or substantially changed systems; and
- (4) The extent and results of Federal awarding agency monitoring (e.g., if the subrecipient also receives Federal awards directly from a Federal awarding agency).

Condition

We noted that although Social Services monitors its subrecipients on the basis of using some risk factors, primarily based on reviews of the subrecipients independent single audits, Social Services has not yet developed and documented a formal risk assessment process for its subrecipients by which to determine the frequency and extent of subrecipient monitoring activities to be performed. Some of the risk factors that Social Services currently utilizes related to information contained in the subrecipients independent single audits are (1) whether the subrecipient was designated as a “high risk” auditee pursuant to the Uniform Guidance, (2) existence of questioned costs with findings, and (3) a large number of findings across several of the compliance requirements.

Cause

Social Services did not formally develop policies and procedures for evaluating each subrecipient's risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward in a timely manner such that it could be implemented during the fiscal year ended June 30, 2016.

Effect

In the absence of a formally documented risk assessment process for determining appropriate monitoring procedures, sufficient and effective monitoring may not occur for those subrecipients most at risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward.

Questioned Costs

No questioned costs were identified.

Context

Disbursements to subrecipients for the Foster Care Title IV-E, Adoption Assistance, and Social Services Block Grant programs for the fiscal year ended June 30, 2016 totaled \$1.2 billion, \$465.8 million, and \$297.6 million, respectively.

Recommendation

Social Services should develop and document a formal process for performing risk assessments over its subrecipients in order to determine the frequency and extent of monitoring activities to be performed that is commensurate with the identified risks for each subrecipient.

Views of Responsible Officials and Corrective Action Plan

Management’s response is reported in “Management’s Response and Corrective Action Plan” included in a separate section at the end of this report.

Reference Number:	2016-024

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A – Office of Management and Budget Guidance for Grants and Agreements, Chapter II – Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Subrecipient Monitoring and Management, §200.331 Requirements for pass-through entities (2 CFR 200.331):

All pass-through entities must:

- (d) Monitor the activities of the subrecipient as necessary to ensure that the subaward is used for authorized purposes, in compliance with Federal statutes, regulations, and the terms and conditions of the subaward; and that subaward performance goals are achieved.

Welfare and Institutions Code - WIC, Division 9. Public Social Services, Part 3. Aid and Medical Assistance, Chapter 8.9. Transition of Community-Based Medi-Cal Mental Health, §14705:

- (c) With regard to county operated facilities, clinics, or programs for which claims are submitted to the department for Medi-Cal reimbursement for specialty mental health services to Medi-Cal eligible individuals, the county shall ensure that all requirements necessary for Medi-Cal reimbursement for these services are complied with, including, but not limited to, utilization review and the submission of year end cost reports by December 31 following the close of the fiscal year.

Welfare and Institutions Code - WIC, Division 9. Public Social Services, Part 3. Aid and Medical Assistance, Chapter 8.9. Transition of Community-Based Medi-Cal Mental Health, §14712:

- (e) Whenever the department determines that a mental health plan has failed to comply with this chapter or any regulations, contractual requirements, state plan, or waivers adopted pursuant to this chapter, the department shall notify the mental health plan in writing within 30 days of its determination and may impose sanctions, including, but not limited to, fines, penalties, the withholding of payments, special requirements, probationary or corrective actions, or any other actions deemed necessary to promptly ensure contract and performance compliance.

Condition

Nine of 56 subrecipients of Short-Doyle funding were tested and two did not submit their cost reports timely. One of these two subrecipients had not submitted its cost reports for fiscal years 2013-14 and 2014-15 and the other subrecipient had not submitted its cost reports for fiscal year 2014-15.

The Mental Health Division of Health Care Services did not take the required action of notifying the two subrecipients in writing within 30 days of the noncompliance. It was only through our audit requests that the Mental Health Division detected that these two subrecipients had not submitted the required cost reports. Additionally, it was observed that even when cost reports are submitted timely, the Mental Health Division will often not review them for up to two years after submission.

The cost reports are the basis for the allocation of payments made to subrecipients providing mental health services to eligible beneficiaries and serve to provide the Mental Health Division with fiscal oversight for subrecipient monitoring purposes. The Welfare and Institutions Code states that the cost report is due by December 31 following the close of the fiscal year. The Mental Health Division updates the cost report template annually prior to its release to subrecipients for use in reporting.

The fiscal year 2013-14 cost reports were due on December 31, 2014. However, the template was not finalized and approved for subrecipient use until May 2015 with an extended due date of October 2015. Therefore, the Mental Health Division should have issued a written notice of

noncompliance for late reports by November 30, 2015. The fiscal year 2014-15 cost reports were due on December 31, 2015. The Mental Health Division should have issued a written notice of noncompliance for late reports by January 31, 2016.

Cause

The Mental Health Division did not perform the required follow-up action for late cost reports because they are not tracking cost report submission.

Effect

Delays in releasing the cost report template and delays in reviewing the submitted cost reports do not comply with the objective of timely and effective subrecipient monitoring. Inaccurate or untimely cost reports could result in under/over funding each subrecipient and increases the risk of statewide noncompliance with award requirements.

Questioned Costs

No questioned costs were identified.

Context

For the fiscal year ended June 30, 2016, disbursements of Short-Doyle funding from the Medical Assistance Program to the two noncompliant subrecipients totaled \$600,686,955, the nine tested subrecipients totaled \$735,001,087, and all 56 subrecipients totaled \$1,786,580,218. For the fiscal year ended June 30, 2016, disbursements of Short-Doyle funding from the Children's Health Insurance Program to the two noncompliant subrecipients totaled \$42,255,184, the nine tested subrecipients totaled \$52,506,388, and all 56 subrecipients totaled \$125,758,201. The sample was not a statistical sample.

Recommendation

The Mental Health Division should develop and follow policies and procedures to track the submission of the annual cost reports. These policies and procedures should include a component to comply with the required follow-up actions for late cost reports. Additionally, the Mental Health Division should strengthen and follow policies and procedures for reviewing the cost reports in order to accomplish the objective of timely and effective subrecipient monitoring. Further, the Mental Health Division should retain evidence that their policies and procedures are operating as designed.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

Reference Number:	2016-025
Category of Finding:	Subrecipient Monitoring
Type of Finding:	Material Weakness and Material Instance of Noncompliance
State Administering Department:	California Department of Health Care Services (Health Care Services)
Federal Catalog Number:	93.767
Federal Program Title:	Children’s Health Insurance Program
Federal Award Numbers and Years:	05-1605CA5021; 2016 05-1505CA1081; 2015
Federal Catalog Number:	93.778
Federal Program Title:	Medical Assistance Program
Federal Award Numbers and Years:	05-1605CA5ADM; 2016 05-1605CA5MAP; 2016

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A – Office of Management and Budget Guidance for Grants and Agreements, Chapter II – Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Subrecipient Monitoring and Management, §200.330 Subrecipient and contractor determinations (2 CFR 200.330):

The non-Federal entity may concurrently receive Federal awards as a recipient, a subrecipient, and a contractor, depending on the substance of its agreements with Federal awarding agencies and pass-through entities. Therefore, a pass-through entity must make case-by-case determinations whether each agreement it makes for the disbursement of Federal program funds casts the party receiving the funds in the role of a subrecipient or a contractor. The Federal awarding agency may supply and require recipients to comply with additional guidance to support these determinations provided such guidance does not conflict with this section.

Condition

Health Care Services could not provide evidence that the required subrecipient versus contractor determinations were performed for the Children's Health Insurance Program and Medical Assistance Program.

Cause

Health Care Services does not have policies and procedures in place to perform and document the required determinations.

Effect

Subawards are made using a standard contract agreement. The language in the agreement does not clearly indicate whether it casts the receiving entity as a subrecipient or as a vendor. Given that there is similar language used throughout the agreements with local agencies, there is not a clear definition, nor is there an established and documented assessment of subrecipient versus vendor that clearly defines the nature of the party receiving the federal funds as a contractor or a subrecipient. This ambiguity in the nature of the funding that is being passed through to third parties, including whether it casts the receiving entity as a subrecipient or a vendor, limits the pass-through entity's ability to properly monitor the activities of the receiving entity to ensure that subrecipients are in compliance with federal administrative requirements. Further, it does not provide sufficient information for the recipient to properly record and report the activity as either a subaward of federal awards or as a vendor. Additionally, extraordinary time and effort was needed by Health Care Services to determine and support the amount to be reported as disbursements to subrecipients in the schedule of expenditures of federal awards.

Questioned Costs

No questioned costs were identified.

Context

For the fiscal year ended June 30, 2016, amounts disbursed to subrecipients of the Medical Assistance Program totaled \$3,562,495,312 and to subrecipients of the Children's Health Insurance Program totaled \$139,281,229.

Recommendation

Health Care Services should develop and follow policies and procedures to perform and document the required subrecipient and contractor determinations as well as revise standard contract language to clearly indicate whether it casts the receiving entity as a subrecipient or a vendor.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

Reference Number: 2016-026
 Category of Finding: Subrecipient Monitoring
 Type of Finding: Material Weakness and Material Instance of Noncompliance

State Administering Department: California Department of Health Care Services (Health Care Services)

 Federal Program Title: Medical Assistance Program
 Federal Award Numbers and Years: 05-1605CA5ADM; 2016
 05-1605CA5MAP; 2016

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Subrecipient Monitoring and Management, §200.331 Requirements for pass-through entities (2 CFR 200.331):

All pass-through entities must:

- (b) Evaluate each subrecipient’s risk of noncompliance with Federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient monitoring described in paragraphs (d) and (e) of this section, which may include consideration of such factors as:
 - (1) The subrecipient’s prior experience with the same or similar subawards;

- (2) The results of previous audits including whether or not the subrecipient receives a Single Audit in accordance with Subpart F – Audit Requirements of this part, and the extent to which the same or similar subaward has been audited as a major program;
- (3) Whether the subrecipient has new personnel or new or substantially changed systems; and
- (4) The extent and results of Federal awarding agency monitoring (e.g., if the subrecipient also receives Federal awards directly from a Federal awarding agency).

Condition

The Children’s Health Insurance Program and Medical Assistance Program are subject to the *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Health Care Services did not evaluate each subrecipient’s risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward.

Cause

Health Care Services did not develop policies and procedures for evaluating each subrecipient’s risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward in a timely manner over the Children’s Health Insurance Program and the Medical Assistance Program such that they could be implemented during the fiscal year ended June 30, 2016.

Effect

The monitoring performed during the fiscal year ended June 30, 2016, did not ensure that sufficient and effective monitoring occurred for those subrecipients most at risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward.

Questioned Costs

No questioned costs were identified.

Context

Disbursements for the fiscal year ended June 30, 2016 to the Children’s Health Insurance Program and the Medical Assistance Program subrecipients totaled \$139,281,229 and \$3,562,495,312, respectively.

Recommendation

Health Care Services should review all federal statutes, regulations, and the terms and conditions of the federal award and determine whether or not policies and procedures exist and are operating effectively to ensure compliance with all requirements.

Additionally, Health Care Services should develop policies and procedures to evaluate each subrecipient’s risk of noncompliance with federal statutes, regulations, and the terms and conditions of the subaward and perform monitoring according to the assessed risk. Further, Health Care Services should retain evidence that the policies and procedures are operating as designed.

Views of Responsible Officials and Corrective Action Plan

Management’s response is reported in “Management’s Response and Corrective Action Plan” included in a separate section at the end of this report.

Reference Number: 2016-027

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter I - Office of Management and Budget Governmentwide Guidance for Grants and Agreements, Part 25 - Universal Identifier and System for Award Management, Subpart B - Policy, §25.200 Requirements for program announcements, regulations, and application instructions (2 CFR 25.200):

- (a) Each agency that awards types of Federal financial assistance included in the definition of “award” in §25.305 must include the requirements described in paragraph (b) of this section in each program announcement, regulation, or other issuance containing instructions for applicants that either:
 - (1) Is issued on or after the effective date of this part; or
 - (2) Has application or plan due dates after October 1, 2010.
- (b) The program announcement, regulation, or other issuance must require each entity that applies and does not have an exemption under §25.110 to:

- (1) Be registered in the System for Award Management (SAM) prior to submitting an application or plan;
 - (2) Maintain an active SAM registration with current information at all times during which it has an active Federal award or an application or plan under consideration by an agency; and
 - (3) Provide its unique entity identifier in each application or plan it submits to the agency.
- (c) For purposes of this policy:
- (1) The applicant is the entity that meets the agency's or program's eligibility criteria and has the legal authority to apply and to receive the award. For example, if a consortium applies for an award to be made to the consortium as the recipient, the consortium must have a unique entity identifier. If a consortium is eligible to receive funding under an agency program but the agency's policy is to make the award to a lead entity for the consortium, the unique entity identifier of the lead entity will be used.
 - (2) A "program announcement" is any paper or electronic issuance that an agency uses to announce a funding opportunity, whether it is called a "program announcement," "notice of funding availability," "broad agency announcement," "research announcement," "solicitation," or some other term.
 - (3) To remain registered in the SAM database after the initial registration, the applicant is required to review and update on an annual basis from the date of initial registration or subsequent updates its information in the SAM database to ensure it is current, accurate and complete.

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter I - Office of Management and Budget Governmentwide Guidance for Grants and Agreements, Part 25 - Universal Identifier and System for Award Management, Subpart B - Policy, §25.205 Effect of noncompliance with a requirement to obtain a unique entity identifier or register in the SAM (2 CFR 25.205):

- (a) An agency may not make an award to an entity until the entity has complied with the requirements described in §25.200 to provide a valid unique entity identifier and maintain an active SAM registration with current information (other than any requirement that is not applicable because the entity is exempted under §25.110).
- (b) At the time an agency is ready to make an award, if the intended recipient has not complied with an applicable requirement to provide a unique entity identifier or maintain an active SAM registration with current information, the agency:
 - (1) May determine that the applicant is not qualified to receive an award; and
 - (2) May use that determination as a basis for making an award to another applicant.

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Subrecipient Monitoring and Management, §200.331 Requirements for pass-through entities (2 CFR 200.331):

All pass-through entities must:

- (a) Ensure that every subaward is clearly identified to the subrecipient as a subaward and includes the following information at the time of the subaward and if any of these data elements change, include the changes in subsequent subaward modification. When some of this information is

not available, the pass-through entity must provide the best information available to describe the Federal award and subaward. Required information includes:

(1) Federal Award Identification.

- (i) Subrecipient name (which must match the name associated with its unique entity identifier);
- (ii) Subrecipient's unique entity identifier;
- (iii) Federal Award Identification Number (FAIN);
- (iv) Federal Award Date (see §200.39 Federal award date) of award to the recipient by the Federal agency;
- (v) Subaward Period of Performance Start and End Date;
- (vi) Amount of Federal Funds Obligated by this action by the pass-through entity to the subrecipient;
- (vii) Total Amount of Federal Funds Obligated to the subrecipient by the pass-through entity including the current obligation;
- (viii) Total Amount of the Federal Award committed to the subrecipient by the pass-through entity;
- (ix) Federal award project description, as required to be responsive to the Federal Funding Accountability and Transparency Act (FFATA);
- (x) Name of Federal awarding agency, pass-through entity, and contact information for awarding official of the Pass-through entity;
- (xi) CFDA Number and Name; the pass-through entity must identify the dollar amount made available under each Federal award and the CFDA number at time of disbursement;
- (xii) Identification of whether the award is R&D; and
- (xiii) Indirect cost rate for the Federal award (including if the de minimis rate is charged per §200.414 Indirect (F&A) costs).

- (2) All requirements imposed by the pass-through entity on the subrecipient so that the Federal award is used in accordance with Federal statutes, regulations and the terms and conditions of the Federal award;
- (3) Any additional requirements that the pass-through entity imposes on the subrecipient in order for the pass-through entity to meet its own responsibility to the Federal awarding agency including identification of any required financial and performance reports;
- (4) An approved federally recognized indirect cost rate negotiated between the subrecipient and the Federal Government or, if no such rate exists, either a rate negotiated between the pass-through entity and the subrecipient (in compliance with this part), or a de minimis indirect cost rate as defined in §200.414 Indirect (F&A) costs, paragraph (f);
- (5) A requirement that the subrecipient permit the pass-through entity and auditors to have access to the subrecipient's records and financial statements as necessary for the pass-through entity to meet the requirements of this part; and
- (6) Appropriate terms and conditions concerning closeout of the subaward.

Condition

The Mental Health Division of Health Care Services did not communicate the universal identifier and system for award management requirements to applicants of Short-Doyle funding in accordance with 2 CFR 25.200. Additionally, the Mental Health Division did not collect the unique entity identifier prior to awarding funds in accordance with 2 CFR 25.205. Further, the Mental Health Division did not communicate to its subrecipients the required federal award data

elements upon making a subaward, including identifying the award as a subaward in accordance with 2 CFR 200.331.

Cause

The Mental Health Division does not have a process in place to ensure the required information is communicated to subrecipients, nor was the Mental Health Division aware of these pre-award and post-award requirements for pass-through entities.

Effect

This may result in awarding Short-Doyle funds to entities that have not registered with the SAM and in subrecipients not using and reporting subawards in accordance with federal statutes, regulations, and the terms and conditions of the federal award.

Questioned Costs

Questioned costs could not be determined.

Context

For the fiscal year ended June 30, 2016, payments to subrecipients of Short-Doyle funding under the Children's Health Insurance Program totaled \$125,758,201 and for the Medical Assistance Program totaled \$1,786,580,218.

Recommendation

The Mental Health Division should review all federal statutes, regulations, and the terms and conditions of the federal award and determine whether or not policies and procedures exist and are operating effectively to ensure compliance with all requirements.

The Mental Health Division should develop and implement policies and procedures over Short-Doyle funding that ensure the required information is communicated to applicants in accordance with 2 CFR 25.200 and that the unique entity identifier is collected prior to making subawards in accordance with 2 CFR 25.205. Further, the Mental Health Division should obtain and maintain adequate documentation that the unique entity identifier has been obtained.

Additionally, the Mental Health Division should develop and implement policies and procedures, which provide for the timely and proper communication of all applicable subaward information in accordance with 2 CFR 200.331 and maintain records demonstrating that such communications occurred.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

Reference Number: 2016-028
Category of Finding: Reporting
Type of Finding: Significant Deficiency and Instance of Noncompliance

State Administering Department: California Department of Public Health (Public Health)
Federal Catalog Number: 93.069
Federal Program Title: Public Health Emergency Preparedness
Federal Award Number and Year: 5U90TP000506-04; 2015

Federal Catalog Number: 93.889
Federal Program Title: National Bioterrorism Hospital Preparedness Program
Federal Award Number and Year: 5U90TP000506-04; 2015

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management §200.302 Financial management (2 CFR 200.302):

- (2) Accurate, current, and complete disclosure of the financial results of each Federal award or program in accordance with the reporting requirements set forth in §200.327 Financial reporting and §200.328 monitoring and reporting program performance.

Condition

The Emergency Preparedness Office (EPO) of Public Health combined the federal expenditures for the Public Health Emergency Preparedness and the National Bioterrorism Hospital Preparedness Program and reported the amount as a single award in the Federal Financial Report

(FFR). Instructions for the FFR clearly state that reporting multiple awards on the same FFR requires additional forms in order to properly identify the awards.

Cause

The Centers for Disease Control and Prevention (CDC) as the granting agency combines the communication for these federal awards, which has created confusion in proper reporting by individual federal catalog numbers. The award letter states that audits should report the activity under the two separate federal catalog numbers, but for all other referencing, the activity is referred to by the single federal catalog number.

Effect

Improper reporting does not allow the granting agency the ability to monitor the required reporting data elements, such as federal expenditures, recipient share of expenditures, and unobligated balance for each individual grant.

Questioned Costs

Questioned costs were not identified.

Context

EPO is required to submit the Federal Financial Report on an annual basis.

Recommendation

The Emergency Preparedness Office should review the report filing instructions and revise policies and procedures in order to ensure that reporting is complete and accurate. Additionally, EPO should submit corrected reports to the granting agency.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

Reference Number: 2016-029
Category of Finding: Special Test and Provisions - Provider Health and Safety Standards
Type of Finding: Significant Deficiency and Instance of Noncompliance
State Administering Department: California Department of Public Health (Public Health)
Federal Catalog Number: 93.777
Federal Program Title: State Survey and Certification of Health Care Providers and Suppliers (Title XVIII) Medicare
Federal Award Number and Year: 05-1505-CA-5000; 2015

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards For Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 42 - Public Health, Chapter IV - Centers for Medicare & Medicaid Services, Department of Health and Human Services (Continued), Subchapter C - Medical Assistance Programs, Part 442 - Standards for Payment to Nursing Facilities and Intermediate Care Facilities for Individuals with Intellectual Disabilities, Subpart C – Certification of ICFs/IID, §442.109 Certification period for ICF/IIDs: General provisions (42 CFR 442.109):

- (a) A survey agency may certify a facility that fully meets applicable requirements. The State Survey Agency must conduct a survey of each ICF/IID not later than 15 months after the last day of the previous survey.
- (b) The statewide average interval between surveys must be 12 months or less, computed in accordance with paragraph (c) of this section.
- (c) The statewide average interval is computed at the end of each Federal fiscal year by comparing the last day of the most recent survey for each participating facility to the last day of each facility's previous survey.

U.S. Department of Health and Human Services (HHS) Centers for Medicare and Medicaid Services (CMS), Survey and Certification Group, Quality Assurance for the Medicare & Medicaid Programs, FY2015 Mission and Priority Document (MPD):

D. Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICF/IID). States have a statutory obligation to conduct annual surveys of ICFs/IID. These facilities must be surveyed, on average, every 12.9 months with a maximum 15.9 month survey interval (please see S&C: 12-29-ALL).

Condition

For one of 40 ICFs/IID providers tested, the annual survey was not performed in accordance with the required interval. The sample was not a statistical sample.

Cause

This condition was a result of Public Health's Center for Health Care Quality (the Center) not having sufficient resources.

Effect

CMS tracks each participating state's outcomes based on the state's submission into a tracking database. If a state has not met the target number of certifications, the state's subsequent year's allocation is adjusted (reduced) to compensate for those certifications not performed. As a result of CMS' review of outcomes in California, the State of California's subsequent grant award was reduced by \$316,800.

Questioned Costs

No questioned costs were identified.

Context

Expenditures of State Survey and Certification of Health Care Providers and Suppliers (Title XVIII) Medicare funds for the fiscal year ended June 30, 2016, totaled \$44,586,801.

Recommendation

The Center should evaluate and improve monitoring and tracking of mandatory workload to ensure that certification surveys are performed timely. Then, if necessary, evaluate existing resources and reallocate or seek to obtain additional resources in order to improve the administration of federal awards to ensure compliance with federal statutes, regulations, and the terms and conditions.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

Federal Program Title:	Medical Assistance Program
Federal Award Numbers and Years:	05-1605CA5ADM; 2016 05-1605CA5MAP; 2016

Criteria

Title 2 - Grants and Agreements, Subtitle A - Office of Management and Budget Guidance for Grants and Agreements, Chapter II - Office of Management and Budget Guidance, Part 200 - Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, Subpart D - Post Federal Award Requirements, Standards for Financial and Program Management, §200.303 Internal controls (2 CFR 200.303):

The non-Federal entity must:

- (a) Establish and maintain effective internal control over the Federal award that provides reasonable assurance that the non-Federal entity is managing the Federal award in compliance with Federal statutes, regulations, and the terms and conditions of the Federal award. These internal controls should be in compliance with guidance in “Standards for Internal Control in the Federal Government” issued by the Comptroller General of the United States or the “Internal Control Integrated Framework,” issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Title 45 - Public Welfare, Subtitle A - Department of Health and Human Services, Subchapter A - General Administration, Part 95 - General Administration - Grant Programs (Public Assistance, Medical Assistance and State Children’s Health Insurance Programs), Subpart F - Automatic Data Processing Equipment and Services - Conditions for Federal Financial Participation (FFP), Specific Conditions for FFP, §95.621 ADP reviews (45 CFR 95.621):

The Department will conduct periodic onsite surveys and reviews of State and local agency ADP methods and practices to determine the adequacy of such methods and practices and to assure that ADP equipment and services are utilized for the purposes consistent with proper and efficient administration under the Act. Where practical, the Department will develop a mutually acceptable schedule between the Department and State or local agencies prior to conducting such surveys or reviews, which may include but are not limited to:

- (f) ADP System Security Requirements and Review Process:
 - (3) ADP System Security Reviews. State agencies shall review the ADP system security of installations involved in the administration of HHS programs on a biennial basis. At a minimum, the reviews shall include an evaluation of physical and data security operating procedures, and personnel practices.

Condition

The California Medicaid Management Information System (CAMMIS) Division of Health Care Services is responsible for appropriate, cost effective safeguards over the information systems used in the administration of the Medical Assistance Program (California Medicaid Management Information System or CA-MMIS). The CAMMIS Division uses a service organization/fiscal intermediary (Xerox Business Services division of Xerox spun off into wholly separate corporation, Conduent, in January 2017) to perform many fiscal components of the administration of the program. The CAMMIS Division obtained a Statement on Standards for Attestation Engagements (AT) Section 801, Reporting on Controls at a Service Organization (SOC 1 type 2) report for the period July 1, 2015 to June 30, 2016 from Conduent on the Suitability of the Design and Operating Effectiveness of Controls. There were a number of exceptions in that report, three of which were significant enough to warrant a modified opinion on controls.

Cause

The three significant exceptions were that Xerox did not have (1) adequate controls that restrict access to promote changes to the production environment to authorized personnel, (2) an adequate process to terminate employees' access to the network and applications upon notification, and (3) adequate controls that restrict access to Automatic Transaction Generators (ATGs) to authorized personnel, nor an adequate process to approve ATGs prior to implementation.

Effect

As a result, there is an increased risk of unauthorized access to CA-MMIS creating a risk that unauthorized modifications could be made to the production environment and/or the information within it. Based on these results, no reliance was placed on the ADP Risk Analysis and System Security Reviews for testing compliance with Activities Allowed or Unallowed, Allowable Costs/Cost Principles, and Eligibility for Individuals.

Questioned Costs

No questioned costs were identified.

Context

For the fiscal year ended June 30, 2016, total fee-for-service federal expenditures processed by Xerox operations totaled \$24,126,186,171.

Recommendation

The CAMMIS Division should ensure that the corrective actions noted in the SOC 1 type 2 report are implemented by Conduent in a timely manner.

Views of Responsible Officials and Corrective Action Plan

Management's response is reported in "Management's Response and Corrective Action Plan" included in a separate section at the end of this report.

Notes to the Schedule of Expenditures of Federal Awards

STATE OF CALIFORNIA
NOTES TO THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS
FISCAL YEAR ENDED JUNE 30, 2016

1. GENERAL

The accompanying Schedule of Expenditures of Federal Awards (Schedule) presents the expenditures for all federal award programs received by the State of California (State) for the fiscal year ended June 30, 2016, except for federal awards received by the University of California system, a component unit of the State, the California State University system, the California State Water Resources Control Board Water Pollution Control Revolving Fund, the California State Water Resources Control Board Safe Drinking Water Pollution Control State Revolving Fund, and the California Housing Finance Agency, a component unit of the State. These entities engaged other auditors to perform an audit in accordance with the U.S. Office of Management and Budget, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Code of Federal Regulations, Title 2, Subtitle A, Chapter II, Part 200) also referred to as the “Uniform Guidance”.

2. BASIS OF ACCOUNTING

The federal award expenditures reported in the Schedule are prepared from records maintained by each State department for federal funds and reported on the cash basis. All expenditures for each program are net of applicable program income and refunds.

State departments’ records are periodically reconciled to State Controller Office’s records for federal receipts and department expenditure reports. Negative amounts shown on the Schedule represent adjustments or credits made in the normal course of business to amounts reported as expenditures in prior years.

3. NONCASH FEDERAL AWARDS

The State is the recipient of federal award programs that do not result in cash receipts or disbursements. These noncash federal awards include a variety of items, such as commodities, vaccines, or federal excess property. Noncash awards received by the State are included in the Schedule and are italicized. Noncash awards for fiscal year ended June 30, 2016 are as follows:

Federal Catalog Number	Federal Program Title	Noncash Awards for the Fiscal Year Ended June 30, 2016
10.555	National School Lunch Program	\$ 170,612,102
10.565	Commodity Supplemental Food Program	18,425,507
10.569	Emergency Food Assistance Program (Food Commodities)	75,827,269
15.543	Lake Tahoe Regional Wetlands Development	105,000
39.003	Donation of Federal Surplus Personal Property	8,145,716
93.268	Immunization Cooperative Agreements	441,795,672
<u>Total</u>		<u>\$ 714,911,266</u>

4. LOANS, LOAN GUARANTEES OUTSTANDING AND INSURANCE IN EFFECT

Loans and loan guarantees outstanding, and insurance in effect at June 30, 2016 are included in the Schedule and are summarized below:

Federal Catalog Number	Federal Program Title	Loans/Loan Guarantees Outstanding for the Fiscal Year ended June 30, 2016	Insurance In Effect at June 30, 2016
14.228	Community Development Block Grants/State's Program and Non-Entitlement Grants in Hawaii	\$ 41,578,919	\$ -
14.239	Home Investment Partnerships Program	166,796,410	-
64.114	Veterans Housing Guaranteed and Insured Loans	-	104,555,423
66.818	Brownfields Assessment and Cleanup Cooperative Agreements	850,000	-
81.041	State Energy Program	1,516,393	-
<u>Total</u>		<u>\$ 210,741,722</u>	<u>\$ 104,555,423</u>

5. PASS-THROUGH

Federal awards received by the State from a pass-through entity are included in the Schedule and are italicized.

6. SUBRECIPIENTS

Amounts provided to subrecipients from each federal program are included in a separate column on the Schedule.

7. RELATIONSHIP TO FEDERAL FINANCIAL REPORTS

The regulations and guidelines governing the preparation of federal financial reports vary by federal agency and among programs. Accordingly, the amounts reported in the federal financial reports do not necessarily agree with the amounts reported in the accompanying Schedule, which is prepared on the cash basis.

8. DE MINIMIS COST RATE

The majority of State entities claim indirect costs in accordance with a federally approved indirect cost rate plan. The de minimis election for State entities that claim indirect costs, but do not have a federally negotiated indirect cost rate are as follows:

State Entities Without Federally Negotiated Indirect Cost Rate	De Minimis Cost Rate Elected?
Department of Community Services and Development	Yes
Emergency Medical Services Authority	No
Arts Council	No
Board of Governors of Community Colleges	No
California Exposition and State Fair	No
California Victim Compensation Board	No
California Coastal Commission	No
Department of Child Support Services	No
Office of Planning and Research	No
Public Utilities Commission State Library	No

**Summary Schedule of Prior Audit Findings
Prepared by Department of Finance**

Reference Number: **2015-001**

Federal Catalog
Number: 10.557

State
Administering
Department: California Department of Public Health (Public Health)

Audit Finding: Eligibility. Local agencies are responsible for eligibility determination for participants in the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC) program using the state-owned Integrated Statewide Information System (ISIS). We tested 60 beneficiaries and found 4 instances in which at least one type of required eligibility information was not obtained or evidenced in ISIS at the time of application.

Status of Corrective
Action: Fully Corrected. A Management Information System report was developed in March 2016. The report is run by Public Health and lists, by local agency, the 'certification holds' placed on participants' accounts. On June 8, 2016, a webinar was held for WIC local agencies to explain how the 'certification holds' report should be used within the clinic to monitor holds and documentation requirements. Another webinar took place in December 2016 to reiterate the policy and procedures regarding 'certification holds'. The webinars will continue as part of ongoing training to WIC local agencies on a semi-annual basis.

Reference Number: **2015-002**

Federal Catalog
Number: 20.319

State
Administering
Department: California Department of Transportation (Caltrans)

Audit Finding: Special Tests and Provisions – Wage Rate Requirement. In fiscal year 2013-14, the predecessor auditor reported that Caltrans did not have procedures in place to comply with federal wage rate requirements because it did not obtain certified weekly payrolls from contractors for the High-Speed Rail Corridors and Intercity Passenger Rail Services – Capital Assistance Grants program. In fiscal year 2014-15, Caltrans had not yet implemented procedures to obtain the weekly certified payrolls.

Status of Corrective Action: Fully Corrected. The grants in question were with a vendor and a local agency. There have been efforts to collect certified payroll reports that remain in question. Letters have been sent to contractors for the closed contracts containing the appropriate Davis-Bacon clause. While no violation occurred during the contract period, the vendor has not responded. Caltrans will monitor local agencies as subrecipients in order to verify agencies are properly collecting certified payroll reports from its contractors. It is the responsibility of each local agency to review the weekly certified payroll reports to determine whether the reports are in compliance with the Davis-Bacon Act as identified in the Caltrans Local Assistance Procedures Manual.

Reference Number: **2015-003**

Federal Catalog Number: 20.513
 20.516
 20.521

State Administering Department: California Department of Transportation (Caltrans)

Audit Finding: Subrecipient Monitoring. During fiscal year 2013-14, the predecessor auditor reported that Caltrans does not have adequate controls in place to ensure that all equipment is inspected within the required time frame for the Transit Services Cluster. Caltrans is currently in the process of implementing controls to ensure that all equipment with its subrecipients is inspected through monitoring on a three-year cycle for the Transit Services Cluster. Eight subrecipients were selected for testing and we noted that for two of the subrecipients, Caltrans was unable to provide supporting equipment inspection reports to indicate that the equipment was properly monitored under the three-year inspection cycle.

Status of Corrective Action: Partially Corrected. Monitoring compliance is achieved through the inspection of one-third of all required vehicles on a yearly basis ensuring 100 percent of all vehicles are inspected within three years. Staff travel throughout the state to review vehicles and inspection reports are physically retained at the Sacramento headquarters location. To enhance monitoring, Caltrans is in the process of implementing an electronic grants management system (system). This system will enable Caltrans to run reports in real time to determine if all agencies and equipment have been monitored according to our three-year monitoring cycle. When district and headquarters staff perform equipment monitoring inspections, the inspection date will be entered, and a scanned copy of the inspection form will be uploaded into the system. The system will automatically notify managers of the three-year monitoring due dates. If the field manager finds equipment in the system that appears due for inspecting, they can

take the necessary corrective action. Caltrans will train staff on the new system, and anticipate full implementation by December 31, 2017.

Reference Number: **2015-004**

Federal Catalog Number: 84.365

State Administering Department: California Department of Education (Education)

Audit Finding: Activities Allowed or Unallowed; Allowable Costs/Cost Principles. Education could not provide evidence of an approved local plan for three of 25 subrecipients tested. Education awarded and disbursed funds to subrecipients without first ensuring that the federal compliance requirements were understood and that the subrecipient programs utilizing those funds were in compliance with those requirements. Due to department turnover, Education has not had, since 2009, a process in place to ensure that subrecipients have an approved plan in place prior to awarding funds.

Status of Corrective Action: Fully Corrected. In 2015, Education re-established the processes and procedures for reviewing plans of subrecipient programs to ensure each subrecipient understands and is in compliance with the federal requirements, prior to the awarding of any funds. Full implementation of these processes and procedures commenced with the 2015-16 grant awards.

Reference Number: **2015-005**

Federal Catalog Number: 93.568

State Administering Department: California Department of Community Services and Development (CSD)

Audit Finding: Earmarking. Because CSD's process for evaluating and monitoring compliance was established to ensure it does not exceed the required percentages over the life of the grant award, we were unable to test and determine CSD's compliance with the aforementioned earmarking compliance requirement on a federal fiscal year basis. Our understanding is that CSD misinterpreted the earmarking regulations, and as such, designed and implemented both processes and controls related to the

planning and administration and weatherization earmarking compliance requirement based upon the life of the grant award, as opposed to on a federal fiscal year basis.

Status of Corrective Action: Fully Corrected. CSD is not in agreement with this Finding. CSD has had several conference calls with the U.S. Department of Health and Human Services (HHS) on this finding. During these calls, CSD has received confirmation that its interpretation is correct and that no changes are needed to its internal controls. CSD has memorialized their understanding that it is acceptable to apply the earmarking requirement based on the life of the grant award in a letter dated September 9, 2016 to HHS.

Reference Number: **2015-006**

Federal Catalog Number: 93.568

State Administering Department: California Department of Community Services and Development (CSD)

Audit Finding: Period of Performance. CSD misinterpreted the period of performance compliance requirement and understood the obligation period to be five federal fiscal years. However, CSD must obligate the funds within the first two federal fiscal years but then has five federal fiscal years in which to expend and liquidate the federal funds awarded under the grant awards. CSD is not in compliance with the required period of performance pursuant to the “Terms and Conditions Addendum: Additional Financial Requirements” and Section 8626 of Title 42 of the U.S. Code. For fiscal year 2014-15, CSD obligated \$29,279,877 and \$13,610,556 in federal funds related to the 2012 and 2013 grant award year, respectively, which fell outside the period of performance.

Status of Corrective Action: Partially Corrected. CSD has adjusted its procedures to correct for this requirement beginning with Program Year 2016. Unexpended funds are no longer recaptured from prior grants and reallocated. Rather, contracts will be extended where funds are still available to maximize federal funding. In addition, any funds (i.e., returned utility payments, proceeds from litigation, etc.) that are returned to CSD after the period of performance are then forwarded to the U.S. Department of Health and Human Services (HHS). HHS has indicated that it is acceptable to remedy this going forward and has not requested that the questioned costs be returned. CSD memorialized this understanding in a letter to HHS dated September 9, 2016.

Reference Number: **2015-007**

Federal Catalog
Number: 93.917

State
Administering
Department: California Department of Public Health (Public Health)

Audit Finding: Subrecipient Monitoring. During our review of subrecipient monitoring, we noted that for two of the nine subrecipients selected for testing, Public Health did not ensure that subrecipients completed required OMB Circular A-133 audits (single audits) within nine months of the end of the subrecipient's audit period. Public Health did not follow up with the two subrecipients until August 17, 2015, 14 months after the end of the subrecipients' audit period. Consequently, there may be a delay in monitoring the compliance of subrecipient activities and issuing any corrective action with respect to audit findings, if applicable. Public Health also monitors subrecipients' use of federal awards by performing site visits. The monitoring performed is documented by program advisors in Public Health's site visit monitoring reports. While the site visit monitoring reports are subject to review and approval by a section manager, such review and approval is not documented in all nine subrecipients selected for testing.

Status of Corrective
Action: Fully Corrected. Public Health's Office of Aids (OA) has since implemented procedures to obtain subrecipients single audit reports within the required time frame, by using a tracking and monitoring process for the OMB Circular A-133 reports. As of April 1, 2016, the OA had developed an Audit Tracking Report Log, an Excel spreadsheet that documents each subrecipients audit period, audit due dates, submission dates, and follow-up dates.

Beginning with the first visit of the FY 2015/16 monitoring cycle [August 24, 2016], managers and staff began using a new and improved monitoring log. Unlike the previous log, the new log clearly tracks each step in the monitoring process and allows management to filter and sort to quickly assess where each visit is in the process. Additionally, the Unit Chief fills out a column on the monitoring log to document the date of his review and e-mailed approval of each site visit report. The monitoring log is accessible to the Branch management team and is reviewed on a regular basis by the Unit and Section Chief.

Reference Number: **2015-008**

Federal Catalog Number: 93.767

State Administering Department: California Department of Health Care Services (Health Care Services)

Audit Finding: Activities Allowed or Unallowed; Allowable Costs/Cost Principles. We tested a sample of 40 cash draws for the Children’s Health Insurance Program (CHIP) amounting to \$1,086,034,397. Of the sample items tested, we noted that 10 cash draws included a total of \$3,685,271 in Local Education Agency (LEA) expenditures that are not allowed to be funded under CHIP.

Status of Corrective Action: Uncorrected. Internal controls exist to ensure program expenditures are properly funded from allowable federal funding sources. Business rules were implemented through the fiscal intermediary to draw down funding according to Aid Codes. A coding error associated with Aid Code 7x, One Month Bridge to Healthy Families, resulted in payments claimed under CHIP from title XIX funding. LEA Medi-Cal Billing Option Program expenditures are not allowed to be claimed under CHIP. Health Care Services conducted a root-cause analysis to identify the coding error associated with Aid Code 7x and made the necessary corrections. Health Care Services will work with the fiscal intermediary to ensure LEA claims are paying correctly; program will work with the accounting office to ensure funding for prior claims paid are adjusted accordingly. In addition, Health Care Services will review claiming regularly to protect against errant billing in the future.

Reference Number: **2015-009**

Federal Catalog Number: 93.778

State Administering Department: California Department of Health Care Services (Health Care Services)

Audit Finding: Eligibility. Based on our review of 140 participants across multiple counties, we found five instances for which at least one type of required eligibility information was not obtained or evidenced in the Statewide Automated Welfare System (SAWS). As a result, we could not conclude

that the five participants were eligible to receive \$1,068 in benefits for fiscal year 2014-15.

Status of Corrective Action: Partially Corrected. Health Care Services will issue county guidance to reiterate the need for counties to: perform timely renewals and maintain appropriate verification documents in the State Automated Welfare System, to ensure when verification of a social security number fails, and the county knows that further action to resolve the failed verification must be performed.

Reference Number: **2015-010**

Federal Catalog Number: 93.959

State Administering Department: California Department of Health Care Services (Health Care Services)

Audit Finding: Subrecipient Monitoring. All federal awards made on or after December 26, 2014 are subject to the new *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). The effective date of the Uniform Guidance for subawards is the same as the effective date of the federal award from which the subaward is made. Based on discussions with management, Health Care Services was unaware of the new requirements under the Uniform Guidance and did not evaluate the subrecipient's risk of noncompliance to determine the appropriate subrecipient monitoring.

Status of Corrective Action: Fully Corrected. Below are the activities undertaken to meet the subrecipient pre-award risk assessment requirements:

1. Convened a workgroup that developed appropriate criteria for a risk assessment tool to evaluate each first-tier subrecipient's risk of noncompliance with Federal statutes, regulations, and the terms and conditions of the subaward for purposes of determining the appropriate subrecipient monitoring described in the Uniform Guidance.
2. Amended the State/County contract with new language on how to comply with the subrecipient pre-award risk assessment under the Uniform Guidance.
3. Issued a Mental Health Substance Use Disorder (SUD) Services Information Notice on July 15, 2016, that provides guidance to counties and stakeholders on following the requirements for the subrecipient pre-award risk assessment process.

4. Revised county desk audit and site visit instruments to include a subrecipient pre-award risk assessment compliance review. Each county will be evaluated annually as a "low," "medium," or "high" risk based on a review of prior year SUD county monitoring reports, Office of Management and Budget A-133 audits, Health Care Services fiscal audits, and other pertinent information.
5. Revised annual fiscal audit plan to incorporate the subrecipient pre-award risk assessment evaluation into the selection criteria of counties to be audited. Health Care Services submitted a corrective action plan to the Substance Abuse and Mental Health Services Administration (SAMHSA) on July 22, 2016, in order to resolve this audit finding. As of March 8, 2017, SAMHSA has not responded with an audit resolution letter.

Department of Finance Response Letter

EDMUND G. BROWN JR. ■ GOVERNOR
STATE CAPITOL ■ ROOM 1145 ■ SACRAMENTO CA ■ 95814-4998 ■ WWW.DOF.CA.GOV

March 24, 2017

Macias Gini & O'Connell^{LLP}
3000 S Street, Suite 300
Sacramento, CA 95816

Ladies and Gentlemen:

Thank you for the opportunity to respond to the federal compliance audit report for the fiscal year ended June 30, 2016. This report was the result of your examination of the state's administration of federal programs and will be part of the Single Audit Report covering this period. We accept the reported findings and recommendations and recognize the compliance findings resulted in 10 unqualified opinions and 9 qualified opinions for the 19 major programs audited. We also recognize internal controls and federal award administration need improvement.

Overseeing the financial and business policies of the state continues to be an important part of the California Department of Finance's (Finance) leadership. State entities with findings and recommendations responded directly to Macias Gini & O'Connell^{LLP} (MGO). The responses and corrective action plans, compiled by MGO and provided to Finance, are attached. Finance will disseminate the Single Audit Report results to all state entities and remind them of their responsibility for implementing corrective actions.

If you have any questions concerning this letter, please contact Jennifer Whitaker, Chief, Office of State Audits and Evaluations, at (916) 322-2985.

Sincerely,

MICHAEL COHEN
Director

Enclosure

Management's Response and Corrective Action Plan

**STATE OF CALIFORNIA
MANAGEMENT'S RESPONSE AND CORRECTIVE ACTION PLAN
FOR THE FISCAL YEAR ENDED JUNE 30, 2016**

Reference No. 2016-002:

The California Department of Public Health (Public Health) Women, Infants, and Children (WIC) Division will review and modify its procedures for terminating WIC Staff user access to the WIC MIS System. The WIC Division Local Services Branch (LSB) will work with the Information Technology Services Division (ITSD) to generate a WIC MIS Logon ID Maintenance report at the conclusion of each month. This report will identify all WIC Staff who had their WIC MIS access terminated during the report period (30-31 days). Additionally, the WIC Division Planning and Workforce Services Unit (PAWS) will also notify the LSB of all separated WIC Staff at the conclusion of every month. The LSB will then cross reference the ITSD report with the separated WIC Staff list that is sent by PAWS. If a separated WIC Staff failed to have the WIC MIS access terminated after their separation date, LSB will follow the procedure outlined in the WIC MIS policy to ensure that user's access is terminated completely.

Estimated Implementation Date: June 2017

Reference No. 2016-004:

The California Department of Transportation (Caltrans) will take the following corrective action:

- Identify existing risk assessment activities that the Division of Local Assistance performs (June 2017).
- Identify gaps in our current risk assessment activities (August 2017).
- Identify steps on how we close the gaps (October 2017).

Considering:

- (1) The subrecipient's prior experience with the same or similar subawards;
 - (2) The results of previous audits including whether or not the subrecipient receives a Single Audit in accordance with Title 2, Grants and Agreements Subtitle A-Office of Management and Budget Guidance for Grants and Agreements Chapter II, Part 200, Subpart F-Audit Requirements, and the extent to which the same or similar subaward has been audited as a major program;
 - (3) Whether the subrecipient has new personnel, or new or substantially changed systems; and
 - (4) The extent and results of federal awarding agency monitoring (e.g., if the subrecipient also receives federal awards directly from a federal awarding agency).
- Develop a formal risk assessment plan (December 2017).
 - Implement plan (January 2018).

Caltrans has quarterly meetings with the Federal Highway Administration (FHWA) to discuss new and existing policies and how they are being implemented. Caltrans has bi-monthly meetings with FHWA, cities and counties to discuss new and existing policies and how best to implement these policies most efficiently. Caltrans has just recently updated their Local Assistance Procedure Manual that provides guidance on federal policy and procedures. The Procedure Manual was reviewed by FHWA prior to the release, and the manual will now be updated on an annual basis to include all changes and new federal policies that have been introduced. Prior to the annual release of the updated Procedure Manual and the rolling out of new or revised federal policies, FHWA and other stakeholders will have a chance to review and comment to ensure the guidance is accurate.

Caltrans performs an annual process review to focus on key policies and procedures that have been implemented with the release of the new Procedure Manual. The purpose is to review how well the policies and procedures have been implemented and if there needs to be any corrections made based on the process review findings.

This should ensure a timely response to federal requirements and the implementation of changes resulting from new requirements.

Reference No. 2016-011:

The California Department of Health Care Services (Health Care Services) agrees with the audit finding that its current allocation and cost reporting processes are insufficient to ensure county first-tier subrecipients are minimizing the time elapsing between receipt of quarterly advances of Block Grants for Prevention and Treatment of Substance Abuse (SABG) funds and the related expenditure, which could potentially result in an interest liability, required to be returned to the federal granting agency.

Beginning with the federal fiscal year (FFY) 2017 SABG award, Health Care Services anticipates implementing a new quarterly line-item invoicing process, whereby counties will only receive reimbursement for authorized SABG Substance Use Disorder Program, Policy and Fiscal Division services after the invoices have been reviewed to verify work performed and costs claimed are in accordance with the State/County SABG contract. This will replace the current process, whereby counties are advanced a quarterly allocation to be settled through the cost report process, at the end of a 21-month period. Once implemented, this new process will eliminate the possibility of time elapsing between receipt of SABG funds and the related expenditure and potential interest liability.

Estimated Implementation Date: March 31, 2017

Contact: Sarah Hollister, External Audit Manager
Audits & Investigations – Internal Audits
California Department of Health Care Services

Reference No. 2016-013:

Health Care Services agrees with the finding. Health Care Services is currently in the process of drafting a Medi-Cal Eligibility Division Information Letter (MEDIL) to inform counties of the outcome of the State Single Audit. The MEDIL will address the findings by providing counties with guidance that reiterates the need for completing renewals timely, and to ensure that eligibility is terminated in instances where the beneficiary does not comply with the renewal process, or is determined ineligible for other reasons (i.e. income, property, residency). In addition, Health Care Services shall begin conducting random audits of counties that specifically focus on verifying that renewals are performed timely, in compliance with federal and state regulations, and that eligibility is terminated from the Medi-cal Eligibility Data System (MEDS) when the beneficiary is found ineligible to the Medi-Cal program. Through these reviews, Health Care Services will look to identify and isolate problematic areas in policy, or counties' business operations and process workflow that may contribute to delays in completing renewals. Health Care Services will work directly with counties to address any issues found during the course of these reviews to ensure that mechanisms are implemented to circumvent findings, in turn, increasing both timeliness and accuracy of the renewal process.

In addition, Health Care Services is collecting "Medi-Cal Renewals by County" data on a monthly basis, and posting the data on its Consumer Focus Stakeholder Workgroup webpage as part of the department's transparency/accountability practice. This report is a monthly county-by-county breakdown of Medi-Cal renewals due, which reflects the timeliness of the renewals processed in each county. This public reporting of Medi-Cal Renewals data provides consumer advocates, the media, and the public the opportunity to voice any concerns pertaining to counties' timeliness of renewal processing. Health Care Services will utilize this reported data to assist in identifying counties that may be experiencing a backlog in the processing of renewals, identify specific areas in the renewal process that may be problematic, and offer program guidance where needed.

Performing random audits of counties' renewal processing, and closely monitoring the monthly Medi-Cal Renewals by County data, will aid in the department's efforts for oversight and management of the counties conducting renewals.

Health Care Services will issue the MEDIL no later than April 30, 2017. County audits focusing on the renewal process will begin no later than July 1, 2017, and will continue through at least, July 1, 2018.

Reference No. 2016-017:

The California Department of Community Services and Development's (CSD) administrative processes for the Low-Income Home Energy Assistance Program (LIHEAP) block grant were designed to ensure that local service providers had the funding needed to deliver vital services to low-income households throughout the year. Since LIHEAP is not a federally mandated program and awarding of federal monies may be delayed, CSD had previously administered contracts with local service providers on a calendar year basis, and made adjustments in future year contracts as a way to streamline state and local administrative processes. CSD ensures that LIHEAP funds are distributed in accordance with agreed upon allocation methodologies; and the funds are typically expended within two to three years, even though the federal Cash Management Improvement Act permits access to the federal funds for five federal fiscal years. CSD implemented changes to ensure compliance with the period of performance requirement and funding adjustments are completed within the allowable time frame.

CSD agrees with the Recommendation; and although the 2015 monitoring report has not been released by the U.S. Department of Health and Human Services, CSD has provided written communication to the Office of Community Services of the corrective action taken to ensure compliance with the period of performance.

Reference No. 2016-023:

Adoption Assistance

The Adoption Services Bureau will formalize a risk assessment process which will be shared in an All County Information Notice to be released by June 30, 2017, and included in the next version of the Adoption Assistance Program (AAP) monitoring manual. Risk assessment criteria may include items such as AAP caseload size, new systems, personnel changes, timely submission of corrective action plans, and maintenance of files, single audit report findings, program updates and date of last monitoring visit. The risk assessment will be performed and documented annually.

On-site Fiscal Monitoring

Social Services will develop a procedure guide by July 2017 to formally document the risk assessment process currently utilized for on-site fiscal monitoring reviews. Currently, factors considered when determining counties in which to conduct an on-site fiscal monitoring review include population, expenditures, the determination of a county as "high risk" in the county's Single Audit and issues identified by the Social Services Fiscal Systems and Accounting Branch or program staff (i.e., repeat findings in a desk audit, lack of responsiveness from the county, changes in county personnel or accounting systems, etc.). As Social Services believes that this meets the criteria identified in the Code of Federal Regulations section 200.331(b), the Department will continue to use these factors, and will document more systematically how counties are chosen for an on-site fiscal monitoring review each year.

Estimated Implementation Date: July 2017

Reference No. 2016-025:

Health Care Services agrees with the recommendation. Health Care Services acknowledges the need to establish policies and procedures to perform and document the required subrecipient and contractor determinations. While Health Care Services has partially complied with this requirement, it will continue to work over the next 12 months to achieve full compliance as laid out in the Uniform Guidance pertaining to subrecipient monitoring requirements.

Estimated Implementation Date: Fiscal year 2017-18

Reference No. 2016-026:

Health Care Services agrees with the recommendation. Health Care Services acknowledges the need to establish policies and procedures to evaluate each subrecipient's risk of noncompliance. While Health Care Services partially complies, it will work over the next 12 months to achieve full compliance with the Uniform Guidance requirements as they pertain to risk assessment requirements.

Estimated Implementation Date: Fiscal year 2017-18

Reference No. 2016-027:

Health Care Services agrees with the recommendation. Health Care Services will include information in the Mental Health Plan (MHP) cost report indicating that the payments are considered a subaward, and identify the regulations with which they need to comply. This information will be added effective immediately and on a go forward basis.

Estimated Implementation Date: April 2017

Reference No. 2016-029:

Public Health agrees with the finding. Public Health has a contract with the Los Angeles County Department of Public Health to conduct federal recertification surveys on behalf of Public Health for health care facilities within Los Angeles County (LAC). LAC failed to conduct the required survey in 2014.

In 2015, the Public Health's Center for Health Care Quality (the Center) renegotiated the LAC contract. To ensure compliance with contracted work, the Center has significantly increased its monitoring of LAC's work performance. Below are some of the actions the Center has undertaken:

- Developed specific workload tracking worksheets to ensure compliance with contracted work as established in the new 3-year contract.
- The Center dedicated one Field Operations Branch Chief whose primary function is to oversee LAC performance.
- Hired a former Licensing and Certification district manager as a retired annuitant to conduct ongoing oversight and monitoring of the LAC contract performance. This individual conducts onsite monitoring, statistical data analysis, and audit review of required federal and state survey workload, as well as, assessment of proper assignment of scope and severity, triaging, timeliness and completion of complaints and entity reported incident (ERI) investigations.
- Established the LAC Monitoring Unit (LACMU) and hired a Health Facility Evaluator Nurse (HFEN) supervisor with two HFEN nurse surveyors to conduct concurrent onsite quality review of the federal recertification survey process through a defined State Observation Survey Analysis (SOSA) process. [A SOSA survey is where one of our trained HFENs observes an entire recertification survey to ensure proper survey protocols are used. The SOSA surveyor relays observations to LAC supervisors on areas needing improvement.]

- The Center conducts bi-monthly calls with individual LAC program managers to discuss work performance and enforcement actions.
- The Center conducts bi-monthly calls with the Health Facilities Inspection Division (HFID) branch chief, assistant branch chief and program managers to discuss ongoing operational issues and monitoring activities.

As needed, the Center has and will continue to move resources from one district office to assist another in meeting mandatory survey workload – including using state staff to assist LAC if warranted. Surveyor applicants are informed during the hiring process that statewide travel may be required.

In 2015, the Center revised the estimate process it uses to determine the number of surveyors needed to meet mandatory workload. The estimate takes into consideration the number of facilities, the frequency of activities to be completed and standard average hours for each activity to derive how many surveyors are needed. Based on these revisions, the Legislature approved an additional 144 surveyor positions for the Center, as well as approved an augmentation to the LAC contract that supported an additional 22 surveyor positions for LAC.

Each year the Center re-evaluates its workload and the positions needed to meet required activities. As the Center determines a need for additional positions, it will use the established Budget Change Process to seek Administration and Legislative approval.

Implementation Date: July 1, 2015

Reference No. 2016-030:

Health Care Services agrees with the finding and recommendation.

Health Care Services intends to collaborate with Conduent as to the best way to manage the remediation of these findings. Remediation tasks may be managed via a corrective action plan (CAP), Plan of Action and Milestones (POAM) or other mechanism suitable to meet control objectives. Health Care Services plans to execute formal correspondence (FI Letter) by March 2017 and request Conduent to respond within ten (10) business days addressing the following:

1. Plan of action tasks to remediate above control objectives
2. Timeline-based schedule
3. Success criteria defined
4. Owner and point of contact

If Conduent's response is acceptable, Health Care Services will provide oversight and monitor remediation tasks to completion. An unacceptable response will result in further collaboration efforts between Health Care Services and Conduent. Noncompliance may be subject to withholds of the Monthly Security Invoice.

Estimated Implementation Date: March 2017
