Common Revenues, Transfers, and Loans BR Titles

Revenue, transfer, and loan (RTL) BRs are used to report such information in Hyperion. Departments are required to report RTL data for the General Fund and all special funds that they report in their accounting records. RTL data for bond funds, federal funds, and other non-government cost funds are entered into Hyperion as needed for certain departments and/or programs.

Revenue transfers and loans/loan repayments must have appropriate transfer authority. Specific BR Titles must be created for these types of issues as shown in the examples below. There is a 255 character limit (including spaces) for the BR Titles, so very long BR Titles may require some abbreviations. Using these common RTL BR Titles in Hyperion helps the Administration provide a consistent title across all department budget galleys published by the Department of Finance at Governor's Budget and Budget Enactment. Consistent BR Titles also facilitate the audience's understanding of what the adjustment is and represents from year to year.
