

Natural Resources Agency programs protect and restore California's diverse, abundant natural and cultural resources for current and future generations, including 278 state park units, stunning coastlines and lakes, spectacular forests, vast fish and wildlife habitats, rich farmlands and mineral resources. Agency programs also protect the public through suppression of wildfires, construction of levees in the Central Valley, and permitting environmentally safe energy power plants. These programs not only contribute to the state's unique quality of life, but also are critical to sustaining a vibrant economy.

3110 Special Resources Programs

The Special Resources Programs include the Tahoe Regional Planning Agency, the Yosemite Foundation Program, and the Sea Grant Program.

PROGRAM DESCRIPTIONS

10 - TAHOE REGIONAL PLANNING AGENCY

A congressionally approved compact between California and Nevada established the Tahoe Regional Planning Agency. The Agency coordinates planning and regulations that preserve and enhance the environment and resources of the Lake Tahoe Basin. Funding for the Agency is shared between Nevada (one-third) and California (two-thirds).

20 - YOSEMITE FOUNDATION PROGRAM

This program receives revenue from the sale of personalized motor vehicle license plates by the Department of Motor Vehicles. The funds are allocated by the State Controller for restoration and preservation projects in Yosemite National Park.

30 - SEA GRANT PROGRAM

The Sea Grant Program encourages research and education in the fields of marine resources and technology. This program provides funding to the University of California and University of Southern California to match federal funds for selected projects under the federal Sea Grant Program.

3125 California Tahoe Conservancy

The California Tahoe Conservancy's mission is to protect and sustain the unique natural resources and recreational opportunities in the Lake Tahoe Basin. The Conservancy achieves its mission by developing and implementing programs that acquire environmentally sensitive land, provide grants or directly fund soil erosion prevention and watershed restoration, improve stream environments and wildlife habitats, and improve water quality. The Conservancy also balances these activities with programs to improve public access and recreational opportunities in an environmentally sound manner by acquiring lakefront property, constructing pedestrian and bike paths, and building public access facilities.

The Conservancy is also a key implementing agency of the Environmental Improvement Program (EIP) which is a 1997 agreement between California, Nevada, the Tahoe Regional Planning Agency, the federal government, local governments, and various private entities to commit \$908 million over 10 years to a list of acquisition and capital improvement projects needed to achieve environmental goals in the Basin. The EIP is updated periodically to include more refined estimates of projects, modifications in the scope of identified projects, and inclusion of new projects. The 2008-2018 EIP was finalized in July 2009. California has yet to officially adopt the 2008-2018 EIP.

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the Tahoe Conservancy's Capital Outlay Program, see "Infrastructure Overview."

PROGRAM DESCRIPTIONS

10 - TAHOE CONSERVANCY

The California Tahoe Conservancy performs day-to-day management and maintenance of the lands it has acquired, as well as the completion of corrective and restorative actions needed to fully achieve the purposes of the acquisitions. It is envisioned that the Conservancy ultimately will acquire up to 6,000 environmentally sensitive parcels under existing criteria. To date nearly 4,900 parcels, totaling nearly 6,500 acres, have been acquired. These parcels are being managed to maintain and/or restore their natural functions, provide for public safety, and provide for open spaces.

The Conservancy has also acquired additional parcels where more extensive site improvements or more active ultimate uses are envisioned. For example, the management objectives for the public access and recreation lands are to allow: for suitable and appropriate interim uses during the site improvement planning and implementation process, design and construct public access facilities, and arrange for long-term management.

In addition, high rates of tree mortality (25 percent-40 percent) throughout the Basin have required special emphasis on forest resource management activities to reduce fuel hazards, remove hazardous conditions, start corrective actions to manage forest health through a variety of means, and limit public liability. Activities include the removal of diseased, dead and dying trees to promote forest health while reducing the risk of fire that would destroy property and habitat, threaten lives, and diminish the water quality and other resource values of Lake Tahoe.

The program also provides grants to local governments to improve the Lake's water quality by controlling soil erosion caused by existing development, primarily along roadways, and to treat sediment-laden runoff. These projects involve acquisitions and site improvements such as the revegetation of barren slopes, and building roadside and storm drainage facilities and sediment basins.

50 - ACQUISITION AND SITE IMPROVEMENT PROJECTS

This program acquires environmentally sensitive lands and provides public access and recreation by enhancing existing facilities and establishing new public access sites along the Lake and in natural areas. The program also preserves a wide variety of habitats supporting endangered, threatened or rare animal and plant species, and restores streams and watersheds such as marshes, meadows and riparian areas to mitigate development damage and enhance water quality.

INFRASTRUCTURE OVERVIEW

The Conservancy manages programs to help protect Lake Tahoe's water quality and conserve wildlife habitat, watershed areas, and public access on the California side of the Lake Tahoe Basin. The Conservancy is a primary implementer of the State of California's responsibilities under the Environmental Improvement Program (EIP) for the Lake Tahoe Basin - a 1997 agreement between California, Nevada, the Tahoe Regional Planning Agency, the federal government, local governments, and various private entities. The EIP is updated periodically to include more refined estimates of projects, modifications in the scope of identified projects, and inclusion of new projects. The 2008-2018 EIP was finalized in July 2009. California has yet to officially adopt the 2008-2018 EIP. However, based on the 2008-2018 EIP, the Conservancy has identified its own EIP project list for new funding.

3210 Environmental Protection Program

The California Environmental Protection Program receives revenue from the sale of personalized motor vehicle license plates by the Department of Motor Vehicles. Revenues are deposited in the California Environmental License Plate Fund. Funds expended pursuant to Division 13.5 of the Public Resources Code must have one or more of the following purposes:

- The control and abatement of air pollution, including all phases of research into the sources, dynamics and effects of environmental pollutants.
- The acquisition, preservation, restoration, or any combination thereof, of natural areas or ecological reserves.
- Environmental education, including formal school programs and informal public education programs. Protection of nongame species and threatened and endangered plants and animals.
- Protection, enhancement, and restoration of fish and wildlife habitat and related water quality, including review of the potential impact of development activities and land use changes on that habitat.
- The purchase, on an opportunity basis, of real property consisting of sensitive natural areas for the state park system and for local and regional parks.
- Reduction or minimization of the effects of soil erosion and the discharge of sediment into the waters of the Lake Tahoe region, including the restoration of disturbed wetlands and stream environment zones.

^{*} Dollars in thousands, except in Salary Range.

RES 12 NATURAL RESOURCES

3210 Environmental Protection Program - Continued

The appropriations and expenditures for programs and projects funded from the California Environmental License Plate Fund are contained in the budgets of the various state boards, commissions and departments.

3340 California Conservation Corps

The California Conservation Corps (CCC) provides young women and men the opportunity to work hard responding to fires, floods and other disasters, restoring California's environment, and installing clean energy and energy conservation measures. Through their service, the members of the CCC gain life, work, and academic skills to become strong workers and citizens.

In addition to the CCC, there are also 13 certified local conservation corps located in various communities throughout the state. These local corps perform workforce development and training activities with youth.

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the CCC's Capital Outlay Program, see "Infrastructure Overview."

PROGRAM DESCRIPTIONS

10 - TRAINING AND WORK PROGRAM

This Program focuses on four areas:

- Natural Resource Work: Corpsmembers protect and enhance the state's natural resources through landscaping, park
 development, trail construction, tree-planting, fire hazard reduction, energy auditing and retrofitting, irrigation system
 installation, watershed improvement, wildlife habitat enhancement, removal of nonnative vegetation, fence construction
 and meadow restoration.
- Emergency Response: Corpsmembers are dispatched to fires, assisting with initial attack, mop-up and logistical support; floods, filling sandbags, reinforcing levees and stabilizing hillsides; earthquakes, removing hazards and staffing disaster assistance centers; oil spill clean up; snow removal; search-and-rescues; pest infestation eradication; and homeland security assistance.
- Corpsmember Education: Corpsmembers are provided opportunities to advance their academic skills while in the CCC through local adult and charter schools, and community colleges.
- Corpsmember Development and Training: The CCC stresses both work and service ethic, which includes teamwork, self-discipline, leadership, and giving back to California. Corpsmembers learn conservation principles and career planning. The CCC also offers training in trail building, first aid, and firefighting certification, which can lead to internship opportunities with various employers in California.

INFRASTRUCTURE OVERVIEW

The California Conservation Corps (CCC) operates 25 facilities statewide, including 7 residential facilities and 18 non-residential satellite centers in urban and rural areas. These facilities help the CCC achieve its mission of providing employment, training, and educational opportunities to young men and women, and assisting federal, state and local agencies, and nonprofit entities with the conservation of California's natural resources.

3360 Energy Resources Conservation and Development Commission

The Energy Resources Conservation and Development Commission (Energy Commission) is responsible for ensuring a reliable supply of energy to meet state needs while protecting public health, safety, and the environment. Activities include: permitting energy facilities, designating transmission line corridors, assessing current and future energy demands and resources, developing energy efficiency standards and implementing programs to reduce wasteful and inefficient use of energy, stimulating development of alternative sources of energy such as wind, solar, biomass, and non-petroleum transportation fuels; analyzing transportation fuel supplies, prices, and trends and, maintaining capacity to respond to energy emergencies.

PROGRAM DESCRIPTIONS

10 - REGULATORY AND PLANNING PROGRAM

The Regulatory and Planning program facilitates markets in providing adequate statewide energy supplies. The program develops long-range projections for future energy supplies and demand, maintains current information on statewide electrical generation, transmission, natural gas, and fuels markets. Additionally, this program certifies power plant sites and designates transmission line corridors, monitors new energy facilities and fuel infrastructure for compliance and for supply and distribution adequacy consistent with state energy policies. Further, the program develops state energy policy based on the economic, financial, security, safety, and environmental implications of supply, demand, and price assessments, and monitors energy markets to ensure competitive prices and to prevent potential market abuses.

10.10 - Power Plant Site Certification and Transmission Line Corridor Designation Program

The Power Plant Site Certification and Transmission Line Corridor Designation program is responsible for: reviewing power plant siting applications; ensuring power plant developers comply with conditions of certification and all applicable laws and regulations during the construction and operation of power plants; reviewing applications for designation as transmission line corridors; evaluating constraints and opportunities for energy resource development; and analyzing reliability, efficiency, and environmental performance issues related to power plants and the state electricity transmission grid.

10.20 - Electricity Resource Planning

The Electricity Resource Planning program is responsible for evaluating current and future electricity supply market trends and infrastructure needs; assessing the adequacy of electricity supplies; and analyzing regulations and environmental issues related to electricity. Additionally this program addresses transmission line planning and permitting barriers and provides information and recommendations to state agencies, electricity market participants, and the public. The natural gas program component is responsible for evaluating current and future natural gas market trends and infrastructure needs, assessing the adequacy of natural gas supplies, analyzing regulations and environmental issues related to natural gas, and leading interagency work groups to monitor short-term natural gas market trends.

20 - ENERGY RESOURCES CONSERVATION PROGRAM

The Energy Resources Conservation program objectives include working to reduce overall energy use and decreasing peak electricity demand by identifying energy efficiency opportunities and developing and implementing programs and standards for efficiently using energy in all sectors.

20.10 - Buildings Program

^{*} Dollars in thousands, except in Salary Range.

3360 Energy Resources Conservation and Development Commission - Continued

The Building program objectives include working to reduce consumer and business energy bills and peak demands by developing and implementing strategies and minimum efficiency standards for new and existing residential and nonresidential buildings, appliances, and equipment. The Building program provides technical assistance on building standards and enforcement support to the building industry and building departments. Further, the program maintains a database of energy efficiency appliances and equipment and enforces compliance with the appliance efficiency standards.

20.30 - Energy Projects Evaluation and Assistance Program

This program is responsible for providing technical assistance, grants, and loans to improve energy efficiency and reduce operating costs of schools, hospitals, local governments, water and water treatment facilities, agricultural facilities, industry and multi-family housing.

20.40 - Demand Side Program Evaluation

The Demand Side Program Evaluation is responsible for collecting and analyzing electricity and natural gas consumption data used to prepare energy demand forecasts, forecasting peak and total energy consumption by sector, and estimating the amount of energy conserved by existing and proposed program activities.

30 - DEVELOPMENT PROGRAM

The Development Program conducts research, development, demonstration, commercialization, and deployment activities on energy efficiency, renewable and advanced energy technologies, and alternative and renewable fuel and advanced vehicle technologies to ensure future energy supplies are cost effective, secure and reliable, enhance environmental quality, and promote state and local economic development. The program provides technical assistance, financial assistance, direct technology research and demonstration, technology forecasting, technology analysis and evaluation, and information transfer. The program also helps energy technology companies export technologies, products, and services to international markets and helps California companies develop international energy projects.

30.20 - Transportation Technology and Fuels

The Transportation Technology and Fuels program provides analyses and recommendations to guide state energy policy and legislation to achieve climate change objectives, reduce petroleum consumption, and promote economic development. The program provides financial incentives for using alternative and renewable fuels and advanced vehicles, alternative fuel infrastructure, and workforce training. The program monitors, analyzes, and reports on transportation fuel supply and production, fuel infrastructure issues, transportation fuel demand trends, and responds to energy and fuel shortages and emergencies. The program assists local and regional agencies reduce energy-related greenhouse gas emissions through land use planning and community design, provides support to border energy commitments, and facilitates international trade missions and delegation visits.

30.30 - Research and Development

The Research and Development program supports energy research and development projects not adequately addressed by competitive and regulated markets. The program goal is to develop, and help bring to market, energy technologies providing increased environmental benefits, greater system reliability, and lower energy costs, and provide benefits to Californians through investing in research and development of advanced electricity generation and transportation technologies, energy efficiency, and technologies to reduce or eliminate consumption of water and other finite resources, increase use of renewable energy resources, or improve energy transmission or distribution.

30.40 - Technology Evaluation

The Technology Evaluation program fosters growth of the renewable energy market by providing production-based incentives and rebates to purchasers of renewable products, tracking and verifying renewable energy transactions, and educating the public about renewable energy.

99 - LOAN REPAYMENT PROGRAM

The Loan Repayment program consists of Conservation and Development programs loan repayments deposited into the following accounts: State Energy Conservation Assistance Account; Local Jurisdiction Energy Assistance Account; Energy Technologies Research, Development and Demonstration Account; and Local Government Geothermal Resources Revolving Subaccount.

3370 Renewable Resources Investment Program

The Renewable Resources Investment Program receives 30 percent of the royalties deposited in the Geothermal Resources Development Account. The state receives these monies from the federal government for geothermal leases. Funds from the Bosco-Keene Renewable Resources Investment Fund may be expended only for the following: fish habitat improvements; forest resource improvements; urban forestry projects; agricultural soil drainage and soil erosion programs; agricultural, industrial and urban water conservation; wildland fire protection; and coastal resource enhancement projects. Specific project and program expenditures for the Renewable Resources Investment Program are included in the budgets of various departments.

3460 Colorado River Board of California

The Colorado River Board protects California's rights and interests in the water and power resources of the Colorado River system. The Board works with: Colorado River Basin states (Arizona, California, Colorado, Nevada, New Mexico, Utah, and Wyoming), federal agencies, other state agencies, six local agencies (Palo Verde Irrigation District, Imperial Irrigation District, Coachella Valley Water District, Metropolitan Water District of Southern California, San Diego County Water Authority, Los Angeles Department of Water and Power), Congress, and the courts. Activities include analyses of engineering, legal and economic matters concerning the Colorado River resources of the seven basin states and the 1944 United States-Mexico Water Treaty obligation to deliver Colorado River water to Mexico.

PROGRAM DESCRIPTIONS

10 - GEOLOGIC HAZARDS AND MINERAL RESOURCES CONSERVATION

This program evaluates, assesses and maps the State's geologic and seismologic hazards, such as earthquakes, landslides, tsunami and volcanic eruption threats, and hazardous minerals exposures, in order to protect the public health and safety and the natural environment; analyzes the State's mineral assets and maps its mineral resources. Information is used by Federal, State, and local government agencies, industries and individual businesses, and the public to make informed decisions about land use, seismic safety, and mineral development.

20 - OIL, GAS, AND GEOTHERMAL RESOURCES

This program regulates the drilling, operation, and abandonment of oil, natural gas, and geothermal wells to protect the environment, prevent pollution, and ensure public safety. The state is fully reimbursed for program expenditures by annual assessments and fees on the respective industries. Approximately 500 companies operate over 88,000 wells in California for the production of oil, natural gas, and geothermal resources.

30 - LAND RESOURCE PROTECTION

This program protects agricultural farmland and open space through various financial incentives. Under the Williamson Act, landowners who agree to keep their property undeveloped for at least ten years receive lower property tax assessments. The California Farmland Conservancy Program provides grants to local governments and nonprofit land trusts for the acquisition of agricultural conservation easements that permanently remove development rights, and therefore development pressure, from agricultural lands. The Farmland Mapping Program of the Land Resource Protection program develops maps, statistics, and reports relating to farmland conversion, farmland inventory and land protection to assist in local land use decisions.

50 - BEVERAGE CONTAINER RECYCLING AND LITTER REDUCTION

This program has been transferred to the Department of Resources Recycling and Reuse pursuant to Chapter 21, Statutes 2009.

60 - MINE RECLAMATION

This program regulates active surface mining operations and monitors local lead agencies to ensure compliance with the Surface Mining and Reclamation Act of 1975. It assists cities, counties, state agencies, and mine operators in their efforts to reclaim mined lands to beneficial uses. This program also compiles an inventory of the state's estimated 47,000 abandoned mines and remediates abandoned mine hazards to protect public safety.

3500 Department of Resources Recycling and Recovery

The Department of Resources Recycling and Recovery protects public health and safety and the environment through the regulation of solid waste facilities, including landfills, and promotes recycling of a variety of materials, including beverage containers, electronic waste, waste tires, used oil, and other materials. The Department also promotes the following waste diversion practices: (1) source reduction, (2) recycling and composting, and (3) reuse. Additional departmental activities include research, permitting, inspection, enforcement, public awareness, market development to promote recycling industries, and technical assistance to local agencies.

^{*} Dollars in thousands, except in Salary Range.

PROGRAM DESCRIPTIONS

11 - WASTE REDUCTION AND MANAGEMENT

The objectives of the Waste Reduction and Management Program include:

- Ensuring all nonhazardous solid waste is stored, collected, processed, and disposed in a safe and environmentally sound manner.
- Participating in development and maintenance of local solid waste management plans describing how each city and county will reduce solid waste disposed to achieve at minimum a 50 percent diversion of waste from landfills.
- Cleaning up solid waste disposal sites when the responsible party either cannot be identified or is unable or unwilling to
 pay for timely remediation, and where cleanup is needed to protect public health and safety, or the environment.
- Réducing thé amount of waste generated and promoting composting, recycling, and use of recycled materials in manufacturing processes.
- Reducing the number of tires placed in landfills, illegally dumped, or stockpiled while promoting technologies turning waste tires into useful products.
- Reducing the amount of improperly disposed used oil and promoting used oil recycling.
- Reducing electronic waste by providing safe and convenient collection and recycling of specified electronic equipment.

50 - BEVERAGE CONTAINER RECYCLING AND LITTER REDUCTION

The Beverage Container Recycling and Litter Reduction program administers the California Beverage Container Recycling and Litter Reduction Act with a goal of achieving an 80 percent recycling rate for glass, aluminum, and plastic beverage containers sold in California. To achieve this goal, the Division of Recycling ensures: (1) the California Redemption Value (CRV) is paid by beverage distributors for each beverage sold in California; (2) consumers are refunded CRV for recycled beverage containers; (3) recycling centers are conveniently located; (4) grants are made to encourage recycling and development of markets for recycled materials; (5) strong oversight and enforcement programs are in place to protect the integrity of the Beverage Container Recycling Fund; and (6) public outreach and private partnerships are promoted.

3540 Department of Forestry and Fire Protection

The California Department of Forestry and Fire Protection (CAL FIRE) serves and safeguards the people and protects the property and resources of California.

CAL FIRE provides all hazard emergency - fire, medical, rescue and disaster - response to the public and provides leadership in the protection of life, property and natural resources.

CAL FIRE safeguards the public through: engineering; research, development and adoption of regulations; fire and life safety programs; fire prevention, law enforcement, and public information & education; resource protection; and emergency response.

CAL FIRE limits the damage caused by fires, disasters, environmental degradation, and related emergencies by employing diverse yet complementary efforts including: training California's fire service professionals; public education and prevention awareness; responsible stewardship of our natural resources; and natural resource and emergency management.

CAL FIRE's highly trained professionals and leaders cultivate mutually beneficial and cost-effective relationships with all levels of government and the private sector to enhance the efficiency and effectiveness of public safety programs and mitigate emergencies in the urban, rural, and wild land areas of California.

CAL FIRE promotes a culture of innovation, accountability, integrity, diversity, planning, workplace safety, and teamwork to foster an efficient and effective organizational environment.

^{*} Dollars in thousands, except in Salary Range.

3540 Department of Forestry and Fire Protection - Continued

Since Department programs drive the need for infrastructure investment, each Department has a related capital outlay program to support this need. For the specifics on CAL FIRE's Capital Outlay Program, see "Infrastructure Overview."

MAJOR PROGRAM CHANGES

• Eliminate Funding for CAL FIRE's 4th Firefighter-The Budget includes a reduction of \$3.6 million General Fund in 2010-11, and \$30.7 million General Fund in 2011-12 as a result of restoring CAL FIRE's staffing levels to three firefighters per engine. Beginning in 2003, CAL FIRE increased staffing levels from three to four firefighters per engine during peak fire season in the summer and early fall. However, these additional staffing levels have not improved CAL FIRE's initial attack effectiveness at containing wildfires to less than ten acres. Therefore, four person staffing levels are not cost-effective. This proposal will restore CAL FIRE firefighter staffing back to its historic levels.

PROGRAM DESCRIPTIONS

10 - STATE FIRE MARSHAL

The State Fire Marshal is responsible for the statewide protection of life and property through the development and application of fire protection engineering, education and enforcement. Activities include the following:

Code Development and Analysis: Objectives include the development and adoption of codes relating to fire/life safety
used statewide by local fire and building authorities. The program also operates the California All-Incident Reporting
System (CAIRS), which collects and analyzes incident response data provided by local fire departments.

• Fire and Life Safety: Objectives include the application of laws and regulations related to fire prevention and life safety. This is achieved through code compliance inspections of new and existing buildings and plan review of State-Owned and

^{*} Dollars in thousands, except in Salary Range.

3540 Department of Forestry and Fire Protection - Continued

State-Occupied projects as mandated by Health and Safety Code Sections 13108, 13143, 13145 and 13146, and includes local jails, high rise and areas not covered by a local fire department. The program also assists local fire and building authorities in the interpretation and enforcement of fire/life safety regulations within their respective jurisdictions

- Fire Engineering: This program uses a multi-pronged approach toward reducing or eliminating fire risks/hazards and changing the fire environment. Consumer services and product evaluations are conducted on portable fire extinguishers, fire sprinkler/extinguishing systems, dangerous and consumer fireworks, flame retardant fabrics/chemicals, vapor recovery devices and building materials listing services. Other activities include coordination of hazardous materials and California Unified Program Account services to local fire officials as well as a liaison role for fire/life safety standards between the fire service and the film/entertainment industry.
- Pipeline Safety: This program regulates approximately 5,800 miles of hazardous liquid pipelines that transport crude oil
 and refined products (e.g., gasoline, diesel, jet fuel, etc.) between offshore platforms, production fields, refineries and
 marine terminals. Regulated pipelines do not include those within production fields, marine terminals or refineries. The
 program has been designated as a federal agent for the inspection of pipeline safety standards for interstate pipelines
 since 1987.
- State Fire Training: The program provides a comprehensive training and certification service to local fire agencies.
 Activities include the California Fire Service Training and Education System and Fire Service Training and Education Program.

11 - FIRE PROTECTION

CAL FIRE provides fire protection to keep damages to life, property and natural resources within social, political and economic constraints. The objective is to quickly and aggressively attack all fires in areas where CAL FIRE has assumed primary direct protection responsibility by virtue of law, contract or agreement until the fire is under control. The level of initial attack and follow-up action is relative to values threatened and control difficulty with the goal to control all unwanted fires within the first burning period.

11.10 - Fire Prevention:

This program focuses on the most effective methods, materials and procedures to remove or mitigate physical risks and hazards and to enforce pertinent laws for the reduction of fire incidents. More specifically, efforts focus on what needs to be done before a wildland fire starts in order to reduce the costs of fire fighting, property loss, injury to fire fighters and damage to the environment.

11.30 - Fire Control:

The objective of this program is to detect, respond and suppress wildland fires in or threatening State Responsibility Areas. The heart of the effort is an aggressive initial attack strategy. CAL FIRE's goal is to contain 95 percent of all wildfires to 10 acres or less. This is achieved through detection, ground attack, air attack and mutual aid using fire engines, fire crews, bulldozers, helicopters and fixed wing aircraft.

11.40 - Cooperative Fire Protection:

CAL FIRE provides a full range of fire protection to local, county, state and federal agencies throughout California through the administration of 146 cooperative agreements in 35 of the state's 58 counties, 25 cities, 31 fire districts and 34 other special districts and service areas. Additionally, there are agreements with six counties that provide wildland fire protection on behalf of the Department.

11.60 - Conservation Camps:

CAL FIRE, in cooperation with the Department of Corrections and Rehabilitation, Divisions of Adult Operations and Juvenile Justice, operates 39 conservation camps throughout the state which house 196 fire crews. These crews provide one of the primary labor forces for firefighting, emergency response, and conservation related work projects.

11.80 - Emergency Fire Suppression:

CAL FIRE incurs additional emergency fire suppression expenditures when budgeted initial attack forces are unable to cope with a wildland fire within the initial attack period, when extreme fire conditions exist, and when mutual aid requests from other government authorities are fulfilled.

12 - RESOURCE MANAGEMENT

California's state and private forest, range, watershed lands and urban forests provide multiple human, climate and environmental benefits. The objective of this program is to maintain and enhance those benefits and to minimize damage to these resources from natural catastrophes and human development. Objectives are met by regulation of timber harvesting, coordination of climate related activities for the forest sector, technical assistance to non-industrial landowners, operation of state demonstration forests and forest nurseries, vegetation management projects, and administration of federal forestry assistance programs.

12.10 - Resources Protection and Improvement:

The objective of this program is to improve forest lands. Activities include the detection, evaluation, and control of forest pests; growing and selling tree seedlings from two nurseries for reforestation and soil erosion control; genetic tree improvement; advice and assistance to non-industrial forest landowners on management of forests and improved harvesting practices; the demonstration of sustainable forestry in state forests; implementation of the California Forest Improvement Act of 1978; and demonstration of the use of wood waste and forest growth for increased use of forest products. In the area of vegetation management, assistance is provided to public and private landowners to achieve land use objectives by reducing damage from wildland fires, increase wildlife habitat, increase productivity of forest and rangelands, improve water yields and air quality, and maintain desirable ecosystems. CAL FIRE cooperates with federal, state and local agencies, and private property owners to develop and achieve land use objectives. Activities include removal, rearrangement, conversion, or improvement of vegetation using various treatment measures such as prescribed fire and mechanical, manual, biological, and chemical methods.

^{*} Dollars in thousands, except in Salary Range.

RES 72 NATURAL RESOURCES

3540 **Department of Forestry and Fire Protection - Continued**

12.30 - Forest Practice Regulations:

The objective of this program is to maximize sustained production of high-quality timber while protecting soil, water, wildlife, recreation and other values associated with forest land. Activities include regulating timber harvesting operations on nonfederal timberlands, carrying out studies of causes and effects of soil erosion, issuing licenses to timber operators, and assisting taxing agencies in their administration of taxes on timber and timberland.

12.40 - Forest Resource Inventory and Assessment:

This program provides information to assist in the formulation and analysis of resource policies and practices regarding fire protection, watershed protection, and resource management. Activities include assessing forest and range land conditions; developing and maintaining the data and tools used in the California Fire Plan; identifying policy options for improving conditions across all wildland resources; publishing forest and range assessments; designing and conducting inventories to gather forest and range land data; developing a data storage; producing maps displaying soil and vegetation types; and providing comment on the U.S. Forest Service Resources Planning Act, National Forest Management Act and Soil Conservation Service Resource Conservation Act processes.

12.50 - Professional Foresters Registration Program:

The Office of Professional Foresters Registration is a statutorily authorized program within the State Board of Forestry and Fire Protection. The program is responsible for the licensing and regulation of all persons who practice forestry or rangeland management on non-federal, state and private lands in California pursuant to the Professional Foresters Law of 1972.

13 - BOARD OF FORESTRY AND FIRE PROTECTION

The California State Board of Forestry and Fire Protection (Board) is a Governor-appointed body within CAL FIRE. The Board is responsible for developing the general forest policy of the State, for determining the guidance policies of the CAL FIRE, and representing the state's interest in federal land in California. Together, the Board and CAL FIRE work to carry out the California Legislature's mandate to protect and enhance the state's unique forest and wildland resources. The Board's statutory responsibilities are to:

- Establish and administer forest and rangeland policy for the state;
- Protect and represent the state's interest in all forestry and rangeland matters;
 Provide direction and guidance to the Director and CAL FIRE on fire protection and resource management;
- Deliver a comprehensive regulatory program for forestry and fire protection;
- Conduct its duties to inform and respond to the people of California.

20 - ADMINISTRATION

Departmental administration provides executive leadership, policy direction, and a variety of program support services necessary for the successful completion of the Department's mission. CAL FIRE headquarters provides leadership through the executive office and through central services in accounting, budgeting, business services, legal, human resources, information technology, program accountability, and program and systems analysis. CAL FIRE field units provide localized general support services in a variety of locations throughout in the state.

INFRASTRUCTURE OVERVIEW

^{*} Dollars in thousands, except in Salary Range.

3540 Department of Forestry and Fire Protection - Continued

The Department of Forestry and Fire Protection operates over 500 facilities statewide, including 228 forest fire stations, 112 telecommunications sites, 39 conservation camps, 21 ranger unit headquarters, 16 administrative headquarters, 13 air attack bases, 9 helitack bases, 8 state forests, 2 nurseries, a training academy, and various other miscellaneous facilities. These facilities support fire protection, the Office of the State Fire Marshall, and resource management efforts for over 31 million acres of state and privately owned wildlands throughout the state.

3560 State Lands Commission

The State Lands Commission manages and protects California's sovereign public trust lands, which the state received upon admission into the Union, as well as other lands subsequently conveyed by the federal government. Sovereign lands include the beds of all navigable waterways, including non-tidal rivers, streams and lakes, and tide and submerged lands within rivers, sloughs, bays and the Pacific Ocean extending from the mean high tide line seaward to the three-mile offshore limit. Other lands acquired from the United States include swamp and overflow lands and state school lands. These lands and reserved mineral interests total more than four and one-half million acres. The three-member commission consists of the Lieutenant Governor, the State Controller, and the Director of Finance.

The commission's budget no longer contains capital outlay expenditures, as the relocation of the Huntington Beach Field Office has been put on hold. Because of site constraints and regulatory requirements, this project has become unfeasible to pursue at this time. In an effort to address the immediate deficiencies of this facility, the Commission has made several modest repairs and improvements to the current Huntington Beach Field Office to keep this facility functional until a longer-term solution can be implemented. The Commission has indicated that although the building's most pressing deficiencies have been remediated, the facility will eventually need to be replaced or relocated.

PROGRAM DESCRIPTIONS

10 - MINERAL RESOURCES MANAGEMENT

The State Lands Commission oversees efficient development of mineral resources that are located on state lands. The Commission also controls the development and operation of the Long Beach tidelands oil field. The objectives of the Mineral Resources Management Program are to manage the orderly extraction of oil, gas, geothermal resources and other minerals; maximize the revenue generated consistent with the best interests of the state, and ensure that public safety and environmental protection are maintained at the highest possible standards in the development of these resources.

20 - LAND MANAGEMENT

The State Lands Commission manages all state sovereign lands to ensure use of the lands is consistent with the public trust doctrine and prudent land use practices. The Commission issues leases and permits for the use of public lands based upon environmental, health, safety and public benefit considerations. The program also manages all state school lands to ensure the maximum return to the State Teachers' Retirement System.

30 - EXECUTIVE AND ADMINISTRATION

The Executive and Administration program provides management, policy direction and administrative support to the line programs of the Commission.

40 - MARINE FACILITIES MANAGEMENT

The State Lands Commission adopts rules, regulations, guidelines and leasing policies for marine oil terminals within California providing for the best achievable protection of the public health and safety and the environment. The Commission's Marine Facilities Management Program inspects all marine facilities and reviews and approves all marine oil terminal Operations Manuals. In addition, the Marine Facilities Management Program implements the state's Marine Invasive Species Program to prevent the introduction of non-indigenous species into California waters through ship mediated vectors. The program conducts scientific research, the development of rules and regulations and the physical inspection of oceangoing vessels.

3600 Department of Fish and Game

The mission of the Department of Fish and Game (Department) is to manage California's diverse fish, wildlife, and plant resources, and the habitats upon which they depend, for their ecological values and for their use and enjoyment by the public.

^{*} Dollars in thousands, except in Salary Range.

RES 92 NATURAL RESOURCES

3600 Department of Fish and Game - Continued

This includes habitat protection and maintenance in a sufficient amount and quality to ensure the survival of all species and natural communities. The Department is also responsible for the diversified use of fish and wildlife including recreational, commercial, scientific, and educational uses.

Since department programs drive the need for infrastructure investment, the Department has a related capital outlay program to support this need. For the specifics on the Department of Fish and Game's Capital Outlay Program, see "Infrastructure Overview."

3600 Department of Fish and Game - Continued

PROGRAM DESCRIPTIONS

20 - BIODIVERSITY CONSERVATION PROGRAM

This program encourages the preservation, conservation, maintenance, and restoration of wildlife resources, including the Ecosystem Restoration Program, under the jurisdiction and influence of the state. Activities involve the conservation, protection and management of fish, wildlife, native plants, and habitat to ensure maintenance of biologically sustainable populations of those species.

25 - HUNTING, FISHING, AND PUBLIC USE PROGRAM

This program facilitates diverse and sustainable hunting, fishing (recreational and commercial), trapping, and other public uses and associated economic benefits to the state by conserving and managing game species. Activities include collection and assessment of information on the distribution and abundance of game fish and wildlife to determine appropriate regulations (bag limits, gear restrictions, etc.) and to monitor the effects of those regulations.

30 - MANAGEMENT OF DEPARTMENT LANDS AND FACILITIES PROGRAM

This program manages Department-owned or leased lands and facilities, including hatcheries, wildlife areas, ecological reserves, fish and wildlife laboratories, and public access areas, to contribute to the conservation, protection, and management of fish and wildlife.

40 - LAW ENFORCEMENT PROGRAM

This program serves the public through law enforcement, public safety and hunter education. Law enforcement promotes compliance with laws and regulations protecting fish and wildlife resources; investigates habitat destruction, pollution incidents and illegal commercialization of wildlife. Wardens also serve the public through general law enforcement, mutual aid and homeland security.

45 - COMMUNICATIONS, EDUCATION, AND OUTREACH PROGRAM

This program serves the public through resource conservation education and use activities in the classroom and on public and private lands, community and stakeholder outreach, and the delivery of information and data using a variety of methods including publications, presentations, web applications and media relations.

50 - SPILL PREVENTION AND RESPONSE PROGRAM

This program prevents damage, minimizes environmental impacts, restores, and rehabilitates California's fish and wildlife populations and their habitats from the harmful effects of oil and other deleterious material spills in marine waters and inland habitats.

61 - FISH AND GAME COMMISSION

The California Fish and Game Commission ensures the long term sustainability of California's fish and wildlife resources by guiding the ongoing scientific evaluation and assessment of California's fish and wildlife resources; setting California's fish and wildlife resource management policies and ensuring these are implemented by the Department of Fish and Game; establishing appropriate fish and wildlife resource management rules and regulations; and building active fish and wildlife resource management partnerships with individual landowners, the public and interest groups, and federal, state and local resource management agencies.

INFRASTRUCTURE OVERVIEW

The Department of Fish and Game (DFG) manages 720 properties statewide, comprising more than 1 million acres (636,991 acres owned and 486,143 acres owned by other entities, but administered by DFG). Since several state agencies purchase land for the purpose of habitat or wildlife protection, and management responsibilities of these properties are often transferred to the DFG, the number of properties is continually increasing. The 720 properties managed by the DFG include the following: 110 wildlife areas, 130 ecological reserves (which include conservation easements), 11 marine reserves, 159 public access areas, 21 fish hatcheries, 251 lands that have not yet been designated, and 38 other types of properties.

\$1,650

\$2,370

The Wildlife Conservation Board administers a statewide capital outlay program for the acquisition, restoration and enhancement of wildlife habitat, and development of wildlife-oriented public access and recreational facilities areas.

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the Wildlife Conservation Board's Capital Outlay Program, see "Infrastructure Overview."

INFRASTRUCTURE OVERVIEW

Between the years 2000 to 2010, the Wildlife Conservation Board has helped fund and protect over 821,750 acres of wildlife habitat through a combination of fee and conservation easement acquisitions. In addition, funding has been authorized to enhance and restore approximately 242,000 acres of riparian, wetland, fisheries and other wildlife related habitat areas within the state. The Board also has helped fund and has taken action on over 112 projects involving the development of wildlife-oriented public access facilities.

3680 Department of Boating and Waterways

The Department of Boating and Waterways funds, plans, and develops boating facilities on waterways throughout California and ensures safe boating for the public by providing financial aid and training to local law enforcement agencies. In addition, the Department has responsibility for boating safety and education, licensing of yacht and ship brokers and salespeople, aquatic weed control in the Sacramento-San Joaquin Delta, and beach erosion control and sand renourishment along California's coast and operates an oceanography program at the Scripps Institution of Oceanography at La Jolla.

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the Department of Boating and Waterways' Capital Outlay Program, see "Infrastructure Overview."

PROGRAM DESCRIPTIONS

10 - BOATING FACILITIES

The Boating Facilities program provides funding through its local assistance programs to expand and improve public boater access to California's waterways. To accomplish this, the department:

- Grants funds to cities, counties and other governmental agencies for the design and construction of boat launching facilities, floating restrooms, vessel sewage pumpouts, and non-motorized boating access trails and launch facilities.
- Loans funds to cities, counties, and districts for the planning, design and construction of small craft harbors.
- Loans funds to private, for-profit businesses for the development of recreational marinas.
- Provides aquatic weed control in the Sacramento-San Joaquin Delta, its tributaries and the Suisun Marsh.
- Grants funds, on a cost-sharing basis, to local and federal agencies to finance beach erosion control measures to protect coastal resources.

The Department also has the statutory responsibility to plan, design and construct all recreational boating facilities in State Parks and on the State Water Project. The Department's capital outlay program also constructs recreational boating facilities on state-owned or state-managed property.

The Department also conducts research and studies on coastal processes through its oceanography program.

20 - BOATING OPERATIONS

The Boating Operations programs work to ensure safe and enjoyable boating on California waters. Program activities include promoting boating safety and education, providing financial assistance and training to local boating law enforcement agencies, ensuring uniformity in boating enforcement, and licensing for-hire boat operators and yacht and ship brokers and salespeople. Statistical information is gathered on boating accidents to monitor accident trends and problem areas, and the causes of accidents are analyzed and documented. The results of these findings are used to direct outreach of various Department programs. Grants are provided to local public agencies for the removal of abandoned vessels on navigable waterways.

30 - BEACH EROSION CONTROL

The Beach Erosion Control and Public Beach Restoration programs help mitigate coastal erosion by studying the causes of erosion, constructing beach enhancements, and other restoration efforts. Regional beach erosion restoration projects are constructed by the U.S. Army Corps of Engineers in cooperation with state and local agencies. Localized beach restoration is typically constructed by local agencies with state cooperation.

40 - ADMINISTRATION

The Administrative Services Division consists of accounting, budgeting, business services, information technology, and personnel. The effective provision of these services ensures the delivery of timely, reliable and accountable services to the boaters of California.

INFRASTRUCTURE OVERVIEW

The Department of Boating and Waterways, Boating Facilities Division, develops and improves boating facilities on over 140 state-owned and state-managed properties and has the statutory responsibility to plan, design and construct public recreational boating facilities in all state parks and on the State Water Project. Projects include construction of boat ramps, small marinas, non-motorized boating access and water trails, day use boat-in facilities, boating instruction and safety centers, and other projects that expand and enhance recreational boating opportunities.

3720 California Coastal Commission

The California Coastal Commission, comprised of 12 voting members appointed equally by the Governor, the Senate Rules Committee, and the Speaker of the Assembly, was created by voter initiative in 1972 and was made permanent by the California Coastal Act of 1976 (Coastal Act). The Coastal Act calls for the protection and enhancement of public access and recreation, marine resources, environmentally sensitive habitat areas, marine water quality, agriculture, and scenic resources, and makes provisions for coastal-dependent industrial and energy development. New development in the coastal zone requires a coastal permit either from local government or the Commission. Local governments are required to prepare a local coastal program (LCP) for the coastal zone portion of their jurisdiction. After an LCP has been reviewed and approved by the Commission as being consistent with the Coastal Act, the Commission's regulatory authority over most types of new development is delegated to the local government, subject to limited appeals to the Commission. The Commission also is designated the principal state coastal management agency for the purpose of administering the federal Coastal Zone Management Act in California and has exclusive regulatory authority over federal activities such as permits, leases, federal development projects, and other federal actions that could affect coastal zone resources and that would not otherwise be subject to state control.

PROGRAM DESCRIPTIONS

10 - COASTAL MANAGEMENT PROGRAM

The objectives of the Coastal Management Program are to implement coastal resources conservation through planning and regulation. Activities include:

- Reviewing and approval of local coastal programs (LCPs), port master plans, university long-range development plans,
- and any amendments to such plans, for consistency with the Coastal Act.

 Reviewing coastal development permit applications for new development in areas without a certified LCP, areas of permanently retained jurisdiction (e.g., tidelands, submerged lands, and public trust lands) and limited categories of local coastal development permit actions that can be appealed to the Commission.
- Monitoring and enforcement of coastal development permits.
- Reviewing federal activities for consistency with the Coastal Act.

^{*} Dollars in thousands, except in Salary Range.

3720 **California Coastal Commission - Continued**

Protecting and expanding opportunities for public coastal access and recreation.
 Implementing a coastal water quality protection program.
 Providing technical information and assistance to support effective coastal management.

Implementing a coastal and ocean resource public education program.

20 - COASTAL ENERGY PROGRAM

The Coastal Energy Program addresses coastal energy issues including, but not limited to, offshore oil and gas development, electricity generating power plant expansion and development, and siting and development of liquefied natural gas facilities.

30 - ADMINISTRATION

The objective of the Administration Program is to provide administrative support including accounting, budgeting, business services, support services, information technology, and human resources services to other departmental programs.

3760 State Coastal Conservancy

The State Coastal Conservancy develops and implements programs to protect, restore and enhance natural, recreational, and economic resources along California's coast, coastal watersheds, the ocean, and within the San Francisco Bay Area. Through direct funding and grants to local agencies and nonprofit organizations, the Coastal Conservancy supports the following projects:

- Restoration and enhancement of the natural environment and scenic lands.
- Development of public access.
- Protection of agricultural lands through purchase of development rights and fee interests.
- Resolution of land-use and development conflicts.
- Restoration of urban waterfronts to increase tourism and public access, provide parks and open space, and encourage private-sector development.
- Restoration of watersheds and ocean resources to improve water quality and improve habitat values.
- Acquisition of threatened resource lands.
- Education programs on coastal resources for kindergarten through grade 12.

Pursuant to the California Ocean Protection Act (Public Resources Code Section 35500 et seq.), the Coastal Conservancy serves as staff and fiscal agent for the California Ocean Protection Council. The mission of the California Ocean Protection Council is to ensure that California maintains healthy, resilient, and productive ocean and coastal ecosystems for the benefit of current and future generations.

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the State Coastal Conservancy's Capital Outlay Program, see "Infrastructure Overview."

PROGRAM DESCRIPTIONS

15 - COASTAL RESOURCE DEVELOPMENT PROGRAM

The Coastal Resource Development Program:

- Preserves coastal agricultural land.
- Assists in the design or redesign of subdivisions and waterfronts to encourage appropriate public/private development and use.
- Protects and provides public access ways to the coastal and bay-shore lands with high scenic, recreational or habitat value.
- Acquires important coastal resource lands for eventual conveyance to public agencies or qualified nonprofit organizations.
- Enhances the capacity and performance of government programs to meet the goals of the California Ocean Protection Act (COPA).

^{*} Dollars in thousands, except in Salary Range.

3760 State Coastal Conservancy - Continued

- Improves the understanding of ocean and coastal ecosystems.
- Promotes ocean and coastal awareness and stewardship.

25 - COASTAL RESOURCE ENHANCEMENT

The Coastal Resource Enhancement Program creates and restores fish and wildlife habitats, including enhancement of watersheds, wetlands, ocean resources, and riparian corridors. The program provides technical assistance and mediation to resolve land use conflicts in a manner that preserves, restores or establishes wildlife habitats. The program also provides funding for planning and implementing resource restoration and enhancement projects, including projects to improve ocean and coastal water quality, improve the quantity and quality of ocean and coastal habitat in California, and increase healthy ocean and coastal wildlife populations and communities in California. The program also provides funds for the design and construction of nature centers.

INFRASTRUCTURE OVERVIEW

The State Coastal Conservancy grants funds to local governments, nonprofits and other project partners for the acquisition of land and easements, and the development of public facilities, to implement the State's Coastal Management Program and the California Ocean Protection Act. Over the past six years, the Conservancy has participated in the acquisition of more than 153,000 acres of coastal lands and easement interests.

3780 Native American Heritage Commission

The California Native American Heritage Commission (NAHC) is the state's "trustee agency" for the protection and preservation of Native American cultural resources, sacred sites on public land and Native American burial sites. NAHC facilitates consultation between California tribal governments, Indian organizations and tribal elders with local, state, and federal agencies.

3790 Department of Parks and Recreation

The mission of the California Department of Parks and Recreation is to provide for the health, inspiration, and education of the people of California by helping to preserve the state's extraordinary biological diversity, protecting its most valued natural, cultural and historical resources, and creating opportunities for high-quality outdoor recreation for current and future generations to enjoy. With increased urbanization, the establishment of park units and recreation areas accessible to the major population centers of the state has become particularly important. Specific activities include stewardship of natural resources, historic, cultural and archeological sites, artifacts and structures, provision of interpretive services for park visitors, construction and maintenance of campsites, trails, visitor centers, museums, and infrastructure such as roads and water systems, and creation of recreational opportunities such as hiking, bicycling, fishing, swimming, horseback riding, jogging, camping, picnicking, and off-highway vehicle recreation.

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the Department of Parks and Recreation's Capital Outlay Program, see "Infrastructure Overview."

MAJOR PROGRAM CHANGES

Reduction to State Parks-The Budget includes a reduction of \$11 million General Fund in 2011-12 as a result of partially
or fully closing state parks. This park closure plan will minimize the impact on attendance by closing state parks with the
lowest attendance and revenue generation, and partially closing parks during weekdays and off-peak seasons. When
fully implemented, these park reductions will result in \$22 million of ongoing General Fund savings.

INFRASTRUCTURE OVERVIEW

The State Park System includes 279 units, including parks, beaches, trails, wildlife areas, open spaces, off-highway vehicle areas, and historic sites. The State Park System is responsible for almost one-third of California's scenic coastline and manages coastal wetlands, estuaries, beaches, and dune systems. The State Park System consists of approximately 1.56 million acres, including: over 315 miles of coastline, 974 miles of lake, reservoir and river frontage, approximately 15,000 campsites and alternative camping facilities, and 4,249 miles of non-motorized trails. The facilities aid the Department's mission of providing for the health, inspiration and education of the people of California by helping to preserve the state's extraordinary biological diversity, protecting its most valued natural and cultural resources, and creating opportunities for high-quality outdoor recreation.

3810 Santa Monica Mountains Conservancy

The Santa Monica Mountains Conservancy acquires, restores, and consolidates lands in the Santa Monica Mountains and Rim of the Valley Trail Corridor for park, recreation, and conservation purposes. The Conservancy may:

- Lease, rent, sell, transfer, or exchange lands for park purposes.
- Award grants or interest free loans to state and local agencies to purchase or restore park, recreation, conservation, or buffer-zone areas to ensure that the character and intensity of development on these lands is generally compatible with and does not adversely impact the environment.
- Implement programs to improve access from the inner city areas surrounding the Conservancy, thereby providing recreational opportunities for all residents.
- Manage the Rim of the Valley Trail Corridor recreational trail.

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the Santa Monica Mountains Conservancy's Capital Outlay Program, see "Infrastructure Overview."

3820 San Francisco Bay Conservation and Development Commission

The San Francisco Bay Conservation and Development Commission is a state agency with regional authority responsible for protecting the Bay and its shoreline and for developing regional strategies for addressing the impacts of sea level rise and climate change on the Bay. The Commission maintains the San Francisco Bay Plan. Based on this plan, the Commission issues or denies permits for filling, dredging, and land development projects within the Bay, along the Bay shoreline and within other "managed wetlands" adjacent to the Bay. The Commission also implements the Suisun Marsh Preservation Act of 1977. Furthermore, the Commission is responsible for managing the Bay segment of the California coastal zone under the federal Coastal Zone Management Act. Under this federal law, the Commission develops and implements the federally approved coastal management program for the Bay and exercises authority over federal activities otherwise not subject to state control. Partial funding is received from federal grants, agreements, contracts and reimbursements.

3825 San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy

Established in 1999, the San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy's mission is to acquire and manage public lands to provide open space, low-impact recreational uses, educational uses, water conservation and watershed improvement, wildlife and habitat restoration and protection, and preserve the San Gabriel Mountains and the San Gabriel and Lower Los Angeles Rivers, and their tributaries, consistent with existing and adopted river and flood control projects for the protection of life and property.

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the San Gabriel and Lower Los Angeles Rivers and Mountains Conservancy's Capital Outlay Program, see "Infrastructure Overview."

3830 San Joaquin River Conservancy

The mission of the San Joaquin River Conservancy is to acquire, preserve, manage, and promote access to lands within the flood plain on both sides of the San Joaquin River from Friant Dam to Highway 99.

Specific activities are to:

- Implement the San Joaquin River Parkway Master Plan, a 22-mile regional greenspace and wildlife corridor along both sides of the river extending from Friant Dam to Highway 99, with an interconnected trail system and recreational and educational features.
- Acquire approximately 5,900 acres from willing sellers.
- Operate and manage lands for public enjoyment consistent with the protection of natural resources.
 Protect, enhance, and restore riparian and riverine habitat and ecological diversity.
- Facilitate the development of the parkway, garner public support, and secure its future.

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the San Joaquin River Conservancy's Capital Outlay Program, see "Infrastructure Overview."

INFRASTRUCTURE OVERVIEW

The Conservancy oversees 2,541 acres within the San Joaquin River Parkway for habitat conservation and restoration, public access and recreation opportunities, and cultural asset and historical resource preservation. Additional acquisitions are being evaluated, with the goal of securing 5,900 acres (some owned by partner entities) for conservation purposes.

3835 Baldwin Hills Conservancy

The Baldwin Hills Conservancy was established in 2000 to acquire open space and manage public lands within the Baldwin Hills area and to provide recreation, restoration, and protection of wildlife habitat for the public's enjoyment and educational experience.

Specific agency responsibilities are to:

- Approve the Baldwin Hills Park Master Plan
- Prioritize and implement acquisition of additional recreational and open space land for the expansion of Kenneth Hahn State Recreation Area
- Conduct the necessary planning activities for the area
- Develop and coordinate a program of resource stewardship for optimum recreational and natural resource value based on the needs of the surrounding community

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the Baldwin Hills Conservancy's Capital Outlay Program, see 'Infrastructure Overview.'

INFRASTRUCTURE OVERVIEW

Since its inception, the Conservancy's acquisition program has resulted in a 33 percent increase in public lands for the expansion of Kenneth Hahn State Recreation Area. The Conservancy territory includes a total of 1,427 acres of open space, the largest swath of contiguous unpaved land in the entire 127 square-mile Ballona Creek Watershed of Los Angeles County. Approximately 768 acres are currently protected. The Master Plan calls for the acquisition and development of the remaining balance of privately held open space to implement the community-based vision for a two square-mile urban park and natural recreation area.

3840 Delta Protection Commission

The mission of the Delta Protection Commission (Commission) is to adaptively protect, maintain, and where possible, enhance and restore the overall quality of the Delta environment consistent with the Delta Protection Act, and the Land Use and Resource Management Plan for the Primary Zone (Regional Plan). This includes, but is not limited to, agriculture, wildlife habitat, and recreational activities. The goal of the Commission is to ensure orderly, balanced conservation and development of Delta land resources and improved flood protection.

3845 San Diego River Conservancy

The mission of the San Diego River Conservancy is to achieve the goals of the San Diego River Conservancy Act by implementing four programs: (1) land conservation, (2) recreation and education, (3) natural and cultural resources preservation and restoration, and (4) water quality and natural flood conveyance. This mission will be accomplished in part by building, with our partners, a San Diego River Park and hiking trail stretching from the headwaters of the River to the Pacific Ocean. These programs foster collaboration among governments and nonprofit organizations, and leverage grant funding to achieve an array of conservation objectives.

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the San Diego River Conservancy's Capital Outlay Program, see "Infrastructure Overview."

^{*} Dollars in thousands, except in Salary Range.

3850 Coachella Valley Mountains Conservancy

The mission of the Coachella Valley Mountains Conservancy is to acquire and hold as open space mountainous lands surrounding the Coachella Valley and natural community conservation lands within the Coachella Valley. The Conservancy also provides for the protection of wildlife and the enhancement of recreational and educational experiences on those lands.

Specific activities are to:

- Acquire lands to protect biological, scenic, cultural, and recreational resources in the Coachella Valley and surrounding
 mountains
- Provide enhanced educational, interpretive, and recreational opportunities for the public to increase their appreciation, understanding, and enjoyment of the mountains and conservation lands in the Coachella Valley.

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the Coachella Valley Mountains Conservancy's Capital Outlay Program, see "Infrastructure Overview."

INFRASTRUCTURE OVERVIEW

The Conservancy has acquired 4,659 acres within the Coachella Valley and the Santa Rosa and San Jacinto Mountains for the public's enjoyment and for use consistent with the protection of cultural, scientific, scenic, and wildlife resources. In addition, the Conservancy has made grants for the acquisition of an additional 28,170 acres by other entities. The Conservancy's five-year infrastructure plan calls for the acquisition of an additional 13,900 acres in that period.

3855 Sierra Nevada Conservancy

The Sierra Nevada Conservancy's mission is to initiate, encourage, and support efforts that improve the environmental, economic and social well-being of the Sierra Nevada Region, its communities and the citizens of California. The Conservancy achieves its mission through the awarding of grants and loans, development of projects and programs, providing technical assistance and assisting in collaborative efforts with a broad array of governmental and non governmental partners.

PROGRAM DESCRIPTIONS

10 - SIERRA NEVADA CONSERVANCY PROGRAM

Established pursuant to Chapter 726, Statutes of 2004, the Conservancy is authorized to:

- Provide increased opportunities for tourism and recreation;
- Protect, conserve, and restore the region's physical, cultural, archaeological, historical, and living resources;
 Aid in the preservation of working landscapes;
- Reduce the risk of natural disasters, such as wildfires;
 Protect and improve water and air quality;
- Assist the regional economy through the operation of the Conservancy's program;
- Undertake efforts to enhance public use and enjoyment of lands owned by the public.

In support of these programs, the Conservancy facilitates collaborative planning efforts with local and regional governments, community groups and interested parties, provides technical assistance and initiates and funds projects to identify and fill critical needs in the Sierra Nevada region.

3860 Department of Water Resources

The Department of Water Resources protects, conserves, develops, and manages California's water. The Department evaluates existing water resources, forecasts future water needs and explores future potential solutions to meet evergrowing needs for personal use, irrigation, industry, recreation, power generation, and fish and wildlife. The Department also works to prevent and minimize flood damage, ensure the safety of dams, and educate the public about the importance of water and its efficient use.

Since department programs drive the need for infrastructure investment, each department has a related capital outlay program to support this need. For the specifics on the Department of Water Resources' Capital Outlay Program, see "Infrastructure Overview."

PROGRAM DESCRIPTIONS

10 - CONTINUING FORMULATION OF THE CALIFORNIA WATER PLAN

The California Water Plan is the state's strategic plan for the efficient use, management and development of the state's water resources. The Plan is updated every five years and provides a framework for water managers, legislators, and the public to consider options and make decisions regarding California's water future. The Plan evaluates current and future water conditions, challenges and opportunities. It presents basic data and information on California's water resources including water supply evaluations and assessments of agricultural, urban, and environmental water uses to quantify the gap between water supplies and uses. The plan identifies and evaluates resource management strategies such as conservation, recycling, desalination, transfers, storage, conveyance, quality, watershed management, ecosystem restoration, and urban land use management to help meet future demands in light of uncertainties and unexpected catastrophic events.

This program also identifies ways for the state to: (1) assist local agencies and governments prepare integrated regional

^{*} Dollars in thousands, except in Salary Range.

3860 Department of Water Resources - Continued

water management plans on a watershed basis and diversify their regional water portfolios to ensure sustainable water uses, reliable water supplies, better water quality, environmental stewardship, efficient urban development, protection of agriculture, and a strong economy, (2) assist cities, counties and local agencies prepare a Water Element for their General Plans, Urban Water Management Plans and Agricultural Water Management Plans, and (3) help local agencies and governments improve coordination between water and land use planning.

20 - IMPLEMENTATION OF THE STATE WATER RESOURCES DEVELOPMENT SYSTEM

The State Water Project is a water storage and delivery system that consists of 30 dams and reservoirs, 22 pumping plants, 3 pumping-generating plants, 5 hydroelectric power plants, and over 660 miles of canals and pipelines. The Project provides water to 25 million Californians and 755,000 acres of irrigated farmland.

The Department plans, designs, constructs, operates, maintains, and manages State Water Project facilities which provide State Water Project water supply to a network of physical facilities located from Plumas County to the Mexican Border.

The Delta Habitat Conservation and Conveyance Program (DHCCP) is charged with improving the Delta ecosystem and ensuring water supply reliability in a safe, timely, and cost effective manner. This includes development of the Bay Delta Conservation Plan, project specific conservation measures, and the Environmental Impact Report and Environmental Impact Statement.

30 - PUBLIC SAFETY AND PREVENTION OF DAMAGE

This program protects life and property from damage by floods, ensures proper construction and maintenance of jurisdictional dams and levees, and provides loans for construction, improvement and rehabilitation of domestic water systems to meet state standards for drinking water. Activities include preventive floodplain management to discourage unwise development in areas subject to flooding, protection of already developed floodplains, issuance of flood warnings in cooperation with the National Weather Service, operation of flood control facilities, coordination and supervision of flood fighting activities, and annual levee and flood channel maintenance and inspection. This program also buys land, easements, and rights-of-way for federal flood control projects and supervises the design and construction of new dams and periodic inspection and reevaluation of all existing jurisdictional dams for proper operation and maintenance. Fiscal oversight and coordination activities associated with the Disaster Preparedness and Flood Prevention Bond Act of 2006 are administered under this program. The program also reviews federal dam projects in coordination with federal and other state agencies with regard to dam safety.

35 - CENTRAL VALLEY FLOOD PROTECTION BOARD

The Central Valley Flood Protection Board's mission is to control flooding along the Sacramento and San Joaquin Rivers and their tributaries in cooperation with the United States Army Corps of Engineers to provide public safety through flood protection in the Central Valley. The Board cooperates with various agencies of the federal, State and local governments in establishing, planning, constructing, operating, and maintaining flood control works. The Board also maintains the integrity of the existing flood control system and designated floodways through its regulatory authority by issuing permits for encroachments that comply with Board standards.

40 - SERVICES

This program provides technical support within the Department and expertise in the fields of water resources planning, development and management; watermaster services; chemical laboratory analysis; electronic data processing; and mapping and surveying for other agencies.

45 - CALIFORNIA ENERGY RESOURCES SCHEDULING

For a limited period of time, this program purchased electric power on behalf of the state's investor-owned utilities. Beginning January 1, 2003, the utility companies resumed responsibility for purchasing power from the spot market. The utilities, however, continue to receive power from the Department's long-term energy contracts with energy suppliers, under which the Department retains legal and financial responsibility. Additionally, the Department retains the legal and financial responsibility for administering \$8.287 billion in revenue bonds issued to repay the General Fund for money borrowed for power purchases during the energy crisis and funding of reserve accounts necessary to maintain an investment grade credit rating associated with the revenue bonds.

INFRASTRUCTURE OVERVIEW

The Department of Water Resources has two major infrastructure programs: the State Water Project and the flood control system in the Central Valley. The State Water Project is a water storage and delivery system that consists of 30 dams and reservoirs, 22 pumping plants, 3 pumping-generating plants, 5 hydroelectric power plants, and more than 660 miles of canals and pipelines. The Project provides water to 25 million Californians and 755,000 acres of irrigated farmland. The Project also provides recreational opportunities to approximately 6 million visitors annually at 15 separate reservoir-based facilities as well as public fishing access to the entire Aqueduct. Existing flood control infrastructure in the Central Valley consists of 1,595 miles of levees, 348,000 acres of channels and floodways, nearly 800,000 linear feet of bank protection, and 55 various flood control structures. In general, these facilities provide more flood protection in urbanized areas and less in agricultural areas.

3875 Sacramento-San Joaquin Delta Conservancy

The mission of the Sacramento-San Joaquin Delta Conservancy is to support efforts that advance both environmental protection and the economic well-being of Delta residents in a complementary manner. The Conservancy's activites include the following: protecting and enhancing habitat and habitat restoration; protecting and preserving Delta agriculture and working landscapes; providing increased opportunities for tourism and recreation; promoting Delta legacy communities and economic vitality in the Delta; increasing the resilience of the Delta to the effects of natural disasters such as floods and earthquakes; protecting and improving water quality; assisting the Delta regional economy through the operation of the Conservancy's program; identifying priority projects and initiatives for which funding is needed; conducting activities to protect, conserve, and restore the region's physical, agricultural, cultural, historical, and living resources; assisting local entities in the implementation of their habitat conservation plans and natural community conservation plans; facilitating protection and safe harbor agreements under the federal Endangered Species Act of 1973 and the California Endangered Species Act for adjacent land owners and local public agencies; and promoting environmental education. The Conservancy will act as a primary state agency to implement ecosystem restoration in the Delta and to support efforts that advance environmental protection and the economic well-being of the Delta residents.

3885 Delta Stewardship Council

The mission of the Delta Stewardship Council, through a seven-member board, is to achieve the state's co-equal goals of providing a more reliable water supply for California and protecting, restoring and enhancing the Sacramento-San Joaquin Delta (Delta) ecosystem. The co-equal goals are to be achieved in a manner that protects and enhances the unique cultural, recreational, natural resource, and agricultural values of the Delta as an evolving place. A legally enforceable Delta Plan will further the co-equal goals and guide state and local agency activities related to the Delta. The Council will develop and implement a strategy to appropriately engage participation by federal and state agencies with responsibilities in the Delta and develop a scientific program to manage the Delta through the Delta Science Program and the Delta Independent Science Board.

The Delta Stewardship Council is the successor to the California Bay-Delta Authority and CALFED Bay-Delta Program.
